The government has halted the elimination of state-set prices in most areas, but has allowed it to continue in areas such as coal production and transportation. Earlier price reforms had contributed to the record inflation of recent years.

SAN JOSE, COSTA RICA (JAN. 17) UPI - Rescue teams Tuesday recovered 23 bodies from the wreckage of a plane that crashed in Costa Rica's rugged mountains. There were no survivors from Costa Rica's worst air disaster in

10 years.

Red Cross, civil defense and government investigative crews worked for nearly 10 hours to recover the victims' bodies, most of which were scattered through dense alpine vegetation. Others were found pinned in the twisted steel of the aircraft.

The Spanish-made twin-engine Casa Aviocar C-212 aircraft, a bulbous twin-engine model suited to tough flying conditions, dropped from radar screens just before 8 a.m. Monday during a domestic flight from the capital's Juan Santamaria International Airport to the southern town of Palmar, crashing in the mountainous Pico Blanco area about 20 miles southwest of San Jose.

Officials said 23 people - 19 adult passengers, a 2-year-old girl and three crew members - were aboard the plane. Among the victims were nine Canadians, one American, two Swedes, a Norwegian and three Panamanians.

One of the victims was identified as David Ulland, 43, a farmer from Austin, Minn., who owned farmland in Costa Rica and spent several months a year in Central and South America.

There were six Costa Ricans, including three crew members, aboard the ill-fated plane.

The bodies were transferred to the judicial investigation morgue to undergo autopsies, as required by law.

The bodies of the Costa Rican victims were to be handed over to their families. Officials said those of foreigners would be handled through their respective embassies.

The plane was totally destroyed, with its nose section embedded in the foot of the mountain, where it destroyed trees and vegetation before coming to rest.

A Red Cross spokesman and government officials said that civil aviation and judicial officials were trying to determine what caused the crash.

The accident was the worst in the last 10 years of Costa Rican aviation.

The airplane apparently smashed full-speed into the mountainside, rather than attempting a crash landing. Officials offered no explanation for the crash but said ''downward turbulence'' and heavy gusts of winds are common to the mountain range and could have played a part.

Pico Blanco forms part of a mountain chain that divides Costa Rica's central plateaus from the southern part of the country. Some peaks rise to

more than 9,000 feet, and a pass used by aviators, known as Parrita Pass, is considered dangerous because of regular strong winds.

The plane belonged to the Sansa company, a subsidiary of Costa Rican Airlines, also known as Lacsa.

WASHINGTON (JAN. 17) UPI - The federal government should shorten its drug approval process because it takes nearly a decade for a new prescription drug to reach the public, a pharmaceutical manufacturers association said Wednesday.

The 23 new drugs approved by the Food and Drug Administration in 1989 underwent an average of 6 1/2 years of government-monitored human testing and another three years of administrative review, the trade group reported.

New approvals included five drugs for cardiovascular disease and three for cancer, the two leading causes of death in the United States.

''Given the overriding importance of new drug therapy, that review time must be shortened,'' said Gerald Mossinghoff, president of the Pharmaceutical Manufacturers Association.

Mossinghoff said 18 of the drugs approved last year in the United States already had been on commercial markets in other industrial countries where reviews took about half as long.

Mike Shaffer, an FDA spokesman, said the agency ''has been concerned about approval time for quite a number of years and is taking major steps to reduce those times.''

Six of the drugs approved in 1989 cleared administrative hurdles in 14 months or less, Shaffer said. ''That is a good sign ... we have made progress, there is no question about that,'' he said.

The Pharmaceutical Manufactuerers Association represents more than 100 drug firms.

#90017u1032 01/17/1990 ~United Press International

BEIRUT, LEBANON (JAN. 17) UPI - Military strongman Gen. Michel Aoun ordered a newspaper in Christian east Beirut closed for seven days Wednesday because it defied his orders and continued to publish news accounts referring to Elias Hrawi as president and Selim Hoss as prime minister.

Aoun, who was named acting prime minister in 1988 by outgoing President Amin Gemayel, ordered all news media Tuesday to stop publishing stories referring to Hrawi and Hoss by their titles. Hrawi's army command countered late Tuesday by ordering news media to ignore Aoun ''because he has no legal standing.''

The orders were the latest moves in a power struggle between Aoun and Hrawi, who was chosen president by the Lebanese Parliament as part of a new power-sharing agreement hammered out in Saudi Arabia in an effort to bring peace to the war-torn country.

Aoun rejected the new power-sharing arrangement and said no agreement could be reached until Syria withdrew its forces from Lebanon. He ordered the Parliament dissolved. Hrawi, whose government is supported by Syria and has gained wide international recognition, has fired Aoun but has been unable to uproot him from the presidential palace outside Beirut.

In reaction to Aoun's order, the moderate newspaper Ad Diyar published as usual Wednesday and said in a front-page editorial that it refused to accept the general's directive banning coverage of the president.

''With all respect, we will not comply,'' wrote Charles Ayyoub, the newspapers editor and publisher. ''We are defending our own weapon ... We refuse all restrictions and refuse that our offices become our prisons.''

A Lebanese radio station controlled by Aoun quoted a decree from the general Wednesday ordering the newspaper to be closed for seven days as punishment for its refusal to obey his directive.

''The Internal Security Force was instructed to carry out the decision immediately,'' the decree said. The radio station also said legal action was to be taken against ''the author of the article,'' referring to Ayyoub.

The leading independent newspaper An Nahar decided not to publish Wednesday ''due to the new circumstances'' that resulted from imposing restrictions on news coverage both in east and west Beirut, a senior editor at the paper said.

A senior editor at An Nahar said if the paper abided by either order ''it will lose the objectivity it has been struggling to preserve throughout the civil war.''

''With the new circumstances, it would be imposible for An Nahar to pursue its policy of being independent, non-partisan and a paper for all the Lebanese,'' the editor said.

An Nahar's head office is in Moslem west Beirut and many staff members

commute daily between the two parts of the divided city.

Two other east Beirut-based newspapers, Al Anwar and Al Bairak, abided by Aoun's decree and refrained from using official titles when referring to Hrawi, Moslem Prime Minister Selim Hoss, members of Hrawi's government and members of Parliament.

Meawhile, two major radio stations in Christian east Beirut remained suspended for a second day because of news broadcasts protesting Aoun's order.

Voice of Lebanon, run by the hardliners in the Phalange Party, and Voice of Free Lebanon, run by the Lebanese Forces of Samir Geagea, have been carrying extensive reports on Hrawi's activities.

Aoun insisted that Hrawi's election was invalid and illegal. He ordered the Parliament dissolved shortly before the legislature elected Hrawi's predecessor, Rene Moawad, who was killed in west Beirut in a bomb explosion 17 days after his election.

In Paris, Aoun supporters who have been occupying the Lebanese Embassy for a week said in a statement Wednesday that Lebanon has asked France to expel them by force if necessary.

However, Foreign Minister Roland Dumas said he had received no such request from the Lebanese government, which in any event would have to come from the head of Lebanon's diplomatic mission to France rather than from Beirut.

''We are not yet in a situation to know what we are doing regarding that embassy,'' Dumas said. ''We are going to treat this problem calmly.''

The statement from the demonstrators said Lebanon's ambassador to France, Fouad Turk, informed them of the request late Tuesday night.

The occupation was organized to protest an order by Hoss transferring the independent-minded from Paris to Bern, Switzerland - a far less important diplomatic post for Lebanon.

NEW YORK (JAN. 17) UPI - Latest metal market prices as quoted Wednesday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 71.00-72.00 c-lb.

Antimony, domestic, refined in alloy, $2.00 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 116.60 c-lb.

Lead, common, U.S. primary producers 40.00 c-lb.; U.S. non-primary (secondary) producers 42.00-47.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $285.00-$300.00 76-lb. flask.

Nickel, bettes delivered to customers, merchant, N.Y., $3.67-$3.87 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $135.00-138.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $503.00-$505.50; dealer-approx., $490.00-$502.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $100.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $102.00 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 317.75 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $8.87-12.96 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.35-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 68.00-68.75 c-lb.

SACRAMENTO, CA (JAN. 17) UPI - A school board is restricting student access to Sport Illustrated's 1989 swimsuit issue after concluding that it may not be in a youngster's best interests.

Trustees of San Juan Unifed School District voted 4-1 Tuesday night to place the bathing beauty issue on reserve - and behind the counter - in school libraries.

Students who want to see it must sign a formal request and parents can ask that their children not be allowed to do so, the board said.

The action was spurred by anti-pornography crusader David Woodell, who sought a stronger policy of requiring parent permission slips for any student who wanted to gaze at school-bought copies of the publication.

Woodell lodged his protest last September and a review committee was appointed.

The panel concluded that although Sports Illustrated's February 1989 special 25th Anniversary Swimsuit issue had no sports coverage, it had ''value in terms of art, photography and fashion history,'' and should not be removed from libraries. It advised, however, that the issue be placed on the reserve list since it portrayed women in a controversial manner.

Woodell, who had successfully lobbied for a county cover-up law for sexually explicit magazines and videos, told the school board Tuesday that the Sports Illustrated issue was pornographic, and ''was only created to appeal to the prurient interest.'' As soft-core pornography, he said, it degraded women and could lead to crimes against them.

Two librarians opposed the restricted access policy on grounds that students had a right to read the magazine and come to their own conclusions. They were applauded by about 15 high school students in attendance.

The board's action was largely symbolic since the district has only one copy of the swimsuit issue. The others were lost or stolen during the past school year.

#90017u1079 01/17/1990 ~United Press International

WASHINGTON (JAN. 17) UPI - The Supreme Court, noting there may be a ''natural distaste'' for its decision, ruled Wednesday that a union cannot withhold pension benefits from a union official convicted of embezzling funds.

The court, in a unanimous decision, said that pension funds of the Sheet Metal Workers could not withhold benefits from Curtis Guidry, who pleaded guilty in 1982 to embezzling more than $377,000 from the union and was sent to prison.

Guidry was business manager and financial secretary of Local 9 of the union which had 1,550 members throughout Colorado.

While in prison, Guidry sought his pension benefits that amounted to more than $1,000 a month. The pension funds argued that he had forfeited his benefits and, in turn, the union maintained the benefits should be paid to the union.

The Supreme Court, however, ruled that the Employment Retirement Income Security Act of 1974 forbids such actions.

Justice Harry Blackmun wrote that ERISA ''reflects a considered congressional policy choice, a decision to safeguard a stream of income for pensioners (and their dependents, who may be, and perhaps usually, are blameless), even if that decision prevents others from securing relief for the wrongs done them. If exceptions to this policy are to be made, if is for Congress to undertake that task.''

Blackmun concluded, ''Understandably, there may be a natural distaste for the result we reach here. The statute, however, is clear. In addition, as has been noted above, the malefactor often is not the only beneficiary of the pension.''

(JAN. 17) UPI - A twin-engine plane crash-landed on Florida's Interstate-95 in Boca Raton this morning. All three men on board walked away from the wreck with only cuts and bruises. The pilot was flying from Wilmington, Delaware, to Fort Lauderdale when his engines gave out. The plane blocked morning traffic.

Police say a man who said he wanted to return to his native Cuba because he feels politically threatened tried to hijack an America West plane going from Houston to Las Vegas last night with a phony bomb. The pilot said he had to stop to refuel in Austin, Texas. Police evacuated the plane and arrested the man.

A 70-year-old San Diego woman has died after being mauled by her grandson's pit bulls. Lilly Marjee's grandson found her still alive in his Los Angeles kitchen yesterday. She was feeding the dogs when they attacked her. The dogs are usually kept on chains in the front yard... but they'd been brought inside because of bad weather.

American Telephone and Telegraph Chairman Robert Allen says it will be several days before the problem that caused a failure of long distance service Monday is fully corrected. He says experts at Bell laboratories in Illinois, New Jersey and Ohio are working to devise a permanent solution to the problem.

300 Armenians protested in Moscow because they feel Soviet President Gorbachev is NOT doing enough to stop an ethnic war in the Republic of Azerbaijan that has killed 56 people... most of them Armenians. Two-thousand Christian Armenians have been been evacuated from the territory.

#90017u1129 01/17/1990 ~United Press International

SAN FERNANDO, PHILIPPINES (JAN. 17) UPI - Communist guerrillas plan to launch a sabotage and terrorist campaign against Americans to force Washington to withdraw U.S. military bases from the Philippines, a captured rebel document released by police Wednesday showed.

National Police troopers found the eight-page document during a raid Sunday on the house of Ruben Francisco, a provincial rebel leader who is the main suspect in the killing of a mayor in a town near the U.S.-run Clark Air Base Jan. 5.

The document, written in Filipino, listed a nine-point plan by the outlawed Communist Party of the Philippines and its military arm, the 23,000-member New People's Army, which waged war against the government for the past 20 years.

The document said actions, to be carried out between July 1989 and July 1991, would include the launching of ''sabotage operations against the Philippine armed forces and U.S. military facilities'' and the ''abduction and punishment of American imperialists.''

American servicemen found in areas by the New People's Army will be captured and killed, the document said.

''The Americans must not stay because of their continued control of Philippine economy and politics, direct intervention in local affairs, maintaining their military bases and arming the Philippine armed forces,'' it said.

At least six Americans, including Vietnam War hero Col. James ''Nick'' Rowe, have been killed by the rebels since 1987 in the vicinity of Clark and in the capital. The rebels have said the slayings were prompted by U.S. support of the government's anti-insurgency drive.

Aside from Clark, the United States also operates the sprawling Subic Bay Naval complex, a repair and logistics center for the U.S. 7th Fleet, and four smaller installations.

According to the document, the rebels also plan to implement their own agrarian reform program, intensify ''arms grabbing'' operations, liquidate ''despotic'' landlords, seize equipment of multinational corporations and prevent the further recruitment for members of a government militia force.

Also captured were documents detailing the killing of Mayor Javier Dizon of Mexico, a town near Clark. The rebels have claimed responsibility for the killing, saying Dizon was active in the setting up of a militia force in his town.

In August last year, police authorities seized another NPA docement showing a list of eight American military personnel at Clark marked for assassination. The list included a lieutenant colonel, a major, two captains, two sergeants and two airmen.

#90017u1143 01/17/1990 ~United Press International

LOS ANGELES (JAN. 17) UPI - An elderly woman died early Wednesday despite six hours of surgery that included the amputation of an arm that had been ''chewed to the bone'' during a pit bulldog attack in her grandson's kitchen.

Marjee Lilly, 70, died at the County-USC Medical Center at 2:33 a.m., hospital spokeswoman Adelaida De la Cerda said.

Lilly underwent about six hours of extensive surgery, including the amputation of her left arm, as doctors struggled to save her life following the Tuesday attack, De la Cerda said.

The woman's arms had been ''chewed to the bone'' by the dogs, De la Cerda said.

Clarence Hubbard found his grandmother on the kitchen floor in a pool of blood when he returned to his South Los Angeles home from work about 9:30 a.m. to check on her. The dogs were sitting nearby in a corner.

Police arriving at the home described a grisly scene.

''There were hunks of flesh all over the floor,'' Lt. Alan Kerstein said. ''Both arms were stripped of flesh from wrist to the shoulder.''

Lilly, who was visiting her grandson and his wife from San Diego, told paramedics she had just fed the two dogs when they attacked. She said it went on for 15 to 30 minutes.

The dogs are usually kept on chains in the front yard, but Hubbard had allowed them in the house because of bad weather.

Kerstein said criminal charges will not be brought against Hubbard, who he described as ''extremely distraught.''

Both dogs were impounded and, although they had no record of violence, Hubbard asked that they be destroyed.

Kerstein said the woman has visited her grandson several times and had gotten along with the dogs.

''According to the family, they (the dogs) were friendly to her. This was not a case of attacking a stranger,'' Kerstein said.

''What's very alarming about this is the unpredictability and quickness to violence these dogs can exhibit,'' he said. ''You really have to take pause and question the sensibility of having these kinds of dogs at home.''

Authorities speculated that the dogs were provoked when Lilly used an arm to keep them at bay while she poured dog food out of a 25-pound bag.

A series of pit bull attacks during the past few years prompted the City Council to pass a law mandating the immediate impounding of animals in such cases and their destruction if judged dangerous.

Pit bull attacks have been reported around the world. Most recently, a British schoolgirl had to undergo emergency surgery this week when she was mauled by a pit bull terrier.

The 11-year girl suffered severe injuries to her groin, arms and legs when the dog broke free from a chain and attacked her while the dog's owner was visiting her family in Mansfield, Nottinghamshire.

#90017u1148 01/17/1990 ~United Press International

WASHINGTON (JAN. 17) UPI - In another sign of his penchants for secrecy and personal diplomacy, President Bush has sent a top adviser to Manila to reaffirm support for Philippine President Corazon Aquino, the White House disclosed Wednesday.

White House press secretary Marlin Fitzwater said deputy national security adviser Robert Gates flew to Manila unannounced Tuesday night for private meetings with Aquino, Defense Minister Fidel Ramos and other officials.

The official reasons for the trip were to convey ''continued strong

commitment to democracy in the Philippines'' and review ''the Philippine security situation and the Aquino government's accelerated economic and military programs.''

''It just made sense for the president to send again a personal emissary who would relay his strong support for her government,'' Fitzwater said.

However, the mission came against a backdrop of continued concern about the stability of the Aquino government in the aftermath of an attempted coup last fall, despite her recent efforts to bring the military into line.

At the time of the coup attempt, which saw the United States intervene with limited air support for loyalist forces, some U.S. officials suggested Aquino had not done enough to attack political and economic discontent in the Philippines.

Denying the Gates trip was specifically meant to help head off yet another challenge from the military, Fitzwater said Aquino ''has been very responsive'' to those problems in making ''a number of changes'' in her government and in economic policy.

''Mr. Gates is going there to simply offer our help and see if there are any ways that we can be constructive in terms of fostering her efforts,'' he added.

One contentious issue that was not placed on the agenda, Fitzwater said, was the status of the large American military bases in the Philippines, the focus of negotiations expected to begin in March or April.

The 1947 treaty covering the six facilities, including the giant Clark Air Base and Subic Bay Naval Complex, expires in 1991. Aquino has said she is keeping her options open on a new agreement, which under the constitution requires Senate approval.

Anti-bases sentiment is strong in the Senate and Philippine officials have accused the United States of not fulfilling economic obligations tied to the base agreement negotiations.

The after-the-fact announcement, made as Gates was well on his way to Manila, underscored the way Bush has kept U.S. foreign policy on a close hold from the White House since taking office a year ago.

To the consternation of some career foreign service officers at the State Department, foreign policy for the most part has been formulated by a small circle of top officials and in many instances carried out in similar fashion.

While lacking the same potential for controversy, the Gates trip came as

Bush continues to face criticism for sending national security adviser Brent Scowcroft and Deputy Secretary of State Lawrence Eagleburger on secret missions to China in July and December, during a time official U.S. policy seemed to bar diplomatic business as usual in retaliation for the Tiananmen Square massacre.

Bush similarly excluded even some his closest advisers, including Defense Secretary Dick Cheney and CIA Director William Webster, from the secret planning of his December summit on Malta with Soviet President Mikhail Gorbachev.

WASHINGTON (JAN. 17) UPI - Fervent liberals, a favorite target of President Bush's 1988 election campaign, hit back harshly Wednesday, arguing that after a year in the White House Bush had failed in a myriad of areas and was ''not so kind, not so gentle.''

The Americans for Democratic Action, a leading liberal organization, contended in a report that the president was too weak on areas ranging from helping the middle class and poor to the environment, civil rights, the war on drugs and abortion.

''At the heart of what is wrong with the Bush administration is the empty

notion that mere words and rhetoric can equal leadership, plus the mistaken belief that the market can correct all social and economic wrongs '' said the 20-page report presented by Rep. Charles Rangel, D-N.Y., the group's president.

''A bullish stock market is not the measure of the good life for a nation embroiled with racism, industrial decline, injustice, ignorance and indifference,'' said the report, entitled: ''President George Bush - One Year Later: Not-so-kind, not-so-gentle.''

''President Bush promised a kinder, gentler nation,'' it added. ''Instead, we got during the past year more gloss-over of the real problems: education, women's and minority rights, environment, homelessness, drug addiction and reproductive rights.''

Bush, who bashed liberals constantly in his 1988 campaign, did not comment on the report.

The group used a variety of figures, some of them from before Bush became president, to make its case, arguing that the poverty level in the nation was not lessening and contending that while the administration boasts of the new jobs being created, half are low-income positions.

The study, critical of Bush on almost all fronts, runs contrary to public opinion.

Most polls have shown that Bush's overall approval rating is very high, generally in the mid-60s to low-70s. While the president has gotten lower marks from the public on specific issues such as the environment and the homeless, he has received very high marks on his handling of foreign affairs - an area that was boosted further by the recent invasion of Panama.

But even on that score Rangel was critical, contending that while the U.S. military performed well, the president virtually ignored the Constitution by conducting the action.

#90017u1163 01/17/1990 ~United Press International

WASHINGTON (JAN. 17) UPI - President Bush, applauding the commander of U.S. forces in Panama for his troops' ''outstanding job,'' pledged economic aid Wednesday to the new U.S.-backed government and said American troops will come home ''as soon as possible.''

Bush, however, was vague about the timetable for reducing the U.S. presence and offered no details on the scope or substance of the economic boost for the nation ravaged not only by last month's fighting but also by

long-running U.S. sanctions.

Standing with Gen. Maxwell Thurman, Bush commented during a picture-taking session in the Rose Garden before the start of a National Security Council meeting concerning the security situation in Panama and that nation's economic needs.

In response, Thurman told Bush that the American strike force ''did a dynamite job'' during the Dec. 20 invasion to oust strongman Manuel Noriega, and told the commander in chief, ''We appreciate your support.''

Asked when U.S. troops would come home, Bush said, ''They'll be coming down substantially. It's my objective to get the troops out. We want them out as soon as possible. We want to get them down to the level before the military action.''

Before Bush ordered the move against Noriega, about 12,000 U.S. troops were in Panama with the Southern Command, the major U.S. military force for South American action that also assigned to protect the strategic canal between the Caribbean and the Pacific.

Thurman said the current troop level is 18,900, about 8,000 ''below the maximum,'' with 4,000 or 5,000 more expected to return to their U.S. bases.

Bush said ''democracy is on the move'' in Panama, where new President Guillermo Endara took the oath of office as U.S. paratroopers moved against Noriega.

''We want to give them economic help ... offer them help to individuals out of work,'' the president said.

The total cost of U.S. economic aid was one topic ''we'll be talking about '' Bush said.

Bush came out of the Oval Office with Thurman, along with Defense Secretary Dick Cheney, Secretary of State James Baker and national security adviser Brent Scowcroft.

''This is my first chance to thank General Thurman and his troops for the outstanding job they did for our country in Panama,'' Bush told waiting reporters. ''We're grateful to our commander who served with great distinction and others as well.''

The president said he also told Thurman about his visits with the parents of some of soldiers wounded or killed in the action. Twenty-three Americans died in combat during the operation.

Responding to questions, the president said that U.S. troop withdrawals

are ''not driven'' by the upcoming Andean drug summit in Cartagena, Colombia. Peru's President Alan Garcia has refused to attend the Feb. 15 session as long as the U.S. invasion forces remain in Panama.

Garcia plans to send a representative to the talks, which will include Bush and the presidents of Colombia and Bolivia.

''I want to do what is right for Panama,'' Bush said. ''I want to do what Panama wants and obviously there are still some security considerations that General Thurman was telling Secretary Cheney and me about.''

Asked whether Vice President Dan Quayle is still scheduled to visit Panama Bush replied, ''I expect he will. I hope so.'' But the president acknowledged the vice president's itinerary ''has not been set yet.''

Some Latin American countries, angered by the U.S. military action, have not been willing to accept visits from American officials, apparently snarling plans to send Quayle on a fence-mending mission.

#90017u1164 01/17/1990 ~United Press International

BERN, SWITZERLAND (JAN. 17) UPI - Switzerland agreed Wednesday to help the United States obtain information about drug money former Panamanian leader Manuel Antonio Noriega may have deposited in secret Swiss bank accounts.

The United States on Jan. 9 specifically requested the disclosure of documents involving accounts in two Swiss banks in Zurich and Geneva, a Justice Ministry statement said.

Noriega, toppled in the Dec. 20 U.S. invasion of Panama, is accused in the United States of using Swiss banking secrecy laws to hide millions of dollars he allegedly obtained by helping drug traffickers ship cocaine from Colombia to the United States. He is in custody awaiting trial in federal court in Miami.

The Swiss government, to prevent the money from being transferred elsewhere while an investigation is under way, provisionally ordered the Noriega accounts blocked on Dec. 26.

The Justice Ministry statement said Tuesday the office of the Swiss federal prosecutor will now seek a court order that will force the banks to disclose information about deposits and withdrawals from the accounts.

Banking secrecy laws prohibit Swiss banks from making any disclosure unless ordered to do so by a court, which in turn acts only if there is hard evidence that the funds originated from criminal activity.

Even then, disclosure orders can be appealed all the way to the Swiss Supreme Court in a process that can take as long as 10 years.

Swiss bank accounts held by former Haitian dictator Jean-Claude ''Baby Doc'' Duvalier and late Philippines president Ferdinand Marcos were blocked in 1986 and disclosure rulings were handed down by several local courts.

But lawyers acting for the Duvalier and Marcos families entered appeals at the state level and intend to keep appealing to the Supreme Court.

Swiss government officials said privately that the Noriega case will be simpler, because he has been formally charged with crimes.

#90017u1167 01/17/1990 ~United Press International

WASHINGTON (JAN. 17) UPI - Neil Bush, son of President Bush, is negotiating a settlement with thrift regulators investigating the failed Silverado Banking, Savings and Loan Association, the Office of Thrift Supervision said Wednesday.

Karl Hoyle, chief spokesman for the thrift agency, said Neil Bush has met with regulators in Washington and a settlement is expected to be announced this week or later next week.

''He's been in here negotiating with our enforcement people and we expect this week or early next week to have either a consent agreement or pursue through the normal course whatever action needs to be taken,'' Hoyle said.

Silverado collapsed in 1988 and was taken over by government regulators in December of that year, four months after Bush, 34, stepped down as a director. Bush, who lives in Denver and works in the oil industry, joined the Denver thrift's board in 1985.

''At any institution that fails we look at all directors and officers to determine if there is something they did or did not do to cause the failure of the institution,'' Hoyle said.

Bush has not been accused of any wrongdoing.

Silverado has been under investigation by federal regulators who are examining an unusual volume of activity between it and Lincoln Savings and Loan Association of Irvine, Calif.

Lincoln was seized by regulators in April and has been the focus of a highly charged congressional hearing into its operations and the

intervention of five U.S. senators on behalf of its chairman, Charles Keating.

On Tuesday, Bush's mother, Barbara Bush, said her son ''hasn't done anything wrong'' and is cooperating ''in every way possible.''

In an interview with wire service reporters, the first lady said, ''Neil is the most loving, loyal, wonderful son. He feels he is hurting his father. But we love him more than life. That is just one of the prices you have to pay.''

Last week, three former Silverado officers and directors agreed to consent orders that prohibit them from working in the savings and loan industry without prior regulatory approval. None of the executives admitted any wrongdoing.

Although he declined to specify the nature of the negotiations between thrift regulators and Bush, Hoyle said he expects a consent agreement will be reached.

Hoyle said Bush could elect to challenge the findings of the OTS investigation of Silverado, which would result in a lengthy legal confrontation.

The settlements with Silverado's directors do not prevent the agency from making criminal referals, Hoyle said. The agreements also do not prevent the Federal Deposit Insurance Corp. from suing the officers and directors to recover some of Silverado's losses.

Silverado collapsed after the once high-flying Denver real estate market was grounded by the troubled oil industry. Rescuing the failed thrift is expected to cost taxpayers $1.6 billion.

Prior to closing Silverado, federal examiners had expressed concern about the soundness of the thrift's management. Examiners also were concerned with what they believed to be an ''excessive concentration'' of commercial lending in the depressed Denver market, the OTS said.

Also flagged for regulatory attention were deficiencies in assessing the ability of borrowers to repay loans and an unusually large number of problem transactions with shareholders, officers and directors, the agency said.

#90017u1185 01/17/1990 ~United Press International
By FREDERICK M. WINSHIP, UPI

NEW YORK (JAN. 17) UPI - The American premiere of ''Junon and Avos - The Hope,'' the Soviet Union's first rock opera, is more of an ego trip for presenter Pierre Cardin than an artistic success.

Advertised as "the first hit of the decade," this avant-garde work made its debut at Moscow's Lenin Komsomol Theater in 1981 and was picked up two years later by Cardin, the French fashion designer and theatrical promoter for his Espace Cardin theater in Paris, where it was something of a sensation.

''Junon and Avos'' has since played Amsterdam and most of the major cities of Eastern Europe and has been filmed for British television. As a stage spectacle, it has has a certain brashness in its criticism of the authoritarian Soviet regime as being not much better than repressive government by the czars.

This may have been hot stuff for Soviet audiences in 1981 but the show has lost its punch as the result of Mikhail Gorbachev's perestroika and the changes in Eastern Europe. ''Junon and Avos'' cannot sustain itself as a pre-glasnost curiosity because it wasn't a very good show in the first place.

It is basically a series of vignettes telling the true story of Count Nikolai Rezanov, a chamberlain to Czar Alexander I, who came to San Francisco in 1806 with two ships, Junon and Avos, to establish trade with the Spanish rulers of California. Rezanov is searching for a new life far from the tyranny and isolation of imperial Russia.

He falls in love with Conchita, the governor's teenage daughter, who returns his ardor and rejects her suitor, Fernando Lopez, who dies in a duel with Rezanov. The Russian nobleman returns home to get permission from the Czar to marry Catholic Conchita outside the Orthodox faith, and dies in Siberia on his way back to America.

Conchita waited for Rezanov for 35 years, then entered to a convent, reputedly becoming California's first nun. After her fate is related in an epilogue that reminds the audience that now is the time to discover a new way of thinking and a new faith in understanding one another, the cast sings a finale, ''Hallelujah to Love.''

''Junon and Avos'' opened at the City Center last weekend for an ambitious five-week engagement ending Feb. 4. The first night attracted a celebrity audience wined and dined by Cardin at his Maxim's restaurant, but attendance has been dwindling since then. It's one of those shows that loses some of its audience at intermission.

It is difficult to criticize popular poet Andrey Voznesensky's Russian text and lyrics, based on a series of poems he wrote about Rezanov, but

parts that have been translated into English for the show's American narrator, Philip Casnoff, are pretentious and awkward.

The show is not helped by staging that relies on a dated formula combining smoke and laser lighting for dramatic effect. Director Mark Zakharov attempts to add to the drama by having the cast in constant motion, actually climbing the walls at times.

The elaborately costumed actors are forced to hobble and occasionally dance about on a stage filled with sharply raked plexiglass cubes divided by a mid-stage canyon into which they disappear and reappear. The golden prow of a ship gleams overhead and occasionally dumps ship's rigging onto the stage to give the male chorus members an excuse to display their pectorals in the best beefcake tradition.

Alexis Ribnikov's music is a strange mix of Russian liturgical melodies gorgeously sung by a mostly female choir, folk tunes also effectively sung and blaringly banal rock music reminiscent of the 1960s played onstage by musicians on keyboards, guitars and drums.

Most of the singing falls to Nikolai Karachentsev, as Rezanov, who almost chews his hand-held microphone in a display of intensity that is supposed to pass for passion.

Passion is exactly what this show lacks. Ham is offered as a substitute and the biggest hamsters in a cast that gets four stars for mugging are Yelena Shanina as Conchita, a blonde confusingly cast as a Latin heroine, and Aleksandr Abdulov as Fernando. Abdulov reduces acting to its most superficial rudiments.

What we have here is a display of what money (Cardin's) can do when it is used to push on the public the tastes of one man for what he considers an exciting theater experience. Viewing the emperor's clothes as presented by Cardin can be a numbing experience.

#90017u1214 01/17/1990 ~United Press International

WASHINGTON (JAN. 17) UPI - Renowned cellist Mstislav Rostropovich and his wife, opera singer Galina Vishnevskaya, welcome the Kremlin's decision to reinstate their Soviet citizenship but say the move does not settle their conflict with the powers in Moscow.

At the instigation of Soviet President Mikhail Gorbachev, according to the Tass news agency, the ruling Presidium approved a decree Tuesday reinstating the musical couple as Soviet citizens and restoring their honors as Soviet People's Artists.

A statement issued Tuesday by the National Symphony Orchestra, which the 62-year-old Rostropovich has served since 1977 as music director and conductor, said, ''We consider the return of our citizenship as a straightforward, open admission of a mistake made in the past.''

However, Rostropovich said he will not be completely satisfied until Nobel Prize-winning writer Alexander Solzhenitsyn, also now living in the United States, is allowed to return to the Soviet Union.

''We remain true to our friendship with and admiration for the great Russian writer, Alexander Solzhenitsyn,'' the statement said. ''At one time, our stance was the cause of our expulsion and we will be fully satisfied only after this genius is returned to his people.''

Rostropovich's troubles with Soviet authorities began when he and his wife provided shelter to Solzhenitsyn from 1969, when the dissident author was expelled fom the Soviet Writers Union, until 1973, when he was expelled.

Rostropovich was forced to leave the Soviet Union in 1974 and settled in the United States with his wife and two daughters, Olga and Yelena. He later was granted U.S. citizenship.

Rostropovich indicated that he and his wife do not intend to return to resume life in their homeland.

''Almost 16 years of life in the West since our expulsion, do not as yet give us an opportunity to change our lives,'' Rostropovich said. ''However the act of our rehabilitation provides a chance to have creative and human contacts with our people in the future, which were artificially and unscrupulously stopped by the former Soviet government in 1978.''

Patricia O'Kelly, National Symphony Orchestra spokeswoman, said Rostropovich already had planned his first return to the Soviet Union at the end of the month as he lead the orchestra on a tour that takes it first to Japan and then to Moscow on Feb. 11.

Asked if Vishnevskaya would accompany her husband, O'Kelly said, ''I don't know at this time. I assume she will.''

#90017u1215 01/17/1990 ~United Press International

SPACE CENTER, Houston (JAN. 17) UPI - Dead skin cells, food particles, lint and grit that fall to Earth fill the air in the weightless environment of the space shuttle and can cause problems for both astronauts and equipment.

To find out more about the problem, the shuttle Columbia is carrying two

types of instruments that will show scientists what type of debris is floating in the crew cabin, how much there is and where it comes from. It is the first time such devices have been flown on a shuttle.

Several astronauts have complained about eye and throat irritation, coughing and sneezing they attribute to the debris. A dehumidifier has leaked water because of debris clogging a line.

''The truth of the matter is, other than crew subjective reports about the quality of the debris in the air, we really don't know what's there,'' said Dane Russo, environmental health system project manager for NASA's space station Freedom.

''That's one of the purposes of this experiment, to objectively measure ... what is it that's in the air, how much is there and where did it come from. That would lead us to possibly implementing procedures that may help us clean the air up more so than currently is being done.''

Jerry Goodman, manager of the office that oversees the shuttle crew compartment design, already has made changes to reduce minute debris produced during groundwork on the shuttles between flights.

Changes include the elimination of fiberglas tape in the crew cabin, improvement of filters on shuttle avionics and better cleaning of materials carried on the shuttle.

The changes have ''significantly'' reduced debris from shuttle equipment, Goodman said.

A particulate monitor running almost continuously during Columbia's 10-day mission will give scientists an idea of the amount of debris in the air, Russo said.

Two sampling instruments also were used, one early in the flight and one later. Each device will collect particles according to size for 24 hours and the debris will be analyzed once the shuttle returns to Earth.

''The uppermost stage will collect the largest particles, greater than 100 microns,'' Russo said (a micron is one millionth of a meter). ''That's pretty big stuff that you can see. There is a lot of that in the air. Food particles, lint, hair, skin flakes, sand grit, that kind of stuff.''

Other stages of the device collect particles ranging from 100 microns to less than 2.5 microns.

''In terms of toxicological significance, it's the particles 10 microns and smaller,'' Russo said. ''Those are the respirable particles that could get into the astronauts' airways.''

The shuttle already is equipped with air filters, Russo said. But the debris problem may result from poor air circulation in the shuttle cabin.

''We know there are dead spots in the cabin where air circulation is not as good as in other cases,'' he said. ''It's a very complex problem.''

Solving the problem not only is important for future shuttle missions, but for NASA's planned space station.

''We're hoping to learn some lessons with the shuttle to help us prevent these kinds of problems from occuring on station and to develop instrumentation to monitor the air for space station,'' Russo said.

#90017u1226 01/17/1990 ~United Press International

CHARLESTON, SC (JAN. 17) UPI - When 4-year-old John Ross Cannon got a hug from Mickey Mouse at Disney World last April, it was a special moment, one of the last his family got to share with him before the child died of a brain tumor a month later.

His parents, Larry and Tammy Cannon, have pictures to remember the moment, but they want something more. The Cannons are searching for several people with video cameras who may have captured the hug on tape.

''I know there were a number of people there, shooting videos,'' Tammy Cannon said Tuesday as she and her husband, a Navy petty officer, unpacked boxes at their new duty station in Charleston.

Two people with video cameras - a man in his mid-40s wearing a white T-shirt and blue Bermuda shorts, and a girl about 16 clad in a blue-and-white striped sweater and white pedal-pushers - can be seen in some of the Cannons' pictures.

Tammy Cannon said young John ''shouldn't be hard to spot for anyone who has him on tape.'' He was in a blue wheelchair with a red backpack hanging from the rear.

The youngster's brain tumor was diagnosed in December 1988. Radiation treatment shrunk the growth but part of the tumor had grown around the child's brain stem and was inoperable.

The Cannons sought help from advice columnist Ann Landers, who published their letter in a recent column. Because they were moving at the time, the address in their letter is that of Tammy Cannon's mother in Virginia.

The Cannons current address is 514 Amy Drive, Goose Creek, S.C. 29445.

#90017u1227 01/17/1990 ~United Press International

NEW HAVEN, CT (JAN. 17) UPI - A man sentenced to 10 months in jail for selling counterfeit paintings for thousands of dollars was also ordered to turn over some of his bogus works to teach others how to spot a forgery.

Robert L. Trotter, 35, of Kennett Square, Pa., was also placed on three years' probation Tuesday for bilking art dealers and auction houses of an estimated $135,000 in bogus folk art.

U.S. District Judge Alan H. Nevas ordered Trotter to turn over four of his bogus paintings to the Yale University Art Gallery to teach others how to detect fraudulent artworks.

Trotter was required to return $68,400 to three people who bought counterfeit paintings and was told to sign and date any future paintings he creates.

Trotter, an antiques restorer, was charged with bilking customers of about $135,000 in the past five years by passing off as folk paintings copies he made from originals.

Assistant State's Attorney Peter Jongbloed said Trotter was uncovered last year when a couple from Orange bought a painting for $25,000. They determined the painting was a fraud before Trotter cashed the check and notified the FBI.

Gene and Mary Anne Shannon, who own an art gallery in Orange, said the copy of an 1881 work by New Haven artist John Haberle was the best forgery they had ever seen.

The couple said they were satisfied with Trotter's sentence, saying the case would be a lesson to others.

But another victim of Trotter's disagreed.

Stonington art dealer Marguerite Riordan, who lost $62,800 on two Trotter forgeries, said the defendant was given what amounted to ''a 10-month vacation.''

''He'll be back painting bad paintings again,'' said Reardon, ''Con men are con men.''

#90017u1236 01/17/1990 ~United Press International

VIENNA, AUSTRIA (JAN. 17) UPI - Canada's military chief Wednesday expressed his nation's commitment toward achieving an East-West strategic balance at ''the lowest possible level'' and playing a key role in world peace-keeping efforts.

On the second day of three weeks of informal talks between Eastern and Western military leaders at the Hofburg Palace, Canada's chief of the defense staff, Gen. John de Chastelain, stressed his nation's role in the Western military alliance as one of support for the North American continent.

''Collaboration with the United States in the defense of North America remains a key role in our contribution to the NATO defensive plan,'' Chastelain told the chiefs of staff from NATO, the Warsaw Pact and neutral and non-aligned European countries.

He said that arms control and disarmament remain ''a constant, consistent, dominant priority of Canadian foreign policy.''

One of Canada's main foreign policy objectives, he said, is ''improving security for Canada and its allies by achieving strategic stability and a military balance between East and West, at the lowest possible level of the two forces.''

The unprecedented gathering is intended as an exercise in informal frankness aimed at making progress on European arms reductions. But the seminar is not a formal negotiation and specific results are not expected.

Agreement to hold the seminar was reached last fall by delegates of the 16 members of NATO, seven Warsaw Pact states and 12 neutral and non-aligned European countries participating in the confidence building talks.

Four items are scheduled on the seminar's agenda: each country's general military policies; the relationship of stated policies to actual force structures in the field; military activities and military training in each country; and military budgets.

Chastelain expressed Canada's desire to help support the changes in Eastern Europe, describing the reforms as giving ''promise of an opportunity for significant progress in the reduction of military confrontation.''

While caution is necessary, he said, it should ''not be allowed to stifle opportunity,'' one of which is the so-called Open Skies conferences, the first of which is scheduled to be held in Canada next month.

Canada is particularly concerned with its position as a country exposed by its geographic location to agression between the Soviet Union and the

United States.

''This vantage point draws attention to Canada's position as a zone over which ballistic missiles and bombers transiting the polar regions must fly '' the Canadian general said, adding that the advent of the air-launched cruise missile has caused a renewal of emphasis on airborne interception.

He offered Canada's assistance as a mediator in conflict.

As a non-colonizing nation, a nation whose sovereignty is ''best supported in a world free from conflict'' and whose contribution to security ''can best be effected through alliance,'' Chastelain said gives Canada a special role in world peacekeeping efforts.

He pointed out that Canada is acceptable to many nations as a mediator because of its ''international objectivity, and that in spite of the fact that we are a NATO member.''

Canada's participation in peacekeeping operations world-wide and its experience in this field with members of the two alliances and the neutral and non-aligned nations of Europe attest to its ability to play a role in international peacekeeping, he said.

#90017u1241 01/17/1990 ~United Press International

LONDON (JAN. 17) UPI - Stock prices closed higher in moderate trading Wednesday on the London International stock exchange as investors chose to ignore disappointing U.S. trade news.

The Financial Times 100-stock index, which fell 17.1 points Tuesday, closed up 24.8 points at 2,373.9. The narrower top 30 industrial average gained 19.6 points to 1,895.3.

Volume amounted to around 427 million shares, below the 480 million shares changing hands Tuesday.

Traders said market sentiment was initially damaged by the U.S. Commerce Department report showing America's trade deficit widened in November to its highest monthly level in 1989 at $10.5 billion, up from the $10.2 billion deficit the month before.

Analysts had expected the trade deficit for November to improve slightly to about $10 billion.

Market watchers said traders chose to ignore the trade news and with some selective institutional buying, helped by a late surge, prices ended higher after a slow start.

Special features, such as Avon Rubber, boosted trading enthusiasm. News that West Germany's Trellerborg had built a 4.9 percent stake sent Avon Rubber soaring $1.33 to $8.18.

In the breweries sector, Guinness gained 24 cents to $10.55 after one of its subsidaries, LVMH, reported profits up 45 percent. Scottish and Newcastle shares eased 6 cents to $3.66 on speculation that Elders might sell its 23.6 percent interest in the company.

Cable and Wireless brightened the electricals sector, gaining 24 cents to $8.84 as investors awaited the outcome of China-Hong Kong Telecom talks.

Wellcome PLC, still undermined by the U.S. recommendation to reduce the dosage of its Retrovir AIDS drug, slipped 10 cents to $11.71.

Among the day's other active issues, Ferranti added 4 cents to 57 cents a share and Grand Metropolitan PLC gained 14 cents to $9.93.

Elsewhere in Europe, prices on the Frankfurt Stock Exchange closed higher in moderately active trading.

The German Stock Index, tumbled 52.93 points on Tuesday, closed up 13.80 points at 1,802.48.

-30- 2253

#90017u1262 01/17/1990 ~United Press International

(JAN. 17) UPI - Reports from Moscow say the death toll climbed to 76 in the growing civil war between Christian Armenians and Moslem Azerbaijanis in the two southern Soviet republics. The daily Communist Party newspaper says 11-thousand Soviet troops arrived to try to stop the ethnic fighting. The report says the force ''aims NOT at bloodshed, but at putting an end to it.''

The shuttle Columbia's five-member crew is starting to wrap up a series of medical and scientific experiments in preparation for Friday's landing at Edwards Air Force Base in California. Shuttle commander Daniel Brandenstein is celebrating his 47th birthday today. He enjoyed a wakeup call beamed up from mission control last night that featured a recording of the song ''Danny Boy.''

The value of imported goods purchased by Americans slipped 600 Million dollars in November, contributing to an increase in the month's U-S trade deficit. The Commerce Department reports that the trade deficit for November jumped to 10 and one-half BILLION dollars, up from 10-point-two BILLION in October. Analysts had predicted an improvement in the figure.

Officials in Los Angeles say an elderly woman who was severely mauled by her grandson's pit bulls died early this morning from her injuries. 70-year-old Lilly Marjee died after undergoing about six hours of extensive surgery as doctors struggled to save her life following yesterday's attack. Officials say the woman's arms... one of which was amputed... had been ''chewed to the bone.''

There's NO reaction yet from Jerusalem on Senate Republican leader Robert Dole's proposal to cut U-S foreign aid to Israel and other big recipients in favor of increased aid to emerging democracies in Eastern Europe and Panama. In Dole's words- ''Israel is our best ally in that part of the world, but we have got limits.'' The White House reacted coolly.

#90017u1273 01/17/1990 ~United Press International

TOKYO (JAN. 17) UPI - The government, in an apparent move to forestall an escalation of trade friction with the United States, announced Wednes Japan will continue voluntary controls on car exports to the U.S. market for another year, starting April 1.

International Trade and Industry Minister Hikaru Matsunaga, in announcing the decision at a news conference, said the ceiling, which will remain at 2.3 million units a year, will be removed as soon as a steady decline in exports is ascertained.

''The decision was made in consideration of various factors such as the demand outlook for U.S. and Japanese car markets, foreign exchange fluctuations and Japanese cars in stock in the United States,'' he said.

Matsunaga said a steady decline in Japanese car exports to the United States has yet to be ascertained.

The decision was made amid signs of escalating trade friction between the two countries in the wake of bilateral negotiations to open the Japanese market to U.S. imports.

Japan's trade surplus with the United States topped $50 billion annually in recent years.

Ministry sources said the decision also is aimed at easing growing concern in the U.S. automobile industry over a steady rise in the Japanese share on the U.S. car market.

United Auto Workers Union leaders have urged Japan to reduce the car export quota to 1.5 million units, warning that the U.S. auto industry will suffer damage if the quota is maintained at the current level.

UAW President Owen Bieber expressed ''deep dissatisfaction with the Japanese government's decision, saying that as a result serious injury to American jobs will continue and likely worsen in an overall weakening U.S. vehicle market.''

U.S. car sales are expected to fall below 10 million units in 1990 in line with a gradual slowdown of the U.S. economy.

The daily newspaper Mainichi Shimbun said the most important consideration given by the ministry lay in the fact that sales by the top three U.S. automakers dropped 20 percent in 1989 while Japanese car sales climbed to a 30 percent U.S. market share for the first time.

Executives of the Japanese auto industry were divided over the Japanese decision.

Shoichiro Toyoda, president of Japan's top automaker Toyota Motor Corp. and an advocate of an early removal of the restrictions, said ''it is regrettable, although I think the ministry made the decision after a comprehensive review of the existing state of relations between Japan and the United States.''

Yutaka Kume, president of Nissan Motor Co., called the decision ''a practical choice'' to avoid a further worsening of trade relations between the two countries.

Japan instituted voluntary restrictions on its car exports to the United States in 1981. The annual ceiling was set at 1.68 million units from 1981 to 1983. The volume was raised to 1.68 million units in 1984 and to 2.3 million units in 1985.

Japanese car manufacturers, however, failed to use up their quotas over the last three years mainly because of sluggish demand on the U.S. market and expansion of their local production in the United States.

Japanese car exports to the United States this year are estimated to be about 10 percent less than the ceiling.

#90017u1276 01/17/1990 ~United Press International

WASHINGTON (JAN. 17) UPI - Calling ''crime without punishment'' the nation's biggest problem, two Republican lawmakers proposed Wednesday the government declare a national drug and crime emergency and impose harsher prison sentences for some federal crimes and strike many inmate rights.

Under legislation proposed by Sen. Phil Gramm of Texas, and Rep. Newt Gingrich of Georgia, the government should declare a 5-year drug and crime

emergency during which criminals convicted of violent and drug-related federal charges would face mandatory, full sentences.

Many state and federal sentencing guidelines allow parole after a part of a sentence is served.

Other features of the bill include requirements that inmates work while in prison and provisions allowing the government to withhold certain benefits and conduct random drug tests on those released from jail.

To cut expenses, the measure proposes to undercut some judicial rulings on ''cruel and unusual'' punishment by allowing the government to use military installations, or even tents, for temporary inmate housing. ''Non-essential'' prison construction costs, such as air conditioning, also would be eliminated.

Gramm called the proposal ''an effort to address what we believe is the number one problem in America and that problem is crime without punishment.'' He said the plan ''represents the hard-hitting, get-tough, serious approach we need.''

Saying that ''federal judges' definition of minimum standards tend to be middle class,'' Gingrich said, ''a country that can't figure out how to keep a rapist or armed robber ... off the street has to be in trouble.''

Responding to opponents of the bill, Gingrich said, ''How can we take seriously putting pressure on Colombia and Peru (to fight drugs) ... if we haven't the guts to put pressure on the United States.''

Both Gramm and Gingrich gave President Bush higher marks than Congress in trying to deal seriously with the nation's drug problem and challenged Democrats on Capitol Hill to approve some of the president's remaining ''drug-war'' legislation.

Gingrich said the bill would complement last year's approval of $1 billion for prisons as part of the president's drug-fighting package by ensuring ''we spend it smart.''

#90017u1281 01/17/1990 ~United Press International

STRASBOURG, FRANCE (JAN. 17) UPI - The European Community is obligated to support democratic reforms in Eastern Europe but it can take several years before the former communist nations develop market-oriented economies, EC Commission President Jacques Delors said Wednesday.

''Our admiration for the peoples of Central and Eastern Europe should not hide the reality,'' Delors said in a speech to the European Parliament.

''The present evolution engenders hopes but also carries multiple dangers in it. Reversions or deviations are possible. Everywhere the situation is difficult and demands a new political structure and profound economic reforms.''

''The political dangers which threaten these countries should not be underestimated and thus concern us as well.''

Delors said some people are already talking about immediate accession of the East European countries to the 12-nation EC ''as if they were ready politically and economically already to apply a pluralist democracy and a market-oriented economy.''

''No doubt it is in the first place a matter for these peoples, but the Community should commit itself to solidarity with these countries within a new framework of cooperation, which we will try to define rapidly,'' he added.

Delors said the needs of the East European countries exceeded the scope of trade and economic cooperation agreements the EC has concluded or is negotiating with them. He warned that will inevitably lead to a revision of budgetary provisions.

''Taking into account the capacity of absorption of this financial aid by economies being profoundly transformed, our action should extend over five or 10 years,'' he said.

He said the EC Commission would soon make proposals to adapt budget resources to the new situation.

''The Community and its member states... should have the the capability to influence in an effective way ... the course of events and the future architecture of the great Europe,'' he said.

''This raises in the first place the German question. Let us be clear: the rapprochement or the unification of the German people is first of all a matter for the Germans themselves.''

Delors said East Germany is in a special position because the EC founding treaty considers trade between East and West Germany as internal German trade, not subject to EC external levies or duties.

Therefore, he said East Germany has its place in the Community, if it wants it, ''on condition this process is achieved ... through free self-determination, peacefully and democratically'' in the framework of an East-West dialogue and in the prospect of European integration.

''As to the form this should take, that is first of all a matter for the Germans themselves,'' he said.

If the people in West and East Germany decide to unite, then East Germany will automatically become part of the Western trading bloc.

#90017u1295 01/17/1990 ~United Press International

NEW YORK (JAN. 17) UPI - Police raided a gambling ring linked to the Genovese crime family, making nearly two dozen arrests in New York and Florida and smashing a sports betting operation that netted about $335 million a year, authorities said Wednesday.

Police broke up the sophisticated ring, which used toll-free numbers and couriers who shuttled money between New York City and Florida, Tuesday and seized $750,000 in cash, said Capt. Stephen Davis, a police spokesman.

Authorities also secured a temporary restraining order freezing $5 million in assets held by the ring, said Colleen Roche, spokeswoman for Manhattan District Attorney Robert Morgenthau.

Some 19 people were arrested in New York and several others in Florida following a nine-month investigation dubbed ''Operation Toll-Free'' because the ring used ''800'' numbers to take bets on national sports events, Davis said.

Davis said the betting ring was believed to have brought in $335 million annually.

''They were betting on pro baseball, pro football and even high school football,'' Roche said.

The alleged ringleader, Alfred ''The Coach'' Mart, 73, was nabbed Tuesday in Florida, where is he also the subject of a racketeering indictment.

''He flew up to New York every Thursday, oversaw the operations in New York and would go back Sundays,'' Davis said.

Mart, a Plantation, Fla., resident, has links to the Genovese crime family Davis said.

The raid, sparked by information gleaned from wiretaps, began Saturday when authorities searched nine locations throughout New York City, arresting 13 people and seizing $150,000 in cash.

On Tuesday, six more search warrants were executed at locations in New York and Florida, leading to more arrests, Roche said.

During the raid, detectives also found the keys to several safety deposit boxes and later seized some $600,000 in cash from the boxes, which were under the name of Joseph Yedsobnik, another suspected leader, Roche said.

Shortly after police cleaned out one of the boxes, the wife of one of the defendants arrived at that bank, he added.

#90017u1297 01/17/1990 ~United Press International

WASHINGTON (JAN. 17) UPI - The Supreme Court ruled Wednesday that federal legal policy does not bar an unsuccessful construction bidder from suing a U.S. competitor who bribed the Nigerian government to get a $10.8 million contract.

The court's unanimous ruling clears the way for the civil case against Kirkpatrick International to be tried in federal court in New Jersey, which had ruled in 1987 that the Act of State Doctrine barred the trial.

The legal doctrine says U.S. courts cannot judge cases involving another country's government when the alleged illegal activity occurred in the foreign country.

Justice Antonin Scalia, writing for the court, found the doctrine does not apply in the New Jersey case because the trial court is not required to determine the legality of Nigeria's contracting procedures.

''In every case in which we have held the Act of State Doctrine applicable the relief sought or the defense interposed would have required a court in the United States to declare invalid the official act of a foreign sovereign performed within its own territory,'' Scalia said.

''In the present case ... neither the claim nor any asserted defense requires a determination that Nigeria's contract with Kirkpatrick International was, or was not, effective.''

Environmental Tectonics Corp. lost the contract award to Kirkpatrick International, a New Jersey construction firm that offered various Nigerian government officials $1.7 million in bribes in exchange for the $10.8 million contract to build an aeromedical center for the Nigerian government.

Kirkpatrick pleaded guilty to violating the Foreign Corrupt Practices Act and was fined $75,000. Environmental Tectonics Corp. sued for damages, contending it was unfairly denied the contract.

#90017u1298 01/17/1990 ~United Press International
WASHINGTON (JAN. 17) UPI - Sen. Ernest Hollings, D-S.C., proposed a national sales tax Wednesday to finance a cut in Social Security and capital gains taxes and a restoration of deductions for invididual retirement accounts.

Hollings, a senior member of the Senate appropriations and budget committees, said he will introduce a package calling for a 5 percent value added tax, exempting only food, health care and housing.

The South Carolina Democrat, an original sponsor of the Gramm-Rudman law, said the national sales tax would provide revenue to offset the tax cuts and IRAs, but also for targeted tax credits for research and investment, and revenue sharing to the states for education.

In a letter to Rep. Dan Rostenkowski, D-Ill., chairman of the House Ways and Means Committee, and Sen. Lloyd Bentsen, D-Texas., chairman of the Senate Finance Committee, Hollings said a 5 percent value added tax would raise $53 billion.

''We need to get this country moving again and this is the kind of financial Marshall plan that will do the job,'' Hollings said.

Although popular in some European countries, the national sales tax has never been instituted in the United States.

Hollings' letter was prompted in part by the announcement of Sen. Daniel Moynihan, D-N.Y., who said he will offer legislation to slash the Social Security tax from 6.2 percent to 5.1 percent in 1991.

Moynihan said that his proposed legislation would cut Social Security taxes by $7 billion this year and $55 billion next year. Hollings said that the Congressional Budget Office pegged the savings to taxpayers at $7 billion this year but $38 billion in 1991.

The Moynihan proposal has triggered a major discussion in Washington with some conservatives and liberals backing the New York Democrat who is a major congressional figure on Social Security. The administration, so far, has strongly resisted the idea.

Asked at his news conference how he planned to make up for the $55 billion in revenues, Moynihan said through new taxes or cuts in spending but declined to be more specific.

Hollings said Moynihan's proposal ''is right - but only as a first step to tax adjustment,'' adding that it failed to provide additional revenues to balance the loss.

''We need most to encourage savings, encourage research and investment, support education and position ourselves to compete in an international economy,'' Hollings said.

Hollings proposed a package that would follow the Moynihan Social Security tax cut at a cost of $38 billion; a cut in capital gain taxes to 15 percent for stocks and bonds at a cost of $4 billion; targeted tax credits for research and investment at a cost of $5 billion; and revenue sharing for education at a cost of $4.5 billion.

Moynihan said it would take a year to implement the value added tax and other parts of the package should be put in place at the same speed to avoid to keep revenues neutral.

''However, once instituted, the VAT revenues increase to eliminate the deficit and debt,'' Hollings said. ''Most importantly, this VAT is deducted from exports making us more competitive in international trade.''

''For years now, we have been on a consumption binge refusing the pay the bills and avoiding any sacrifice to build our country,'' he said. ''We cannot stand idly by as Europe expands and Japan leads.''

At the same time, Sen. William Roth, R-Del., in a letter to Treasury Secretary Nicholas Brady, saying he was pleased the administration was considering a plan to spur savings by exempting from taxes family savings accounts if the principal is not removed for 10 years.

Roth urged the administration to consider allowing premature withdrawals for the purchase of a first home, advanced education or catastrophic health costs. He also proposed a low-income credit as a savings incentive for the working poor.

CHICAGO (JAN. 17) UPI - Retail sales of farm tractors were lower in December compared with the same month one year earlier and were down slightly for the entire year, the Equipment Manufacturers Institute said Wednesday.

Total sales of two-wheel and four-wheel-drive tractors were down 1.7 percent in December and slightly lower for all of 1989.

Retail sales of self-propelled combines were up 100.6 percent in December, rectangular balers up 31.8 percent and forage harvesters up 68.6 percent compared with December 1988.

For the entire year, self-propelled combine sales were 52 percent higher than 1988, balers up 24.2 percent and forage harvesters up 16.5 percent.

The Chicago-based institute represents more than 175 manufacturers of farm and specialized industrial and construction equipment.

#90017u1324 01/17/1990 ~United Press International

(JAN. 17) UPI - TODAY'S PEOPLE:

DAN DISCUSSES DRUGS: CBS anchorman Dan Rather says he has ''no alibis, no excuses'' for his one-time journalistic experiment with heroin. Back in the 1950s, Rather had a police employee in Houston inject him with heroin so he would better understand the drug for a story he was writing. ''Looking back on it, I don't know whether it was a smart thing or a dumb thing,'' Rather told The Baltimore Sun Tuesday before addressing an anti-drug assembly for seventh graders. ''It was a whole different time and place. The whole country was different. I didn't know anything about (heroin) and I was too dumb to be afraid.'' Rather first revealed the heroin incident to a reporter for the Ladies Home Journal several years ago and now says his candor may have been ''a dumb mistake.'' Rather also was asked how he felt about Baltimore Mayor Kurt Schmoke's proposal to decriminalize drugs. ''This is a well-thought-through and interesting idea '' he said. ''But it's not one with which I personally agree.''

ROWDY ROD'S CARNAL CONCERT: Rod Stewart's concert in Lafayette, La., was just too much for one concert-goer. Charles Falterman, 27, is seeking unspecified damages from Stewart, the Cajundome and its insurance company because he injured his knee at the Stewart show last year. Falterman's suit went on at length about the nature of the concert, saying Stewart's songs were ''erotic and hedonistic in nature,'' which combined with the light show to whip the fans ''into a boiling pot of ecstatic emotionalism'' and ''a gross sense of abandon and egregious sense of conduct insouciance.'' All of that caused Falterman to slip and break his kneecap when Stewart began kicking soccer balls into the audience, he says.

BLUES FOR SISTER ANNETTE: St. Joseph's Hospital in Memphis, Tenn., has enlisted a new fund-raiser, Elwood Blues, aka Dan Aykroyd, for its $3 million expansion and renovation program. Aykroyd donned his Blues Brothers fedora and sunglasses last year and posed with Sister Annette Crone, the head of the hospital, who wore her habit and a pair of shades, and the picture will appear on T-shirts, posters and ads for ''We're on a Mission from God'' money-raising campaign. Sister Annette had never heard of the Blues Brothers before but someone rented the Aykroyd-John Belushi movie for her and now she's an authority, a spokeswoman said.

RODEO FARE: Bill Cosby will be the first non-musical entertainment to

perform at the Houston Livestock Show and Rodeo in 20 years. Cosby joins 26 other acts - ranging from country star George Strait to Patti LaBelle to Lisa Lisa and Cult Jam - signed for the rodeo, which runs from Feb. 18 to March 4. The Highwaymen - Willie Nelson, Johnny Cash, Waylon Jennings and Kris Kristofferson - will play March 3 in what organizers say is their first show together.

GLIMPSES: ''Jeopardy'' host Alex Trebec will guest star on ''Cheers'' Thursday in an episode in which John Ratzenberger's Cliff character gets to be a ''Jeopardy'' contestant ... Jimmy Dean, the singer and sausage maker, is a serious yachtsman. He's getting a pair of state-of-the-art engines for his new boat, the 107-foot Big Bad John, and is in Houston this week to learn how to work on the big, bad engines. Each one is the size of a small car and has 2,200 horsepower ... Dick Gregory didnt' show up for court in Milwaukee Tuesday and thus forfeited the $79 he put up for bail on a trespassing charge. The social activist was arrested Jan. 8 for refusing to leave a store that sells drug paraphernalia as part of his protest against drug abuse.

-30- 3779

#90017u1327 01/17/1990 ~United Press International

SAN ANTONIO, Texas (JAN. 17) UPI - Levi Strauss & Co. will close a sewing plant and lay off all 1,100 workers to move production abroad, where labor costs are lower, the clothing maker said Wednesday.

''There's going to be a tremendous impact on the San Antonio community. It hurts us very badly,'' said Louisa Hernandez, who heads a labor union local at a sister Levi Strauss shop.

''It's going to be tough,'' said Mayor Lila Cockrell, who added she felt helpless about the ''very sad'' news.

''We asked if there were anything the city could do or could have done that would have alleviated any problems that led to this decision. They said no,'' Cockrell said. ''This is something that is not a local problem or a local situation that caused this thing to happen. It is an industry-wide trend toward offshore manufacturing.''

San Francisco-based Levi Strauss, the world's largest apparel maker, ''is shifting sewing from the plant to contractors as part of its ongoing efforts to increase manufacturing flexibility and reduce costs,'' the company said in a two-page statement.

Company spokesman John Onoda later said the operation would be moved to the Carribean Basin, but he would not disclose a specific location.

The closing date for the sewing plant on San Antonio's poor South Side was

set for April 16 to give workers 90 days' notice, the company said.

''The workers will work until the work on hand is finished, and then they don't have to come to the plant to report,'' Onoda said. ''They stay on the payroll. They are paid until April 16.''

Severance pay and extended medical coverage will be provided, the company said, and an outplacement service also will be offered.

The decision will not affect the more than 1,300 people employed at the company's two other facilities - a finishing center and sewing plant - in San Antonio.

''We hope some of the people from the South Zarzamora (Street) plant will find jobs at these facilities. We are also working closely with local, state and federal officials and other local employers to help our people find new jobs,'' Peter Thigpen, a Levi Strauss senior vice president for operations, said in a company statement.

''Our long-standing company policy of making products for the United States in the United States whenever possible still stands,'' Thigpen said. ''More than 90 percent of Levi's jeans and more than 75 percent of all Levi's products sold in the United States are still made in the United States.''

Levi Strauss, which will now operate 27 U.S. sewing facilities, employs almost 31,000 people worldwide. The company reported estimated 1989 sales of $3.6 billion.

Hernandez, who is district manager for the Amalgamated Clothing & Textile Workers Union local representing Levi Strauss's other sewing plant in San Antonio, said she did not know the average wages at the non-union shop targeted for closing. During the last round of contract talks involving her plant, Hernandez said the company told her the average hourly wage was $5.57.

''The effect this will have on my union is the fear that will be in people's minds once anything is mentioned about trying to better their working conditions,'' Hernandez said.

''When you pay $5.57 an hour here and the company now has the option to go and pay (lower wages) in the Carribean, of course they're going to take the option to make more money,'' she said.

The mayor said the city will immediately ''make a very aggressive effort'' to attract another industry to the plant.

The 1870,000 square foot menswear facility purchased by Levi Strauss in

1981 originally produced sports coats, but now produces men's slacks.

#90017u1333 01/17/1990 ~United Press International

MOSCOW (JAN. 17) UPI - Soviet officials said Wednesday more troops may be sent to the Azerbaijan republic to stop a virtual civil war that spread for the first time to the Armenian capital, where Armenians raided police stations in a desperate hunt for guns.

Some 11,000 fresh Soviet troops deployed to the region nearly doubled the number of soldiers trying to stop Azerbaijani-Armenian warfare that raged for a fifth day Wednesday and reportedly has left 76 people dead since Saturday.

''The situation is not worsening but it is bad enough already,'' Foreign Ministry spokesman Yuri Grimitskikh said of the ethnic strife, which is considered the worst since Soviet leader Mikhail Gorbachev assumed power in March 1985.

''If the situation demands it, more troops will be sent'' to the Transcaucasian region on the Soviet Union's southern rim, Grimitskikh said.

He said the fresh troops were taking up positions ''where they are needed - where battles are are going on - to separate the warring sides.''

The official news agency Tass said the 6,000 Interior Ministry troops and 5,000 army soldiers were ordered to Azerbaijan under a state of emergency that has resulted in curfews, document check points and restriction of movement in the consulsed region.

The new troops brought the total forces deployed in the crisis to nearly 22,000 soldiers. Some 10,900 troops had been sent earlier, most to the Moslem republic of Azerbaijan with 1,800 sent to the Christian republic of Armenia.

The daily Communist Party newspaper Pravda justified the huge troop deployments as the use of ''force in the name of life, in the name of humanism; force aimed not at bloodshed but at stopping it.''

The fighting reflects an ominous escalation of a two-year conflict over the Nagorno-Karabakh enclave, an area populated mostly by Christian Armenians but located within Azerbaijan. Azerbaijan has resisted efforts by its neighboring republic of Armenia to control the disputed area.

Since the violence erupted Saturday, the two ethnic communities have formed self-defense brigades and have begun using sophisticated weaponry captured or stolen from the military - including armored personnel

carriers, surface-to-air rockets, machine guns and even unmarked helicopters.

As the full-scale battles raged a fifth day with no sign of abating in the Azerbaijan republic amid what army generals are calling a civil war, officials said the recent unrest had also spread for the first time to the Armenian capital of Yerevan.

Interior Ministry spokesman Dmitri Tselesnov told United Press International that Armenians attacked 13 points in Yerevan and other Armenia locations in desperate searches for weapons to defend themselves against Azerbaijanis.

The raiders seized 452 firearms Tuesday and Wednesday, including Makarov revolvers and small-arms ammunition, Tselesnov said.

One of the raids was on a sports club, where attackers made off with bullets used by marksmen. In other raids described by Tselenov, Armenians pillaged a hunting club, stole 31 Makarov revolvers from a post office, took 15 pistols from a police station and grabbed weapons from railyard guards.

Trouble was also brewing in the third Transcaucasian republic of Georgia, where thousands of people demanded independence at rallies in Tbilisi and workers at some plants were on strike, according to news reports and sources in the Georgian capital.

The official Tass news agency said since Azerbaijani-Armenian pogroms erupted Saturday, ''56 people, mostly Armenians, have been killed and 156 wounded in Baku,'' the capital of Azerbaijan. The Izvestia government newspaper said 20 more people were killed in the Nagorno-Karabakh enclave.

The new round of clashes raised to more than 270 the number of deaths since the dispute over mountainous Nagorno-Karabakh erupted in February 1988, rekindling an age-old enmity between Azerbaijanis and Armenians.

About 4,000 Armenian refugees have been evacuated from Baku, 2,000 of them across the Caspian Sea by ferry into the republic of Turkmenia and the others flown north to towns in the Russian republic, Tass said.

A decision by the Soviet parliament in November to restore control of Nagorno-Karabakh to Azerbaijan did not appease the Azerbaijanis, whose powerful Popular Front has now called for expelling all Armenians from the enclave and from Baku.

A total of 300,000 Armenians once lived in Baku, a city of 1.7 million, but most have left in the past two years.

-30- 4778
#90017u1347 01/17/1990 ~United Press International
GENEVA (JAN. 17) UPI - A team from the United Nations will fly to Iran this weekend to investigate charges of widespread human rights violations, U.N. officials said Wednesday.

The five-member team, appointed by the U.N. Commission on Human Rights, was to have visited the country last week, but Tehran demanded the investigation be postponed until after the commission's annual meeting, scheduled to run through March 9.

Team leader Reynaldo Galindo Pohl insisted, however, on carrying out the investigation in Iran before the meeting convened Jan. 29 so he could report back on his findings.

The investigating team will arrive in Tehran Saturday and stay in Iran for more than a week, a spokesman said.

Members of an Iranian mujahadin opposition group on Wednesday presented Galindo Pohl, a professor of law from El Salvador, with signed statements from 1,300 people who testified they had been tortured.

The opposition group last week had presented the U.N. investigator with documents identifying 653 prisons and ''torture centers'' and naming 1,786 Iranians who reportedly tortured prisoners.

The group charged that 1,200 political prisoners were executed in Iran in 1989 under the ''camouflage'' of drug trafficking charges.

There are about 110,000 known political prisoners in Iran, and opposition groups say the real total is probably much higher.

#90017u1354 01/17/1990 ~United Press International
POTOSI, MO (JAN. 17) UPI - Condemned killer Gerald Smith, who beat to death a former girlfriend and then killed a fellow convict during a nearly nine-year stay on death row, Wednesday calmly awaited execution at the Potosi Correctional Center.

Smith was scheduled to receive a lethal injection at 12:01 a.m. CST Thursday, marking the first execution in the nation this year.

Smith was convicted of the murder of Karen Roberts, a former girlfriend, whom he beat to death with an iron bar on a St. Louis street in 1980. Smith said he killed her because she gave him a venereal disease.

Smith was also convicted of murdering Robert Baker, a death row inmate. He received a second death sentence in that slaying.

Baker, handcuffed and being led to his cell by guards, was attacked and fatally stabbed in 1985 by Smith and another death row inmate, who also received a second death sentence for the slaying.

Dale Riley, assistant director of the Division of Adult Institutions, said Smith requested a last meal of a steak, french fries, salad and a soft drink.

Smith also asked permission to receive final visits from three friends from death row and also made telephone calls to two of his brothers, who are also convicts, and a sister-in-law.

''Gerald's demeanor hasn't changed a bit,'' said Riley. ''He seems very decided on his fate, and has not changed his mind about wanting the execution performed.

''It's my understanding he's asked his attorney not to file a last-minute appeal and that his attorney has agreed.''

Riley said Smith had requested three personal witnesses to his execution, including ''an identified attorney, a relative and a friend.''

Meanwhile, the Coalition Against the Death Penalty filed a clemency application with Gov. John Ashcroft. The governor forwarded the application to the Board of Probation and Parole for a recommendation.

Smith, 31, has been held on death row since Aug. 19, 1981, and on many occasions has ordered various defense lawyers to halt all appeals.

Over the years, he also has threatened to kill guards, prosecutors, his defense lawyers and Missouri Supreme Court judges if his execution were not carried out. On other occasions, he has changed his mind and authorized lawyers and family members to file appeals for stays of execution.

The Missouri Supreme Court on Tuesday set the execution date only an hour or two after the U.S. Supreme Court denied Pleban's most recent appeal for a stay.

During the eight years and five months that Smith has been confined on death row, he has received 12 stays of execution, 10 in the case of his former girlfriend and two in the case of the fellow inmate.

Smith's execution would be the second carried out in Missouri since 1965. It would be the 121st in the nation since the U.S. Supreme Court lifted

its ban on capital punishment in 1976.

#90017u1383 01/17/1990 ~United Press International

RALEIGH, NC (JAN. 17) UPI - The ''other woman'' in a divorce case is being sued by her lover's former wife who insists a husband is worth at least $10,000 - even one with a cheating heart.

Susan Spencer Mason, 31, a researcher for a law firm, dusted off a state law that allows a spurned spouse to sue for alienation of affection and for criminal conservation, a legal term that translates to adultery.

''I think most domestic attorneys have had somebody call about these kinds of cases,'' said Aida Fayar Doss, Mason's lawyer. ''Several years ago it was almost never heard of. It seems to be on the upswing, perhaps with a resurgence of traditional family values.''

A plaintiff must show a marriage existed with love and affection until the defendant entered the picture, alienated the spouses and destroyed the marriage.

The plaintiff also must prove damages, including loss of companionship, income and retirement benefits.

''It gets pretty serious,'' said Doss.

Mason's divorce from Richard Mason became final Wednesday and she received custody of their child. Now she wants retribution for the humilation she claims she suffered.

Susan Mason is suing Susan Ervin Belk, 20, for alienation and criminal conversation. Mason is seeking in excess of $10,000 on each claim, meaning a jury could award her a great deal more if she wins.

''Certainly, it's a matter of principle. She's very hurt. She's being left alone as a single mother,'' said Doss. ''The money will not make up for the hurt and humilation but if she can get the money that will certainly help.''

But Doss added, ''It's not totally a matter of money at stake here. Somebody just can't move into someone's marriage and alienate someone's affection.''

Court documents filed on Susan Mason's behalf said her husband's relationship with Belk ''has been open, flagrant, notorious and has resulted in the pregnancy of the defendant. She has suffered humilation, shame and disgrace.''

Doss said Belk and Richard Mason are living together.

''The law presumes to have a redress for every injury,'' she said. ''We as attorneys like to tell clients there's a remedy for every wrong. If somehow the relationship of marriage has been injured by a third party, this is the remedy.''

Not only does the law apply to lovers, it also applies to mothers-in-law and to ''anyone who alienated a marriage,'' Doss said.

The law came under question in 1984 and the state Court of Appeals ruled there was no logical basis for it. But the state Supreme Court disagreed and reinstated the law.

A Winston-Salem man who filed suit last year was awarded $40,000 from his wife's boyfriend.

ANCHORAGE, AK (JAN. 17) UPI - Gritty volcanic ash fell in sparsely populated areas early Wednesday, following the latest spectacular eruption of Redoubt Volcano, witnesses said.

''Ash came down with the snow,'' said Joyce Logan in Skwentna, a small town northwest of Anchorage and more than 100 miles northeast of the volcano.

''Luckily, the ash was covered by snow,'' she said. ''But when you broke through the snow, you could see a black line of ash right through the snow. It's real, real gritty. It isn't the fine dust like we got last time.''

The 10,197-foot mountain 110 miles southwest of Anchorage rumbled violently Tuesday night and, at 10:48 p.m. Alaska time (2:48 a.m. EST Wednesday), it erupted, the Alaska Volcano Observatory reported.

The eruption lasted 20 minutes and was similar in force to Redoubt's Jan. 11 blowout, said Steve Brantley, a geologist at the volcano observatory.

Satellite imagery showed the volcanic plume rose to 30,000 feet, the Federal Aviation Administration said in a renewed warning to pilots to steer clear of engine-damaging ash.

Clouds and darkness obscured the volcano and the plume, but pilots in the air at the time of the eruption told the FAA they saw lightning coming from around Redoubt.

The late-night eruption brought ash early Wednesday to small communities north of the volcano, but no problems were reported.

Ash in Skwentna measured about a quarter-inch, Logan said. Light ash also was reported in Cantwell, near Mount McKinley, Brantley said.

Redoubt has been erupting off and on since Dec. 14, and geologists said the sporadic explosions could continue. This latest eruption, coming with a brief warning of increased earthquake activity at the mountain, broke the calm that made the oil industry hopeful that Cook Inlet production could resume.

The Cook Inlet Pipe Line Co., ordered by the state to empty its seven oil storage tanks 20 miles from the volcano, had just submitted a plan for resuming operations at its Drift River terminal hours before the latest eruption.

The oil terminal is threatened by flooding and mudflows from the meandering Drift River, which left its banks when melting ice and slurries of muck running down the mountainside sent the river on a new course and threatened the oil storage tanks.

The 30,000-barrel-per-day Cook Inlet crude oil operation has been halted because there has been nowhere to store oil for tanker pickups except the Drift River tank farm, where dikes protect the tanks but eruptions continue to chase off workers and raise fears of an oil spill.

#90017u1410 01/17/1990 ~United Press International

NEW YORK (JAN. 17) UPI - International Business Machines Corp. said Wednesday it took a $2.42 billion one-time charge in the fourth quarter of 1989 to finance a restructuring plan which includes reducing its work force by 10,000 people.

The $2.42 billion charge resulted in 1989 fourth-quarter earnings of $591 million, or $1.04 a share, down 74.8 percent from $2.34 billion or $3.97 a share in the year-ago quarter. IBM's fiscal year coincides with the calendar year.

Total revenues for the fourth quarter, including support services and software, were $20.46 billion, up 2.3 percent compared with $20 billion in the year-ago period. Sales of computers were virtually flat in the fourth quarter at $14.35 billion, compared with $14.26 billion in the last quarter of 1988.

"Revenues in 1989 continued to show strong growth in the non-U.S. business

with modest growth in the United States," IBM Chairman John Akers commented. "With the U.S. restructuring announced in December, we look forward to a more competitive IBM."

The computer manufacturing giant, based in Armonk, N.Y., had announced in early December it was cutting down on new hiring, offering early retirement incentives and trimming some domestic operations in order to improve financial performance in an increasingly competitive environment.

William Gould, computer analyst with New Japan Securities-U.S., in New York, said the one-time charge was "greater than expected, but realistic." Gould predicted that the bulk of IBM's growth this year will be on foreign markets, including in Japan, the country with the fastest growing demand for mainframes.

"Strong foreign sales are a feature of IBM's outlook, and with respect to Japan, IBM has a significant marketshare of about 25 percent in mainframes " Gould said. "If IBM can compete successfully, it will experience growth in Japan." Foreign sales accounted for 59 percent of IBM's overall revenues in 1989, up from 57.6 percent in the previous year.

Earnings for 1989 were $3.75 billion or $6.47 a share, down 35.3 percent from 1988's $5.8 billion or $9.80 a share. Total annual revenues for 1989 were $62.71 billion, up 5.1 percent from 1988's $59.68 billion. Sales of computers alone in 1989 were $41.58 billion, up 4.1 percent from 1988's $39.96 billion. Rentals were the fastest growing segment at IBM in 1989, up 13.2 percent to $2.84 billion from $2.51 billion in the previous year.

IBM viewed that growth in the computer lease area had a short-term "unfavorable impact" on sales, but added that "these leases will benefit IBM in the long term." The results confirmed what Akers described in December as a U.S. market situation reaching saturation.

Revenues from domestic operations were up a mere 1.58 percent - a decrease in real terms. Revenues from foreign operations were $37 billion in 1989, up 7.6 percent from 1988's $34.4 billion.

Akers had predicted that IBM will continue to witness in 1990 a double-digit growth in Asia, and a seven to eight percent growth in Europe. However, IBM cited a "stronger dollar" as having "unfavorably impacted" revenues and earnings.

The release of IBM's financial results did little to affect the stock which was up a modest 25 cents at $100.375 at midday on the New York Stock Exchange.

#90017u1414 01/17/1990 ~United Press International
ELMENDORF AIR FORCE BASE, Alaska (JAN. 17) UPI - Military helicopters Wednesday searched west of Anchorage for an Air Force F-15 jet fighter that disappeared Tuesday on a training mission.

The jet, carrying only the pilot, dropped off radar just as Anchorage air traffic controllers were handing his flight off to Elmendorf Air Force Base controllers during the Tuesday afternoon exercise, Sgt. Steve Wilhelmi said.

Attempts to reach the pilot by radio failed but an emergency locator signal was picked up near Mount Susitna, across Cook Inlet about 25 miles from Anchorage.

Weather and darkness hampered searchers Tuesday night but an intensive search resumed Wednesday.

The pilot was not identified.

#90017u1438 01/17/1990 ~United Press International
DETROIT (JAN. 17) UPI - General Motors Corp. and Ford Motor Co. are developing their smallest V8 engines ever in anticipation of tighter fuel mileage standards, while Chrysler Corp. is working on a new family of four-cylinder engines, sources said Wednesday.

The focus of GM's program is a 4.0 liter V8 engine that would most likely be built at the giant automaker's Tonawanda, N.Y., engine plant and be used in its cars and light trucks, said MetalWorking News, a weekly trade publication.

Other sources close to GM's suppliers confirmed the report, saying GM's "high value V8" would most likely be a multi-valve design but not be offered until the 1994-model year at the earliest.

"GM, like other top U.S. automakers, really needs a fuel-efficient V8 engine strategy," said one source, adding that the automaker's V8 engines, heavily used in its Cadillac division, are on average four mpg less fuel efficient than its V6 motors.

The nation's top carmakers, subject to federal fines, will have trouble meeting future corporate average fuel economy (CAFE) standards if they are raised by the government from the current 27.5 mpg level. Industry analysts say American automakers are woefully behind their Asian rivals in developing new engines that are both powerful and efficient.

Second-ranked Ford has reportedly pushed ahead a plan by nearly three

years to build a new multi-valve 4.0 liter V8 engine made of aluminum for use by 1994 in cars like its Lincoln Continental, sources said.

The engine may be built at Ford's reconverted engine plant in Romeo, Mich. which will also build a line of new 4.6 liter V8s for use in its cars and light trucks.

Ford's 4.6 liter engines will initially be of a conventional design, with a cast iron block and two valves per cylinder when they are offered next year. A 32-valve, aluminum version will offered for the 1993-model year, industry analysts said.

Sources also said Ford has resurrected a program to build a new V6 engine at its Cleveland engine plant for use in the next generation Aerostar van, code-named WIN88 and due for 1994. That engine will most likely have a displacement of 3.5 liters, although Ford declined comment on the program.

Chrysler's top priority is to replace its 2.2 and 2.5 liter four-cylinder engines with a 2.0 liter 16-valve version for the 1994-model year, sources say. The nation's third largest automaker is also developing a multi-valve 2.5 liter V6 engine, tentatively slated for 1994.

Chrysler confirmed earlier this month it has developed a 32-valve 4.0 liter V8, which top executives say is "being placed on the shelf" for later use should market demand and federal requirements allow it.

#90017u1450 01/17/1990 ~United Press International

AUSTIN, TX (JAN. 17) UPI - Air piracy charges were filed Wednesday against a Cuban-born man who seized a flight attendant and tried to hijack an America West jetliner to Cuba with a fake bomb, the police and FBI said.

The bomb turned out to be a toothpaste dispenser tied to a small blinking flashlight, authorities said.

Jose Manuel Gonzalez, 39, of New Orleans, was to appear before a federal magistrate for arraignment on charges of air piracy and crime aboard an aircraft, said Michael Wilson, agent in charge of the FBI's San Antonio office.

Gonzalez was charged by Austin police with aggravated kidnapping, Deputy Chief Ken Williams said at a news conference.

Gonzalez, a U.S. resident since 1962, boarded America West flight 727 that departed Houston for Las Vegas, Nev., at about 10:45 p.m. Tuesday. Once in flight he brandished the fake bomb, tied up a flight attendant and

demanded to be flown to Cuba, authorities said.

Daphne Dicino, an airline spokeswoman, said, ''The captain informed passengers he had to stop in Austin for fuel. The captain quickly notified the proper authorities of the incident and told them he planned to divert the plane to Austin.''

On the ground, passengers fled the jet down emergency ramps and several Austin police boarded the aircraft and subdued the suspect in a brief struggle. Officer said when they entered the jet's cabin the suspect was choking the flight attendant, who had been tied up in the rear of the craft.

Two flight attendants were admitted to St. David's Hospital, one for injuries received when she was tied up and choked by the hijacker and another for coffee burns, a hospital spokesman said. Gonzalez was treated at Brackenridge Hospital for head lacerations, Williams said.

As he was led handcuffed to a waiting police car, Gonzalez told reporters the hijacking attempt was politically motivated.

''I feel threatened ... because of my political opinions,'' he said. ''I feel this country is in peril.''

Williams said, ''The only thing that he asked for was to be flown back to Cuba. He felt he was being persecuted here, that someone was after him.''

Williams said Gonzalez was carrying a substance that could be a drug and that police were awaiting test results before filing additional charges.

When asked about reports Gonzalez was behaving strangely at the America West boarding gate at Houston's Intercontinental Airport, Wilson said, ''There is some indication that there may have been but we haven't been able to determine that yet.

''I think you've got to understand that he commandeered that plane right as it reached the level of its altitude of 35,000 feet, which was about 10 minutes after he entered the plane,'' Wilson said. ''The behavior that he showed was in fact erratic behavior in that he took a stewardess hostage.''

#90017u1462 01/17/1990 ~United Press International

WASHINGTON (JAN. 17) UPI - U.S. oil production fell by more than half a million barrels a day in 1989 - the largest annual decline on record - leaving domestic output at its lowest point in 26 years, the American Petroleum Institute said Wednesday.

In its assessment of 1989 trends in the oil industry, the institute said the "very disturbing" drop-off in U.S. production opened the door for an 8.2 percent increase in imported oil to 7.9 million barrels a day - the highest level in ten years. Imports provided 46 percent of America's oil last year, second only to the 47.7 percent import market share recorded in 1977.

"It is particularly noteworthy that the increase in imports was not driven by increases in consumption, which has been the more important factor until last year, but by decreases in domestic production," said Edward Murphy, director of finance, accounting and statistics for the institute.

"We appear, in fact, to have reached a turning point," Murphy said. "While few analysts, including myself, are confident about our ability to anticipate developments in petroleum markets with great precision, most see substantial decreases in U.S. production, combined with moderate increases in consumption, leading to substantial increases in our demand for foreign crude oil.

"I think the trend of U.S. production and the consequent trend of increasing U.S. petroleum imports is very disturbing and should be a focus of national concern," Murphy told reporters.

The institute said the dramatic decline in U.S. production last year was partly due to the first decrease in output from Alaska's North Slope in more than a decade.

The institute said the 140,0000 barrel per day reduction in Alaskan supplies reflected, to some degree, the disruption in shipping operations caused by the Exxon Valdez tanker spill as well as maintenance work on the state's oil pipeline.

However, the institute estimated those special factors probably accounted for less than a third of the Alaskan decrease. "A decline of around 100,000 barrels a day appears to be a fair assessment of the underlying trend for the year," API said.

On top of the substantial reduction in Alaskan supplies, production in the lower 48 states took a nose-dive in 1989, dropping by 410,000 barrels per day compared to a decrease of only 265,000 barrels a day in 1988. The institute said the huge decline in lower 48 production was the result of vastly reduced drilling activity caused by record low oil prices in recent years.

Altogether, U.S. output fell by 553,000 barrels a day in 1989, much worse than the 200,000 barrel per day reduction in 1988 and the 300,000 barrel per day decline in 1987. Domestic production averaged 7.58 million barrels a day in 1989, down from 8.14 million barrels a day in 1988.

"This was the largest U.S. decline we have ever experienced and the lowest level of domestic production in more than a quarter of a century," Murphy said.

Murphy's remarks come amidst continuing oil industry efforts to gain federal permission to drill in promising but environmentally fragile areas offshore California and Florida and in Alaska's Arctic National Wildlife Refuge.

Congress has barred drilling in those areas due to environmental concerns, but the industry contends that, in view of growing U.S. dependence on foreign oil, the nation cannot afford to put those oil reserves off limits.

The industry and the Bush administration contends drilling can be conducted in an environmentally sensitive manner, but environmentalists say the Exxon Valdez accident shows the industry's promises are hollow. They also argue the disputed areas will not provide enough oil to substantially reduce U.S. imports.

Murphy said there would be "tremendous" industry interest if the offshore areas and the Arctic refuge were opened up. "I think there would be drilling and, hopefully, there would be discoveries," Murphy said. "The rate of decline (in U.S. production) in the future will be greater due to the lack of access to the offshore areas and Alaska."

#90017u1475 01/17/1990 ~United Press International

CAPE CANAVERAL, FL (JAN. 17) UPI - Columbia's astronauts suffered another false equipment alarm in the waning orbits of their 10-day flight Wednesday, got a break in the weather for Earth photography, and plowed through the last of their scientific experiments.

In what was an otherwise quiet day, a smoke detector in an aft avionics bay set off a shrill siren in the shuttle cabin. Finding no traces of smoke, flight engineers attributed the scare to a bad sensor.

''The feeling is it was a false alarm,'' NASA spokesman Jeff Carr said.

Earlier in the week, erroneous data generated by a navigational aid set off an alarm that awoke the crew from a sound sleep.

Weather permitting, commander Daniel Brandenstein, who celebrated his 47th birthday in space Wednesday, will guide NASA's oldest space shuttle to a pre-dawn landing Friday at Edwards Air Force Base in California's high Mojave Desert.

''He's certainly one of the finest stick handlers we've got in the astronaut corps,'' said Granvil Pennington, lead flight director for America's 33rd shuttle mission, the second-longest for NASA.

Good weather is expected for landing, but snow is possible Thursday in the Mojave Desert and Air Force forecasters were closely monitoring two low-pressure systems over California that could cause problems.

With their main objectives achieved, Brandenstein, co-pilot James Wetherbee, 37, Bonnie Dunbar, 40, Marsha Ivins, 38, and G. David Low, 33, wrapped up studies on materials processing, crystal growth, human adaptation to weightlessness and other topics.

Last week, the hard-working astronauts launched an 8-ton Navy Syncom IV communications satellite like a giant Frisbee from the shuttle's 60-foot payload bay and used the ship's robot arm to retrieve an 11-ton science satellite that would have otherwise plunged back to Earth in March.

Another goal of the mission - launched Jan. 9 from the Kennedy Space Center - is to flight test Columbia's modified fuel, life support and waste disposal systems that will eventually permit missions of up to 28 days.

''You are now officially the second-longest shuttle mission to date. Congratulations,'' astronaut Steve Oswald radioed from mission control in Houston as the crew reached the milestone Wednesday.

The longest mission was a 10-day, seven-hour, 47-minute-flight by Columbia in late 1983, featuring the Space Lab science module.

Although the ship's ninth flight has been less than optimum for Earth photography, the astronauts managed Wednesday to beam home spectacular views of central Africa and Australia.

Color television cameras perched in the spaceplane's cargo hold clearly showed Lake Victoria and the Serengeti Plain. Minutes later, Brandenstein reported ''what looks like a mighty good-sized typhoon'' northwest of Australia.

In addition to the standard video gear carried aboard all space shuttles, Brandenstein has been using a high-definition IMAX camera to photograph Earth scenes for a documentary about the planet's fragile environment.

But as of Wednesday, only about 55 percent of the film's ''targets'' had been recorded for the wide-screen movie that will be shown at the National Air and Space Museum in Washington, D.C.

''We're getting quite a few (IMAX targets),'' Pennington said. ''There's

still a lot of the specific ones that ... have been weathered in and we're trying the best we can, hoping some of these will clear in the next couple of days.

''There's a tropical storm over northwest Australia that we've been having a good time with the crew,'' he said. ''The Australians call typhoons willy-willies. The name of the tropical storm is Sam, so we've been calling it in some of our transmissions willy-willy Sam.''

-30- 3994

#90017u1488 01/17/1990 ~United Press International

NEW YORK (JAN. 17) UPI - A leading oil trader forecast Wednesday that crude oil prices will drop more than 25 percent in the next six months and then more than double in the 1990s in oil's "last hurrah" as an energy source.

"I believe very strongly that this is going to be both the decade of oil's preeminence and its demise," Peter Beutel of Elders Futures in New York told a news briefing of energy reporters.

"It's my very firm opinion that the 1990s may well be oil's kind of 'last hurrah,'" the analyst and trader on the New York Mercantile Exchange said. "We're coming into the last 'bull market' for oil."

He said there was "better than a 50-50 chance crude prices will fall to $15 a barrel in the next six months," a drop sufficient to spur the 13-nation Organization of Petroleum Exporting Countries to discipline overproducing members. OPEC pumps more than one-third of the world's oil.

With OPEC once again successfully limiting output, prices will rebound to about $30 a barrel on the Merc, Beutel forecast. Prices of the U.S. benchmark West Texas Intermediate crude have been recently running between $20 and $23 a barrel on the Merc.

But world oil markets have been indicating "we're headed into a situation where the oil is going to rise in price very dramatically" in the 1990s, Beutel said.

The current price range around $20 a barrel is too low to provide industry with sufficient incentive to develop alternative energy sources, Beutel said. But as crude prices rise later in the decade, the incentive will be provided to develop lower-priced energy sources.

Oil company executives he had talked to, Beutel said, "see the handwriting on the wall." More and more they refer to themselves as "energy companies " he added.

Environmental pressures for cleaner fuels that do not pollute the air "will place as much upward pressure on prices as supply and demand," he said.

The analyst said the economies of the world's two leading industrial nations - Japan and the United States - that have benefited most from low oil prices will be challenged to maintain their economic preeminence in the 1990s, the decade of higher oil prices.

He believed the 50 percent drop in crude prices in 1986 helped pressure the Soviet Union to open up its economy and society because oil accounts for 60-80 percent of Soviet earnings of hard currencies.

#90017u1501 01/17/1990 ~United Press International

MIAMI (JAN. 17) UPI - Gunmen stole a U.S. Marshals Service plane from an airport ramp, tying up ground workers with duct tape and fleeing in the aircraft normally used to transport arrested criminal suspects, investigators said Wednesday.

The unoccupied King Air twin-engine plane was parked for the night at a Tac Air Service ramp at Tamiami Airport southwest of Miami, Metro-Dade County police said.

About 11:30 p.m. Tuesday, at least two gunmen confronted Tac Air employees at the ramp.

''The two employees were tied up and left there. They were confronted by the subjects at gunpoint and a car and an airplane were taken forcibly. The plane belonged to the marshals service,'' a police spokesman said.

The car's owner was not identified.

The Tac Air workers were not injured, employee Valerie Sanders said.

''They were just roughed up a little bit,'' she said.

The service company refuels the marshals service planes and assists with other flight arrangements, Sanders said.

A marshal's spokesman said the plane was normally used to transport criminal suspects. There was no indication that the theft was connected to the marshals' work.

The investigation was turned over to the FBI.

#90017u1510 01/17/1990 ~United Press International

AUSTIN, TX (JAN. 17) UPI - The U.S. thrift industry's problems deepened through the third quarter of 1989 as losses surged to $11.6 billion against $8.8 billion in the comparable period of 1988, a financial institution consulting firm said Wednesday.

Sheshunoff Information Services Inc., which researches and analyses the performance of banks and other financial entities, also warned of a growing mountain of repossessed real estate in savings and loan hands.

Unprofitable institutions among the nation's 3,042 thrifts as of Sept. 30 had increased to 1,048 from 878 in June, the company said in a report. Losses rose 17 percent to $15.1 billion from $12.9 billion in the year-ago period.

The number of profitable institutions dropped to 1,994 from 2,084 in June. said the Austin-based firm. Earnings of the thrifts fell to $3.5 billion from $4.1 billion in the first nine months of 1988.

Losses eroded the thrifts' capital position, the report said. Their combined tangible capital fell $9.6 billion during the nine months to $11.8 billion for an industry-wide tangible capital-to-assets ratio of 0.9 percent.

New capital requirements which took effect Dec. 7 stipulate a minimum ratio of 1.5 percent, or a plan to reach that level. Those rules also stipulate that the ratio must rise to three percent by 1995.

Alex Sheshunoff, head of the research service, said many undercapitalized savings and loan associations have been selling off assets to meet the new requirements, among other capital-raising tactics.

Total assets for the industry in September were down 3.5 percent against the 1988 period to $1.3 trillion. By comparison, the assets held by U.S. banks totaled $3.2 trillion at the end of September.

Sheshunoff said a three-tiered thrift industry is emerging. The top layer is made up of over 1,700 well-capitalized, profitable institutions which continue to finance home ownership, primarily with savings deposits.

Next come troubled thrifts which "due either to bad location, bad management, or bad luck find themselves undercapitalized and often losing money." Such institutions face a bleak real estate outlook." "Third are the federally owned thrifts that have officially died and are currently between owners," Sheshunoff said.

The largest year-to-year industry change was seen in the Northeast, where

thrifts incurred nine-month losses of $1.5 billion, compared to profits of $625.7 million in the same period of 1988. The report said the losses resulted from the region's slumping real estate market.

Sheshunoff said Western real estate woes "hammered earnings" in the region. One particular trouble spot was Arizona, where thrifts saw an $859 million increase in repossessed real estate and other assets.

The Arizona real estate debacle also affected California thrifts, which had a $1.3 billion collective loss. But the largest losses were in the Southwest, with a total of $6.1 billion - $4.7 billion in Texas alone.

S&Ls were profitable in 21 states and the District of Columbia. Profits were concentrated in the Midwestern and Mid-Atlantic states. Ohio S&Ls recorded the largest combined income of $91.2 million through September followed by Illinois, Michigan and Wisconsin.

"One of the greatest challenges facing the thrift industry is the continued rise of repossessed assets," Sheshunoff said. "Nationwide, these assets comprised of mostly foreclosed real estate total $35.7 billion.

"Add to this real estate held by banks and federal regulatory agencies, plus nonperforming real estate loans, and the magnitude of the supply of troubled real estate becomes apparent," the report said. "In Texas alone, it totals over $40 billion."

#90017u1519 01/17/1990 ~United Press International

(JAN. 17) UPI - There is a possible break this morning in the cocaine wars in Colombia. A written message signed by the self-proclaimed ''Extraditables'' hit squad says the group will stop drug trafficking, assassinations and terror attacks in exchange for fair treatment of their families. The statement says the terrorists are willing to accept a government victory in the cocaine war. The statement was read to reporters in Medellin by two freed kidnap victims.

Reports from Bogota say reporters were told to go to a working-class neighborhood in the city. The two kidnap victims were in an automobile in the neighborhood and one of them read the statement. It could be the first response to a peace initiative by three former Colombian presidents, who said the drug traffickers could receive more lenient treatment if they gave up the war they declared on the government on August 25th.

Iran's spiritual leader, Ayatollah Ali Khameini, says Iran attaches ''great importance'' to the Islamic zeal of the people in Soviet Azerbaijan. Iran's news agencies during the past two weeks have reported that thousands of people assembled on the Soviet side of the Arias River

to chant Islamic slogans. The reports indicate that scores of Azerbaijanis swam across, some using inflated tires to reach the Iranian shore. Another 11-thousand Soviet troops are in Azerbaijan in an attempt to end Moslem-Christian warfare.

The nation's merchandise trade deficit grew in November to the highest level of 1989... at 10 and one-half-BILLION dollars, up slightly from the month before. The Commerce Department report issued today surprised financial analysts expecting the trade gap to improve to 10-BILLION dollars. The 10 and one-half-BILLION-dollar November shortfall beat October's 10-point-two-BILLION-dollar deficit as the year's highest.

Another government report shows that resolution of the Boeing strike pushed U-S industrial output ahead four-tenths of one percent in December. The Federal Reserve revised November figures to show a three-tenths of one percent gain. The Fed says freezing weather throughout much of the nation in December caused a sharp rise in utility output, and some disruptions in petroleum refining and construction industries.

#90017u1521 01/17/1990 ~United Press International

NEW YORK (JAN. 17) UPI - A leading oil trader forecast Wednesday that crude oil prices will drop more than 25 percent in the next six months and then more than double in the 1990s in oil's ''last hurrah'' as an energy source.

''I believe very strongly that this is going to be both the decade of oil's pre-eminence and its demise,'' Peter Beutel of Elders Futures in New York said at a news briefing for energy reporters.

''It's my very firm opinion that the 1990s may well be oil's kind of 'last hurrah,''' the analyst and trader on the New York Mercantile Exchange said. ''We're coming into the last 'bull market' for oil.''

He said there was ''better than a 50-50 chance crude prices will fall to $15 a barrel in the next six months,'' a drop he said would be sufficient to spur the 13-nation Organization of Petroleum Exporting Countries to discipline overproducing members. OPEC pumps more than one-third of the world's oil.

Once OPEC has again limited output, prices will rebound to about $30 a barrel on the Merc, Beutel forecast.

Prices of the U.S. benchmark West Texas Intermediate crude have been recently running between $20 and $23 a barrel on the Merc.

But world oil markets have been indicating ''we're headed into a situation

where the oil is going to rise in price very dramatically'' in the 1990s, Beutel said.

The current price range around $20 a barrel is too low to provide sufficient incentive for the development of alternative energy sources, Beutel said.

But as crude prices rise later in the decade, the incentive will be provided to develop lower-priced energy sources, he said.

Oil company executives he had talked to, Beutel said, ''see the handwriting on the wall.'' More and more, they refer to themselves as ''energy companies,'' he added.

Environmental pressures for cleaner fuels that do not pollute the air ''will place as much upward pressure on prices as supply and demand,'' he said.

The analyst said the economies of the world's two leading industrial nations - Japan and the United States - that have benefited most from low oil prices will be challenged to maintain their economic pre-eminence in the 1990s, the decade of higher oil prices.

He believed the 50 percent drop in crude prices in 1986 helped pressure the Soviet Union to open up its economy and society, because oil accounts for 60 to 80 percent of Soviet earnings of hard currencies.

#90017u1522 01/17/1990 ~United Press International

WEST BERLIN (JAN. 17) UPI - A former East German Politburo member testified Wednesday that Erich Honecker acted alone when he ordered police to crush pro-democracy demonstrations last fall, a move that eventually led to his downfall.

''He took the matter into his own hands,'' Guenter Schabowski told an official commission inquiring into police violence against protesters last October.

Among officials testifying at a commission hearing in East Berlin was Egon Krenz, a longtime member of Honecker's Politburo who replaced the ousted chief for two months until he too was forced to resign in early December.

Krenz said the Politburo was dominated by a handful of leaders who did not consult with the rest of the members and claimed Honecker had lost touch with reality, and ''thought in unrealistic perspectives.''

''There was a domination by people who wrongly assessed the entire country

'' said Krenz of the Politburo, which was abolished last December as part of a series of reforms that also included the abolition of the Communist Party's exclusive right to rule the country.

Krenz, citing a ''pledge of secrecy,'' refused to answer a question about links between the ruling Communist Party and the State Security police, which is now being dismantled, the East German news agency ADN reported.

Schabowski testified Honecker personally ordered the violent police crackdown on pro-democracy demonstrators who took to the streets during celebrations marking the state's 40th anniversary Oct. 7-8 last year.

''The wrong assessment of the situation was a principle, it was an element of policy,'' said Schabowski.

But ADN reported members of the commission scoffed when Schabowski testified that he did not learn of the violence until Oct. 9, saying the officials dismissed the claim as ''grotesque'' and ''schizophrenic.''

Schabowski said Honecker discussed the crackdown only with his chief of security, Erich Mielke. During the demonstrations, Mielke was seen directing units of the State Security police that charged demonstrators with batons, tear gas and water canons.

The new, reform-minded East German government has given in to pressure to abolish the hated secret police force, but is facing increasing demands that it be dismantled more quickly.

Thousands of angry protesters Monday stormed the State Security headquarters in East Berlin, looting the building and causing millions of dollars of damage.

#90017u1531 01/17/1990 ~United Press International

(JAN. 17) UPI - The physician treating a comatose five-year-old who survived 40 minutes submerged in an icy drainage reservoir says the child has only a slim chance of surviving without brain damage. Dr. Craig Futterman says most of the boy's major organs- including his brain, lungs and liver- suffered some damage in the incident. He says the primary concern, however, is the boy's brain, which has swelled.

A newspaper report report says the nation's ''murder capital'' already has jumped ahead of last year's record-breaking homicide rate, recording 25 slayings since 1990 began. January 1989 found a record 52 murders in Washington, D-C, which recorded 438 deaths last year for the highest per-capita murder rate in the nation.

A population control group is urging couples to have smaller families. The Zero Population Group issued a report saying the only lasting answer to the nation's environmental woes is more efficient consumption and a ''smaller U-S population.'' The group says efforts to relieve environmental consumption will be undercut by continued population growth.

#90017u1565 01/17/1990 ~United Press International
PRAGUE, CZECHOSLOVAKIA (JAN. 17) UPI - The Soviet Union has agreed in principle to withdraw all 80,000 of its troops from Czechoslovakia, a Czech Foreign Ministry spokesman said Wednesday.

Spokesman Lubos Dobrovsky, at a news conference following two days of Soviet-Czechoslovak talks, said a timetable for the pullout must still be worked out, but said both sides are in ''complete agreement'' that all Soviet troops eventually would leave the country.

There was no immediate confirmation from the Soviet delegation, but the official Czechoslovak news agency, CTK, quoted Soviet officials in Moscow as saying the talks yielded ''positive results.''

The Soviet officials also told the news agency that the possible withdrawal of Czechoslovak troops would not be linked to talks underway in Vienna on reductions of conventional forces in Europe.

The Soviet delegation in Prague was said to be trying to link any troop withdrawal to the reduction talks that reopened Tuesday in Vienna, a move the Czechoslovak delegation rejected.

The Prague negotiatons adjourned late Tuesday and were scheduled to resume early next month in Moscow.

''The date for signing the (final) agreement is not the burning issue here. The burning issue is that the troops are withdrawn,'' Dobrovsky said at the news conference.

He quoted Soviet Deputy Foreign Minister Ivan Aboimov, the head of the Soviet delegation, as saying the ''ultimate goal of our talks is the complete withdrawal of Soviet forces from Czechoslovak territory.''

''In this respect, there was perfect agreement between the two sides from the beginning,'' Dobrovksy said.

Czechoslovakia has asked Moscow to pull out all 80,000 of its troops by the end of the year. The Czechoslovak delegation asked the Soviets Tuesday to withdraw at least half its forces prior to elections scheduled for early June, Dobrovsky said.

Soviet army troops have been deployed in Czechoslovakia since the 1968 Warsaw Pact invasion that crushed the Prague Spring reform movement.

The last vestiges of the hard-line communist leadership that had ruled Czechoslovakia since that time, including President Gustav Husak, were

swept aside in the face of mass popular demonstrations late last year. The current leadership of the Warsaw Pact nations on Dec. 4 signed a statement condemning the 1968 invasion.

The Czechoslovak talks come amid a growing number of calls in other East Bloc countries for the removal of Soviet troops.

In Poland, a leading Solidarity priest, the Rev. Henryk Jankowski, spoke out against the Soviet military presence in a sermon last week, saying the deployment of large standing armies was ''nonsense and un-Christian.''

BUCHAREST, ROMANIA (JAN. 17) UPI - The trials for four top officials of former Romanian dictator Nicolae Ceaucescu will begin within days, the general prosecutor told Bucharest Radio Wednesday.

Three former Politburo members and a security chief will face charges ''this weekend or next week,'' said prosecutor Gheorghi Robu.

The site and exact timing of the trials and were not specified, nor were the charges against the highest officials to face a court since Ceausescu was ousted Dec. 22.

The provisional government run by the National Security Front has promised that members of Ceausescu's regime would be brought to justice.

It remains unclear, however, how many people face trial.

Robu told the radio station that among the first leaders to be prosecuted are former Politburo members: Manea Manescu, vice president of council of state and second to Ceausescu in the government; Emil Bobu, No. 3 in the Communist Party behind the Ceausescus; and Vice Prime Minister Ion Dinca. Also up for trial is Interior Minister Tudor Postelnicu, who had authority over some aspects of security.

A secret military tribunal convicted and executed Ceausescu and his wife, Elena, for genocide, corruption and anti-state offenses on Dec. 25.

Military trials have already begun in the city of Sibiu for members of Ceausescu's secret police, accused of killing protesters in last month's pro-democracy revolt. Some prison sentences have been issued.

Sibiu, 150 miles north of Bucharest, was the scene of fierce fighting between loyalist members of the Securitate and pro-democracy forces.

The nation is most anxious for the trials of the Ceausescus' sons, Nicu and Valentin. Although they are in custody, trial dates have not been announced.

Nicu Ceausescu, 40, has been portrayed in the newly freed press as a playboy who abused his positions as minister for youth and party chief in

Sibiu.

Confronted by angry demonstrators, the provisional government rescinded its pledge that the Ceausescus would be the last to be executed for their crimes in Romania. Citizens now have the option of reinstating the death penalty in a Jan. 28 ballot.

WASHINGTON (JAN. 17) UPI - A teacher wounded one year ago in the schoolyard massacre at Stockton, Calif., lobbied Congress and the White House on Wednesday for a federal ban on assault weapons.

Janet Geng appeared at a Capitol Hill news conference with officials of the Coalition to Stop Gun Violence and the National Education Association as well as with District of Columbia City Council Chairman David Clark.

She gave a vivid account of how a gunman wielding an AK-47 assault rifle repeatedly sprayed bullets across the playground at Cleveland Elementary School during recess on Jan. 17, 1989.

''The man was standing in a military stance. At this moment, I realized we were being fired upon,'' she recalled. ''We had no protection - nowhere to hide. The doors to the building were locked. We were like animals ready for the slaughter.''

Five children, including a girl Geng had been talking to when the shooting erupted, were killed and 29 other youngsters plus Geng were wounded. Geng was hit in the leg. A year later, she said, she still suffers from chronic pain, numbness and stiffness.

The shooting left a number of children permanently disabled, and more than 100 remain in counseling, she said.

Geng, a mother of two boys, brought with her a petition signed by 59 members of the Cleveland school staff appealing to President Bush to support a ban on assault weapons. She said she would deliver the petition to the White House.

Bush ordered a freeze on the importation of semiautomatic assault rifles in March, but the Coalition to Stop Gun Violence said the ban should be extended to all domestically manufactured assault weapons.

Many state legislatures have considered such legislation, but California is the only state to adopt an assault weapon ban. Maryland passed a seven-day waiting period for assault weapons purchases and Virginia requires that people trying to buy assault weapons undergo a background check.

PLATTE CITY, MO (JAN. 17) UPI - An Army major who told police he accidentally dropped his wife from an 80-foot-high hotel balcony while sweeping her up in a romantic gesture will be arraigned for first-degree assault, a prosecutor said Wednesday.

David Schneider, 34, a major in the Army at Fort Leavenworth, Kan., told police he was carrying his wife, Deborah, 34, when he stumbled and accidentally dropped her over a balcony rail at an Embassy Suites Hotel in Kansas City on Nov. 4.

Deborah Schneider, who is expected to recover fully after lapsing into a week-long coma following the fall, ''has no memory'' of the incident, County Prosecuting Attorney Vic Peters Peters said.

''He's charged with first-degree assault by pushing his wife off the balcony,'' Peters said. ''He told the police that he was carrying her and

he tripped. He said it was a romantic gesture gone awry.''

On Tuesday, a judge in Circuit Court ordered Schneider held in lieu of $25,000 bond. Peters said Schneider posted bond and was free Wednesday under orders to appear in court for arraignment Jan. 25.

A 15-year-old girl told police she saw Schneider push his wife over the 3-foot-9-inch barrier on the eighth floor of the hotel atrium, the prosecutor said.

''She saw him put a hand on (his wife's) chest, the other hand behind her and flip her over (the balcony),'' Peters said.

The prosecutor described the balcony as a low wall on the edge of the atrium.

#90017u1645 01/17/1990 ~United Press International

CROWN POINT, IN (JAN. 17) UPI - An unemployed factory worker charged with murdering a sheriff's deputy and his wife and then incinerating their bodies was ordered held Wednesday without bond.

Magistrate T. Edward Page refused to set bond for suspect George Francis Swetkey, 51, of Hobart. Swetkey is charged with shooting Lake County sheriff's deputy Gary Rosser, 41, and strangling his wife, Teresa, 30.

Police said Swetkey told them he had offered to sell Rosser a house that had been forfeited to the government and asked Rosser to provide $26,000 cash as payment. When Rosser arrived at Swetkey's house with the money Saturday afternoon, Swetkey told the deputy the transaction was a hoax and shot him in the head, police said.

Swetkey then allegedly strangled Rosser's wife, put both victims in her car, drove it to Gary and set it afire.

Both bodies were burned beyond recognition and positive identification was made through dental records. An autopsy showed Rosser was still alive when the fire was set, the coroner's office said.

Lake County Sheriff's Police Chief James Reyome said the case is not closed despite Swetkey's arrest.

Rosser was cooperating in a federal investigation of corruption in Lake County government. Several county officials already have been convicted as a result of the investiation and Rosser was scheduled to testify later this month against a fellow sheriff's deputy in a related case.

#90017u1653 01/17/1990 ~United Press International

ANCHORAGE, AK (JAN. 17) UPI - Alaska's rigorous 1,150-mile Iditarod sled dog race has attracted more mushers than any time in its 18-year history, and officials said Wednesday that might be thanks to the new cash payment being awarded to every finisher.

Seventy-seven men and women, most from Alaska but a dozen from six other states and three European countries, have signed up to run the Anchorage-to-Nome marathon across Alaska. If no one drops out before the March 3 start, this year's number of racers will top the 1986 starting lineup of 73 mushers, as sled dog drivers are called.

The new prize just for finishing the grueling trek may have attracted more mushers to attempt the challenge this year, said Joanne Potts, an Iditarod race official.

The top 20 finishers share a $250,000 purse, with $50,000 for the winner and lesser amounts to the next 19 with the 20th place picking up $3,000.

For all but the top competitors, just finishing this punishing race across Alaska's winter wilderness is often accomplishment enough. But this year, for the first time, a new rule gives mushers an additional incentive to finish no matter how far back in the pack they are.

A $1,000 finishing award will be paid to each musher who reaches Nome after the top 20, Potts said. Although the completion prize may have attracted a few more entrants, it does little more than pay back the bulk of the entry fee mushers must pay to help cover the expense of arranging a race across Alaska.

What was believed to be the last entry, the 77th, arrived Wednesday, postmarked by the midnight Monday deadline for signing up.

Three tough former champions are in the race: defending champ Joe Runyan, three-time winner Susan Butcher and four-time winner Rick Swenson, all Alaskans.

The race includes two prominent senior citizen mushers, Joe Redington, the 72-year-old founder of the Iditarod, and 84-year-old Norman Vaughan, who was driving dog sleds 60 years ago in Antarctica with Adm. Richard Byrd, the explorer.

An Englishwoman who finished last two years ago, Lesley Monk, entered and so has her husband Roy. John Suter, the man who became famous running large black poodles, is in the race.

This was to be the first year the Soviet Union had entrants, two invited mushers from the Soviet Far East. But new Soviet flight rules imposed on a Nome airline grounded the Soviets on the wrong side of the Bering Strait, Potts said. The Soviets were unable to reach Alaska in time to begin several months of needed training with dog teams supplied by Butcher.

Mushers start with up to 18 sled dogs. For the last several years, the top teams have spent about 11 1/2 days racing to Nome. Runyan won last year's Iditarod in 11 days, 5 hours, 24 minutes and 34 seconds. Those at the back of the back have needed about three weeks cross Alaska by dog team.

#90017u1666 01/17/1990 ~United Press International

WASHINGTON (JAN. 17) UPI - President Bush met with his top crime-busters Wednesday as he readied an updated anti-drug plan that is to include an increased role for the military, more federal agents and a possible death sentence for druglords.

Bush, struggling to bring the nation's rising drug problem under control, is to announce his proposed strategy next Thursday in a speech at the White House, the administration said.

In brief remarks Wednesday, prior to a 75-minute meeting with law enforcement directors and military officials, Bush vowed to ''renew our determination to defeat drugs, defeat crime and destroy the kingpins behind it.''

Bush said his first anti-drug strategy, mandated by Congress and announced last fall, has helped achieve ''great progress'' by expanding the battle in interdiction, law enforcement, education and treatment.

But he said more needs to be done and again called on Congress, which reconvenes Tuesday, to pass the rest of his 1989 anti-crime package, particularly legislation to toughen sentencing and expand the death sentence.

Administration sources say that although an overall cost has not yet been determined, the president's updated anti-drug strategy is expected to cost from $10 billion to $11 billion, about 10 percent more than current spending.

Sources also say the package, drafted by federal anti-drug chief William Bennett, calls for hiring more FBI and Drug Enforcement Administration agents, and is likely to seek a death sentence for drug kingpins, even if they or their organizations are not directly involved in a murder.

The strategy will seek an increased role for the military in drug interdiction. A centerpiece of that initiative was to be stationing of U.S. warships off Colombia, but due to Latin American concerns about gunboat diplomacy that proposal has been placed on hold, maybe permanently.

''The updated strategy will generally mirror the first strategy - the idea being more is better - more federal agents, more and better treatment facilities, more of everything,'' said one administration official.

Sources say Bennett, in the draft strategy he submitted to Bush last week, also recommends the designation of New York, Los Angeles, Miami and Houston as ''high-intensity drug trafficking areas.''

Such a designation would make the cities eligible for additional federal assistance. Last year, the government provided emergency aid to combat a cocaine crisis in Washington. But the results have been grim.

''We have failed to turn the corner in this very city,'' said Bush, noting that as of Wednesday the district had 25 reported homicides this month, far ahead of the 1989 pace when the ''nation's murder capital'' had a record 438.

Bush spoke to reporters in the Rose Garden before meeting with the heads of more than a dozen federal agencies, including: Attorney General Dick Thornburgh, DEA Director Jack Lawn, FBI Director William Sessions and Bennett.

Last year the president, in addition to proposing a $7.9 billion anti-drug strategy, which Congress boosted to more than $9 billion, introduced a $1.2 billion anti-crime package.

Congress approved the bulk of the anti-crime legislation, such as funding for more jails and federal prosecutors. But it failed to act on measures to toughen sentencing and expand the death sentence.

Bush, in calling for prompt action on those measures Wednesday, said "the last thing" that federal lawmen need "is for Congress not to move or to tie their hands."

Rep. Charles Rangel, D-N.Y., chairman of the House Select Committee on Narcotics Abuse and Control, has complained that the White House has failed to wage an adequate drug war.

On Wednesday, Rangel, as president of Americans for Democratic Action, issued a blistering review of Bush's first year in office, including his handling of the drug problem.

''The American people are rightly aroused by the widening epidemic of

drugs,'' he said. ''But again the Bush administration prefers to make the nightly news with more TV spectaculars rather than getting at the root causes of drug addiction, its prevention and its treatment.''

Bush offered his own overview of the drug war Wednesday, saying, ''We have seen great progress where it counts - in the street, where record amounts of cocaine have been seized.''

Federal law enforcement experts, however, say the record seizures are not because of additional interdiction, but reflect an increased amount of drugs being smuggled to the streets.

#90017u1677 01/17/1990 ~United Press International

UNITED NATIONS (JAN. 17) UPI - The United States vetoed Wednesday a U.N. Security Council resolution that sought to declare a U.S. military raid on the home of Nicaragua's ambassador in Panama City a violation of international law.

U.S. Ambassador Thomas Pickering cast the negative vote as 13 of the council's 15 members voted in favor of the resolution. Britain abstained.

The U.S. negative vote constituted a veto because the United States is one of five permanent members of the Security Council, who can block any resolution considered against their national interests. The other permanent members are the Soviet Union, China, Britain and France.

The council was convened at the request of Nicaragua, which complained that U.S. troops ransacked the home of its ambassador Dec. 29, nine days after the United States invaded Panama and ousted Gen. Manuel Antonio Noriega.

Nicaraguan President Daniel Ortega, in retaliation for the U.S. military action, expelled 20 U.S. diplomats from Managua the following day despite an apology from President Bush.

Pickering called the raid an ''honest mistake'' and said U.S. troops had been instructed to respect diplomatic missions in Panama City.

''The inviolability of diplomatic residences is a matter of real concern to us all,'' Pickering said.

The vetoed resolution asked that the raid be declared in violation of international law, specificially the Vienna conventions on diplomatic and consular relations.

Nicaragua, which has been feuding with the United States in the Security

Council for years, was successful in getting the Washington-based Organization of American States on Jan. 8 to condemn the U.S. raid.

#90017u1691 01/17/1990 ~United Press International

LONDON (JAN. 17) UPI - Union officials Wednesday rejected Ford Motor Co.'s new offers as a one-day strike by 9,000 workers brought production to a halt at ten major Ford plants in Britain.

Union leaders, who met for four hours with Ford negotiators in London, said they would recommend that their members reject the latest offer by the company, including a 10.2 percent pay raise in the first year of a new contract. The company also offered for the following year an eight percent increase or a rate matching inflation plus 2.5 percent, whichever the highest.

Ford workers staged their one-day action in a show of support to the negotiating union leaders and several hundreds demonstrated in front of the negotiations building.

The new offer amounted to a raise of half a percentage point for the second year over the previously proposed contract, and other incentives included an extra day of vacation for employees who had worked for ten or 25 years. A Ford spokesman said this was the company's final offer and "probably the best in the motor industry."

Talks, however, broke down, with union leaders representing all of Ford's 31,800 workers saying they would recommend that workers reject the offer in a ballot vote Tuesday. If a majority of Ford workers rejects the offer, a strike will be called next week at all Ford plants in Britain.

Workers belonging to the two main trade unions at Ford - the Transport and General Workers Union and the Amalgamated Engineering Union - account for 90 percent of the workforce, Ford said.

The unions are bargaining for more substantial salary hikes and fewer hours of work in their 39-hour week. Ford said the work stoppage could result in a loss off $29 million.

The Ford negotiations are seen as a critical pacesetter in the private sector by the British government, which is seeking to keep public sector pay demands down to fight down inflation.

#90017u1712 01/17/1990 ~United Press International

SEATTLE (JAN. 17) UPI - The $300 million growth in the nation's trade deficit for November, reported Wednesday to be $10.5 million, was caused in part by a 48-day strike against the Boeing Co. that cut airplane deliveries by more than half.

The Commerce Department reported that imports totaled $40.7 billion in November while U.S. exports slipped to $30.2 billion, down from $31 billion in October.

The strike against Boeing by the International Association of Machinists and Aerospace Workers was blamed for a large portion of the deficit increase, with exported airplanes valued at $537.2 million, compared with $1.4 billion in October.

Robert Dederick, chief economist at Northern Trust Co. in Chicago, said the Boeing strike was not entirely to blame for the November deficit, which analysts had expected to improve slightly to about $10 billion.

"That counts for most of the deterioration in November but it doesn't count for the fact that the trade deficit hasn't improved much since the beginning of the year," he said.

Exports of capital goods decreased in November by $1 billion, while industrial supply exports dropped by $200 million. Automobile and auto parts exports slipped by $100 million.

The Boeing strike began Oct. 4 and ended Nov. 20, the second-longest walkout in the aerospace giant's history. The machinists approved a compromise settlement proposed by a federal mediator that consisted of general wage increases over three years along with bonuses and cost-of-living adjustments tied to inflation.

For the fourth quarter, Boeing delivered 50 planes, far short of the scheduled 94. Boeing spokesman Tom Cole said the company does not provide numbers for scheduled deliveries for individual months, but said based on annual statistics it is safe to assume an average of 27 planes delivered each month, with about 16 of those going to foreign customers.

In October, Boeing delivered 22 airplanes. Fifteen went to overseas clients, with 12 of those delivered after the strike began. In November, with the strike underway for several weeks, Boeing delivered 12 planes, with only four going to foreign customers. With production lines gearing up again in the aftermath of the strike, December deliveries totaled 16 aircraft, with eight sent overseas.

Cole said Boeing has revised its delivery schedule, stetching it out well into the late 1990s. As of Wednesday, the company's backlog of orders totaled 1,716 planes. "Catching up is a difficult thing to determine," Cole said. "But we are back up to full production."

#90017u1740 01/17/1990 ~United Press International
WASHINGTON (JAN. 17) UPI - The Soviet Union bought 525,000 metric tons of U.S. wheat Wednesday, putting the total for its wheat purchases in the past eight days at 1.5 million tons, the Agriculture Department said.

The sales all were made at subsidized prices through the Export Enhancement Program. The latest sale was worth nearly $77 million based on Chicago prices.

In a related development, U.S. officials announced that the second round of negotiations toward a new U.S.-Soviet grain agreement were scheduled for March 21 and 22 in Vienna. Since the mid-1970s, the superpowers have used long-term agreements to regulate grain sales between the nations. The current agreement, which expires late this year, obligates the Soviet Union to buy nine million tons of U.S. grain annually.

Until last week, the Kremlin made few wheat purchases from the United States, preferring to buy huge amounts of corn. Analysts have said feed grains offered more attractive prices and Soviet officials wanted to see the impact of new policies aimed at persuading Soviet farmers to sell more wheat to the state.

There have been reports that the reforms, which include a plan to pay farmers in "hard currency" for increased deliveries, are falling short of their goals.

Since the fiscal year opened last Oct. 1, the Soviet Union has purchased 2.29 million tons, or 84.2 million bushels of U.S. wheat. The eight-day string of purchases was the equivalent of 55.1 million bushels.

Terms of the latest sale call for delivery of 350,000 tons of hard red winter wheat and 175,000 tons of northern-dark northern spring wheat in March. Four exporters were given subsidies worth $18.73 a ton, or 51 cents a bushel, for making the sale.

The Soviet Union was the No. 1 export market for U.S. grain in fiscal 1989 buying a record 21.7 million tons of corn and wheat. So far this fiscal year, the Kremlin has purchased 11 million tons of U.S. corn, 795,000 tons of soybean meal and 217,900 tons of soybeans.

HOLLYWOOD (JAN. 17) UPI - In a first for the Academy Awards, this year's show will feature live presentations beamed via satellite from around the world, including Moscow, the academy announced Wednesday.

Gilbert Cates, producer of the 62nd annual Oscar show, to be broadcast by ABC television from the Los Angeles Music Center March 26, said the academy wants the presentation to ''reflect the dramatic changes of today's world.''

''More than 1 billion people in approximately 90 countries watch the Academy Award presentations, celebrating the power of movies to touch the human experience,'' Cates told a news conference.

''Consequently, this year we are making the arrangements to go live via satellite ... where presentations will originate from an Oscar party in each city.''

Along with Moscow, the participating cities are London, Tokyo, Buenos Aires and Sydney.

The awards show will mark the first time satellite inserts from five continents will be aired in connection with the Oscar presentations.

Cates said all nominees of the various awards would be present at the Music Center but announcement of some of the victors may be made from the foreign capitals. He added that specific categories that might be announced abroad were not yet decided.

He also said it has yet to be determined which individual national film figures would appear in the participating cities.

#90017u1785 01/17/1990 ~United Press International

WASHINGTON (JAN. 17) UPI - Vice President Dan Quayle will travel to Panama, Honduras and Jamaica Jan. 27-29 as part of a Latin American diplomatic mission ordered by President Bush.

In an announcement, the vice president's office said Quayle would be in Honduras for the inauguration of Rafael Callejas as president, where he will meet separately with visiting heads of state from the region also in attendance.

Officials previously had said the vice president would head to Panama on Bush's behalf to meet with the newly installed president, Guillermo Endara.

Following Latin American condemnation of the U.S. invasion of Panama, Bush acknowledged he was concerned about having damaged relations in the hemisphere and announced he was dispatching Quayle for the ''very, very important'' mission of diplomatic fence-mending.

Sensitivities in the region were also aroused when word leaked that the United States had dispatched warships earlier this month for the waters off the Colombian coast as part of a drug interdiction effort. That project has since been put on hold.

The vice president, who declined to describe the mission as a fence-mending foray, said he will be consulting and listening to leaders in the hemisphere.

The vice president's office also said Quayle would travel next month to South America, attending presidential inaugurations in Chile and Brazil from March 10 to March 16 with other stops still undetermined.

#90017u1799 01/17/1990 ~United Press International

WASHINGTON (JAN. 17) UPI - Backstairs at the White House:

The U.S. Marine Band, known as the President's Band, is traveling to the Soviet Union next month for an 18-day concert tour.

Col. John Bourgeois, conductor, is preparing a program that should bring the music-loving Russians to their feet with rousing American numbers and the familiar classics.

The concert swing is part of a cultural exchange program being encouraged with the United States's new hands-across-the sea rapprochement. The Red Army Chorus was a big hit in Washington and other cities when it recently toured the United States.

Bourgeois said his repertoire also will include songs from the musicals ''Carousel'' and ''Porgy and Bess.'' In addition. ''Ol' Man River'' will be sung by a Marine Corps soloist.

In a tribute to his Soviet hosts, the red-coated band will play ''Moscow Nights'' and also ''America.'' The first concert will be held on Feb. 5 or 6 in Moscow. Leningrad, Minsk, Kiev are among the other stops.

Barbara Bush has become a tour guide when it comes to the upstairs family quarters at the White House, and she delights in showing off the historic mementos.

The president's sisters and brothers chipped in to buy a new mattress for the 7-foot Lincoln bed in the Lincoln suite - a bed, incidentally that Abraham Lincoln never slept in, but was used for guests in his era.

It seems that Bush houseguests, who were invited to spend the night, did complain about the mattress on the bed. The new one is custom made.

The first lady enhanced her knowledge of the Lincoln era with a visit from Pulitzer Prize-winning historian David Donald, who delivered the first of a series of White House lectures on the presidency recently.

Donald showed Bush the secret doorway in the yellow oval sitting room on the family floor, and the window, down a narrow corridor, looking out on

Pennsylvania Avenue where Lincoln made speeches during the Civil War.

The Yellow Oval Room also was used as an office by Franklin Roosevelt and Harry Truman. It is the room where Roosevelt learned that Pearl Harbor had been bombed on Dec. 7, 1941.

Bush also visited the summer cottage of Lincoln and his wife, Mary Todd, on the grounds of the Old Soldiers Home in Washington, where they retreated during the sweltering summers in the nation's capital in the 1860s.

Bush has read most of the first lady books, but only excerpts of Nancy Reagan's book ''My Turn.''

Still she gives a lot of credit to Mrs. Reagan, who renovated the family suite and made it livable. ''She saved me a lot of trouble,'' said Bush. ''The plumbing works.''

She said she is also grateful to Pat Nixon for the small room that was converted into a beauty parlor. It also was used as a delivery room for the Bushes' spaniel, Millie, and her six puppies.

During her daily 1-mile swims in the outdoor heated pool, Bush listened to a tape of Rosalyn Carter reading exerpts from her book ''First Lady from Plains.'' The waterproof tape recorder, given to her by a friend, was strapped around her waist.

In the Christmas gift department, the President and Mrs. Bush received a present from their Secret Service detail that they cherish. It's a pastel drawing of Millie, and occupies a place of honor on the wall near the mantle of their cheerful sitting room with colorful flowery sofa and chair coverings.

Bush has become hooked on her computer. She learned word processing last summer and says the president now accuses her of ''being married to the computer.''

The first lady is transcribing on the computer her diaries, dating back for 30 years in very small handwriting. She said she definitely plans to write a book, and the dairies will provide her with a starting point. But her memoirs won't be on the stands until after she leaves the White House.

Meanwhile, Ronald Reagan's post-presidency book is expected to be published in early 1991. Reagan, who put the personal touch on all of his speeches, is expected to do a lot of his own writing.

#90017u1842 01/17/1990 ~United Press International

LONDON (JAN. 17) UPI - Foreign Secretary Douglas Hurd, just back from a four-day trip to Hong Kong, told Parliament Wednesday that the colony's Vietnamese boat people must be returned to their homeland and said repatriation was preferable to life in a refugee camp.

Britain drew a storm of international protest when it forcibly sent 51 boat people back to Hanoi late last year. It has repeatedly defended the move, saying Hong Kong cannot cope with more non-political refugees from Vietnam.

Hurd visited a Hong Kong detention center Tuesday, observing interviews with refugees and facing protesters calling for an end to forced repatriation.

''Having seen the (refugee) camps for myself, I am more than ever convinced that return to Vietnam in carefully controlled conditions is preferable to camp life with no hope of resettlement elsewhere,'' Hurd said.

''There is nowhere for those boat people to go,'' he said. ''The policy of repatriation is therefore the right one and I hope that this may soon be endorsed by the international community.''

Hurd also addressed the role of democracy in the future of the British colony, which is to be restored to Chinese rule in 1997.

''An important element in that is the extent and pace of democratization in Hong Kong before and after 1997,'' he said.

Hong Kong has only 10 elected representatives on its 60-man governing council. Liberal activists in the colony have called for that number to be doubled in 1991 and accused Britain of dragging its feet on the issue.

''Our goal is to set in place a system starting with elections to the legislative council in 1991 which will satisfy Hong Kong's aspiration for democracy and which will endure after 1997. I hope after further discussion to be able to announce a decision within the next few weeks,'' Hurd told Parliament.

Hurd said the Chinese government was serious about upholding the joint British-Chinese declaration which guarantees continuation of Hong Kong's system of government for 50 years after its repossession.

He called on China to do more to reassure Hong Kong residents about their future. Hong Kong residents have been worried about the future since Beijing's brutal crackdown on pro-democracy demonstrations in Beijing in June.

Hurd has attempted to ease the colony's concerns by offering 50,000 families the right to move to Britain, a move China has criticized. A Chinese-dominated committee working on a basic law for the colony area further complicated the issue Wednesday.

Members of the Basic Law Drafting Committee, meeting in the southern Chinese city of Canton, proposed that Hong Kong's post-1997 government officials should be required to hold right of abode solely in the territory.

The proposal would exclude members of the 50,000 families from holding government offices after 1997. Hurd had proposed that the 50,000 families be selected based on their contribution - economic and political - to Hong Kong.

#90017u1885 01/17/1990 ~United Press International
WASHINGTON (JAN. 17) UPI - Rep. Sander Levin, D-Mich., met Wednesday with a Japanese legislator critical of American trade policy and emerged from the discussion urging U.S. lawmakers to have a full-scale debate about the nation's future in the world trade market.

Levin, a member of the House Ways and Means Committee and the House Task Force on Trade and Competitiveness, said his meeting with Shintaro Ishihara, a member of the Japanese Diet and co-author of ''The Japan That Can Say No,'' was an ''interesting and amicable'' discussion about U.S.-Japan trade issues.

''What I tried to convey to Mr. Ishihara is that the status quo in our economic relationship won't work anymore,'' Levin said. ''The '90s cannot be a repeat of the '80s ... that means a change among our competitors, espcially Japan, with whom we have the largest deficit.''

Levin said while he agrees with Ishihara's assertions that the U.S. should retool its manufacturing base and become more export-oriented, Japan also should become more consumer-oriented and remove ''major structural impediments'' in its trade policies.

Levin said ''numerous products of great quality'' have been unable to penetrate the Japanese market because of barriers.

''It's a myth that the two markets are equally open,'' the congressman said. ''There are problems of (product) quality in America ... but others, certainly Japan, has to be willing to buy from us.''

Levin said other views expressed in the Ishihara's book, such as American racial prejudice being the root of friction between U.S.-Japan relations, were ''simply inaccurate.''

But Levin said the United States so far has failed to have an in-depth discussion about its future in world trade, even during the 1988 presidential campaign.

He said substantive discussion when Congress passed trade legislation in 1986 became ''twisted'' because of the issue of protectionism.

Levin's meeting with Ishihara came as the Commerce Department announced Wednesday that the U.S. trade deficit reached $10.5 billion last November, the highest level of 1989.

The nation's trade deficit with Japan narrowed to $4 billion last November from October's record $4.9 billion, while the deficit with Western Europe widened to $700 million from October's $460 million, the Commerce Department said.

President Bush's press secretary, Marlin Fitzwater, said the figures showed ''the deficit is moving in the right direction,'' but Levin said the figures should be ''utterly sobering to every American.''

''Any time you have a 100 billion-plus deficit over the long term, there is definitely something wrong,'' Levin said.

#90017u1928 01/17/1990 ~United Press International

WASHINGTON (JAN. 17) UPI - In an unusual public disagreement with Jerusalem, the State Department criticized Israeli Prime Minister Yitzhak Shamir Wednesday, saying his apparent support for placing more settlers in the Israeli-occupied territories does not promote the cause of Middle East.

The State Department was displeased with remarks made by Shamir in a speech last weekend in which he expressed his wish to increase the flow of emigration by Soviet Jews to Israel so new emigres could join civilian settlments in the Israeli-occupied territories.

''We have now seen the text of the prime minister's comments and our characterization of them is, frankly, that they were not helpful,'' said Margaret Tutwiler, a State Department spokeswoman. ''Our position is clear. We do not think that building settlements or putting even more settlers in the (occupied) territories promotes the cause of peace.''

The negative sentiment comes at time when the United States is proceeding with its efforts to promote a Middle East peace initiative.

Secretary of State James Baker has proposed a five-point peace plan that would lead to a meeting of Israeli and Palestinian delegations in Cairo. The Israeli and Palestinian delegations would hammer out details for holding elections in the Israeli-occupied West Bank and Gaza Strip.

The elections would select Palestinian leaders to negotiate with Israel on a final settlement for the territories.

The plan to hold an Israeli-Palestinian dialogue in Cairo has bogged down over the question of which Palestinians would participate and who would choose them. Israeli officials oppose any participation by the Palestine Liberation Organization in selecting the delegation.

Egypt, which will represent the Palestinians in the early phases of the proposed talks, and Israel have agreed in principle to Baker's plan. In an effort to iron out the final details, Baker has proposed a meeting in Washington between himself and the Israeli and Egyptian foreign ministers.

Israel Radio reported Wednesday that Foreign Minister Moshe Arens had talked to Baker by telephone. The radio said an aide to Arens told the Israeli Knesset, or Parliament, that Baker believes the Washington meeting should take place in late February.

Baker met twice this week with Egyptian Foreign Minister Ismet Abdel-Meguid and telephoned Israeli Foreign Minister Moshe Arens. He meets Thursday with Israeli Defense Minister Yitzhak Rabin and will meet with Meguid, probably Friday.

Rabin, a member of the Labor Party, met Wednesday at the White House with Vice President Dan Quayle and national security adviser Brent Scowcroft.

Afterward, he told reporters he had offered his assessment of the peace process and emphasized, ''at the same time, the need of Israel to be strong, to take the risks that are needed for the peace process.''

The long-standing disagreement between the United States and Israel over the settlement issue also surfaced at a time when the United States discussed a proposal to reduce financial aid to Israel and other countries to free cash for new priorities, including Eastern Europe and Panama.

An Israeli Embassy spokesman said the changing situation in Eastern Europe means that Israel will have greater need for United States aid to help resettle new emigres from the Soviet Union and other countries.

Tutwiler said, ''We do not provide U.S. government resources or funds for settlement of new immigrants in the occupied territories.''

But when pressed by reporters about the indirect use of United States

assistance by Israel to help new settlers in the occupied territories, Tutwiler said: ''We would certainly hope that is not going on. That is not our policy.''

#90017u1929 01/17/1990 ~United Press International

ATHENS, GREECE (JAN. 17) UPI - Greece is expected to grant a six-month extension to U.S. military bases on its soil when a bill on the future of the installations is submitted to Parliament next week, officials said.

The conservative New Democracy party and the Pan-Hellenic Socialist Movement, or PASOK, which together hold some 86 percent of the seats in Parliament, have agreed to a U.S. request for a six-month extension.

Greece's three main political parties, which share power in the national unity government of Prime Minister Xenophon Zolotas, decided at their regular weekly meeting Wednesday to introduce a bill in Parliment next week to authorize the extension.

Under an agreement that expired in December 1988, the United States has until May 21 to dismantle the bases, unless a new agreement on defense and economic agreement is signed between the two countries.

But Greece is now scheduled to hold fresh elections by April 8, and the new government that emerges would not have enough time to negotiate a new agreement. Under the bill to be submitted next week, the bases will stay until at least Nov. 21, officials said.

Talks on a new agreement were suspended in May last year, as Greece prepared for general elections. But the June elections, and fresh balloting in November, proved inconclusive, leaving no party with a clear majority in the Vouli, or parliament.

With neither of the two main parties able to form a government, a decision on the future of the bases remained suspended.

The communist-led Alliance of the Left was seen to be responsible for forcing the suspension, because its support was needed to form governments after both elections and the Communists said outright they wanted the bases dismantled.

U.S. Ambassador to Greece Michael Sotirhos held meetings with the leaders of the three main parties late last year to ask for a six-month extension.

Political sources in Greece said President Bush made it clear that, if he received no extension, he would order U.S. troops to begin dismantling the bases immediately, because they needed at least six months to do the job.

Greek Communist Party leader Harilaos Florakis told journalists after Wednesday's meeting that he would vote against the bill to be presented to Parliament next week, but that he would not withdraw from the Zolotas government.

Former Prime Minister Andreas Papandreou, who was voted out of office in June 1989 after eight years in power, said the United States and Greece needed at least two more rounds of discussions on the bases before a new agreement could be signed.

Papandreou said last year that, even if an understanding was reached, his party wanted to put the matter to a referendum before signing an agreement.

New Democracy made it clear it would sign a new agreement on the bases immediately if it came to power.

After Bush's meeting with Soviet leader Michael Gorbachev last month, ushering in a more relaxed atmosphere between Moscow and Washington, Greek officials believed the United States may want to cut back on spending on some of its military bases abroad.

Analysts in Athens, however, said that a cutback in Greece may affect the balance of U.S. relations between Greece and Turkey, traditional rivals in the East Mediterranean.

Consideration of the Greece-Turkey balance, in fact, prompted Papandreou to renege on a campaign promise in 1981 that he would close the bases if he came to power. The broken promise cost him votes among his left-wing supporters in subsequent elections, the analysts said.

(JAN. 17) UPI - China is continuing its repression of pro-democracy dissenters. A report says that in recent months more than 800 Chinese have been sentenced to prison for their involvement in last spring's student-led reform movement. The report- quoting ''well-placed Communist Party sources''- says many of those convicted received 10-year jail terms after secret trials. An estimated 10-thousand people were arrested following the brutal military assault in Beijing's Tiananmen Square.

The biggest alliance of anti-apartheid groups in South Africa is challenging the white-minority government of President Frederik de Klerk to make good on promises of racial reform. The United Democratic Front... which claims to represent three-Million South Africans in 900 organizations... says it has resumed open political activity. Pretoria imposed tough restrictions on the group two years ago, but treason

convictions of U-D-F leaders were overturned on a technicality last month.

#90017u1954 01/17/1990 ~United Press International

TAMPA, FL (JAN. 17) UPI - A Colombian businessman pleaded guilty Wednesday to federal drug trafficking and money laundering charges in a $32 million international case linked to former Panamanian dictator Manuel Noriega.

Gonzalo Mora Jr., appearing before U.S. District Judge Terrell Hodges, pleaded guilty to 32 counts of money laundering and one count of conspiracy to traffic drugs.

Mora was one of nine defendants - including Noriega's personal banker - named in a 33-count money laundering and drug trafficking indictment handed down in 1988.

His guilty plea came one day after an international banking company named in the same indictment pleaded guilty to charges of laundering drug money and agreed to testify against co-defendants, including Amjad Awan, who once was Noriega's banker.

As part of the plea bargain, two divisions of the Bank of Credit and Commerce International agreed to forfeit more than $14 million in certificates of deposit bought with illegal profits.

All of the defendants were scheduled to go to trial Tuesday on charges of helping to conceal the illegal source of $32 million worth of drug profits. The government late Tuesday dropped the charges against another defendant, bank officer Abqal Ashraf.

Jury selection is scheduled to begin Thursday for the six remaining defendants, including Awan, who face 33 counts of conspiracy to import and distribute drugs and launder money.

Hodges agreed Wednesday to allow Mora to withdraw his guilty plea on the most serious charge of conspiracy to traffic drugs if prosecutors fail during the trial to obtain convictions against his co-defendants.

''The sentencing hearing would be deferred until the government has completed its case,'' Hodges told Mora. ''If the government is unable to prove the charge against you, you will be able to withdraw your plea of guilty.''

Mora may not, however, rescind the 32 other guilty pleas. He would face a maximum penalty of life in prison and a $4 million fine if convicted on

the drug trafficking conspiracy charge. He faces 20 years in prison and a $500,000 fine for each count of money laundering.

The case stems from a U.S. Customs Service investigation called Operation C-Chase, which reached its apex in Tampa Oct. 7, 1988, with the arrest of the defendants at a staged bachelor party.

Nationwide, eight indictments charging more than 80 people with laundering drug money were returned.

Federal investigators say the bank officers suggested ways of laundering drug money to an undercover federal agent and supported a policy to accept drug profits. Drug profits were filtered into Tampa from Houston, Chicago, Los Angeles, Miami, Detroit, New York and Philadephia, the indictment said.

The indictment claims BCCI officials would wire money to Panama and deposit it into accounts of dummy corporations. Smugglers would receive checks written from those accounts, investigators said.

When Noriega was indicted on cocaine trafficking charges in February 1988, the operation was moved from Panama to Paris.

The indictment said the money was transferred from Tampa to New York, then to BCCI's European offices and converted to CDs.

WARSAW, POLAND (JAN. 17) UPI - A day-old coal miners' strike in southern Poland gained strength Wednesday as workers at four more mines walked off the job to press demands for higher wages.

The new strikes bring to eight the number of coal mines affected in Poland's worst labor unrest since the Solidarity-led government was elected last June.

Although about 2,500 striking workers at the Kazimierz Juliusz mine returned to work Wednesday, the strikes are the strongest evidence so far of dissatisfaction over the government's economic reform policies, which have triggered huge price increases for basic goods and services.

Solidarity's National Executive Council expressed concern over the price hikes in a statement Wednesday, and the labor movement founder Lech Walesa hinted he might withdraw his support from the government if the economic picture did not improve within three months.

''I give the government until the congress (of Solidarity in April), and after the congress if no decisive changes are taking place it will be necessary to change everything and begin to act differently.''

Walesa did not explain what course he intended to take, and he stressed he remains firmly behind the government for the time being.

The latest wave of strikes began Tuesday at two mines near Katowice, in the Upper Silesian coal region, and three others in the Walbryzch basin in Lower Silesia.

New strikes were reported Wednesday at the Niwka, Grodziec, Jowisz and Jaworzno mines in Upper Silesia.

''This is a typical pay strike. We simply don't have money,'' said Waldemar Grabiszewski, spokesman for the Intrafactory Strike Committee in Upper Silesia.

He said miners were demanding a pay increase of $26 a month, adding, ''If the demands are not met we won't start working.''

Strike organizers have complained that coal miners are underpaid in comparison with workers in other industries and are being squeezed by soaring inflation that has more than doubled the prices for many basic goods in the past few weeks.

Other demands pressed by miners include the restoration of lost benefits, such as free coal allowances, and the elimination of corrupt managers.

But it was clear that not all miners were supporting the strikes. The Civic Committee for Soliarity in Wodzislaw, Upper Silesia, issued a statement Wednesday urging workers to be patient and allow the government's austerity program to work.

''Let us not come with demands that can make the efforts of our government futile,'' the committee said in a statement carried by the official PAP news agency.

''Active strike actions destabilize the situation in the country,'' said the statement, which urged workers to find other forms of symbolic protests.

Prime Minister Tadeusz Maowiecki was scheduled to meet with industry and mining officials to discuss the strikes following a speech to the Parliament Thursday, and a government representative was expected to meet with miners in the strike-bound region on Friday.

#90017u1974 01/17/1990 ~United Press International

ORLANDO, FL (JAN. 17) UPI - Bankrupt Braniff Inc. suffered another blow with the announcement that Merrill Lynch Capital Markets, its best hope to attract a buyer, had abandoned it because Braniff cannot pay its bill.

The companies announced Tuesday night that Merrill Lynch would stop work Friday on trying to sell Braniff and its planes.

Joel Shapiro, one of Braniff's bankruptcy attorneys, said Wednesday that Merrill Lynch withdrew because Braniff could not afford the New York

investment company's fee.

The bankruptcy court order authorizing the hiring of Merrill Lynch provided for Braniff to pay Merrill Lynch a monthly fee, plus any commission for the sale of assets.

Shapiro said Merrill Lynch, which was retained on Oct. 26, had received some compensation from Braniff.

''I do not know whether the December payment was made,'' he said.

The airline's unsecured creditors had asked U.S. Bankruptcy Judge C. Timothy Corcoran III to break the Braniff-Merrill Lynch contract because it drained off assets. A hearing was scheduled on that motion Friday, but with the agreement, the motion was withdrawn.

Shapiro said Merrill Lynch initially tried to sell Braniff as a whole, but when that failed, began to seek buyers for its planes, but also failed at that.

The departure of Merrill Lynch leaves no one but airline employees to try to sell the carrier and its assets, Shapiro said.

''We would hope in the future we would be able to retain them back,'' he said.

''We appreciate the work Merrill Lynch has accomplished and would be pleased to retain its services again,'' David Murchison, Braniff's new chief executive officer, said in a prepared statement. ''However, at this juncture, we must reduce all costs possible.''

Since Murchison was put in charge Jan. 4, Braniff's payroll has shrunk from 190 to 140 employees, said airline spokesman Ann Cook.

The Orlando carrier, which before bankruptcy employed nearly 4,800 people, filed for bankruptcy Sept. 18 and halted all commercial flights Nov. 7. It halted all flights after its last charter flight on Dec. 24.

#90017u1997 01/17/1990 ~United Press International

NEW YORK (JAN. 17) UPI - Lawyers for the city Wednesday tried to discredit the testimony of a doctor who says she contracted AIDS in a public hospital, exposing inconsistencies in the physician's recollection of her own medical history.

Stanley Friedman, a defense lawyer in the $175 million negligence lawsuit filed by Dr. Veronica Prego, hammered away at the dying doctor on the fourth day of cross-examination in state Supreme Court in Brooklyn.

Friedman asked Prego if she was ever given the option of taking the experimental AIDS drug suramin, known to have dangerous side effects, before she was diagnosed as having the disease.

''We never got to that point,'' the doctor replied.

Friedman then pulled out a deposition from one of Prego's doctors who said he had discussed the drug and its benefits with her.

By exposing inconsistencies in the doctor's memory, the defense hopes to discredit Prego, who has testified she pricked herself with an AIDS-contaminated needle she charges was left in a pile of waste by a careless intern.

The Argentine-born doctor, 32, is seeking $175 million in damages from the

intern, Dr. Joyce Fogel, Kings County Hospital, where the incident occurred, and the city's Health and Hospitals Corp., which oversees the Brooklyn medical facility.

The case is believed to be the first trial in which a doctor has claimed hospital negligence caused her to get AIDS.

On Tuesday, Friedman, the lead lawyer representing all the defendants, attacked the doctor for waiting four years after she was infected to file her lawsuit.

The defense has repeatedly tried to get Justice Aaron Bernstein to throw the suit out of court, saying the statute of limitations had passed.

The city claims Prego should have filed suit when she first became infected with the virus on Jan. 12, 1983, rather than when she became sick in 1987.

Also Tuesday, Guardian Angel Lisa Sliwa and model Marla Hanson, whose face was slashed by thugs hired by a man whose advances she had rebuffed, appeared in court to protest what they viewed as the hostile questioning of Prego.

Hanson, 28, whose widely publicized case provoked a national outpouring of sympathy, said that defense questioning of Prego ''reminded me'' of the intense and personal questioning she underwent during the trial of her assailants.

#90017u2005 01/17/1990 ~United Press International

NEW YORK (JAN. 17) UPI - The stock market closed sharply lower Wednesday in active trading, battered by late waves of computerized program selling and earnings disappointments from Alcoa and International Business Machines Corp.

The Dow Jones industrial average, which rose 23.25 Tuesday, tumbled 33.49 to 2659.13.

Among broader market gauges, the New York Stock Exchange composite index fell 1.51 to 186.86 and Standard & Poor's 500-stock index lost 3.35 to 337.40. The price of an average share dropped 29 cents.

Declines led advances 866-636 among the 1,967 issues crossing the NYSE tape. Big Board volume totaled 170,470,000 shares, compared with 186,070,000 shares traded Tuesday.

Analysts blamed the sharp drop on several bouts of computerized program

selling in the last hour of trading. The technique is used to profit on brief price differences between stocks and stock index futures.

"The market has again been captured by them," said Gene Seagle, technical research director at Gruntal and Co., of the computer programs which dictate selling.

Analysts said news that Alcoa's quarterly earnings were sharply lower, and below expectations, started the market off on its afternoon decline and returned Wall Street's focus to fourth-quarter earnings reports. The stock is not only a component of the Dow industrials but of other major market indexes.

Prices fell in early trading after a disappointing earnings report from International Business Machines Corp., which showed profits below analysts' already-lowered expectations. The bellwether Dow component reported earnings fell to $1.04 a share from $3.97 a year earlier, but the 1989 quarter included a $2.4 billion restructuring charge. Some midday bargain hunting pushed the blue chips into the plus column, though, before prices declined again.

Dennis Jarrett, chief market strategist at Kidder, Peabody and Co., noted that the blue chips fared far worse than the broad market. "There were not morethan 1,000 declines so (the broad market) was not hit nearly as bad as the Dow," he said.

"There's also a lot of apathy in the market. No one wants to be too adventuresome with bargain hunting," said Jarrett, referring to the Dow's brief trip into positive territory before the upward momentum fizzled and prices turned lower again.

On the trading floor, Aristech Chemical was the most active NYSE issue, up 1/2 to 25 1/8. Reports late Tuesday said Huntsman Holdings, which owns about 8.7 percent of the company, was evaluating the $26-a-share management buyout offer. Huntsman had proposed a $25-a-share deal. Citicorp followed, up 3/8 to 26 3/8. Varity was third, up 1/8 to third.

Among the other blue chips, Alcoa plunged 5 7/8 to 66 7/8, AT&T fell 5/8 to 42 1/2, IBM tumbled 1 1/4 to 98 7/8, Primerica rose 3/4 to 28 1/2 after reporting fourth-quarter earnings of 87 cents a share, at the high end of expectations, but Westinghouse lost one to 71 3/4 despite reporting a gain in quarterly profits.

Also on the earnings front, Caterpillar tumbled 2 1/8 to 54 7/8. Reports said the company's earnings, expected out Thursday, would be down sharply.

Other aluminum stocks fell along with Alcoa. Reynolds Metals sank 1 7/8 to 52 3/8 and Alcan Aluminium tumbled 1 1/8 to 21 1/4.

Technology issues, which rallied Tuesday, followed IBM down. Digital lost 1 1/4 to 87 7/8, Compaq fell 1 1/4 to 82 5/8, NCR was down 1/2 to 63 1/4, and Hewlett-Packard slumped 7/8 to 45 3/4.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 202,032,740 shares, compared with 217,797,910 shares traded in the previous session.

Prices closed slightly lower in active trading on the American Stock Exchange. The Amex Market Value index fell 0.35 to close at 368.06. The price of an average share lost one cent. Declines led advances 282-258 among the 807 issues traded. Composite volume totaled 18,554,800 shares, compared with 17,873,000 traded Tuesday.

Salomon "put" warrants on the Nikkei index, which effectively function as bets that the Tokyo stock market will fall, led the Amex issues, closing at 4 1/4 on their first trading day.

The National Association of Securities Dealers composite index fell 1.48 to 438.68.

CAPE CANAVERAL, FL (JAN. 17) UPI - The space agency named 23 new astronaut candidates Wednesday to train for space shuttle duty, including the first woman selected to serve as a shuttle co-pilot.

NASA said Air Force Maj. Eileen Collins, 33, of Elmira, N.Y., is a student at the U.S. Air Force Test Pilot School at Edwards Air Force Base, Calif., which has trained many of America's astronauts.

She holds a bachelor's degree in mathematics from Syracuse University and two master's degrees, one in operations research from Stanford University and the other in space systems management from Webster University.

Collins, who is married, and the other astronaut candidates were selected from a group of 1,945 qualified applicants, 106 of whom were granted interviews and medical examinations, NASA said.

NASA said the group ''will report to the Johnson Space Center, Houston, in July to begin a year of training and evaluation, after which they will receive assignments leading to selection for shuttle flight crews.''

Of the 23 astronaut candidates, 11 of whom are civilians and 12 of whom are military officers, seven have been selected for co-pilot training. The others will be trained to serve as ''mission specialists.''

There are a total of five women in the group.

The candidates are the 13th group of astronauts to be selected since NASA started picking crews with the original ''Mercury Seven'' in 1959. The last group of astronaut trainees was named in August 1987.

#90017u2029 01/17/1990 ~United Press International

WASHINGTON (JAN. 17) UPI - Veteran diplomat and Kremlin watcher George Kennan warned Wednesday of ''great difficulty and danger'' for Mikhail Gorbachev because of the reform movement he has unleashed in the Soviet Union and Eastern Europe.

''The situation in the Soviet Union is, at this moment, unstable in high degree,'' Kennan said.

Kennan - instrumental in developing the post-war policy of ''containment'' of Soviet influence - said Gorbachev's economic and political reform program has been an ''extensive failure'' so far, failing to meet the expectations of consumers while fueling ethnic unrest and nationalist movements.

''These, coming at a time when the political institutions of the Soviet

state are in process of basic change, have created a situation of great difficulty and danger for Gorbachev, who is viewed as personally responsible for all these crises and difficulties,'' Kennan said.

Kennan, addressing a one-man hearing by Sen. Joseph Biden, D-Del., of the Senate Foreign Relations Committee, said Gorbachev has made an outstanding contribution to overcoming the tensions of the Cold War and stabilizing a peaceful Europe.

And, although Gorbachev's position is precarious, Kennan said it would be wrong to expect his policies would be drastically changed by a possible successor in the Kremlin.

Kennan, 86 in February, had a unique view of developments in the Soviet Union as a U.S. diplomat in Moscow in 1933-35, 1944-46, and as ambassador in 1952. It was as an envoy in Moscow that he developed the concept of containing Soviet aggression that became the bedrock of U.S. foreign policy for four decades.

Kennan, who remains vigorous and mentally quick despite his years, said there is not much Washington can do to help Gorbachev succeed, considering that the Soviet leader has not asked for direct economic aid and the United States has dire problems of its own. But he called for accelerated movement in negotiations on reductions in conventional forces and arms in Europe.

''The idea that the Warsaw Pact forces could be used by the Soviet Union for an attack on Western Europe is absolute nonsense,'' Kennan said. ''It belongs in a dream world.

''There is no reason not to go in for much deeper cuts in conventional forces than we have proposed,'' he said, noting such cuts would bring economic benefit to both the West and the Soviets.

Kennan said he is concerned about the recent street violence and political unrest in East Germany, and warned the West should not rush to seek the reunification of Germany.

''I would like to emphasize that this is a very, very delicate, dicey, and dangerous situation that we have today (in East Germany),'' he said. ''With a few more days of this, it may turn into a situation where there is no effective government.''

On another point, Kennan said, the reformist governments in Eastern Europe can get adequate financial aid from Western Europe and Japan, because the United States has its own economic troubles.

''I think our first duty is to put our own country in a state it ought to

be before we get carried away giving large financial aid anywhere else in the world,'' Kennan said. ''I think we give too much of it already to a number of countries.''

#90017u2037 01/17/1990 ~United Press International

WASHINGTON (JAN. 17) UPI - Jack Lawn, director of Drug Enforcement

Administration, said the Mexican Embassy assured him Wednesday that there is no investigation or ''basis of fact'' that a slain DEA agent was a drug smuggler.

Lawn said the embassy could provide him no explanation, however, why a documentary on Mexico's government-owned television station Sunday accused DEA agent Enrique Camarena Salazar of having been part of a Mexican cocaine ring.

''There's nothing to it ... (but) they told me they couldn't explain how it got on TV,'' Lawn said following anti-drug meeting at the White House with President Bush.

Repeated calls to the Mexican Embassy in Washington went unanswered.

Lawn, asked if he were angry or if Mexico owed the United States an apology, said that ''you don't become angry until you see the basis of the allegation and we were told that the government of Mexico'' did not initiate it.

The Mexican TV documentary was broadcast following last week's NBC mini-series, ''Drug Wars: The Camarena Story,'' which depicted the 1985 kidnapping of Camarena by Mexican police. He was found dead a month later. The program also showed complicity in drug-trafficking by Mexican officials.

The Mexican TV documentary said Camarena ''was one more drug trafficker, infiltrated in the American anti-drug agency, who betrayed his accomplice and partner Rafael Caro Quintero and for that reason was murdered.''

The network quoted no sources, saying only that ''clear evidence had been uncovered.''

Lawn said, ''I spoke to the Mexican Embassy an hour ago. They said they had no information of any alleged involvement of Camarena, and they have no investigation under way and no intentions of initiating any investigation because they have no basis of fact to pursue one.''

The DEA director also said, ''The embassy here told me that they had just heard from their attorney general, who had contacted our attorney general.''

The DEA had earlier issued a statement saying there was ''not one scintilla of evidence'' that Camarena was involved in drug smuggling, and that there was ''no doubt whatsoever'' that druglords killed him because he was an effective agent.

#90017u2057 01/17/1990 ~United Press International

NEW YORK (JAN. 17) UPI - The dollar came under the contradictory influence Wednesday in New York trading of worse-than-expected U.S. trade figures and deepening ethnic strife in the Soviet Caucasus, but a sharp decline in the stock warket tipped the balance to send the dollar mostly lower.

Heavily bearish for the dollar were Commerce Department figures showing the U.S. trade deficit widening in November to $10.5 billion from $10.2 billion the month before, dashing hopes of an improvement. Foreign exchange markets usually pay close attention to U.S. trade deficits.

"The number was clearly a setback," said James Merrill, senior vice president and chief international economist for McCarthy, Crisanti & Maffei. Analysts had been looking for a deficit under $10 billion.

The dollar rose on news that the Soviet government said its troops could use force if necessary to quell fighting between Azerbaijanis and Armenians in the Transcaucasus. This was seen as a blow to Soviet President Mikhail Gorbachev, and, by extension, as a potential threat to the East European political and economic evolution strengthening the deutsche mark.

"When we heard that Russia's troops received clearance to use force in the Caucasus upheaval, the dollar did benefit from it," said a European trader in New York. "If that turns out to be a major problem we will see some concern in the market about Mr. Gorbachev's political future and a flight into quality, into the safe haven of the dollar."

But the lift provided by this grim news was quickly offset by a drop of more than 33 points on the Dow Jones industrial average.

In late New York trading the dollar changed hands at 1.6912 German marks, off from 1.6935 marks the previous session. The U.S. unit was quoted at 145.30 Japanese yen, also down from 145.60 Tuesday.

Despite Soviet tensions, Merrill said, the mark "still stands to be on a strengthening trend" in the coming months. Germany's economy is vigorous and its high interest rates are pulling in global capital.

In New York trading the British pound eased to $1.6490 from $1.6575. Other dollar rates: 1.5075 Swiss francs, off from 1.51; 5.7490 French francs, down from 5.7585; and 1,259 Italian lire, down from 1,260.

In Europe the dollar was driven down by the disappointing U.S. trade data and finished lower against most key currencies. It was off in Frankfurt at 1.6885 German marks against 1.6965 Tuesday, and also moved down in Zurich to finish at 1.5030 Swiss francs against 1.5205.

In Paris the dollar eased to 5.7625 French francs against 5.8105, in Brussels it fell to 35.29 Belgian francs against 35.66, and in Milan it declined to 1,262.75 Italian lire against 1,273.65. In London, the pound retreated to $1.6495 from $1.6552 as the U.S. currency gained support from Wall Street improvements.

Republic National Bank in New York closed cash gold at $412.25 an ounce, up from $410.75 Tuesday. The New York Commodity Exchange settled gold at $412.50 an ounce, ahead from $410.80. In Zurich gold fell to $410.50 an ounce against $413.50. London gold eased to $410.25 an ounce from $413.75.

Republic closed cash silver at $5.265 an ounce, up from $5.245. Comex spot silver moved up to $5.265 an ounce from $5.23. In Zurich silver was unchanged at $5.25 an ounce, but in London it fell to $5.23 an ounce from $5.26.

#90017u2064 01/17/1990 ~United Press International

NEW YORK (JAN. 17) UPI - NBC has sold the off-network television rights to the entire ''Saturday Night Live'' library to MTV Networks and ''Ha! The TV Comedy Network,'' it was announced Wednesday.

The deal involves more than 300 ''SNL'' programs, from the late night show's premiere on Oct. 11, 1975, through the 1991 season. The sale price was not disclosed.

''Ha! The TV Comedy Network,'' scheduled to premiere in April, will present ''SNL'' shows from the 1980 season through current programming and those for the upcoming 1990-91 season.

MTV will continue to run, for an additional four years, 102 of ''The Best of Saturday Night life'' shows now running on Nickelodeon's ''Nick At Night.''

These classic shows star the original Not Ready For Prime Time Players - Dan Aykroyd, John Belushi, Chevy Chase, Jane Curtain, Garrett Morris, Bill Murray, Laraine Newman and Gilda Radner.

Lorne Michaels, creator and executive producer of ''SNL,'' said: ''I couldn't be more pleased.''

#90017u2075 01/17/1990 ~United Press International

NEW YORK (JAN. 17) UPI - ''Elvis,'' the television series, will make its debut on ABC next month, bumping the cancelled series ''Free Spirit,'' ABC

announced Wednesday.

Priscilla Presley, the rock star's former wife, is one of three executive producers of the television series that ABC said is based on true incidents in Presley's life, set in the early 1950s.

The network promises the half-hour dramatic series will be ''music-filled '' as it looks at Presley's early life in Tupelo, Miss., and his early years in Memphis, Tenn., where the family later moved,

''Elvis,'' starring Michael St. Geraard in the title role, will make its debut in a special premiere on Tuesday, Feb. 6, 9:30-10 p.m., pre-empting ''Coach'' and following ABC's most popular series, ''Roseanne.''

It will premiere in its regular time period on Sunday, Feb. 11, 8:30-9 p.m. Eastern time. It replaces ''Free Spirit,'' which will have its final broadcast on Sunday, Jan. 21.

#90017u2077 01/17/1990 ~United Press International

JERUSALEM (JAN. 17) UPI - Government officials expressed concern Wednesday over a proposal to cut U.S. aid to Israel and four other countries in order to increase funds available for Panama and Eastern European countries struggling to make their governments democratic.

The Israeli government had no official response to a call by U.S. Senate minority leader Robert Dole, R-Kan., to cut aid to Israel, Egypt, Pakistan the Philippines and Turkey.

''As we are speaking about a proposal to change U.S. foreign policy, I think it is still to early to make a statement,'' a foreign ministry spokesman said.

But Vice Premier Shimon Peres said Israel should be concerned about the Dole proposal. He warned that the United States had made long-term commitments to Israel from which it should not back away.

''There is some kind of responsibility ... that the United States has toward Israel, a deep security and political obligation, over and above the peace (process), in order to retain the Israeli defensive powers,'' he told the Economic Club in Jerusalem.

Peres, who is also finance minister, pointed out that Israel devotes 22 percent of its budget to defense. He charged ''there was no justification in coming down'' on aid to Israel while not asking Western European countries, which have smaller defense burdens, to contribute.

Chief of Staff Lt. Gen. Dan Shomron said Israel and the United States had a common interest to keep the Jewish state strong militarily.

''A strong Israel is a guarantee for stability, and therefore I hope that the United States will not cut the aid that it gives,'' he said.

Shomron also told Israel Radio that the proposal to cut aid was the result of the new relationship between the superpowers and between the Warsaw Pact and NATO. He said, however, that the military and political situation had not changed in the Middle East.

Communications Minister Gad Ya'acobi said the amount of U.S. aid to Israel had been eroded by inflation.

''During the last seven or eight years since we are getting $3 billion a year from the United States, the value of this grant in real terms decreased from about 40 to 45 percent due to the American inflation,'' he said.

Ya'acobi, a former finance minister, also said any cuts would ''have a very negative effect on the Israeli economy,'' especially when Israel was preparing to receive an expected 100,000 Jews emigrating from the Soviet Union.

''We are appealing to the United States government to get a special grant to ease the absorption of those Jewish people,'' he said.

Deputy Foreign Minister Binyamin Netanyahu told Israel Radio he did not think U.S. aid to Israel was in danger of being cut in the next three years.

''The support for Israel is firm,'' he said. But he added, ''In the next decade, I am not at all sure that U.S. aid will remain at its present level, and we must prepare economically and politically for this.''

Any indication that U.S. political or financial support for Israel may be reduced immediately produces an outpouring of concern in Israel.

In an op-ed page article in The New York Times, Dole said a 5 percent reduction in foreign aid to the five major recipients, which consume two-thirds of the foreign aid budget, would free $330 million for other nations.

#90017u2097 01/17/1990 ~United Press International

WASHINGTON (JAN. 17) UPI - The government plans to stop marking passports of AIDS-infected foreigners and will also relax travel rules related to

AIDS in advance of two major medical conferences, federal officials said Wednesday.

Currently, travelers to the United States are required to state whether or not they are infected with the human immunodeficiency virus or HIV, which causes AIDS. HIV-infected people can get waivers allowing them to visit the United States for 30 days, but their passports are stamped with a mark indicating they carry the deadly virus.

Many health groups, including the international Red Cross and the World Health Organization, have indicated they may boycott the International Aids Conference in San Francisco in June and the International Hemophilia Congress in Washington in August if those policies are not changed.

Immigration and Naturalization Service officials, who asked not to be named, Wednesday said the government plans to drop its policy of marking passports of HIV-infected travelers. Instead, such people will be given a separate document showing they have been given a waiver to enter the United States, officials said.

People planning to attend the hemophilia and AIDS meetings this summer will also be granted HIV-related travel waivers faster than the 60 days it normally takes, officials said. But the waiver procedure probably will not be speeded up for other travelers, they added.

The policy changes, which are being drafted by the immigration service, the State Department and Health and Human Services Department, should be completed by the end of the month, officials said.

AIDS activists and many public health leaders have called on the United States to drop all travel restrictions against HIV-infected people. But government agencies have argued that only Congress has the power to take such action.

The controversy dates back to 1987 when Congress passed legislation adding AIDS to the list of contagious diseases - including leprosy and syphilis, for which a foreigner could be denied entry to the United States.

Immigration and Naturalization Services sources said ''there does not seem to be an upswelling among the general population that this policy is too restrictive.''

The National AIDS Commission recently reported that the only nations having HIV-related travel restrictions besides the United States are Bulgaria, Chile, China, Cuba, East Germany, Hungary, Iraq, Pakistan and South Africa.

HIV is spread by sexual or blood-to-blood contact, such as drug users

sharing needles, and can be passed from mother to child. The deadly virus cannot be spread by casual contact, like shaking hands or sharing food.

#90017u2106 01/17/1990 ~United Press International

MOSCOW (JAN. 17) UPI - Residents of the Transcaucus region blocked some of the thousands of Soviet troops sent to quell Azerbaijani-Armenian violence Wednesday, but Moscow vowed again to stop the bloodshed and said security forces were now allowed to shoot if necessary.

Fierce battles between Azerbaijanis and Armenians raged for a fifth day with no signs of abating, and the death toll rose to 76 in what military commanders described as civil war in the republics on the Soviet Union's southern rim.

Faced with increased attacks on security personnel, the Defense and Interior ministries and the KGB security agency issued a statement withdrawing orders from their troops not to use weapons and authorizing the use of force if necessary.

In another sign that the violence was threatening to become a rebellion against Soviet power, residents of the Azerbaijani village of Ehegnadzor smashed a monument to Soviet state founder Vladimir Lenin, the official Tass news agency said.

Authorities evacuating Armenians from the Azerbaijani capital of Baku said more than 7,000 refugees had been ferried across the Caspian Sea to the republic of Turkmenia since Saturday, when Azerbaijanis began pogroms against Armenians. Many of the Armenians were being flown northward to Moscow and other Russian cities.

Desperate Armenians raided armories in their capital of Yerevan in a wild hunt for weapons to join the fight against the Azerbaijanis.

The Soviet Communist Party, parliament and government, in a joint message transmitted by Tass, pledged to do everything possible to prevent further violence and expressed ''heartfelt condolences to the families of the dead and profound sympathy to all those affected by the recent unrest.''

''The country's leadership shares the indignation of the Soviet people over the atrocities and the crimes,'' the message said. ''It is taking appropriate steps to end the violence, restore law and order, give material assistance to the victims and strictly punish culprits.''

The parliament's presidium, or executive arm, declared a state of emergency Monday in designated areas of Azerbaijan and Armenia. It ordered the dispatch of 11,000 soldiers in a doubling of troop strength in the two

southern republics where Interior Ministry forces were already deployed to try to stop clashes.

''Soviet army and Interior Ministry servicemen, police and KGB agents are showing maximim restraint in this complex situation,'' the government's security departments said in a statement. ''By risking their lives, they have so far refrained from using arms against criminals to prevent bloodshed.

''But a sharp increase in outrageous attacks has made the situation unbearable. The leadership of the Defense Ministry, Interior Ministry and the KGB have given instructions to their personnel to use weapons in strict accordance with military rules and Soviet laws.''

In an ominous escalation of the 2-year-old conflict over the Nagorno-Karabakh enclave, the Azerbaijanis and Armenians formed self-defense brigades and used sophisticated weaponry captured or stolen from the military.

''The situation is tense in areas bordering on Nagorno-Karabakh,'' Tass said. ''The large numbers of Interior Ministry troops deployed in the Shaumyan and Khanlar regions of Azerjaiban have been unable to stop the ethnic unrest.

''Interior and army troops continue to pour into the areas where a state of emergency was imposed Jan. 15 by a Supreme Soviet decree, but their deployment has been hindered by local residents in a number of populated areas of Azerbaijan.''

Azerbaijanis and Armenians were using armored personnel carriers, surface-to-air rockets, machine guns and even unmarked helicopters in the worst ethnic conflict of Soviet leader Mikhail Gorbachev's nearly five-year rule.

''The situation is not worsening, but it is bad enough already,'' Foreign Ministry official Yuri Grimitskikh said. ''If the situation demands it, more troops will be sent.''

The new round of clashes raised to more than 270 the number of deaths since the violent dispute over Nagorno-Karabakh - an Armenian enclave in Azerbaijan - erupted nearly two years ago.

Tass said 56 people, most of them Armenians, had died and 156 were wounded in the recent Baku pogroms. The Izvestia government newspaper said 20 people had been killed in the Nagorno-Karabakh enclave.

Izvestia said 13,620 Interior Ministry troops and local policemen and 3,500 members of ''volunteer workers' brigades'' were trying to maintain

order in Baku, a city of 1.7 million peole where only a few thousand Armenians remained from a population of 300,000.

Interior Ministry spokesman Dmitri Tselesnov said Armenians attacked 13 points in Yerevan and elsewhere in the republic in desperate searches for weapons. The raiders seized a total of 452 firearms, including Makarov revolvers and small-arms ammunition, over two days, Tselesnov said.

Trouble was also brewing in the third Transcaucasian republic of Georgia, where thousands of people demanded independence at rallies in Tbilisi and workers at some plants were on strike, according to news reports and sources in the Georgian capital.

#90017u2145 01/17/1990 ~United Press International

PARIS (JAN. 17) UPI - West German Chancellor Helmut Kohl said Wednesday that no one should ''try to set conditions'' on a possible reunification of Germany and reiterated that a final settlement on Germany's borders must be postponed until the signing of a peace treaty.

''People in both the Federal Republic of Germany (West Germany) and the German Democratic Republic (East Germany) must have the right and the possibility to decide freely over the question as to whether or not they want to live in one German state,'' Kohl said in a speech at the French Institute of International Relations to mark the launch of his book ''Europe is our destiny.''

Kohl said he would respect whatever decision people make in East Germany - where there is growing speculation a referendum on the reunification issue may be held next year. The two Germanys are scheduled to sign a good neighbor treaty to establish what has been dubbed officially a ''contractual community.''

Kohl said this could include ''a common government committee for permanent consultations and political harmonization'' as well as ''a common parliamentary executive.''

''What Germany finally will look like at the end of this process no one can say today,'' Kohl said. But he said ''no one should try to set conditions on this peaceful process, which would result in the undermining of the right of Germans to self-determination.''

#90017u2208 01/17/1990 ~United Press International

BUCHAREST, ROMANIA (JAN. 17) UPI - The leaders of the interim government met Wednesday to consider cancelling a promised Jan. 28 referendum on whether Romania should ban the Communist Party and reinstate the death penalty.

''They would like to find a way to do this without a referendum,'' government spokesman Dan Radulescu said after the meeting. ''It is very difficult to prepare a referendum in 10 days.''

The ruling National Salvation Front also is considering delaying elections now scheduled for April because of complaints from fledgling political parties that they do not have enough time to organize and campaign.

The new government already has acknowledged that it erred when it bowed to pressure from an unruly mob last week and hastily issued a decree outlawing the Communist Party. Less than 24 hours later it rescinded the order and said the matter would be put to referendum.

Now the government is seeking a way to resolve emotionally charged issues without holding a referendum and jeapordizing the new democracy, Radulescu said.

He said canceling the referendum was among the possibilities being considered by the 11-member executive committee of the ruling National Salvation Front, which took power when dictator Nicolae Ceausescu was ousted Dec. 22.

Radulescu said it was his opinion the referendum would not be held, saying it would be inconsistent with a democracy to outlaw a political party. But he said no decision on the matter was reached Wednesday.

He said the 11 committee members, who will meet again Thursday, may come up with a compromise, such as banning the Ceausescu-style tactics of the Communist Party he ruled for two decades but not outlawing the party altogether.

An estimated one out of every three Romanians belonged to the Communist Party, including many who now make up the new interim government.

Radulescu said the committee also was considering reinstating the death penalty, but only for such serious crimes as genocide.

A rowdy mob that on Friday swept through Bucharest had called for the death penalty for members of Ceausescu's hated Securitate police who are accused of gunning down peaceful pro-democracy demonstrators the week of the dictator's fall.

The interim government had abolished the death penalty after Ceausescu and his wife, Elena, were executed by firing squad Christmas Day. But interim President Ion Iliescu, acceding to the wishes of a mob of thousands that had gathered outside the Front's headquarters, said he would put the question to referendum.

National Salvation Front activist Andrei Partos noted Wednesday that most civilized countries do not have a death penalty.

Radulescu said the Front's executive committee also is discussing delaying the April elections and may decide to hold a convention to write a constitution.

The Romanian Democratic Party joined a call Wednesday for delayed elections, saying it needed time to establish offices, sign up party members and start a campaign.

Unless the balloting is postponed for five months to the end of September, new parties will not have time to campaign for support, Democratic Party spokesman Nicolae Costel said.

The National Peasant Party-Christian Democrat Party previously requested a delay in the election.

In another development, Romania's general prosecutor told Bucharest Radio that the trials of four top officials under Ceaucescu, three former Politburo members and a security chief will begin ''this weekend or next week.''

The site and exact timing of the trials were not specified, nor were the charges against the highest officials to face a court since Ceausescu's ouster.

The provisional government has promised that members of Ceausescu's regime would be brought to justice.

Military trials already have begun in the city of Sibiu for members of Ceausescu's secret police, who are accused of killing protesters in last month's pro-democracy revolt.

The nation is also anxious to begin the trials of Ceausescu's sons, Nicu and Valentin, who are in custody.

Rep. Chet Atkins, D-Mass., said during his six-day tour of Romania that aspiring leaders asked him how to run a campaign and journalists sought advice on covering an election.

Atkins also said Dumitru Mazilu, vice president of the NSF council, was ''very open'' to delaying the election.

NEW YORK (JAN. 17) UPI - Chase Manhattan Corp. announced Wednesday it raised the quarterly dividend on its common stock to 62 cents a share from 59 cents, payable Feb. 15 to stockholders of record as of Feb. 1.

Chase reported quarterly earnings this week of $175 million or $1.47 a share, off from $275 million or $2.93 a share in the year-previous quarter.

It posted an annual loss of $665 million, compared with 1988 earnings of $1.06 billion or $11.55 a share, after boosting loan loss reserves.

#90017u2238 01/17/1990 ~United Press International

CAIRO, EGYPT (JAN. 17) UPI - Syria is slowly moderating its opposition to the Middle East peace process and PLO leader Yasser Arafat has launched an effort to improve ties with Syrian President Hafez Assad, a long-time supporter of radical Palestinian groups opposed to Arafat, officials said Wednesday.

Syria, which resumed diplomatic ties with Cairo last month after a decade of hostility, has begun to moderate its stance toward the peace process because it had drifted away from the Arab mainstream and feared being isolated, an Egyptian foreign ministry source said.

''Syria cannot stand in the way of current Middle East peace efforts because it needs to avoid becoming isolated at a time when the Arab world is moving closer together,'' the source said. ''Syria alone cannot stand in the way of the changes that are sweeping the world. They themselves have admitted this.''

Damascus broke off diplomatic ties with Egypt more than a decade ago after late President Anwar Sadat traveled to Jerusalem and later signed a bilateral peace treaty with Israel. The two countries resumed ties last month after a flurry of diplomatic activity.

Western diplomats saw the surprise resumption of diplomatic ties as an indication that Damascus has softened its stance toward both the PLO, which has recognized Israel's right to exist, and the Middle East peace process being pushed by Egypt, Israel and the United States.

''Both the United States and France have been working on softening Syria and ensuring it does not block any Middle East peace formula that may be worked out, with Egyptian help, between Israel and the Palestinians,'' one European envoy said.

Tayeb Abdel Rahim, the PLO's ambassador to Jordan, said Wednesday the rapprochement between Egypt and Syria had removed an obstacle to holding talks related to the peace process in Cairo.

''We hope all obstacles would be removed in order to convene this Arab meeting, particularly after the Syrian-Egyptian rapprochement, which (eliminated) a major obstacle,'' Abdel Rahim said.

The ambassador also said the PLO has called for a meeting with Egypt, Syria, Lebanon and Jordan to coordinate an Arab stance toward the peace process. The call for such a meeting was a further sign that the PLO is hoping for renewed ties with Damascus.

Arafat, in remarks published Wednesday in the Cairo weekly magazine Al Mussawar, laid out his terms for an improvement in relations with Syria.

He said Damascus should release Palestinian prisoners, stop interfering in the PLO's internal affairs and acknowledge past PLO decisions, such as its renunciation of terrorism and its recognition of Israel's right to exist.

Assad led the Arab boycott of Egypt after Sadat signed a peace treaty with

Israel in 1977. But Assad restored ties with Egypt under President Hosni Mubarak, even though Mubarak still adheres to the only peace treaty signed between an Arab country and Israel.

Libyan leader Col. Moammar Gadafi, another opponent of Egypt's peace treaty with Israel, has also initiated efforts to improve ties with Mubarak, holding two rare meetings with the Egyptian leader in the space of as many months.

''Both Syria and Libya, two former radical opponents of moderate Egypt and (Yasser) Arafat's PLO, are now racing to outdo each other when it comes to friendly ties with Cairo,'' the Western envoy said.

Libya has moved toward curbing its some of its former radical policies, reportedly placing the notorious Palestinian terrorist Abu Nidal under house arrest in Tripoli.

Syria also hosts Palestinian splinter groups opposed to Arafat, such as the Popular Front for the Liberation of Palestine and Popular Front for the Liberation of Palestine-General Command, but there were no immediate indications it would take any action against them.

Syria's move toward greater moderation may also be influenced by the inability of its closest ally, the Soviet Union, to continue providing economic and military assistance at present levels.

Syria on Tuesday denied reports that some 2,000 Soviet advisors are slowly pulling out the country. But political observers believe Moscow's internal political and economic problems have overshadowed the need to maintain aid to Damascus at current levels.

''It is unlikely (Syria and Libya) would put up much resistance to a Mideast plan the Egyptians and the Palestinians could hammer out,'' the Western envoy said. ''The real problem lies in getting the agreement in the first place. Egypt and the Palestinians are willing, but Israel is worried that concessions at this stage could undermine its future.''

BOSTON (JAN. 17) UPI - Fidelity Investments, the giant mutual fund company, said Wednesday it has agreed to buy an undisclosed number of discount brokerage accounts in 11 cities from Security Pacific Corp. of Los Angeles.

However, Security Pacific, parent of Security Pacific National Bank, said it will retain and concentrate on its discount brokerage business in California and Arizona.

''That's the reason we're selling them, to concentrate on our discount business in the west,'' said David Garcia, a spokesman for Security Pacific.

The companies declined to disclose terms of the sale or the number of accounts involved.

Fidelity's president of discount brokerage, David Cariseo, said the company ''is committed to growing its brokerage business in the '90s'' and that it now has about 1.7 million such discount brokerage accounts nationwide.

Fidelity, a privately held company, made four similar account purchases in 1989 and bought two other discount brokerage businesses previously, Cariseo said.

The cities where Security Pacific is selling its accounts are Dallas, Houston, New Orleans, Memphis, Garden City, N.Y., New Haven, Conn., Florham Park, N.J., and Orlando, Jacksonville, Ormand Beach and Plantation in Florida.

Cariseo said Fidelity has not yet decided whether to buy the leases on some of the Security Pacific offices.

#90017u2288 01/17/1990 ~United Press International

(JAN. 17) UPI - President Bush is skeptical of a purported offer by a drug cartel hit squad in Colombia to end its terrorism and drug-trafficking operations in return for leniency from the Bogota government. Spokesman Marlin Fitzwater says the Bush administration

remains opposed to any deals with the Medellin cocaine barons. He told reporters- quote- ''We have always said NO deals.'' The Justice Department says two more Colombian drug suspects have been extradited to face trial in the United States.

A group called ''The Extraditables'' said in a statement today that the cartel would suspend drug smuggling, political assassinations, kidnappings and bombings in return for ''legal and constitutional guarantees.'' Reporters say the document was turned over by a kidnap victim who was released in a working-class neighborhood of the capital along with her daughter. ''The Extraditables'' declared war on the government last August after Colombia reinstated its extradition treaty with the United States.

The space shuttle comes back to Earth on Friday, but for now the Columbia astronauts are keeping busy by studying the effects of weightlessness. The Columbia crew also beamed back to Earth television pictures taken as the craft sailed over central Africa. The astronauts' only excitement came when a shrill fire alarm sounded briefly, indicating smoke in an avionics equipment bay. NASA ground crews say it was a false alarm, attributing the siren to an apparently faulty detector.

President Bush is promising U-S economic aid to the new government of Panama. At a picture-taking session today, Bush praised General Maxwell Thurman, the commander of American military forces in Panama, for an ''outstanding job'' and said he hopes U-S troops will come home ''as soon as possible.'' However, Bush offered NO firm timetable for withdrawal. General Thurman told the president that the strike force ''did a dynamite job'' adding- ''We appreciate your support.''

#90017u2293 01/17/1990 ~United Press International

LOS ANGELES (JAN. 17) UPI - A fugitive who escaped in 1959 while serving a sentence for killing six people in a drunken driving accident was arrested early Wednesday as he stepped off a flight from Florida, authorities said.

Victor Leonard DeCasaus, 67, of Mexicali, Mexico, was taken into custody about 12:30 a.m. at Ontario Airport, sheriff's Sgt. Ernie Roop said.

Authorities had been looking for DeCasaus since January 1959, when he escaped from the Malibu sheriff's station, where he was working as an inmate trusty.

DeCasaus had been convicted one year earlier of six counts of manslaughter and drunken driving stemming from a traffic accident in September 1955 on the San Bernardino Freeway in East Los Angeles.

A man, his wife, their three children and a driver in another car were killed.

DeCasaus was serving six consecutive one-year sentences when he escaped.

Sheriff's deputies believe that DeCasaus fled to his native Mexico and was running a family wholesale grocery business.

Roop said the case remained open and several attempts were made to return DeCasaus to the United States, but all were unsuccessful.

His arrest came after deputies discovered that DeCasaus traveled to Florida, where he operated another grocery business, using a passport with the name Victor L. DeCasaus-Sanchez.

They received information a short time ago that one such trip would end early Wednesday in Ontario.

After his arrest, DeCasaus was taken to the County Jail where he immediately began serving the five years left on his sentence. Escape charges were also pending.

#90017u2319 01/17/1990 ~United Press International

(JAN. 17) UPI - The U-S Supreme Court acknowledges that its decision may evoke ''a natural distaste'' in ruling a union canNOT withhold pension benefits from a union official convicted of embezzling funds. The court unanimously said that Sheet Metal Workers pension funds can NOT with be withheld from Curtis Guidry... a former Colorado union local official convicted in 1982 of embezzling 377-thousand dollars. The court ruled that the 1974 Employment Retirement Security Act forbids the union from with holding benefits.

Many financial analysts were far from delighted with Commerce Department figures showing the U-S merchandise trade gap widened to 10 and one-half-BILLION dollars in November. A Chicago economist says the November red ink was worse than it should have been, even taking into account a strike against Boeing Company that cut airplane exports. White House spokesman Marlin Fitzwater told reporters that the Bush administration believes its trade policies are sound and has NO plans to change them.

-30- 1185

#90017u2323 01/17/1990 ~United Press International

WASHINGTON (JAN. 18) UPI - U.S. exporters sold 184,400 metric tons of hard red winter wheat to Mexico at subsidized prices, the Agriculture

Department reported Wednesday.

The wheat was worth $27 million, based on prices in Chicago. There are 36.7 bushels of wheat in a metric ton of 2,204.6 pounds so the sale involved 6.78 million bushels.

Terms of the sale called for delivery of the wheat from Feb. 15 to March 15.

The sale was made through the Export Enhancement Program, the major U.S. export subsidy program.

Exporters also reported the sale of 26,000 metric tons of soybean oil for delivery to Pakistan during the next few months. The sale was worth about $10.8 million based on Chicago prices.

#90017u2356 01/17/1990 ~United Press International

NEW YORK (JAN. 17) UPI - Representatives for major league baseball players and management met for 6 1/2 hours Wednesday in the latest session aimed at reaching a new labor agreement.

''It was long,'' said Chuck O'Connor, general counsel for the owners' Players Relations Committee. ''What it was designed to do was give the union a comprehensive response to the non-salary issues.''

O'Connor said these included termination pay, expenses, scheduling and other articles in the existing contract that players would not consider central to their salaries.

O'Connor said the parties would meet again Thursday, this time addressing salary issues and the revenue participation plan.

''Hopefully tomorrow we're going to get some information on what they want to change and why,'' said Don Fehr, head of the Players Association. Fehr has asked the owners why they are requesting a change in baseball's salary structure.

''The system is so bad that the Seattle Mariners were bought for $13 million and were sold for $78 million,'' Fehr said. ''We are faced with the most radical suggestion imagainable and we have not been flooded with information on why we should do that.''

Baseball's basic agreement expired Dec. 31, and management has told clubs to put plans for spring training on hold pending a clear sign of progress.

The union has told members not to make any travel arrangements for the

spring until notified otherwise.

Spring training is scheduled to open Feb. 15. Tickets for spring training games remain on sale in both Florida and Arizona.

#90017u2404 01/17/1990 ~United Press International

NEW YORK (JAN. 17) UPI - ABC Sports acquired its first major package in six years Wednesday, paying $210 million to televise College Football Association games for five years beginning in 1991.

The CFA consists of schools from the Atlantic Coast, Southeastern, Big Eight, Southwest and Western Athletic conferences, as well as 20 major independents. Including an agreement with the Big Ten and Pacific 10 conferences that carries through 1994, ABC soon will become the only over-the-air network to carry college football.

''ABC Sports has always held a special regard for the sport of college football and we are pleased to expand our coverage to include CFA games in our television schedule,'' said Stephen J. Solomon, ABC's senior vice president of sports planning and administration.

The agreement represented the first major purchase by ABC Sports since 1984, when they acquired the rights to the 1988 Winter Olympics in Calgary Alberta.

CBS Sports had paid $64 million to televise the CFA for four years in an agreement that expires after the 1990 season. Their exclusive negotiating period with the CFA expired last week.

''We were not prepared to triple the rights fee, which was the price requested by the CFA,'' CBS Sports President Neal Pilson said.

Earlier, ESPN paid $110 million for a 4-year agreement to televise the CFA through 1994.

#90017u2413 01/17/1990 ~United Press International

NEW YORK (JAN. 18) UPI - Phillips Petroleum Co. said Wednesday its fourth quarter earnings would be substantially reduced due to a $280 million delay in delivering oil from its Pt. Arguello field off the coast of California.

The charge will have a ''significant negative'' effect on quarterly earnings, which are scheduled to be released Jan. 25, the company statement said.

Last year, the Bartlesville, Okla.-based Phillips reported fourth-quarter earnings of $135 million, or 55 cents a share, on revenues of $2.8 billion.

''Opposition from organizations in the Santa Barbara area'' has delayed local government approval of a company plan to transport the oil by tanker to refineries onshore, the company said.

''We are forced to significantly reduce the value of these assets because of the protracted delays,'' said Phillips' Chairman Pete Silas.

-30- 1059

#90017u2428 01/17/1990 ~United Press International

TORONTO (JAN. 17) UPI - Dylex Ltd. said Wednesday its subsidiary, Foxmoor Specialty Stores Corp., filed for Chapter 11 bankruptcy protection in New York to dispose of its remaining 250-store chain.

Dylex put the West Bridgewater, Mass.-headquartered chain up for sale in September and completed a deal in January with St. Louis-based Edison Brothers Stores Inc. for the sale of 225 stores. Terms of the deal were not released.

A spokesman for Dylex said the decision to file for bankruptcy was taken after it failed to find any other buyers for the remaining Foxmoor stores. She said the intent now is to liquidate the assets in an orderly manner.

Dylex took a third-quarter $34.9 million writedown for disposal costs on the Foxmoor chain. The expenses were in addition to an estimated operating loss in Foxmoor of $29.5 million for the year ending Feb. 3, 1990.

The Toronto company purchased Foxmoor and Brooks Fashion Stores Inc. in the mid-1980s but neither venture prospered. Brooks went bankrupt in 1987.

Dylex is a clothing manufacturer and retailer with more than 2,000 specialty stores in Canada and the United States including Braemar, Harry Rosen and Thrifty's in Canada.

The company's U.S. operations include 70 Wet Seal women apparel stores on the west coast, 36 NBO menswear stores on the east coast, and six Club Monaco stores in Los Angeles and San Francisco.

-30- 1590

#90017u2579 01/17/1990 ~United Press International

(JAN. 17) UPI - The U-S Supreme Court issued a ruling today that has several religious organizations worried. The high court ruled unanimously that states can levy taxes on the sales of religious materials. Religious

groups had warned that such taxes would threaten religious liberty, but the Supreme Court disagreed.

President Bush today praised the commander of U-S forces in Panama for his troops' ''outstanding job'' in last month's military intervention and the ousting of Manuel Noriega. Bush spoke at the White House alongside General Maxwell Thurman, who said he appreciates the president's support.

A leading liberal group issued a harsh assessment today of President Bush's first year in office. In a 20-page report, Americans for Democratic Action says Bush has failed in a variety of areas, including civil rights and helping the poor, and says the president is- quote- ''NOT so kind, NOT so gentle.''

The White House says President Bush has sent a top adviser to Manila to reaffirm U-S support for Philippine President Aquino . But spokesman Marlin Fitzwater says the mission is NOT a reaction to reports that another coup attempt against Aquino may be in the offing.

Soviet officials say more troops may be sent to Azerbaijan in an effort to halt a virtual civil war that's raging between Moslem Azerbaijanis and minority Christian Armenians. Some 11-thousand reinforcements are in the Soviet republic, where fighting since Saturday has left 76 people dead.

-30- 1650

#90017u2602 01/17/1990 ~United Press International

(JAN. 17) UPI - Two Republican lawmakers want to declare a five-year national drug and crime emergency. Texas Senator Phil Gramm and Georgia Representative Newt Gingrich are proposing legislation under which criminals convicted of violent and drug-related federal charges would face mandatory, full sentences.

Switzerland says it will help the United States obtain information about cash Manuel Noriega may have deposited in secret Swiss bank accounts. Swiss government officials say the legal process may be simpler in Noriega's case because the deposed Panamanian dictator is formally charged with crimes.

A trade group says it takes too long for newly developed prescription drugs to reach consumers. The Pharmaceutical Manufacturers Association is calling on the Food and Drug Administration to shorten its approval process, saying it takes nearly one decade for a new drug to reach store shelves.

The president of Czechoslovakia's parliament was in France today to receive an award from the European Parliament for his commitment to human rights. After receiving the Andrei Sakharov award, Alexander Dubcek called

for international support for Soviet reforms.

Moist, warm air is keeping temperatures unseasonably high in the Midwest. But the system also is generating more of the fog that stranded about 10-thousand airline travelers in Chicago yesterday. Travelers also are battling fog in northern Wisconsin, where at least one school district canceled classes today.

-30- 1656

#90017u2976 01/17/1990 ~United Press International

(JAN. 17) UPI - The Bush administration says NO deals with drug-traffickers... carnage continues in Soviet Azerbaijan... Supreme Court O-K's sales tax on religious goods... and a call for a national crime emergency. U-P-I has it all, next:

There's been an apparent capitulation by drug cartel members in Colombia.

A message purportedly from members of a Medellin cartel hit squad says the group accepts government victory in the cocaine war. It says the group- called ''The Extraditables''- will suspend drug trafficking, political assassinations, kidnappings and bombings in exchange for- quote- ''legal and constitutional guarantees.''

If it's authentic, the statement could be a response to a peace initiative this week by three former presidents of Colombia. The former presidents said the drug traffickers would be treated more leniently by the government if they freed kidnap victims and stopped exporting drugs.

The government of President Virgilio Barco has turned down other peace overtures from the drug traffickers. But last night, when asked about the former presidents' appeal, Barco said- quote- ''The government canNOT be inflexible in its positions.''

A White House spokesman says the Bush administration is opposed to any deals with the drug cartel.

#90017u2992 01/17/1990 ~United Press International

(JAN. 17) UPI - A spokesman for the Soviet Foreign Ministry says the situation in Azerbaijan ''is NOT worsening, but it is bad enough already.''

Soviet officials say more troops may be sent to the republic on the Soviet Union's southern rim, in an effort to halt a virtual civil war between Moslem Azerbaijanis and minority Christian Armenians.

Some 11-thousand new troops are in Azerbaijan, bringing to nearly

22-thousand the number deployed in the current crisis. Officials say 76 people have been killed since the latest wave of fighting began on Saturday.

The focus of the conflict is the disputed enclave of Nagorno Karabakh, which is within Azerbaijan but is populated mostly by Armenians. Azerbaijan has resisted efforts by neighboring Armenia to control the enclave.

In Iran, spiritual leader Ayatollah Ali Khamenei says Iran attaches ''great importance'' to the Islamic zeal of the Azerbaijanis.

Khamenei, who is an ethnic Turk of Azerbaijani origin, says the Soviet Azerbaijanis are trying to renew their links with Iran and are NOT driven by ethnic or national motives.

-30- 1259

#90017u3013 01/17/1990 ~United Press International

(JAN. 17) UPI - President Bush met at the White House today with Attorney General Thornburgh and other top law enforcement officials to discuss the newest initiative in the war on drugs.

Before the meeting, Bush said his first anti-drug strategy announced last fall has made ''great progess,'' but he says more needs to be done.

He again called on Congress to pass the rest of his 1989 anti-crime package, particularly legislation to toughen sentencing and expand the death sentence.

Bush is to formally present his updated anti-drug strategy to Capitol Hill on January 29th. It's expected to call for the death penalty for drug lords, and an increased role for the military in drug interdiction.

On Capitol Hill, two Republican lawmakers today proposed that the government declare a five-year national drug and crime emergency. Under the legislation proposed by Senator Phil Gramm of Texas and Georgia Representative Newt Gingrich, criminals convicted of violent and drug-related federal charges would face mandatory, full sentences.

In Switzerland, Swiss officials agreed today to help the United States obtain information about drug money that ousted Panamanian dictator Manuel Noriega may have put in secret Swiss bank accounts.

President Bush says he will try to bring home as soon as possible the U-S troops that did- quoting now- an ''outstanding job'' in Panama.

But Bush was vague in saying when he thinks the soldiers can return,

adding ''it's my objective to get the troops out.''

Bush also is NOT backing up with details a pledge of economic aid to Panama's new government. The president says funds to help the nation hard hit by last month's fighting... as well as long-standing U-S sanctions... is something- quoting again- ''we'll be talking about.''

Bush had NO comment on a critical report issued by one of the nation's leading liberal organizations today.

Americans for Democratic Action say that after one year in the White House Bush is- quote- ''NOT so kind, NOT so gentle.'' The group says Bush has been weak in areas ranging from helping the middle class and poor to the environment.

#90017u3032 01/17/1990 ~United Press International

(JAN. 17) UPI - The U-S Supreme Court says states can tax the sale of religious materials.

In a ruling today, the high court unanimously concluded that such taxes do NOT violate the constitutional guarantee of freedom of religion.

The case involving the Jimmy Swaggart Ministries was closely watched by a variety of religious groups who view such taxes as a threat.

In an opinion written by Justice Sandra Day O'Connor, the court says the taxes imposed on Swaggart's ministries did NOT significantly burden his religious practices or beliefs.

In other rulings today, the nation's highest court decided a union canNOT withold pension benefits from a union official convicted of embezzling funds.

And in another decision, the court sent back for trial a case involving charges that an American company obtained a contract by bribing Nigerian officials.

Another day of political change in Eastern Europe.

The Foreign Ministry in Czechoslovakia says the Soviet Union has agreed in principal to withdraw all of its 80-thousand troops from the country. The ministry says the timetable for the pullout still has to be worked out.

There was NO immediate confirmation from the Soviets, who have maintained a military presence in Czechoslovakia since the 1968 Warsaw Pact invasion.

In Poland, the Warsaw government is dealing with the nation's worst labor unrest since the Solidarity government was elected last June. Polish Prime Minister Tadeusz Mazowiecki planned meetings with labor leaders today on the strikes by more than 75-hundred workers at five coal mines. The walkouts mainly involve wage disputes.

Elsewhere, Hans Modrow today became the first East German premier to visit West Berlin. Despite the effort at improved ties, West Germany says it will NOT sign a treaty to forge closer ties until East Germany holds elections.

And, the European Community says it will support democratic reforms in Eastern Europe. But the president of the E-C predicts it will take several years for the former communist nations to develop market-oriented economies.

#90017u3171 01/17/1990 ~United Press International

(JAN. 17) UPI - Rescuers are searching west of Anchorage, Alaska, for an Air Force F-15 jet that disappeared yesterday on a training mission. Officials say the fighter plane was carrying only the pilot. An emergency locator signal was picked up 25 miles from Anchorage.

The F-B-I is investigating the theft of a twin-engine airplane owned by the U-S Marshals Service. Officials say gunmen stole the plane last night from an airport near Miami. They first tied up ground workers with duct tape, and then fled in the plane.

Authorities in Austin, Texas, say air piracy charges were filed against a Cuban-born man who used a fake bomb to try to hijack an American West jetliner to Cuba last night. The hijack attempt came shortly after the plane left Houston for Las Vegas.

Chrysler says it's recalling about 625-thousand 1989- and 1990-model vehicles to replace the valve cover and gasket. The automaker says the gasket on those engines could shift and cause an oil leak that might, in some instances, lead to an engine compartment fire.

Ashes fell along with snow today in Anchorage, Alaska. Witnesses say an eruption late last night by Redoubt Volcano had gritty volcanic ash dropping on sparsely populated areas throughout the day.

Missouri corrections officials say condemned killer Gerald Smith is calmly awaiting his execution tonight. Smith beat to death a former girlfriend he says gave him a veneral disease and killed a fellow convict during his nearly nine-year stay on Death Row.

Police in New York say they broke up a gambling ring that netted about 335-Million dollars. Nearly two dozen people were arrested in New York and Florida for alleged involvement in the sports betting ring.

An elderly woman died today in Los Angeles, despite six hours of surgery following a pitbull attack in her grandson's kitchen. Authorities believe the dogs were provoked when Marjee Lilly used her arm to keep them at bay while pouring their food.

#90017u3463 01/17/1990 ~United Press International
(JAN. 17) UPI - Federal officials say Neil Bush, the son of President Bush, is negotiating a settlement with thrift regulators who are investigating the failed Silverado Banking, Savings and Loan Association. Silverado collapsed in 1988 and was taken over by government regulators in December of that year... four months after Neil Bush stepped down as a director of the Denver S-and-L. He has NOT been accused of any wrongdoing.

President Bush met with law enforcement directors and military officials today as he readies his updated anti-drug plan. Administration officials say Bush will announce his proposals next Thursday in a speech at the White House. Administration sources say the package is expected to cost as much as 11-BILLION dollars, about 10 percent more than current spending.

Nicaragua tried to get a resolution passed in the U-N Security Council that would have condemned a U-S military raid on the home of Nicaragua's ambassador in Panama City last month. But the United States vetoed the measure, which would have declared the raid a violation of international law. President Bush has already apologized for the December 29th raid.

Bucharest Radio says the trials of four top officials in the government of executed dictator Nicolae Ceaucescu will begin in the next few days. But Romanian officials are NOT specifying what charges will be levied against the highest officials to face trial since Ceausescu was ousted.

North Carolina divorcee Susan Mason says a husband is worth at least 10-thousand dollars... even one with a cheating heart. Mason's divorce from Richard Mason became final today, and now she's suing the ''other woman'' for alienation of affection and criminal conversation, a legal term that translates to adultery. The suit... based on a somewhat obscure state law... seeks more than 10-thousand dollars on each claim. Susan Mason's attorney says the suit is ''a matter of principle'' and says her client is ''very hurt.''

#90017u3761 01/17/1990 ~United Press International

(JAN. 17) UPI - Soviet officials are again vowing to end the violence between Azerbaijanis and Armenians that's claimed at least 76 lives in the past five days. Today, Moscow withdrew orders from its troops NOT to use weapons and authorized the use of force if necessary. The announcement comes amid news that the troops are meeting more and more resistance from armed residents of the Transcaucus region.

More labor troubles in Poland. A coal-miners' strike that began yesterday gained strength today as workers walked off the job at four more mines in southern Poland. The miners are demanding pay hikes and say they ''won't start working'' if their demands aren't met. It's the country's worst labor unrest since the Solidarity-led government was elected last June.

In East Berlin, a former member of East Germany's Politburo testified that Erich Honecker acted alone when he ordered police to crush pro-democracy protests last fall. Guenter Schabowski says the former East German leader personally ordered the violent police crackdown on demonstrators in early October. The comments came in testimony before a commission that's inquiring into the police violence that eventually led to Honecker's downfall.

Officials say Vice President Quayle is going to Panama, Honduras and Jamaica later this month as part of a Latin American diplomatic mission ordered by President Bush. The U-S invasion of Panama last month drew criticism from some Latin American countries, and Bush voiced concern about damaged relations. He said on January 5th that he'd send Quayle to Latin America for the ''very important'' mission of diplomatic fence-mending. Planning for the trip took two weeks.

#90017u3778 01/17/1990 ~United Press International

(JAN. 17) UPI - The Anti-Defamation League of B'nai B'rith has some grim statistics about anti-Semitism. The group's annual survey shows the number of anti-Semitic incidents nation-wide hit a new high in 1989 and were more serious in nature. B'nai B'rith says there were 14-hundred-32 anti-Semitic incidents last year, including the murder of a holocaust survivor in Brooklyn who protested swastikas scrawled on his apartment door.

Researchers writing in the New England Journal of Medicine are disputing the much ballyhooed power of oat bran to lower cholesterol levels. They contend that the much-touted drops in cholesterol levels among oat bran eaters probably are caused by the amount of fatty foods eaten. They reported on a 13-week study of 20 healthy people that compared the effects of eating oat bran and low-fiber refined wheat. They say the study showed that both reduced cholesterol levels by seven percent.

A Colombian businessman pleaded guilty today to federal drug trafficking

and money laundering charges in federal court in Tampa, Florida. Gonzalo Mora Junior was charged in a 32-Million-dollar international case linked to former Panamanian dictator Manuel Noriega. His guilty plea comes one day after an international banking company named in the same indictment pleaded guilty to laundering drug money.

Prosecutors in Syracuse, New York, today rested their case against a Cornell University graduate student charged with inserting a so-called ''worm'' into military and research computer networks in November 1988. Earlier today, a former classmate of the defendant's testified that Robert Morris appeared stunned when his program replicated out of control on November 1st, 1988. The ''worm'' program froze thousands of computers and computer networks nation-wide.

#90017u3990 01/17/1990 ~United Press International

(JAN. 17) UPI - A planned referendum in Romania later this month may be canceled. The leaders of the country's interim government met today to consider canceling a January 28th referendum on whether Romania should ban the Communist Party and re-instate the death penalty. A government spokesman says it's ''very difficult to prepare a referendum in 10 days.'' He also says it would be inconsistent for a democracy to outlaw a political party.

Fighting raged for a fifth day between Soviet Azerbaijanis and Armenians, with the death toll now at 76 in what is described as civil war in the two Soviet republics. Moscow sent 11-thousand reinforcements to try to halt the violence and today said the troops are now allowed to shoot if necessary. Officials say more than seven-thousand Armenians have been evacuated from the Azerbaijani capital of Baku, where Moslem attacks on Armenians began Saturday.

It was one year ago today that a gunman killed five children in a massacre at the Cleveland Elementary School in Stockton, California. Today, a teacher wounded in that shooting appealed to Congress and the White House to ban U-S-made assault weapons. Janet Geng appeared at a Capitol Hill news conference with a petition signed by 59 members of the Cleveland School staff. The gunman in the January 17th, 1989, shooting was armed with an A-K-47 assault rifle.

#90017u4221 01/17/1990 ~United Press International

(JAN. 17) UPI - The latest news from across the nation and around the world... details and developments from the wires of United Press International.

Moscow says there's been a sharp increase in attacks against troops sent to Azerbaijan to end the civil war in the Soviet republic, so the troops now are authorized to shoot, if necessary.

The order allowing force is the latest development in the fighting between Moslem Azerbaijanis and Christian Armenians that has claimed 76 lives since Saturday.

The Soviet government on Monday declared a state of emergency in parts of Azerbaijan and Armenia, and sent 11-thousand troops to the two republics on the Soviet Union's southern rim. That brings to nearly 22-thousand the total number of troops deployed in the current crisis.

The government promised to do everything possible to prevent further violence and said more troops will be sent in if the situation demands it.

The current violence is the latest in a two-year dispute over control of the disputed enclave of Nagorno-Karabakh, which is an Armenian enclave within Azerbaijan.

The new government in Romania is considering whether to cancel a referendum on banning the Communist Party and reinstating the death penalty.

Such a cancellation would defy the demands of a mob which demonstrated in Bucharest last week.

Interim President Ion Iliescu already has reversed a promise to the protesters to ban the Communist Party. He said he was pressured into a hasty decree and decided instead to put the issue to a January 28th referendum.

But a spokesman says the government probably will find a way around the vote. He says it's hard to set up a referendum that soon.

The spokesman says it would be undemocratic to outlaw a party, and that the death penalty may be brought back only for extreme crimes such as genocide.

The ruling National Salvation Front also is considering delaying elections now scheduled for April. New political parties say they do NOT have enough time to organize and campaign.

-30- 2221
#90017u4273 01/17/1990 ~United Press International
(JAN. 17) UPI - Captured documents indicate rebels in the Philippines plan terrorist attacks on Americans to drive out U-S military bases there.

National Police troopers found the papers in a raid Saturday on the house of the prime suspect in the killing of a mayor in a town near U-S Clark Air Base earlier this month.

The papers were written in Filipino. It listed a nine-point plan by the Philippine Communist Party and its military arm to wage war against the Americans.

The actions were to be carried between July 1989 and July 1991.

The document said American servicemen found in areas by the New People's Army will be captured and killed.

The declaration said the Americans must go because of their control of Philippine economy and politics, direct intervention in local affairs, their military bases and arms aid to the Philippine military.

At least six Americans have been killed by the rebels since 1987 in the vicinity of Clark Air Base and in Manila.

A Cornell University graduate student accused of inserting a ''worm'' into military and research computer networks in November 1988 is expected to testify tomorrow in his trial in Syracuse, New York.

The prosecution rested its case today against Robert Morris, who was indicted in July on charges that he intentionally inserted the ''worm'' program into military and research computer networks without authorization.

Earlier today, a former classmate of Morris's testified that Morris seemed stunned when his program replicated out of control on November 1st, 1988.

Paul Graham testified that the program was initially designed to expose a flaw in the Internet computer network, and it was never meant to destroy any data.

But a flaw in the ''worm'' program allowed it to replicate itself out of control, and the result was that it shut down some six-thousand computers on the nation-wide Internet and Arpanet networks.

Morris faces up to five years in prison and 250-thousand dollars in fines if convicted.

#90017u4302 01/17/1990 ~United Press International

(JAN. 17) UPI - Vice President Quayle will be the highest-ranking U-S official to visit Panama since the U-S invasion there when he makes a brief tour of Latin America this month.

Quayle will make a diplomatic mission to Panama, Honduras and Jamaica January 27th through 29th.

Quayle plans to start the trip in Honduras for the inauguration of Rafael Callejas as president. There, Quayle will meet separately with visiting heads of state from the region also in attendance.

Quayle also will meet the newly installed president of Panama, Guillermo Endara.

Many Latin American countries have condemned the U-S invasion of Panama. Bush has acknowledged Quayle's good-neighbor mission is ''very, very important.''

Researchers at a Boston hospital say a 13-week study of 20 healthy people showed that oat bran has NO special cholesterol-lowering power. Researchers at Brigham and Women's Hospital say much-touted drops in cholesterol among bran eaters probably are caused by cutting back on fatty foods.

The study found that oat bran and low-fiber wheat both resulted in seven-percent drops in cholesterol levels.

But upon further investigation, researchers found that people who took part in the study had cut their intake of foods high in cholesterol and saturated fat while eating the oat bran and low-fiber wheat foods.

Dr. Frank Sacks, director of the study, says- quote- ''oat bran as a fiber doesn't do anything.'' He says- ''it's been terrifically over-hyped.''

But Dr. James Anderson of the University of Kentucky disputes Sacks' claim and says he does NOT agree with the conclusion that oat bran has little effect. Anderson conducted a study of the matter in 1981.

#90017u4396 01/17/1990 ~United Press International

(JAN. 17) UPI - Rescuers reached the wreckage of an Air Force F-15 jet fighter that crashed yesterday on a mountain 30 miles west of Anchorage, Alaska. But military officials say there was NO sign of the pilot, the plane's only occupant.

Costa Rican authorities now say five Americans were among the 23 people killed in Monday's crash of a twin-engine plane during a domestic flight. The airline initially said only one American was aboard. There were NO survivors from Costa Rica's worst air disaster in 10 years.

Workers at four more mines in southern Poland walked off the job today. The new strikes bring to eight the number of coal mines affected in Poland's worst labor unrest since the Solidarity-led government was elected last June.

Car production ground to a halt at 10 Ford Motor Company plants in Britain as nine-thousand workers staged unofficial strikes today. The walkouts came as union leaders and Ford officials met in London to discuss the company's two-year contract offer.

The government predicts U-S meat production will reach a record 62-point-nine-BILLION pounds this year. In addition, the Agriculture Department is forecasting that, for the first time, Americans may eat more chicken than beef.

N-B-C has sold the off-network t-v rights to the entire ''Saturday Night Live'' library to M-T-V Networks and ''Ha! The T-V Comedy Network.'' The deal involves more than 300 ''S-N-L'' programs, from the show's October 11th, 1975, premiere through the 1991 season. The sale price was NOT disclosed.

-30- 1706

#90017u4557 01/17/1990 ~United Press International

(JAN. 17) UPI - Court officials in Los Angeles say the judge in the McMartin Pre-School molestation case will announce tomorrow the verdicts reached by jurors on 52 of the 65 counts. But what happens on the remaining 13 counts is up in the air... after the jury today told the judge it's deadlocked on those counts. Two former teachers at the now-closed Virginia McMartin Pre-School are charged in connection with the alleged incidents that occurred between 1978 and '83.

It looks as though Panama's deposed General Noriega could be going to trial soon. U-S District Judge William Hoeveler said in Miami today that he probably will set trial for the week of March 5th for all 16 defendants in the Noriega drug-trafficking and money laundering case. Noriega first appeared in U-S court January 5th, and Hoeveler says he needs to set the trial quickly to comply with federal speedy trial statutes.

President Bush met with law enforcement directors and military officials in Washington today in preparation for announcing his sequel to last year's drug plan. Bush will outline his new anti-drug strategy next Thursday at the White House. The administration says the plan will include

more federal agents, a bigger role for the military, and a possible death sentence for drug lords.

Generals from NATO and the Warsaw Pact are meeting in Vienna for unprecedented arms talks, and today the chairman of the U-S Joint Chiefs of Staffs issued an assessment. General Colin Powell says NATO is still a viable force but that it appears the United States now can cut defense spending without jeopardizing its security. Powell spoke at a news conference after the second day of the informal talks. In his words- ''The world does seem to be moving in a new and more positive direction.''

-30- 1959

#90017u4559 01/17/1990 ~United Press International

(JAN. 17) UPI - The Soviet government has told its troops to shoot, if necessary, to quell what military commanders say is civil war along the country's southwestern border. Bloody battles between Moslem Azerbaijanis and Christian Armenians show NO signs of abating after five days. Residents of one Azerbaijani village smashed a monument to Soviet state founder Vladimir Lenin. Desperate Armenians raided armories for weapons.

Federal officials say they plan to stop marking passports of AIDS-infected foreigners and will loosen travel rules related to AIDS. The announcement in Washington comes in advance of two major medical conferences this summer. Many health groups... including the international Red Cross... had threatened to boycott the seminars if the policies were NOT changed.

Alaska's most famous race has a record field this year. 77 men and women are signed up to run the Iditarod sled dog race in March. New cash prizes may have attracted the racers. Besides the 250-thousand-dollar purse for the top 20 sleds, there's a one-thousand-dollar prize for anyone else who finishes. The 11-hundred-mile Anchorage-to-Nome marathon has taken up to three weeks to complete.

There have been numerous reported sightings of Elvis Presley since his death more than 12 years ago, and now ''the King'' will be appearing on your t-v screen. A-B-C network officials say ''Elvis,'' the television series, will make its debut next month. Elvis' former wife, Priscilla Presley, is one of the producers of the series, which network officials say is based on true incidents in the singer's life, set in the early 1950's. It will debut in a special premiere on Tuesday, February 6th.

#90018b0003 01/18/1990 ~Business Wire

DES MOINES, IA (JAN. 18) BUSINESS WIRE - Equitable of Iowa Companies owns approximately 22.6 percent of the outstanding common stock of Commercial Federal Corp., a savings and loan holding company, which it accounts for

by the equity method.

Commercial Federal announced yesterday that it has been requested by OTS/FDIC to increase its loan loss reserve by approximately $47 million. Although Commercial Federal does not support the magnitude of the adjustment, it plans to immediately add to its reserves once a final number is determined.

Equitable estimates that the maximum reserve increase by Commercial Federal will reduce Equitable's 1989 net income by approximately $6.3 million, or 88 cents per share.

Equitable of Iowa Companies is a Des Moines based corporation with subsidiaries specializing in individual life insurance, annuities and retailing. At Sept. 30, 1989 it had assets of $2.7 billion and life insurance in force of $7.4 billion.

#90018b0010 01/18/1990 ~Business Wire

BELLEVUE, WA (JAN. 18) BUSINESS WIRE - Summit Savings Association (NASDAQ: SMMT) Thursday reported net income of $90,000, or 13 cents per share, in the second fiscal quarter ended Dec. 31, 1989, compared to a loss of $209,000, or 33 cents per share, for the same quarter last year.

Earnings for the six months ended Dec. 31, 1989, were $150,000, or 22 cents per share, compared to a loss of $397,000, or 63 cents per share, for the six months ended Dec. 31, 1988. Last year's results were negatively affected by additions to loss reserves.

''Reported earnings reflect further results of the restructuring efforts which began last spring, including a significant increase in loan production and the successful sale of real estate owned,'' said James F. Grabicki, president.

He added: ''A successful offering of common stock resulted in a significant increase in the company's equity capital. The offering, together with the over-allotment option granted to the underwriter, was completed Jan. 16, 1990, adding over $5.4 million. Summit Savings' equity capital ratio exceeds 7 percent and the company now complies with all of the fully phased-in regulatory requirements pursuant to the Financial Institutions Reform, Recovery and Enforcement Act (FIRREA) and is now able to implement a prudent strategy of growth.''

Summit's second quarter loan production increased 170 percent to

$25,368,000 compared to $9,410,000 in the second quarter of fiscal 1989. At Dec. 31, 1989, the Association serviced $96,019,000 in loans for others.

Total assets at Dec. 31, 1989, were $108,430,000 compared to $100,810,000 one year earlier. The Association's net worth was $7,698,000, representing 7.1 percent of assets and book value was $4.21 per share at Dec. 31, 1989.

Summit Savings Association is a Bellevue-based thrift institution emphasizing residential lending of all types and offering a wide range of financial services including money market accounts and certificates, annuities, and other investment products. The Association serves the greater Seattle metropolitan area, offering competitive service and rates.

#90018b0018 01/18/1990 ~Business Wire

CLEVELAND (JAN. 18) BUSINESS WIRE - Parker Hannifin Corp. (NYSE:PH) Thursday announced net sales from continuing operations were $594.6 million for the second quarter of fiscal 1990, ended Dec. 31, up 2.6 percent from the $579.8 million reported for the prior year's second quarter.

Net income from continuing operations in the recent quarter was $25.4 million, down 5.3 percent from $26.9 million a year ago, with corresponding earnings per share of 52 cents, down from 55 cents a year ago.

Reported as discontinued operations were operating results and the gain on the sale of the company's three automotive aftermarket divisions and its Biomedical unit, which were divested in December.

Parker obtained $80.5 million in cash for the sale of the automotive aftermarket divisions. Of this amount $60 million was used to retire debt resulting in an early redemption premium, which was reported as an extraordinary item. The company received a convertible preferred stock position in Strato Medical Corp. in exchange for its Biomedical operation.

Net income for the recent quarter, after the impact of discontinued operations and the early redemption premium, was $25 million or 51 cents per share, compared to $27.9 million or 57 cents per share in the year-ago quarter.

First-half sales from continuing operations for fiscal year 1990 totalled $1.17 billion, compared to $1.14 billion for the like period a year ago.

First-half net income from continuing operations was $47.3 million or 97 cents per share, compared to $51.7 million or $1.07 per share a year earlier.

First-half net income, after the impact of discontinued operations and the early redemption of debt premium, was $48.4 million or 99 cents per share, compared to $53.8 million or $1.11 per share a year ago, before the addition of 44 cents a share for the cumulative effect of accounting changes.

Parker Hannifin is a leading producer of motion-control components and systems for a wide range of industrial and aerospace markets. Parker employs 31,000 people in approximately 200 plants around the world, making hydraulic, pneumatic and electromechanical products. Sales from continuing operations for the year ended June 30, 1989, were $2.4 billion. Reported net income for the year was $124.5 million.

#90018b0022 01/18/1990 ~Business Wire

SAN FRANCISCO (JAN. 18) BUSINESS WIRE - BankAmerica Corporation Thursday reported record annual earnings of $1,103 million for 1989, a 52 percent increase from $726 million for 1988.

Earnings per common share were also a record at $5.19 for the year ended December 31, 1989, up 37 percent from $3.79 per common share for the same period in 1988.

The year's results included $270 million for the fourth quarter of 1989, up from $265 million for the fourth quarter of 1988. Earnings per common share were $1.21 in the fourth quarter of 1989, compared with $1.36 in the same period a year ago.

Fourth quarter 1988 figures reflect significant items, notably $351 million of interest income from Brazilian obligations and $167 million of nonrecurring restructuring costs.

"Fourth quarter results contributed to making 1989 earnings the highest in BankAmerica's history," said BankAmerica Chairman A. W. Clausen. "Improved credit quality, increased loan and deposit volume, and growing fee revenue, coupled with continuing control over operating expenses, have produced an excellent finish to a turbulent decade for the corporation.

"I am proud of what BankAmericans have accomplished in a short period of time under difficult circumstances, and confident of our ability to continue building on the record we have established.

"1989 was a year of particularly strong growth in domestic consumer loans and residential mortgage loans. At the same time, we reduced our cross-border outstandings to restructuring countries by $1.4 billion since the fourth quarter of 1988 and increased the adjusted reserve coverage attributable to the remaining medium- and long-term restructuring country debt to 47 percent.

"We also began serving retail customers in Nevada through our newly acquired subsidiary, Bank of America Nevada. In addition, Seafirst Corporation gained twelve new branches in the key area of Pierce County in Washington State through the completion of its acquisition of American Savings Financial Corporation.

"With our expanded customer base and our strong capital position, BankAmerica enters the 1990s in an excellent position to meet the challenges and opportunities that lie ahead."

Taxable-equivalent net interest income was $1,015 million for the fourth quarter of 1989, compared with $1,272 million for the fourth quarter of 1988. Net interest income for the fourth quarter of 1988 included the recognition of $351 million of Brazilian cash interest payments.

#90018b0023 01/18/1990 ~Business Wire

PORTLAND, OR (JAN. 18) BUSINESS WIRE - Pope & Talbot Inc. Thursday reported record sales and earnings both for 1989 and for the year's fourth quarter.

Net income for 1989 reached $43,637,000, or $3.70 per share, substantially ahead of the previous record of $31,944,000, or $2.68 per share, reported for 1988. As mentioned in the third quarter, 1989 results included a $3.5 million, or 29 cent per share, gain related to sale of a sawmill and veneer plant in Oakridge, Ore. Adjusting for this gain, 1989 earnings still were better than 25 percent ahead of 1988. Revenues in 1989 were $618,758,000, or 20 percent greater than the $514,980,000 reported for 1988.

Fourth quarter net income was $9,821,000, or 84 cents per share, a 14 percent gain over $8,649,000, or 73 cents per share, in 1988's record fourth quarter. Revenues of $147,622,000 in the quarter were 4 percent higher than for 1988's final quarter.

Each of the company's three divisions reported higher earnings for the fourth quarter than for the same period in 1988, with wood products and consumer products showing the best year-to-date comparisons.

Peter T. Pope, chairman and chief executive officer, was cautiously optimistic as he looked into 1990. ''The current year looks encouraging '' he said. ''Last year's record operating numbers will be difficult to beat in a weak economy,'' he continued. ''However,'' Pope concluded, ''the balance among our product lines and the economic integration between products produced and materials consumed provide an excellent foundation for another very good year.''

Pope & Talbot Inc. is a publicly held, Portland-based paper, pulp and wood products company traded on the NYSE. Pope & Talbot was founded in 1849 and has operations throughout the United States and in Canada.

SUNNYVALE, CA (JAN. 18) BUSINESS WIRE - California Microwave Inc. (OTC:CMIC) reported record sales, net income and earnings per share for its second quarter and first half, and projected record sales and earnings for its full fiscal 1990 year.

For the fiscal 1990 second quarter ended Dec. 31, 1989, net income increased 52 percent to $1.9 million, or 22 cents per share, on a sales increase of 32 percent to $40.3 million. Last year's second-quarter net income was $1.2 million, or 15 cents per share, on sales of $30.5 million.

For the first half ended Dec. 31, 1989, California Microwave's net income increased 35 percent of $3.3 million, or 39 cents per share, on a sales increase of 25 percent to $71.6 million. For the like six months last year, net income was $2.4 million, or 29 cents per share, on sales of $57.2 million.

Period-end contract backlog was $121.6 million, a decline of 4 percent from $127.1 millino at the like time last year. New orders booked during the second quarter totaled $30.2 million, compared to $29.5 million last year. First half new orders were $67.8 million, compared to $86.9 million for the like period last year.

California Microwave said, as it had last quarter, that total bookings for its fiscal year 1990 are expected to be comparable to last year's record $146 million. Approximately 95 percent of the backlog is expected to be

delivered during the next 12 months.

The company indicated that current increases in receivables and work-in-process inventories resulting from the record shipment rates were financed through increased use of its credit facilities.

California Microwave Inc. is a leading supplier of microwave and satellite communications systems.

HOUSTON (JAN. 18) BUSINESS WIRE - Transco Exploration Co., managing general partner and majority owner of Transco Exploration Partners Ltd. (TXP) (NYSE: EXP) announced Thursday that it has received final approval from the Texas Parks and Wildlife Department and other regulatory authorities to submerge an out-of-service production platform in the Gulf of Mexico as part of the state's new "Rigs to Reefs" program.

This is the first such artificial reef to be established offshore Texas under the program.

Located approximately 90 miles offshore Galveston on High Island Block A-492, the 210-foot structure will be toppled and submerged in 195 feet of water to create an artificial reef environment and enhance fish habitation in the Gulf.

TXP ceased production on High Island A-492 in November 1987, and the deck section and production facilities were removed from the structure in December 1989. The remaining subsurface jacket section will create the artificial reef.

"TXP has been an active participant for many years in the development of energy resources in the Gulf of Mexico," said John H. Lollar, president and chief operating officer, Transco Exploration and Production Co.

"The 'Rigs to Reef' program allows Transco and other companies to turn otherwise unusable structures into artificial reefs that will have lasting value in helping to replenish fishing resources, develop reef mass and enhance marine life in the Gulf of Mexico."

In addition to donating the offshore structure, TXP is also making a financial contribution to the "Rigs to Reefs" program. A portion of the funds will be used to install and maintain navigational buoys over over the Transco 492 artificial reef until new nautical maps are drawn.

MILPITAS, CA (JAN. 18) BUSINESS WIRE - California Micro Devices Corp. (NASDAQ:CAMD) Thursday reported net income of $503,000, or 12 cents per share, for the second quarter ended Dec. 31, 1989, compared to a loss of $606,000, or 15 cents per share, for the same quarter last fiscal year.

Revenue for the quarter was up 59 percent to $10,034,000 vs. $6,301,000 for last year's second quarter. Six-month income was $928,000, or 21 cents per share, compared to last year's loss of $1,777,000, or 45 cents per share.

Revenue for the six-month period was up 54 percent to $18,430,000 compared to $11,940,000 for last year's first six months. The dramatic increase in revenue and the return to profitability can be attributed largely to an increasing base of telecommunication customers and an increased demand for Thin Film products.

A high-performance, microelectronics component technology company, California Micro Devices designs, manufactures, and markets a wide range of electronic components through its Microcircuits, Vanguard Semiconductor and Thin Film divisions. These components are marketed to communications, computer, industrial, medical, aerospace and military customers.

     #90018b0067 01/18/1990 ~Business Wire
BIRMINGHAMN, AL. (JAN. 18) BUSINESS WIRE - Secor Bank, Federal Savings Bank (NASDAQ:SECR), reported a net loss (unaudited) of $(3,637,000) before extraordinary income and payment of preferred stock dividends for the quarter ended Dec. 31, 1989.

During the three-month period ended Dec. 31, 1989, Secor recorded extraordinary income of $874,000 as a result of the early extinguishment of convertible subordinated debentures. The payment of preferred stock dividends for the quarter totaled $1,688,000 resulting in a net available for common stockholders of $(4,451,000).

The net available per common share before extraordinary income was $(1.50). The net available per common share after extraordinary income was $(1.26). During the three-month period ended Dec. 31, 1989, a specific loan loss provision of $3,435,000 was recorded for potential losses on loans originated in prior years.

The majority of the loans are commercial real estate loans originated prior to 1988. Management is of the opinion that as a result of this provision, its specific and general loss reserves are adequate at Dec. 31, 1989, to absorb potential losses. In addition to the specific provision recorded, management will continue to increase the general loss reserve through a monthly provision which is based upon a percentage of loan originations.

Management also decided during the quarter to record a $420,000 provision for loss on an outstanding lawsuit against the bank. Management is of the opinion that the provision is adequate to cover the probable loss on the lawsuit. Management of the bank, consistent with other substantial financial institutions during 1989, is attempting to specifically provide for all probable losses they are aware of at this time.

For the year ended Dec. 31, 1989, Secor reported net income (unaudited) before extraordinary income and preferred stock dividends of $635,000. Extraordinary income, as discussed above, and preferred stock dividends for the year ended Dec. 31, 1989, totaled $874,000 and $6,748,000, respectively.

The net available for common stockholders after extraordinary income and preferred stock dividends was $(5,239,000). The net available per common share before extraordinary income was $(1.74) and the net available after extraordinary income was $(1.50).

For purposes of comparing the 1989 results with the results of the prior year, income before income taxes, extraordinary income and preferred stock dividends for the year ended Dec. 31, 1989, totaled $635,000, as compared to $19,308,000 for the like period in 1988.

The decrease from the prior year is primarily attributable to a significant gain recorded on the sale of investments in 1988, additional loan loss provisions recorded in 1989 and increased operating expenses in 1989. The bank's net interest income did not cover operating expenses during 1989 primarily as a result of the inverted treasury curve which reduced current spreads and eliminated the bank's plans for asset growth.

On Jan. 1, 1990, Secor paid a 10 cents per share quarterly cash dividend to stockholders of record on Dec. 15, 1989.

Total assets of Secor Bank at Dec. 31, 1989, were $2.323 billion, as compared to $2.695 billion at Dec. 31, 1988.

Secor Bank is a regional financial services company, headquartered in Birmingham, with 62 branch offices and 13 loan production offices located throughout Alabama, Louisiana, Florida and Tennessee. Secor Bank is publicly owned with stock trading as SECR in the OTC market.

#90018b0071 01/18/1990 ~Business Wire

NEW HAVEN, CT. (JAN. 18) BUSINESS WIRE - Southern New England Telecommunications Corp. (NYSE:SNG) announced Thursday that consolidated net income for 1989, without the one-time gain from the sale of its interest in LIGHTNET-(a), was $170.1 million or $2.74 per share, up 9.5 percent over 1988 net income of $155.4 million or $2.50 per share.

With the one-time, after-tax gain of $19 million, or 30 cents a share, from the sale, net income for 1989 was $189.1 million, or $3.04 per share. Fourth quarter earnings per share for 1989 were 67 cents, compared with 64 cents in the fourth quarter of 1988. All earnings per share figures have been restated for the two-for-one stock split SNET announced in December 1989.

''Our solid performance in 1989 indicates that our business strategy is sound,'' said Walter H. Monteith Jr., SNET chairman and chief executive officer.

''We will continue to focus on building our network business in Connecticut, improving service, marketing innovatively, and managing costs aggressively. Our goal is to continue to be a financially sound company that provides excellent service to customers and excellent value for shareholders. We're determined to do whatever it takes to accomplish this.''

Revenues and sales for the year increased 5.6 percent to $1,670.5 million, compared with $1,582.6 million in 1988. Fourth quarter revenues and sales were relatively flat. The company said that for the fourth quarter, SNET Systems had a decline in sales when compared with its unusually high sales in the fourth quarter of 1988.

This, coupled with moderating growth in the economy, was offset by continued but slower growth in in-state toll revenues and strong revenues from SNET Publishing, which publishes Yellow Pages and White Pages directories.

For the year, revenues from directory advertising reached $162.6 million, up 13 percent. The cellular mobile phone business increased its customer base by 40 percent from year-end 1988 to December 31, 1989. The cellular business also expanded its coverage area, upgraded its technology, and expanded its sales distribution channels. Revenues and sales from other subsidiaries also showed gains.

Costs and expenses for the year, excluding interest, rose 4.7 percent. Interest expense for the year declined 10.4 percent due to SNET's use of a portion of the proceeds from the LIGHTNET sale to reduce debt. SNET Systems took a somewhat larger than expected inventory write-down of about $9 million, as the subsidiary continued to re-evaluate and update its product lines and the level of inventory needed to service existing customers.

Headquartered in New Haven, SNET is an independent telecommunications company that offers network services, communications equipment, and information management systems.

#90018b0073 01/18/1990 ~Business Wire

SAN FRANCISCO--(BUSINESS WIRE)--The common stock of The Pacific Bank has been approved for listing on the NASDAQ National Market System effective Jan. 16, 1990, it was announced Thursday by Norman C. Eckersley, chairman of the San Francisco-based bank. The shares will trade under the symbol PBSF.

The bank currently has 3,585,714 shares outstanding. Total capital as of Dec. 31, 1989, was $57,565,000 and assets were at $676,497,000. As previously reported, net income for the year ended Dec. 31, 1989, was a record high of $7,431,000, a 110 percent increase over the previous year.

The Pacific Bank was founded in September 1983 by a group of veteran San Francisco banking executives and has posted increased earnings in each year of operation.

Privately held for the first few years of business, in mid-1989 the bank increased its capital by $15.5 million through a rights offering to existing stockholders of one share for each five shares held, and through the sale of 400,000 shares to clients and supporters of the bank.

The latter marked the first time the bank had offered stock outside of its original shareholders. Demand for the stock was 45 percent higher than the amount made available. Eckersley said the additional capital provides a solid base for further growth and expansion of the bank.

The Pacific Bank has four offices in the San Francisco financial district, at 101 California St., 100 Montgomery St., 201 Spear St. and 351 California St. where headquarters are located, with subsidiary and representative offices in Hong Kong, and an off-shore facility in the

Cayman Islands.

Domestically, the bank specializes in providing customized services for mid-size businesses and upscale individual accounts, and is very active in import/export trade finance.

LOS ANGELES (JAN. 18) BUSINESS WIRE - Home Savings of America, the nation's largest savings and loan institution, Thursday reported that its retail deposits in 1989 increased by a record $3.6 billion -- the largest one-year gain in the company's history.

Deposits at Dec. 31, 1989, totaled $33.09 billion, the largest deposit base of any U.S. savings institution.

''The record growth in our deposits is noteworthy because it occurred during a period of increasingly negative news coverage of the savings and loan industry, as well as deposit outflows from the industry,'' said Richard H. Deihl, chairman and chief executive officer.

Deihl noted that more than 530,000 new deposit accounts were opened last year at Home Savings of America's 357 branches in nine states, indicating consumer confidence in the 100-year-old savings institution.

New deposit inflows for the past year -- excluding interest credited to existing accounts -- totaled $1.48 billion. Deposit growth continued to be in retail accounts -- deposits of individual consumers. The company does not utilize brokered deposits.

Home Savings of America's strategy continues to focus on gathering retail deposits and funding residential home mortgages. It has not expanded into non-real estate lending programs, such as auto financing, consumer loans or unsecured commercial loans, and has never invested in high risk ventures such as junk bonds.

Home Savings of America, with assets of more than $44 billion and deposits of more than $33 billion, is the nation's largest savings and loan institution. It is the principal subsidiary of H.F. Ahmanson & Company (NYSE:AHM).

#90018b0088 01/18/1990 ~Business Wire
SARASOTA, FL (JAN. 18) BUSINESS WIRE - OMNI Films International Inc. (NASDAQ:OFII) announced Thursday that it has entered into an agreement with a Japanese group for installation of a Motion Master theater at Kijima Amusement Park near Osaka in southern Japan.

This is the fourth Motion Master system to be sold in Japan.

This new contract brings contract sales to a record level of $4.9 million in the first 120 days of the current fiscal year. These contract sales represent a 188 percent increase over the total amount of contract sales for the prior fiscal year which ended Sept. 30, 1989.

Fred Hollingsworth III, president, stated, ''Our sales penetration in foreign markets, especially in the Far East, is growing at a very strong rate. In addition to the record sales announced to date, the positive worldwide interest in our cinema systems in continuing. 1990 is progressing as the best year in our company's history.''

Under terms of the $800,000 agreement, OMNI will supply a complete Motion Master theater package, including theater design, hydraulically actuated motion seats, synchronization and show controls, projection screen, 70mm projector, six channel surround sound, installation guidance and training of operating and maintanence staff. The agreement also includes the leasing of adventure films produced by OMNI. Shipment of the Motion Master theater is scheduled for late March 1990.

OMNI Films International specializes in the design, sale and installation of five separate and distinct 70mm wide screen cinema systems, and produces, distributes, and licenses 70mm films for these systems. OMNI has delivered approximately 200 of its cinema systems to locations in 53 countries, including every continent except Antarctica. OMNI is traded on the NASDAQ system under the symbol OFII.

MENLO PARK, CA (JAN. 18) BUSINESS WIRE - The Peninsula Intellectual Property Law Association (PIPLA) located in San Francisco Bay's Silicon Valley, has named Jerome Drexler ''Inventor of the Year'' for 1990, based upon his invention of the laser-recordable, plastic, wallet card also known as an optical memory card.

The 15th annual award will be bestowed at a dinner ceremony in Palo Alto

on Feb. 7.

The PIPLA is an organization of more than 200 local patent, copyright, trade secret and trademark attorneys, all of whom are entitled to submit a nomination for ''Inventor of the Year.'' The PIPLA selection committee chose Drexler over the other 1990 nominees as well as submissions from previous years.

Drexler, the president of Drexler Technology Corp. (NASDAQ/NMS:DRXR), filed his first two optical memory card patent applications in March of 1981. Since that time 41 U.S. patents have been issued in the United States and assigned to Drexler Technology.

Drexler Technology Corp. has headquarters in Mountain View, where it has established a card manufacturing plant (at a cost of about $25 million) which is capable of producing about 25 million cards per year. The company also has spent about $25 million on R&D and engineering to develop the cards and the reader/writer units.

Drexler Technology Corp. is a publicly held company whose shares are traded on the NASDAQ National Market System. The company manufactures LaserCard optical memory cards and develops related software and LaserCard-based workstations. ''LaserCard'' is a registered trademark of Drexler Technology Corp.

SAN FRANCISCO (JAN. 18) BUSINESS WIRE - Clyde W. Ostler, 42, has been named vice chairman of retail branch banking for Wells Fargo's retail banking group.

He was formerly chief financial officer of Wells Fargo & Co. Promoted to chief financial officer is Rod Jacobs, 49, executive vice president of financial planning and analysis in the bank's finance group.

Ostler will oversee sales, systems, operations and real property management functions for the bank's 462 branches in California and its five 24-hour customer service centers. He will report directly to Bill Zuendt, vice chairman of Wells Fargo's retail banking group.

Ostler joined Wells Fargo in 1971 as an analyst in the finance group's management sciences department. He was named vice president in 1975 and was promoted to manager of management sciences in 1977. He moved to the international banking group in 1978 and returned to the finance group in 1981.

He was elected senior vice president that year and was named general auditor in 1983. In 1985, he was named executive vice president and in 1986 headed corporate systems planning. He had been chief financial officer since 1986.

Ostler is a 1968 graduate of the University of California, San Diego, with a degree in mathematics, and received an MBA from the University of Chicago in 1970. He resides in Corte Madera,

Jacobs joined Wells Fargo in 1979 as a financial analyst in bank's management sciences department. He was named vice president of that department in 1981 and senior vice president in 1983. As head of the financial planning and analysis, he was responsible for management reporting, management sciences and treasury and was named executive vice president in 1988.

HOUSTON (JAN. 18) BUSINESS WIRE - General Homes Corp. (NYSE:GHO) Thursday announced that it will be paying a solicitation fee to eligible brokers and dealers for soliciting tenders in its offers to exchange its new Series B Convertible Preferred Stock for any and all of its outstanding 12-3/4 percent Subordinated Notes due 1998 and its outstanding 15-1/2 percent Subordinated Notes due 1995.

The fee will be payable only if the exchange offers are consummated. A condition to consummating the exchange offers is the tender of at least 90 percent in principal amount of each series of the subordinated notes. As of Jan. 17, 1990, approximately 65 percent in principal amount of the 12-3/4 percent notes and approximately 58 percent in principal amount of the 15-1/2 percent notes had been tendered.

General Homes is circulating a supplemented prospectus and other material to brokers and holders of notes. To comply with applicable laws, General Homes has extended the expiration of the exchange offers to 5 p.m., New York City time, on Thursday, Feb. 1, 1990.

The exchange offers had been scheduled to expire on Thursday, Jan. 18. General Homes has asked its lenders for an extension of the Jan. 19

deadline for completion of the exchange offers under its senior secured credit agreement.

As previously announced, General Homes' special shareholders' meeting to approve certain matters in connection with the exchange offers has been adjourned to Jan. 19, and may be further adjourned in the absence of a quorum.

CONTACT: General Homes, Houston, W.A. Le Sage, 713/270-4177.

#90018b0115 01/18/1990 ~Business Wire

MILWAUKEE (JAN. 18) BUSINESS WIRE - Firstar Corp. announced record earnings for 1989 of $87.2 million, or $3.73 per common share, up 15 percent from a comparable $3.24 per share for 1988.

Fourth quarter earnings of $22.6 million, or 97 cents per common share, represented an 18 percent increase over fourth quarter earnings in 1988.

For 1989, return on equity was 16.62 percent vs. 16.27 percent in 1988. Return on assets was 1.11 percent, up from 1.06 percent the prior year.

The income improvement for the year was attributable mainly to higher net interest revenue and fee income, along with tighter cost controls. Increased earnings for the quarter were driven primarily by fee income from trust services and charge card.

Net income for 1988, which included the sale of the corporation's headquarters property and extraordinary income tax benefits, totaled $134.9 million, or $5.83 per common share. Excluding these items, net income was $3.24 per share.

''We're very pleased that we not only sustained the record pace that earnings set in the first half of last year, but surpassed it even though net interest margins narrowed during the second half of the year,'' said Firstar Chairman John H. Hendee Jr.

Reserves for loan losses went unchanged during the quarter, and represented 1.80 percent of outstanding loans at year-end. This compares with 1.69 percent a year ago. Continued improvement was made in nonperforming assets during the fourth quarter as they fell $3 million. Nonperforming assets stood at $87 million at year-end and represented 1.61 percent of loans and other real estate. This was a reduction from the mid-year level of 1.91 percent, and the 1.71 percent after nine months. At December 31, 1989, reserves for loan losses represented 111 percent of nonperforming assets.

Total assets stood at $8.6 billion at year-end, up 8 percent from 1988. The biggest asset changes occurred in investment securities, up 30 percent from $1.3 billion to $1.7 billion; and domestic loans, up 8 percent from $4.9 billion to $5.3 billion.

Total deposits of $6.8 billion at year-end were up 6 percent compared to $6.4 billion for 1988. Shareholders' equity of $580 million was up 12 percent from a year earlier.

The board of directors declared a quarterly dividend of 28 cents per common share and $1.91875 per share to preferred stockholders. The dividends are payable Feb. 15 to stockholders of record Jan. 29.

Headquartered in Milwaukee, Firstar Corp. has 39 banks and 125 offices in Wisconsin, Minnesota, Illinois and Arizona.

TULSA, OK (JAN. 18) BUSINESS WIRE - Following its tough 1988 fiscal year, ONEOK Inc. "had a very good 1989," J.D. Scott, chairman, president, and chief executive officer, told shareholders at their annual meeting Thursday morning at corporate headquarters in Tulsa.

"ONEOK is back and financially sound," Scott said, quoting a theme used in the company's recently-published annual report for the 1989 fiscal year ended last August. "Looking back," he said, "we achieved a classic corporate turn-around in 1989." He reviewed these achievements during the year:

- Earnings per share of common stock increased by 71 percent;
- Market value of ONEOK's common stock increased by 76 percent; and
- Dividends were restored on common stock following three quarters in which they were omitted, and then were increased.

The completion of a financial restructuring during the year - culminating in the sale of $125 million of 30-year debentures - was one of the many actions contributing to the turn-around, Scott said, explaining that ONEOK thereby reduced the average weighted interest rate on all long-term debt by slightly more than two percent, or $6.8 million per year.

Scott added that ONEOK's utility division, Oklahoma Natural Gas Co., increased its average number of utility customers in 1989 for the first time since 1985 as the state began to show modest signs of economic

recovery.

More significant was activity in the company's industrial markets, he said: "We renewed contracts during 1989 with companies like Farmland Industries, Ford Glass, Agrico (fertilizer), and Brockway Glass.

"One-third of the volumes of gas being supplied to the company's largest industrial customers are under contracts that run ten years or longer, he noted, and another 60 percent are served under contracts of two to five years. That means "long-term stability for Oklahoma Natural and ONEOK."

In the nonutility division, the Energy Companies of ONEOK, exploration and production activities became profitable during 1989. According to Scott, the company's exploration strategy in 1990 and beyond will be to concentrate in areas "that offer the potential of material increase in our oil and gas reserves.

"We expect our new exploration strategy, over a reasonable time, to result in the addition of significant reserves that, together with increasing oil and gas prices, will add material shareholder wealth."

TULSA, OK (JAN. 18) BUSINESS WIRE - The board of directors of ONEOK Inc., Tulsa-based energy company, Thursday declared a quarterly dividend of 38 cents per share on its common stock, representing an increase of three cents per share.

J. D. Scott, chairman of the board, president and chief executive officer, announced that the dividend will be paid Feb. 15 to shareholders of record Jan. 31.

The new dividend is 8-1/2 percent more than the 35-cent-per-share dividend paid in each of the previous two quarters.

Scott also said that the new dividend rate will equate to 19 cents per share after giving effect to the 2-for-1 stock split approved today by shareholders at the company's annual meeting. The stock split will become effective at the close of business Thursday, Feb. 1.

The board also declared a regular quarterly dividend of 59.375 cents per share on its preferred stock, Series A, unchanged from the previous quarter, and also payable Feb. 15 to shareholders of record Jan. 31.

#90018b0153 01/18/1990 ~Business Wire

LOS ANGELES (JAN. 18) BUSINESS WIRE - Responding to a critical need for more affordable housing for large families, the Community Redevelopment Agency (CRA) Thursday approved spending $6.7 million to develop 272 units of such housing citywide.

The CRA board of commissioners voted to provide loans to five non-profit development groups seeking to build six separate housing projects -- worth almost $34 million -- throughout the city. The action is pending city council approval.

''The lack of affordable large family housing units in Los Angeles may be the most critical component of the city's housing shortage,'' said CRA Administrator John Tuite.

The $6.7 million in CRA loans comes from the successful Bunker Hill Replacement Housing Trust Fund, which generates monies from downtown redevelopment to build low-income housing citywide. Additional financing for the projects is expected to come from tax credits and state, city and private monies.

The housing complexes will be developed in El Sereno, West Los Angeles, Sun Valley and South Central Los Angeles, with two projects being built just west of downtown Los Angeles. Construction work on the six projects is expected to begin later this year, with completion sometime in 1991.

#90018b0169 01/18/1990 ~Business Wire

DENVER (JAN. 18) BUSINESS WIRE - Affiliated Bankshares of Colorado Inc. Thursday reported that earnings for the fourth quarter and year 1989 were significantly improved over the like periods last year.

Net income for the year 1989 was $6,451,727, or 54 cents per share, compared to a net loss of $3,189,701, or 41 cents per share, in 1988.

Net income in the fourth quarter of 1989 was $2,257,953, or 20 cents per share, compared to net income of $598,175, or 3 cents per share in the like period last year.

Kent Olin, president and chief executive officer, said the 1989 fourth quarter earnings include the effect of the previously announced specific evaluation of exposure to changing real estate values.

The provision for loan losses for the fourth quarter of 1989, including the normal provision, was up significantly to $11.9 million and the net expense on foreclosed property amounted to $9.9 million for the quarter.

The sale of the company's credit card interests resulted in a gain of $17.3 million being recognized in the fourth quarter of 1989, with the balance of the gain of $1.2 million to be recognized in 1990.

Olin said the level of non-performing assets (summary on separate page) reflects overall progress in problem resolution with changes between the categories and a significant decrease in non-accrual loans, the most serious category in terms of potential earnings impact. The reserve for loan losses of $40.1 million represents an increased coverage ratio of 99 percent of the $40.3 million in non-accrual loans at year end 1989.

Olin also said the individual bank performance in 1989 was generally good with 18 of Affiliated's 28 banks earning at least 1 percent on average assets, seven banks earning less than that rate and three banks reporting losses.

The net loss in 1988 included a significant provision for loan losses to recognize a deteriorating real estate market in Colorado Springs and a weak real estate market in metropolitan Denver. Conditions showed some improvement in 1989, particularly in the Denver market, which appears to have stabilized.

Total assets decreased .2 percent from Dec. 31, 1988, to $2.6 billion as of year end, 1989. Total deposits were $2.2 billion as of Dec. 31, 1989, representing a decrease of .5 percent during the last 12 months.

Total loans decreased 2.1 percent during the past 12 months to $1.5 billion, and investment securities were down 3.8 percent. Stockholders'

equity (book value) increased 4.3 percent during the past 12 months to $185 million, or $17.15 per common share.

Affiliated Bankshares is a state-wide bank holding company with $2.6 billion in assets, 28 banks and five active non-banking subsidiaries serving the major markets of Colorado. The company's shares are traded in the NASDAQ National Market System. The NASDAQ symbol is AFBK.

ROSWELL, NM (JAN. 18) BUSINESS WIRE - Effective with the start of trading on Friday, Jan. 19, the shares of Hondo Oil & Gas Co. will begin trading under the symbol HOG.

Hondo Oil & Gas formerly was traded as Pauley Petroleum Inc. (ASE:PP). The company name was changed recently when Pauley was merged with its Hondo Oil & Gas subsidiary, which has producing properties that represent the largest segment of the corporation's total assets.

Hondo Oil & Gas was acquired by Pauley in an exchange of stock in January 1988. At that time, Pauley issued 10 million new shares of common in an exchange for all of the common stock of Hondo. The former owners of Hondo currently hold approximately 80 percent of the total shares outstanding. Robert O. Anderson will continue as chairman, president and chief executive officer of the corporation.

The company has producing properties in 13 states and an active exploration program focused on the Southwest and Rocky Mountains. Hondo also owns a modern 30,000 barrel per day refinery in Carson, Calif. and markets oil, natural gas and other petroleum products.

Anderson said the corporate name change will not affect the refinery which will continue to operate as Fletcher Oil and Refining Co.

HONOLULU (JAN. 18) BUSINESS WIRE - First Hawaiian Inc., holding company for First Hawaiian Bank, Thursday reported record earnings for all of 1989, according to an announcement by Walter A. Dods Jr., First Hawaiian

chairman, president and chief executive officer.

This marks the company's 25th year of consecutive record earnings growth.

For the year ending Dec. 31, 1989, First Hawaiian Inc. reported consolidated net income of $57,435,000, a 32.5 percent increase over the $43,339,000 earned in 1988. Per share earnings for the year (adjusted for a previously announced two-for-one stock split) were $2.14, up 32.1 percent from the $1.62 in 1988.

Earnings for the fourth quarter of 1989 were $14,739,000, up 27.2 percent from the $11,591,000 earned during the year-earlier period. On a per share basis, fourth quarter earnings were up 25 percent to 55 cents, adjusted for a stock split, compared to the 44 cents for the fourth quarter of 1988.

First Hawaiian Inc. is a one-bank holding company whose principal subsidiary is First Hawaiian Bank, the state's second largest financial institution. Other major subsidiaries include First Hawaiian Creditcorp Inc., the state's largest locally owned industrial loan company; and First Hawaiian Leasing Inc., which is primarily engaged in commercial equipment and vehicle leasing.

WHITEVILLE, NC (JAN. 18) BUSINESS WIRE - United Carolina Bancshares Corp. (NASDAQ: UCAR) Thursday reported that net income for the year ended December 31, 1989 amounted to $24,223,000 compared to $22,943,000 for 1988 an increase of 5.6 percent.

On a per share basis, net income amounted to $1.74 in 1989 compared to $1.65 in 1988, an increase of 5.5 percent.

For the three months ended December 31, 1989, net income totaled $5,886,000 compared to $5,868,000 in 1988. On a per share basis, net income for the fourth quarter of 1989 amounted to $.42, unchanged from 1988.

At December 31, 1989, total assets amounted to $2,457,840,000, a 10.2 percent increase over 1988. Total deposits amounted to $2,229,079,000 at December 31, 1989, an increase of 10.7 percent over 1988. Loans and lease receivables increased 4.2 percent to $1,578,376,000 in 1989.

At December 31, 1989, stockholders' equity totaled $174,207,000, which

represented a book value of $12.50 per share.

Rhone Sasser, chief executive officer, stated that ''1989 marks the 19th consecutive year that UCB has reported an increase in earnings before securities transactions, a record of which we are very proud. The increase in 1989 earnings was due in large measure to solid growth in noninterest revenues and the control of growth in noninterest expenses.

UCB is the parent company of United Carolina Bank, which operates 109 branch offices in 62 North Carolina communities and United Carolina Bank of South Carolina, which operates 12 branch offices in 6 South Carolina communities. UCB's common stock is traded in the NASDAQ National Market System under the trading symbol UCAR.

The Board of Directors Thursday declared a quarterly cash dividend of 15 cents per share payable February 7, 1990 to stockholders of record on January 31, 1990.

#90018b0198 01/18/1990 ~Business Wire

SAN JOSE, CA. (JAN. 18) BUSINESS WIRE - VLSI Technology Inc. (NASDAQ:VLSI) reported record 1989 revenues of $288.5 million, an increase of 30 percent over 1988, and net income of $506,000, or 2 cents per share vs. $6.7 million last year, or 29 cents per share.

In the fourth quarter, revenues increased to a record level of $80.7 million, up 24 percent from the same quarter a year ago, and also up 5 percent from the third quarter of 1989. Quarterly net income reported was $2.8 million, or 12 cents per share, as compared to $2.9 million, or 13 cents per share, in the fourth quarter of 1988.

James R. Fiebiger, president and chief operting officer, said, ''Overall, 1989 was a year of significant achievements for VLSI. Our San Antonio facility is providing leading-edge process capability, and in San Jose our manufacturing operations have significantly improved productivity and efficiency, resulting in an excellent record of on-time product deliveries to our customers.

''With respect to new products, our recently introduced V8 ASIC Design Platform software has been very well received in the marketplace. It is a significant step in further automation of design and factory interface. V8 also ensures a very high degree of fault coverage for improved testability and sets a new standard for improving time-to-market by ease of use.

''A militarized version of the software, called the Viewpoint Express System, automates chip design by incorporating military standards and requirements.

''Only two years after entering the PC/AT compatible chip set market, we believe the Logic Division now leads in the supply of 12 Megahertz, 286 chip sets.

''The TOPCAT product line introduced in November provides 2- and 3-chip set solutions for 386 SX and 386 DX microprocessors. We believe that

TOPCAT has a technologically superior architecture which is exemplified by (1) major design wins with our customers and (2) Intel's decision to purchase and remarket it as part of their product line.''

Alfred J. Stein, chairman and chief executive officer, commented, ''Both the ASIC and Logic Division achieved record production revenues in the quarter contributing to all-time high revenues for this period. Despite record quarterly operating profits of $5.3 million, the combination of higher foreign exchange losses and a 28 percent tax provision resulted in slightly lower earnings on the sequential basis.

''Annual revenues of $288.5 million were up 30 percent over 1988. Noteworthy are our European and Asia Pacific revenues which were up significantly from last year. Operating profits of $5.4 million for 1989, compared to the prior year of $9.6 million, were lower, primarily due to the delayed start-up of our San Antonio facility.

''Given the strength of our product portfolio in both ASIC and ASSP (Application Specific Standard Product), along with a strong manufacturing capability, we believe that we are well positioned for continued growth in 1990.

''While we will continue cost-reduction and expense-control programs, we will aggressively pursue new product and technology development. Our team is dedicated to continued improvement in all areas, with emphasis on quality and reliability. We thank you for your continued support.''

FAIRFIELD, NJ (JAN. 18) BUSINESS WIRE - Measurement Specialties Inc. (NASDAQ:MMSS) reported a net loss of $651,801 (23 cents per share) on sales of $1,599,568, for the quarter ended Sept. 30, 1989, compared with a profit of $1,027,256 (37 cents per share) on sales of $6,066,499, for the same period of the prior year.

The loss was substantially the result of a significant decline in sales of the company's Ultra Sonic Distance Estimator. The company has sought to decrease its future dependency on distance estimator sales by introducing digital electronic tire pressure gauges, digital postage scales and digital food scales.

In addition, the company continues to market its digital electronic

bathroom scales.

CALABASAS, CA. (JAN. 18) BUSINESS WIRE - Jon Elliott, president and chief executive officer of Capitol Television Network, announced Thursday that the board of directors, acting within the scope of its authority, has reduced the exercise price of the company's Class A warrants from 25 cents to 10 cents, effective immediately.

All other existing conditions attached to the Class A warrants remain unaltered. Each Class A warrant gives the holder the right to purchase one share of the company's common stock. The Class A warrants expire on July 26.

In a related matter, Elliott stated that the board of directors recognized that Class A warrants had previously been exercised at 25 cents and voted to compensate those shareholders by issuing an additional 1.5 common shares of the company's securities for each Class A warrant exercised at 25 cents.

This action was taken upon the recommendation of the corporation's investment bankers, Capital Resources & Marketing Inc.

Elliott said, ''We anticipate that the corporation will receive a substantial amount of new capital as a result of the warrant exercise price reduction, while simultaneously providing an opportunity for our existing shareholders to acquire additional equity in the company at a more favorable price.''

Capitol Television Network is a publicly traded company on the Over-The-Counter market.

DALLAS (JAN .18) BUSINESS WIRE - Dallas Semiconductor Corp. (NASDAQ:DSMI) Thursday reported net sales of $21,540,000, for the fiscal fourth quarter

ended Dec. 31, 1989, compared with $16,679,000 for the fourth quarter of 1988.

Net sales for fiscal year 1989 were a record, totalling $82,209,000, compared with $58,093,000 for fiscal 1988.

Net income for the fourth quarter of 1989 was $2,979,000 (12 cents per share), compared with net income of $2,310,000 (9 cents per share) for the fourth quarter of 1988. Net income for the fourth quarter of 1988 includes an extraordinary credit of $157,000 (no cents per share), reflecting the tax benefits from recognition of net operating loss carryforwards.

Net income for fiscal year 1989 was a record, totalling $11,121,000 (45 cents per share), compared with net income of $9,982,000 (40 cents per share) for fiscal 1988. Net income for fiscal year 1988 includes an extraordinary credit of $2,701,000 (10 cents per share), reflecting the tax benefits from recognition of net operating loss carryforwards.

Dallas Semiconductor Corp. develops, manufactures and markets high performance Complementary Oxide Semiconductor (CMOS) integrated circuits and semiconductor-based systems that provide innovative and cost-effective solutions to electronic design problems in a wide range of existing and emerging markets.

#90018b0226 01/18/1990 ~Business Wire

SEATTLE (JAN. 18) BUSINESS WIRE - Security Pacific Bancorporation Northwest Thursday reported net income of $31.7 million for the quarter ended Dec. 31, 1989, and $114 million for the year, an increase of 10 percent and 26 percent, respectively, over the same periods last year.

In 1988, net operating income was $28.9 million for the quarter and $90.7 million for the year (excluding a $32 million after-tax gain from the sale of the company's Hong Kong operations).

''We wanted to earn $100 million during our 100th anniversary, which we did with room to spare,'' said John D. Mangels, chairman and chief executive officer. The holding company's principal subsidiary, Security Pacific Bank Washington, was founded in May 1889.

The earnings goal was achieved with the help of a healthy Pacific Northwest economy, above-average net-interest margins, stepped up loan demand and ongoing programs to improve efficiency.

''The fact that job growth in Washington exceeded 4.8 percent certainly helped; but our performance is more than just a result of a strong economy '' Mangels said. ''Our sales force contributed to significant growth in loans, and at the same time, we were able to keep expense growth to a minimum.''

Real estate, consumer and business loans all increased over last year, leading to a 10-percent increase in consolidated total assets to $10.2 billion. Non-interest expense increased 4 percent.

In 1989, return on assets (ROA) was 1.19 percent, while return on equity (ROE) was 16.8 percent, compared to 0.98 percent and 13 percent, respectively, in 1988 (excluding the Hong Kong gain).

All four bank subsidiaries in Security Pacific Bancorporation Northwest reported increases in net income for the year.

The four major bank subsidiaries, their net operating income for the year, and percentage increases are: Security Pacific Bank Washington, $100.2 million, 17 percent; Security Pacific Oregon BanCorp, $4.3 million, 116 percent; Security Pacific Bank Alaska, $1.9 million, 156 percent; and Security Pacific Savings Bank in Tacoma, $7.8 million, 66 percent.

Security Pacific Bancorporation Northwest is a Seattle-based, multi-bank holding company with assets of $10.2 billion and subsidiaries operating in Washington, Oregon and Alaska. The Bancorporation is an affiliate of Security Pacific Corp., the nation's fourth-largest banking company.

CUPERTINO, CA. (JAN. 18) BUSINESS WIRE - Apple Computer Inc., reported today that net revenues rose 6 percent for its first fiscal quarter ending December 29, 1989 compared to the same quarter of a year ago.

Net revenues for the quarter were $1.493 billion, compared to $1.405 billion in the year-ago period. Net income for the quarter was $124.8 million, 11 percent below the $140.5 million earned in the same period a year ago.

Included in the fiscal 1990 first quarter net operating income was $33.7 million ($20.5 million after tax, $.16 per share) for expenses related to cost-reduction programs and damages resulting from the October 1989 earthquake in the Bay Area.

Earnings per share were $.96, a 13 percent decrease from the $1.10 per share of the first quarter in the prior year.

International sales accounted for 36 percent of total revenues during the quarter, compared to 32 percent in the first quarter of fiscal 1989.

''The modest year-over-year growth in revenues reflects diverse growth rates of our various products,'' noted John Sculley, chairman and chief executive officer. ''Sales to consumers of the Macintosh Plus and the Apple II computers declined compared to year-ago levels for the quarter. At the same time, sales to the business market of our newer products, the Macintosh IIcx, IIci and SE/30, increased significantly.

''The Macintosh Portable, introduced in September, was supply-constrained throughout the quarter, which adversely affected revenue growth. In markets outside the U.S., where a greater proportion of our revenues are to business markets, we experienced strong sales momentum.

''As the personal computer industry enters a period of slower growth, we expect that the widely-recognized consistency and tight integration of the Macintosh platform will serve us well. We see more and more customers choosing Macintosh because they consider the alternatives as increasingly complex and confusing.

''In recent weeks we have identified a number of steps within the company, particularly in the area of employee expenses, to reduce our cost structure. We expect that these measures will bring expense growth in better line with revenue growth as we progress through this fiscal year. At the same time, we remain focused on key strategic priorities and opportunities. We believe these efforts will help insure that Apple will continue to prosper in 1990.''

PORTLAND, OR (JAN. 19) BUSINESS WIRE - In response to recent inquiries, Portland General Corp. (NYSE:PGN) said it expects the previously announced review of its common dividend to occur at the Feb. 6, 1990, meeting of its board of directors.

Portland General reported in November 1989 it intended to review the dividend in early 1990. In the earlier announcement, Portland General

said the dividend level could be influenced by events, such as an unfavorable outcome of outstanding regulatory issues, which could significantly affect stockholder equity.

Portland General is predominantly an energy company with businesses offering a range of regulated and commercial energy products and services. Its principal subsidiary, Portland General Electric Co., serves more than 567,000 retail electricity customers in northwest Oregon.

SAN ANTONIO (JAN. 18) BUSINESS WIRE - Frank E. Holmes, chairman, Thursday announced that United Services Advisors Inc. posted consolidated net earnings of $371,901 (8 cents per share) for the quarter ended Dec. 31, 1989.

These earnings represent a 37.4 percent increase over the earnings for the like period one year earlier of $270,724 (7 cents per share). Consolidated net earnings for the six month period ended Dec. 31, 1989 were $681,507 (15 cents per share), a dramatic improvement over consolidated net earnings of $24,773 (1 cent per share) for the same period one year earlier.

Holmes pointed out that for the quarter ended Dec. 31, 1989 the company earned $376,620 pre-tax on approximately $674 million in average net assets. This marked the highest level of quarterly pre-tax earnings in the company's history. Just prior to the October 1987 stock market crash, the previous high, $338,399, was achieved on average net assets of approximately $881 million for the quarter ended Sept. 30, 1987.

Since Sept. 30, 1989, total assets managed by the company have grown $200 million to approximately $815 million as of Jan. 16, 1990.

Increased earnings for the quarter ended Dec. 31, 1989 were principally attributable to higher levels of assets under management, favorable performance by the Funds, and continued emphasis on cost efficiency within the organization.

On the performance front, Holmes announced that the U.S. Gold Shares Fund, the company's flagship fund, was ranked the No. 1 fund in performance among all mutual funds as well as the No. 1 performing Gold Fund in the United States for the 12 month period ended Dec. 31, 1989 according to Morningstar Inc., publisher of ''Mutual Fund Values.''

''We are delighted to bring value to our shareholders in this way,'' stated Holmes. ''Over the long term, we anticipate continued strength in the gold shares market. Major contributing factors are greater interest in bullion, a strong demand for jewelry in the Far East, increased demand from Japanese financial institutions as well as the possibility of a gold-backed currency in the Soviet Union.''

United Services Advisors Inc. is a public company based in San Antonio and manages a mutual fund complex of 11 no-load mutual funds. The company's stock is traded over-the-counter (symbol USVSP).

#90018b0241 01/18/1990 ~Business Wire

PHOENIX (JAN. 18) BUSINESS WIRE - Pinnacle West Capital Corp. Chairman Keith Turley Thursday announced the retention of a London-based financial adviser specializing in the mining industry to investigate the possible sale of Malapai Resources Co.

''In evaluating our overall strategy for the future, we are considering every option available to us and that includes the potential sale of Malapai,'' Turley said. ''During the last year, we have received a great deal of unsolicited interest in Malapai from both foreign and domestic companies.''

He said that Warrior International Ltd. of London, ''is talking to a number of interested parties, although discussions are only in the very early stages.''

Malapai, a uranium mining company with operations in Wyoming and Texas, has long-term agreements with utility companies around the world to supply uranium for use in nuclear power plants. Palo Verde Nuclear Generating Station is not among Malapai customers.

''At this point, we are just exploring the possibility of a sale,'' Turley said. ''Before making a final decision, we will carefully consider all factors including what is best for Malapai in the long-term and what is best for Pinnacle West shareholders,''

In a related matter, Turley said that beginning Feb. 5, Malapai will temporarily suspend production of uranium concentrates.

''This is strictly an economic decision,'' Turley said. ''We would have taken this action regardless of our decision to investigate the possible sale of the company. Today's spot market price of uranium does not

support continued production.

''We're sacrificing short-term production for the long-term benefit of reduced costs and higher productivity.''

He said Malapai's existing inventory is sufficient to satisfy current long-term contractual obligations until resumption of operations. To be prepared for a resumption of operations, Malapai will continue licensing efforts, well-field construction and development and will expand international marketing efforts.

''Once the suspension is lifted, Malapai can resume operations within a few weeks,'' he said. ''With a recoverable uranium reserve of 5 million pounds in Texas and 35 million pounds in Wyoming, Malapai remains committed to its long-term customers and the long-range plan to be a low-cost supplier of uranium to the domestic and international nuclear utility industry.''

This action will affect approximately 40 Malapai employees at is Irigaray site in Wyoming and at production facilities in Duval and Webb Counties in Texas.

In addition to Malapai, other Pinnacle West subsidiaries include Arizona Public Service Co., MeraBank, SunCor Development Co. and El Dorado Investment Co.

KANSAS CITY, MO (JAN. 18) BUSINESS WIRE - US Sprint is demonstrating a long-distance service for correctional facilities that eliminates fraudulent calling and lowers costs for the caller.

The service, called ''Safe Block,'' was unveiled this week at the American Correctional Association conference in Nashville, Tenn.

Safe Block is an on-site, stand-alone telephone control system that administers outgoing inmate calls through a sophisticated switching process. The switching technology was developed by Bell South and Hitachi America Ltd.

''Safe Block has proven to be an excellent method of controlling prison telecommunications costs while improving services,'' said Lawrence L. Lake US Sprint's senior vice president of product management. ''We are changing the way prison telecommunications services have been sold in the

past.''

Without Safe Block, inmates are restricted to more expensive operator-assisted collect calls, which place the burden of cost on the inmate's family. In addition, the completion rate for collect calls from prisons is about one-third of the nationwide rate, resulting in high operator services costs for the industry.

With Safe Block, inmates establish a long-distance fund, similar to a commissary fund. They receive an individual 9-digit authorization code and an approved list of numbers they have selected to call.

The inmate enters the code and the phone number, Safe Block verifies the funding and destination number, and connects the call. If funding is unavailable, a warning sounds and the call is disallowed.

When a call is completed, calculations are done in microseconds and the system automatically debits the inmate's account. There's no need to access an operator at all.

''This system enables corrections administrators to customize the phone system to meet their specific needs,'' said Lake. ''They can pre-approve phone numbers, change approval as necessary and even set the maximum time allowed for calls. In essence they are in charge with Safe Block.''

With Safe Block, not only can prisons enjoy the benefits and rates offered by US Sprint and its all-digital fiber-optic network, noted Lake, but administrators can eliminate surcharges to inmates.

Special low to-the-facility rates can be passed on in part or in total to inmates, and it is possible for prisons to obtain the service and avoid any capital equipment cost increases.

US Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company based in Kansas City.

#90018b0259 01/18/1990 ~Business Wire

AUSTIN, TX (JAN. 18) BUSINESS WIRE - The Continuum Co. Inc. (ASE:CNU) announced that for the quarter ended Dec. 31, 1989, revenues were $21,666,000 compared to $16,058,000 for the quarter ended Dec. 31, 1988.

During the most recent quarter, the company had net income of $2,675,000, or $.61 per share, compared to net income of $23,000, or $.01 per share,

last year.

For the nine months ended Dec. 31, 1989, revenues were $58,314,000 compared to $49,351,000 for the comparable period in the previous year. Net income for the nine months was $3,012,000, or $.69 per share, compared to $1,108,000, or $.25 per share, a year earlier.

License sales during the quarter were $2,188,000 and included the previously announced sale of a license to the Continuum's CLIENT/CONTRACT ADMINISTRATION (''CCA'') System. License sales for the same quarter last year were $1,064,000.

Service revenues for the quarter totaled $19,478,000, a 30 percent increase over the same quarter a year ago while expenses other than marketing and administration grew only 19 percent, reflecting improved service personnel utilizations. Marketing and administration expenses decreased due to reduced legal expenses.

Ronald C. Carroll, chief executive officer, noted that increasing service revenue has required additional staffing. ''Our staff is now approximately 790 employees throughout the world.''

The Continuum Co. is an international consulting and computer services firm based in Austin serving the needs of life insurance and other financial services companies for computer software and services.

#90018b0270 01/18/1990 ~Business Wire
SAN FRANCISCO (JAN. 19) BUSINESS WIRE - Bank of San Francisco Co. (ASE:BOF) reported net income of $943,000 for the fourth quarter of 1989 and net income of $2,773,000 for the year ended Dec. 31, 1989.

Both quarterly and yearly earnings were records for the company.

Fourth quarter income represented 39 cents per share, on a fully diluted basis, an increase of 117 percent, on 2,398,007 shares outstanding vs. last year's 18 cents per share on 2,273,670 average shares outstanding.

For the year, net income represented $1.17 per share on 2,373,899 average shares outstanding, vs. 74 cents per share on 1,954,170 average shares outstanding, a 58 percent increase.

Net interest margin for the fourth quarter of 1989 was 5.96 percent vs. 6.25 percent in 1988, however, for the year the net interest margin

increased slightly to 6.08 percent from 1988's 5.74 percent.

Net interest income for the fourth quarter increased 24 percent, from $3,569,000 in 1988 to $4,423,000 in 1989. For the year, net interest income increased 34 percent from $11,737,000 in 1988 to $15,702,000 in 1989.

Due primarily to the outstanding performance of the bank's real estate subsidiary, Bank of San Francisco Realty Investors, non-interest income increased 159 percent in the fourth quarter and 59 percent for the year.

At year end the company's total assets were $331,025,000, an increase of 18 percent from $280,523,000 at Dec. 31, 1988. Total deposits were $305,505,000, a 19 percent increase from $257,096,000 the prior year.

The Loan Loss Reserve at Dec. 31, 1989, was $4,178,000, or 1.71 percent of total loans, excluding mortgage loans held for sale. The Loan Loss Reserve increased 49 percent from $2.8 million at Dec. 31, 1988. Net loans outstanding at year end were up 28 percent from the prior year. As a result of increases in both equity and reserves, the company's primary capital ratio as of Dec. 31, 1989, was 7.44 percent.

Stockholders' equity at year end was $20.8 million, or $9.14 per share, compared to $18.4 million, or $8.11 per share, at year end 1988. The increase is due to stong earnings.

#90018b0272 01/18/1990 ~Business Wire

SAN JOSE, CA (JAN. 19) BUSINESS WIRE - Esprit Systems Inc. (NASDAQ:ESPTC) Thursday reported that for the second quarter fiscal year 1990 ended Nov. 30, 1989, net sales decreased 12 percent to $4,883,000, compared with sales of $5,567,000 for the quarter ended Dec. 3, 1988.

Esprit also reported a net loss of $125,000, or 1 cent per share, for the quarter ended Nov. 30, 1989, compared with a loss of $866,000, or 11 cents per share, for the quarter ended Dec. 3, 1988.

The decreased revenue for the second quarter ended Nov. 30, 1989, is attributed to a significant drop-off in the sale of Esprit ESP 6000 and OPUS series products.

The decrease in the loss for the second quarter ended Nov. 30, 1989, as compared with the like period one year ago, was primarily due to the fact that no foreign exchange losses were incurred for the quarter, as well as interest expense decrease, which was due to a reversal of the recent RCA

Cole patent litigation interest accrual and a significant lower level of borrowings.

These borrowings were decreased in early August as a result of the consummation of the stock purchase agreement described in the previous first quarter news release.

Based in San Jose, Esprit Systems Inc. provides resellers and original equipment manufacturers worldwide with advanced technology to meet a wide range of host and network connectivity needs.

The company's family of products -- ASCII/ANSI terminals, diskless netstations and high-performance modems -- meet exacting corporate standards, including ergonomics, reliability, data security and software compatibility.

#90018b0326 01/18/1990 ~Business Wire
BEVERLY HILLS, CA (JAN. 19) BUSINESS WIRE - The William Morris Agency, the largest talent agency in the world, Thursday announced that it has reached an agreement to represent a sound technology that is making an

enormous impact on the entertainment industry.

The agency will represent Gamma Electronic Systems Inc. (ASE:GE.A)(OTC) and its multidimensional sound technology, the Bedini Audio Spacial Environment or B.A.S.E.

Introduced to the entertainment industry in 1988, the B.A.S.E. process revolutionizes standard stereo sound by duplicating the sound environment of a live performance. The system functions the way humans hear, binaurally analyzing the spacial distances. By subtly correcting the timing, sounds are freed from the speakers, giving audiences a fuller, more dynamic range of depth and dimension.

B.A.S.E. already has been used in the soundtracks of such recent motion pictures as ''The Little Mermaid,'' ''Back to the Future II,'' and ''Star Trek V: The Final Frontier.'' The upcoming film ''Hunt for Red October'' will also utilize B.A.S.E. sound technology.

Major record companies including MCA, Capitol Records, CBS/Sony, Polygram, Warner/Curb and Universal have begun recording with B.A.S.E. technology. Artists who have recorded in B.A.S.E. include Barbra Streisand, the Charlie Daniels Band, Fleetwood Mac, Menudo, Reba McEntire, Bo Didley, Glen Campbell, Shadowfax and George Strait.

B.A.S.E. also can be used to enhance live performances. Recent B.A.S.E. projects have included a state-of-the-art sound system at the Las Vegas Hilton's showroom, and a special 35th anniversary celebration for Disneyland.

Gamma Electronic Systems Inc. is a publicly traded specialist in technology based in Santa Monica. The company's B.A.S.E. system is available for initial studio recording, mastering, re-mastering and conversion of existing materials through the B.A.S.E. process. B.A.S.E. can also be licensed for a variety of industry and consumer applications.

The William Morris Agency is based in Beverly Hills and is the world's longest established and largest entertainment agency. The agency represents clients in a broad spectrum of entertainment businesses including music, motion pictures, television, literature, lectures and variety attractions.

#90018b0384 01/18/1990 ~Business Wire

SAO PAULO, BRAZIL (JAN. 18) BUSINESS WIRE - The Brazilian government has

announced it will allow Novell Inc. (NASDAQ:NOVL), the world leader in PC-based network computing, to commercialize many of its well-known NetWare products.

The long anticipated announcement follows extensive technical presentations and similarity testing conducted by Secretaria Especial da Informatica (SEI). The testing involved performance comparisons between NetWare and various domestic Brazilian systems.

''The successful completion of the registration process is a giant step forward for Novell and the Brazilian computer market,'' said Ernst H. Gemassmer, Novell's senior vice president of international operations.

''This announcement opens the door for Brazilian companies of all sizes to take advantage of Novell's world standard operating system, along with its advanced features and superior capabilities.''

SEI granted its approval for three NetWare products: Advanced NetWare, NetWare SFT v.2.15 and NetWare 386 v.3.0. The successful effort to obtain governmental approval was spearheaded by Datarede Informatica, a major Novell distributor in Brazil.

Novell is also represented in Brazil by three other distributors, ABCOM Informatica, SPA and Telsist, as well as a recently appointed systems integrator, Consisnet.

According to Gemassmer, this announcement signals the beginning of a major effort on Novell's part to participate in the strategically important Brazilian market. ''We view this as a crucial step in allowing Novell to become a major player in the Brazilian PC-based network computing.

''As such, we believe we will play a major role in promoting and enhancing Brazil's excellent software development efforts. Developers will now have a world standard platform upon which to create products intended for both domestic and international consumption.

''We are further convinced that NetWare's prominence in Brazil will greatly stimulate Brazilian microcomputer hardware production and sales. It will also permit users to link mini and mainframe computers with their PC networks.''

Gemassmer also stated his commitment to immediately addressing the critical issue of grey marketing of Novell's popular NetWare products. He indicated that Roydon Olsen will serve as director of business development dedicated to meeting the unique needs of the rapidly growing Brazilian market.

#90018b0604 01/18/1990 ~Business Wire

BURLINGTON, MA (JAN. 18) BUSINESS WIRE - M/A-COM Inc. (NYSE: MAI) Thursday announced that the company has formulated plans for a general restructuring and downsizing of its business and a redeployment of its assets into those businesses with the greatest opportunities for growth and return on investment.

M/A-COM also indicated that the downsizing will include the company's exit from certain businesses and product lines, and the contraction of others in which the exposure to technical risk and level of required investment are not commensurate with the potential return.

In making the announcement, M/A-COM Chairman and Chief Executive Officer, Dr. Thomas A. Vanderslice, said, "The management of M/A-COM is responding to rapidly changing conditions in the defense electronics marketplace with decisive plans for controlling the costs of the company and honing its business focus. With the execution of our plans to concentrate our business, we expect that M/A-COM will be well positioned for the market developments of the 1990's."

M/A-COM will continue its cost reduction efforts now underway, including the consolidation of facilities and work force reductions achieved through an early retirement program, normal attrition, and other cutbacks associated with the downsizing.

M/A-COM businesses identified for disposition include the company's Government Systems Division, as well as certain smaller units primarily engaged in the development and production of subassemblies, microwave high power amplifiers, transmission equipment, and radar antenna assemblies. These businesses have annualized sales of approximately $170 million.

Dr. Vanderslice further stated, "The company will incur a significant loss for its first quarter ended December 30, 1989. The loss will include management's estimate of the impact of implementing these complex strategic downsizing decisions as well as an operating loss for the period and is expected to be in the range of $115 million.

"While there is no current tax benefit associated with this loss, the company will have a significant operating loss carryforward." Dr. Vanderslice, added, "We have every expectation that the ongoing business will return to profitability in the current quarter as the proper sizing of the operations to the marketplace is accomplished."

M/A-COM is a leading producer of radio frequency, microwave and millimeter

wave semiconductors, components and subsystems for applications in telecommunications, radar, navigation, missile guidance, electronic warfare, surveillance and command-control- communications-intelligence (C3I) systems. M/A-COM also supplies surveillance products used in intelligence collection applications.

#90018b0611 01/18/1990 ~Business Wire

NEW YORK (JAN. 18) BUSINESS WIRE - With the recent boom in the home video market and the addition of over 200 independent television stations over the past 10 years, the demand for new movies for both video and syndication is undeniable.

Unicom Inc. of New York, a publicly traded corporation, is helping to fulfill that demand with its recently acquired library of 150 feature-length titles, primarily films of the highly sought-after action-adventure genre.

The new Unicom library, while consisting mostly of action-adventure and martial arts films, does feature titles in virtually every entertainment category, from high adventure/action to horror and romance.

Produced in Asia, the movies are currently being dubbed into English and other foreign languages using the latest in high-tech dubbing techniques. Unicom executives have studied these films carefully in order to determine their suitability for dubbing and distribution in the United States, Europe, Asia and South America.

With its initial group of 10 films currently in the process of production, Unicom plans to have those 10 films on the market by the spring of 1990 and subsequently plans to release 25 more films each year. Additionally, Unicom also holds an option for the purchase of another 140 feature titles over the next several years.

Some of the films Unicom has purchased have had limited theatrical release in China and the Far East, but Unicom does not currently plan to release them theatrically in North America.

The company plans to concentrate its efforts on the relatively untapped home video markets in Europe, Asia and South America, where the need for new film product is strongest. This will reduce distribution costs and make the films available to larger audiences.

All 150 of Unicom's titles will be suitable for family viewing and in addition to the rights to the movies themselves, Unicom has acquired the

licensing rights for music, merchandising and all other product categories.

The company is currently trading over the counter and will apply to the NASDAQ exchange, where Unicom executives expect to be trading by mid-February.

CHICAGO (JAN. 18) BUSINESS WIRE - St. Paul Bancorp, Inc. (NASDAQ:SPBC) Thursday reported consolidated net income for the year ended December 31, 1989 of $10.6 million, or $.87 per share, a decline from the $22.0 million or $1.84 per share, recorded in 1988.

Fourth quarter 1989 results reflected a loss of $5.1 million, or $.42 per share, compared to earnings of $6.43 million, or $.53 per share, for the comparable period of 1988.

The year-end and fourth quarter results for 1989 include a $20.6 million addition to the Bank's reserves as a provision against potential loan losses.

Net interest income before provision for loan losses was $81.1 million in 1989, a 4.4 percent increase from the $77.7 million reported for the previous year. An increase in other operating income to $17.7 million in 1989 from $17.4 million in 1988 also favorably affected 1989 earnings. In addition, the company's net interest margin remained constant at 2.62 percent at year-end 1989 from that same level at year-end 1988.

Shareholders' equity grew to $223.1 million, equivalent to 6.89 percent of average assets, or $18.61 per share at December 31, 1989. Total loan originations were $399.0 million in 1989, compared with 1988 originations of $806.0 million. The percentage of adjustable rate mortgages, including mortgage-backed securities, held in portfolio was 78 percent at year-end 1989, even with the 78 percent at year-end 1988.

Total assets at year-end 1989 grew to $3.4 billion, compared with $3.1 billion at December 31, 1988, while deposits grew to $2.6 billion at December 31, 1989 from $2.4 billion at the end of 1988.

St. Paul Bancorp, Inc. is the holding company for St. Paul Federal Bank For Savings, which is the third largest thrift headquartered in Chicago and operates 33 retail banking offices throughout metropolitan Chicago.

St. Paul offers discount brokerage, insurance, and real estate development services through other subsidiaries.

MIAMI (JAN. 18) BUSINESS WIRE - AmeriFirst Bank (NASDAQ:AMRI) reported a loss for the quarter ending Dec. 31, 1989 of $6.9 million or 63 cents per common share.

The loss for the quarter was less than AmeriFirst anticipated primarily due to a $15.7 million reduction in non-earning loans and real estate owned. Total assets were $4.1 million at Dec. 31, 1989 compared to $4.3 billion at Sept. 30, 1989.

AmeriFirst stockholder's equity was $71.7 million at Dec. 31, 1989, or 1.7 percent of total assets. AmeriFirst has no ''goodwill'' and no investment in junk bonds.

LOS ANGELES (JAN. 18) BUSINESS WIRE - Paul M. Harris, chairman of the board of Guardian Bancorp (ASE:GB), Thursday announced that the company reported net earnings of $5,423,000 (or $1.64 per share) for the year ended Dec. 31, 1989, an increase of 69.2 percent over the $3,205,000 (or $1.01 per share) reported for 1988.

Net earnings for the fourth quarter of 1989 were $1,650,000 (or 50 cents per share) compared with $1,089,000 (or 35 cents per share) for the comparable period last year. Harris attributed the increase in earnings to continued growth in assets, loans and deposits.

Harris stated that total average assets, loans (net) and deposits increased 36.7 percent, 62.5 percent and 35.6 percent, respectively, during 1989 and that non-performing loans were $3 million (or 1.2 percent of total loans) at the end of the year.

He added that management believes that the company's non-performing loans

are adequately secured and not expected to result in any material charge to earnings in the future.

#90018b0624 01/18/1990 ~Business Wire

SAN JOSE, CA (JAN. 18) BUSINESS WIRE - Altera Corp. (NASDAQ:ALTR) announced record financial results for the quarter and year ended Dec. 31.

Fourth-quarter sales of $16.2 million were up 52 percent over the like period in 1988 and up 3 percent over the third quarter of 1989. Total year 1989 sales were $58.9 million, an increase of 55 percent from 1988 sales of $37.9 million.

Net income for the fourth quarter was $3.0 million, up 42 percent over the like period in 1988 and up 4 percent over the prior quarter. Total year net income was $10.8 million, an increase of 52 percent over 1988 net income of $7.1 million.

The percentage growth in net income was slightly less than the percentage growth in net sales due to an increase in the company's effective tax rate. The tax rate increased from 14 percent in 1988 to 30 percent in 1989.

Earnings per share for the fourth quarter of 1989 were 15 cents, vs. 11 cents for the like period in 1988. Total 1989 earnings per share of 55 cents were up 45 percent from 1988 earnings per share of 38 cents. Altera has reported increased sales in each of the last 22 quarters and record income in each of the last 12 quarters.

Operating income in the fourth quarter of $3.8 million was up 102 percent from the like period of 1988 and was a record 23.5 percent of sales. Total year operating income of $13.1 million was 22 percent of sales and was an increase of 93 percent from the prior year.

During this quarter, Altera increased its cash and short-term investments from $25.4 million to $26 million. For the year, Altera increased cash and short-term investments from $21.9 million to $26 million. The Company has no long-term debt. Cash and short-term investments currently represent 47 percent of total assets and 56 percent of total shareholder equity.

Rodney Smith, chairman and chief executive officer, said: ''Demand for Altera's product is growing throughout the world. During 1989, there was significant growth in both foreign and domestic sales. We look forward to

continued growth in 1990.''

Altera Corp., the inventor of the EPLD, was founded in 1983 and is the market leader in high-density, CMOS User-Configurable Integrated Circuits (UCICs) and associated C.A.E. development systems.

MAYNARD, MA (JAN. 18) BUSINESS WIRE - Digital Equipment Corp. (NYSE:DEC), the world's leading manufacturer of network computer systems and services, Thursday reported higher sales for its second quarter, which ended Dec. 30 1989.

For the quarter, the company reported total operating revenues of $3,184,795,000, compared with $3,179,506,000 for the comparable quarter a year ago. Net income for the quarter was $155,402,000, versus last year's second quarter net income of $279,579,000. Quarterly earnings per share were $1.25 versus $2.20 last year.

For the six months ended Dec. 30, 1989, the company reported total operating revenues of $6,315,985,000, up 3 percent from the $6,121,305,000 of the comparable period a year ago. Net income for the six months was $306,185,000, versus $502,953,000 of the comparable period a year ago. Earnings per share were $2.44 versus $3.90 last year.

Digital Equipment Corp., headquartered in Maynard, Mass., is the leading worldwide supplier of networked computer systems and services. Digital offers a full range of computing solutions and systems integration for the entire enterprise -- from the desktop to the data center.

MIAMI (JAN. 18) BUSINESS WIRE - The Panamanian Government reopened its international airport to commercial cargo shipments on Monday for the first time since U.S. troops invaded the Republic in December.

The first scheduled all-cargo flight to arrive at the Omar Torrijos Airport was Miami-based Challenge Air Cargo's DC-8-63 jet freighter loaded with 44,426 kilograms of commercials goods.

Challenge Air Cargo, the only U.S. all-cargo carrier serving Panama, had stockpiled enough goods since the invasion to fill several freighter loads, but expected to ship all this material by the end of the week.

The airline's president, B.F. Spohrer said "Panama has desperately needed commercial goods to keep the country's merchants and commercial houses going. We are delighted that the government has opened up the airport to our all-cargo flights, because even though passenger airlines have been allowed to land they have not been permitted to carry commercial cargo in the bellies of their aircraft."

"We have been flooded with calls from forwarders and one relief organization run by Panamanians seeking our help to ship badly needed goods and supplies to Panama. We expect to cope with all these requests," said Spohrer, "even to the extent of scheduling extra flights."

SANTA MONICA, CA (JAN. 18) BUSINESS WIRE - INTERACTIVE Systems Corp. Thursday announced the appointment of Ben Salama as vice president, Services and Technologies Division.

Salama will oversee the company's consulting and software development services, as well as technology licensing, from INTERACTIVE's Naperville, Ill., office, formerly the location of Lachman Associates Inc., acquired by INTERACTIVE last year.

At INTERACTIVE, Salama will develop a plan to integrate the company's regional development and licensing offices, located in several cities throughout the country, with the company's consulting services efforts.

Prior to joining INTERACTIVE, Salama served as director of the Information Technology Manufacturers Group of United Kingdom-based Data Logic for nearly three years. A Raytheon subsidiary, Data Logic is a $75 million a year software and services company.

Salama joined Data Logic to direct the company's consultant services and software development efforts to Original Equipment Manufacturers (OEMs) through Europe, as well as the company's sales force and marketing activities.

Preceding his employment with Data Logic, Salama served as director of sales and marketing and a member of the board of directors for U.K.-based Sphinx Ltd., one of Europe's leading distributors of UNIX products.

Salama holds a bachelor's degree in mathematics and a master's degree in computer science.

INTERACTIVE Systems Corp., an Eastman Kodak Co., is the premier supplier of UNIX products annd development services to the computer industry, and is gaining leadership in the commercial UNIX market.

The INTERACTIVE 386/ix family of integrated systems software products, including the INTERACTIVE Architech Series, is sold through a broad range of distributors worldwide. INTERACTIVE Systems is headquartered at 2401 Colorado Ave., Santa Monica, Calif., 90404; tel 213/453-8649.

#90018b0637 01/18/1990 ~Business Wire

IRVINE, CA (JAN. 18) BUSINESS WIRE - Laser Precision Corp. (NASDAQ:LASR) Thursday announced that it executed a letter of intent to acquire 100 percent of the outstanding stock of Lightwave Communications Inc., a privately held corporation located in Ridgefield, Conn.

The letter indicates that Lightwave will be acquired in exchange for $675,000 in Laser Precision stock, plus incentives based on Lightwave's economic performance, which could amount to a maximum of an additional $675,000 in Laser Precision stock. Lightwave manufactures specially designed optical modems, components, cable links and multiplexers utilizing fiber optic technology.

The transaction remains subject to preparation and execution of definitive legal documents satisfactory to both parties.

David M. Goodman, chairman and chief executive officer, said the acquisition of Lightwave is another step forward in Laser's plan of expanding its presence in the fiber optics markets with innovative products using fiber technology. Lightwave's products provide fiber optic solutions to the rapidly expanding industrial process control, data communications and avionic test equipment industries.

This acquisition positions Laser to benefit from the application of the Fiber Distributed Data Interface (FDDI) standards.

Gregory A. Miner, vice president and chief financial officer, added that

with the acquisition of Lightwave, Laser gains the technical and entrepreneurial expertise of its two co-founders, Ronald S. Marsilio and Michael L. Canestri.

Canestri is a prolific design engineer who has been involved with all of the company's principal product designs. Marsilio, with a proven track record of starting and growing successful companies, will serve as president of Lightwave.

Laser Precision Corp. is a manufacturer of test and measurement instruments combining advanced optical designs with microprocessing technology. The company's products are used in fiber optic telecommunications, laser research, quality control and chemical analysis.

Its Radiometric and Fiber Optic division is located in Utica, N.Y., and its Analytical Instrument division and corporate headquarters are located in Irvine.

ATLANTA (JAN. 18) BUSINESS WIRE - Atlantic Southeast Airlines Inc. (NASDAQ/NMS:ASAI) Thursday announced that the company's board of directors has authorized the repurchase of up to $10 million of ASA's common stock on the open market, according to John W. Beiser, senior vice president for the Atlanta-based airline.

ASA has purchased approximately 1.6 million shares under previously approved stock repurchase programs.

''This decision by our board of directors represents a strong vote of confidence in our earnings outlook. We also believe this action represents an excellent investment opportunity for the company and our shareholders,'' Beiser said.

The company stated that the stock purchased will be used for stock options compensation programs or for other corporate purposes. Atlantic Southeast Airlines Inc. is Atlanta's largest regional air carrier, and now offers service to 15 cities from a second hub in Dallas/Fort Worth, Texas.

#90018b0649 01/18/1990 ~Business Wire

CHARLESTON, SC (JAN. 18) BUSINESS WIRE - John M. Settle, president of Home Federal Savings Bank, Thursday reported record results for the Savings Bank's first fiscal quarter ended Dec. 31, 1989.

Home Federal's first quarter earnings increased 78.8 percent to $258,000, or 32 cents per share, compared with earnings of $144,000, or 18 cents per share, in the first quarter of fiscal 1989. Net interest income after provision for loan losses increased almost 24 percent to $1,032,000 in the latest quarter compared with $834,000 in the first quarter of 1989. Deposits rose to a record $111 million, primarily due to the inflow of insurance settlements resulting from Hurricane Hugo.

''Home Federal's record earnings were due to our excellent gap position in a declining interest rate environment and to our continued emphasis on controlling costs, including general and administrative expense,'' stated Settle. ''Our strategy has been to maintain a one-year gap position of less than 5 percent and hold general and administrative expenses to 2 percent or less of average assets.

''Since rates began to decline late last year, our cost of funds has dropped at a faster rate than our loan portfolio has repriced. We expect this trend to benefit earnings in future quarters as rates continue to fall or stabilize.

''In the fourth quarter, we increased our loan loss provision to account for possible losses resulting from Hurricane Hugo. We are pleased to report that our hurricane-related losses to date have been minimal and that our asset quality remains very high.

''Our capital, as defined by the stringent requirements in the recently enacted Financial Institutions Reform, Recovery and Enforcement Act, is approximately two times the minimum regulatory requirements. This includes tangible capital which is 7.1 percent of total assets,'' continued Settle.

Home Federal is a federally chartered, FDIC-insured savings bank operating three full-service offices in Charleston, South Carolina. The common stock of Home Federal Savings Bank is traded in the over-the-counter market under the NASDAQ symbol HFSB.

#90018b0652 01/18/1990 ~Business Wire

ALBANY, NY (JAN. 18) BUSINESS WIRE - National Savings Bank of Albany announced earnings for the first fiscal quarter ended Dec. 31, 1989.

Net income for the first quarter of fiscal 1990, ended Dec. 31, 1989, totaled $872,301, or 74 cents per share. This compares to $882,304, or 75 cents per share, for the same period in fiscal 1989.

Growth in assets and liabilities increased net interest income $351,000 over the same period last year while an overall narrowing of spread from the prior year partially offset this improvement by $285,000 for a net improvement of $66,000.

While the spread was down from the prior year quarter, it was up .10 percent from the previous quarter to 2.63 percent. This marked the reversal of a trend in spread since the quarter ended March 1989 and reflected primarily lower deposit rates.

The provision for loan loss was down $99,000 from the same period last year.

The improvement in other income of $51,000 is the result of continued active management of non-performing commercial mortgage loans, RECO and IRE (Real Estate Owned and Investment in Real Estate, respectively).

The increase in other expense was due to the same active management of non-performing commercial mortgage loans, REO and IRE with other operating expense actually declining $71,000 from the prior year.

The combined results of this activity was a decline in these asset categories from $9,116,000 at June 30, 1989 to $7,027,000 at Sept. 30, 1989 and $5,085,000 at Dec. 31, 1989.

Net loans increased $13,168,000, or 3.1 percent, for the quarter while deposits were up $14,893,000, or 3.3. percent.

With loans and deposits up, spread gradually improving, non-performing assets declining and routine operating expenses under tight control, the bank is well positioned for solid performance for the balance of fiscal 1990.

National Savings Bank of Albany is an FDIC insured regional savings bank with eight offices serving northeastern New York from the capital district to the Canadian border. The stock is traded on the NASDAQ National Market System under the symbol NSBA.

#90018b0661 01/18/1990 ~Business Wire

SAN FRANCISCO (JAN. 18) BUSINESS WIRE - Pacific Telesis Group (NYSE:PAC) Thursday reported 1989 net income of $1.24 billion, or $3.02 per share, a 7.5 percent earnings-per-share increase over 1988.

Revenues for 1989 were $9.59 billion, an increase of 1.2 percent over the previous year.

Net income for the fourth quarter was $322 million, or $0.79 per share, a 33.9 percent increase over the fourth quarter of 1988. These results included one-time and out-of-period adjustments that increased net income by $36.4 million or $.09 cents per share. The fourth quarter of 1988 included one-time charges that reduced net income by $.08 cents per share.

Revenues for the period were $2.48 billion, an increase of 1.9 percent over fourth quarter of 1988.

Ginn emphasized the growth of PacTel Cellular which at year end served 381,000 subscribers nationwide, up 45.4 percent. This surge in customers represents PacTel Cellular's largest increase in number of subscribers in one year and in any quarter.

PacTel Cellular fourth quarter net income was $16.3 million, climbing 162.9 percent from the $6.2 million reported for fourth quarter of last year. Fourth quarter performance included out-of-period adjustments that increased net income by $3.9 million. PacTel Cellular net income for the

year grew 255 percent from $15.6 million in 1988 to $55.4 million in 1989. Cellular revenues for the year were up 46.8 percent to $453.2 million.

Operating cash flow(a) for PacTel Cellular was up 55.9 percent for the year from $128.9 million in 1988 to $200.9 million in 1989.

The corporation's local telephone operations also continue to demonstrate strong growth potential. During 1989 Pacific Bell and Nevada Bell added approximately 569,000 customer lines. The companies now have roughly 13.7 million access lines, up 4.3 percent from the 13.1 million lines in 1988.

Pacific Telesis Group is a diversified telecommunications corporation based in San Francisco.

#90018b0669 01/18/1990 ~Business Wire

LAS VEGAS, NV (JAN. 18) BUSINESS WIRE - Electronic Data Technologies (NASDAQ:EDAT), Thursday announced record quarterly revenues of $7.1 million for the quarter ended Dec. 31, 1989, which represents a 54 percent increase over revenues for the quarter ended Dec. 31, 1988 of $4.6 million.

The company reported net income for the quarter ended Dec. 31, 1989 of $687,900, or 18 cents per share, which is comparable to income from continuing operations for the three months ended Dec. 31, 1988 of $557,000 or 15 cents per share.

The increase in quarterly revenues and net income resulted from a 48 percent increase in sales of the company's Gaming Management Systems and a 60 percent increase in revenue from management of gaming machine route locations.

Gaming Management Systems revenue was $4.0 million as compared to $2.7 million for the comparable quarter of 1988.

Route management revenue was $2.4 million for the quarter ended Dec. 31, 1989 as compared to $1.5 million for the comparable quarter of the prior year.

Service and other revenue increased 124 percent to $716,500 for the quarter ended Dec. 31, 1989 as compared to $319,500 for the like quarter of the prior year.

The increases in service revenue and other are due to increased sales of slot systems parts as well as increases in recurring software license and

slot and keno system hardware maintenance fees.

Net income for the three months ended Dec. 31, 1988 was $784,000, or 21 cents per share. The difference between net income and income from continuing operations resulted from the recognition of a gain from discontinued operations of $227,000, or 6 cents per share, as a result of the recapture of estimated losses on the sale of the company's 51-percent-owned foreign subsidiary in November 1988.

EDT is a world leader in the design and manufacture of computerized management systems for the gaming industry. The company also manages, through its wholly owned subsidiary, more than 1,600 gaming machines placed in various non-casino locations in Nevada.

LONDON (JAN. 18) BUSINESS WIRE - British Gas (NYSE:BRG) Thursday announced it has struck oil at a new onshore drilling site at Beckering (license PL256) in the county of Lincolnshire approximately 120 miles north of London.

The well was drilled to a depth of over 5,000 feet and will now be suspended. Two drill stem tests were carried out over a depth range of oil bearing sandstone. Oil flowed at a rate of 120 barrels of oil per day with minor amounts of gas also being produced. Subject to planning consent it is anticipated that a long term test of the well will now be undertaken to evaluate the commercial feasibility of the discovery.

The license is 100 percent owned by Gas Council (Exploration) Limited, a wholly owned subsidiary of British Gas plc.

British Gas, headquartered in London, is the largest integrated gas company in the Western world and is primarily involved in the purchase, transmission, and sale of natural gas to domestic, industrial and commercial customers in Great Britain. Important support activities to its marketing efforts include appliance trading and customer services to domestic gas customers.

British Gas is also active in the exploration for and production of hydrocarbons both offshore and onshore. Expertise developed in the gas business is offered for sale overseas through the British Gas International Consultancy Service. British Gas American Depositary Receipts are traded on the New York Stock Exchange. One ADR is equivalent to ten Ordinary Shares.

BIRMINGHAM, AL (JAN. 18) BUSINESS WIRE - SouthTrust Corp. (NASDAQ/NMS:SOTR) Thursday announced results for the quarter and year ended Dec. 31, 1989.

Net income for the quarter reached $19.2 million, up 7 percent over the 1988 total of $17.9 million. The per share comparison was 71 cents versus 68 cents, an increase of 4 percent.

Net income for the year ended Dec. 31, 1989, increased 8 percent to $72.8 million compared with $67.6 million for the same period of 1988. Net income per share increased to $2.73 for the twelve-month period, compared with $2.56 in 1988.

Total assets as of Dec. 31, 1989, were $7.8 billion, up 17 percent over year-ago totals. Deposits increased to $6.1 billion while loans grew to $4.7 billion.

Wallace D. Malone Jr., chairman and chief executive officer, said, ''We're pleased with our performance for the fourth quarter and the year, and look for this positive performance to continue. This year should see further growth throughout all areas of the company.''

SouthTrust Corp., with headquarters in Birmingham, operates 41 banks with more than 215 offices in Alabama, Florida, Georgia, South Carolina and Tennessee.

BIRMINGHAM, AL (JAN. 18) BUSINESS WIRE - The board of directors of SouthTrust Corp. (NASDAQ/NMS:SOTR) Thursday declared a quarterly cash dividend of 26 cents per share.

The dividend is payable April 2, 1990, to shareholders of record at the close of business Feb. 23, 1990.

This 8 percent increase in the cash dividend represents the 20th consecutive year that SouthTrust has increased dividend payments to stockholders. During that period, the cash dividend has risen 801 percent and grown at a compound annual rate of 12 percent.

Wallace D. Malone Jr., chairman and chief executive officer, said, ''We hold our record of 20 consecutive years of cash dividend increases with great pride. Our ultimate goal at SouthTrust is enhancing shareholder value, and for 20 years, we've continued to meet that goal.''

SouthTrust Corp., a $7.8 billion regional multibank holding company, operates 41 banks in a five-state area which includes Alabama, Florida, Georgia, South Carolina and Tennessee.

SouthTrust Corp. common stock is traded in the national over-the-counter market under the NASDAQ Symbol SOTR.

SAN FRANCISCO (JAN. 18) BUSINESS WIRE - The Good Guys! (NASDAQ:GGUY) Thursday reported net income for its first fiscal quarter ended Dec. 31, 1989 of $3,621,000, up 66 percent from the like period last year.

Earnings per share were 81 cents on 4,466,000 weighted average shares outstanding, compared to 50 cents on 4,385,000 weighted average shares outstanding last year.

As reported earlier, sales for the first quarter of fiscal 1990 increased 49 percent to $87,350,000 from $58,813,000 in the like quarter in fiscal 1989. Comparable store sales rose 25 percent during the most recent period.

In addition, the company Thursday announced plans to open The Good Guys! 23rd store in early summer 1990. This store will be located in Fresno, Calif., at the corner of Shaw Avenue and Blackstone.

The Good Guys! also recently announced its plans to move into Southern California, the largest consumer electronics market in the country.

The company plans to open its first store in Southern California adjacent to the Beverly Center in West Los Angeles.

The Good Guys! is a leading specialty retailer of high quality, brand name

audio, video and personal electronics products headquartered in San Francisco.

CLEVELAND (JAN. 18) BUSINESS WIRE - Oglebay Norton Co. announced Thursday that it had entered into a standstill agreement with Brent D. Baird, representative of a group of private investors who have accumulated approximately 9.5 percent of the company's outstanding common stock through open market purchases.

Under the agreement, the investor group will not make further purchases that would increase its ownership to more than 11 percent, will not engage in a proxy contest with the board of directors or seek to gain control of the company, and will observe certain restrictions on the disposition of their stock designed to preclude a concentration of ownership in the hands of another investor.

It is also contemplated that Baird will be elected to Oglebay Norton's board of directors at its scheduled Feb. 28 meeting.

Renold D. Thompson, president and chief executive officer of Oglebay Norton, commented that Baird had assured him when the open market purchases were first publicly disclosed that they were made for investment purposes and not with a view to gaining control of the company.

He said that Baird had sought board representation with the belief that, as representative of his investor group, he could make a positive contribution to the board's deliberations. ''We welcome Brent Baird's addition to the board and look forward to his contributions as a director '' Thompson said.

Oglebay Norton is a Cleveland-based raw materials and Great Lakes marine transportation company serving the steel, ceramic, chemical, electric-utility and oil- and gas- well service industries with iron ore, coal and other minerals and supplying manufactured products used in hot metal processing.

EL SEGUNDO, CA (JAN. 18) BUSINESS WIRE - Computer Sciences Corp. (NYSE:CSC) has agreed to sell its 30 percent ownership interest in its affiliate, Infonet Services Corp., to MCI Communications Corp. and nine other organizations.

The company will sell 25 percent to MCI, which thereby replaces CSC as Infonet's largest shareholder. That sale, priced at $27.5 million, is subject to clearance under the Hart-Scott-Rodino Act through the U.S. Justice Department.

CSC will sell the remaining 5 percent on a pro-rata basis to nine of the 10 overseas telecommunications agencies that already are shareholders of Infonet. Together, the 10 organizations own 70 percent.

Infonet operates worldwide telecommunications and computing services. Access to its global network is available from 100 countries, with local support provided in 34 countries.

William R. Hoover, chairman and president of CSC, said the company was prompted to sell its remaining interest in Infonet both because the price represented a very good return on investment, and because of the expanded business opportunities the transaction affords Infonet.

The inclusion of a major U.S. communications carrier in Infonet's global ownership will greatly strengthen Infonet's competitive position, enabling it to maintain a leading position in its growing markets, he noted.

Hoover said the price on the sales will be reduced by related costs and provisions established for the phase-down of certain other operations, resulting in an estimated net gain after taxes of about $7.5 million, or 47 cents per share.

CSC will continue to work with Infonet on systems integration opportunities involving requirements for integrated networking and computing services, Hoover said.

The nine Infonet owners that increased their holdings through the pro-rata purchase of 5 percent of CSC's shares are international telecommunications agencies in Belgium, France, the Netherlands, Spain, Sweden, Switzerland, West Germany, Australia and Singapore. The 10th overseas owner is Japan's Kokusai Denshin Denwa Co. Ltd. (KDD), which recently purchased a 5 percent interest in Infonet.

In 1988, CSC initiated a series of strategic alliances to solidify Infonet's market position through the sale of equity ownership in Infonet to national telecommunications authorities around the globe. The sales announced Jan. 18 are another major step in that program.

CSC is the largest independent professional-services company in the computer industry, with annual revenues in excess of $1.3 billion and more than 20,000 employees. It is a major supplier of computer and communications systems and services to industry and government.

#90018b0695 01/18/1990 ~Business Wire

AUSTIN, TX (JAN. 18) BUSINESS WIRE - SEMATECH and AMRAY Inc. of Bedford, Mass., have signed a joint development contract to build a high resolution defect imaging and review tool and executed an Equipment Improvement Program (EIP) for the AMRAY 1830 scanning electron microscope (SEM).

SEMATECH's joint development projects are those in which the consortium works with U.S. suppliers to develop new equipment, materials and processes that support manufacturing requirements for future generations of technology.

AMRAY teamed with ORASIS Corp. of Sunnyvale, Calif., to bid on the project and the joint effort will ultimately result in an automated mechanical handling system advanced in size, speed and versatility. The tasks performed would be similar to programming a car to drive one mile at 900 miles per hour and stop at a pre-defined point less than two inches wide.

The Equipment Improvement Program involves the upgrading of AMRAY's 1830 SEM, a basic tool used for submicron applications by modern fabrication facilities. The SEM improvements will help the semiconductor industry move further into submicron capabilities.

The SEM displays an electron beam scanned image of a die or wafer on a screen for examination or for transfer onto photographic film. The tool provides a higher resolution capability than an optical microscope.

SEMATECH's Equipment Improvement Program is aimed at restoring U.S. semiconductor leadership by strengthening the materials and equipment infrastructure. The programs are initiated to upgrade or modify existing U.S. equipment to meet SEMATECH's manufacturing requirements for future programs.

The EIP focus is on improving the function and reliability of equipment currently on the market in order to increase manufacturing uptime and decrease costs.

SEMATECH is a consortium of 14 U.S. semiconductor manufacturers with an annual budget of $200 million. Half of the funding comes from industry,

or member firms, and the other half from the federal government. AMRAY is the largest SEM manufacturer in the United States and has been involved in SEM technology for more than 20 years.

ST. LOUIS (JAN. 18) BUSINESS WIRE - Emerson Electric Co. (NYSE:EMR) announced Thursday that it has extended the expiration date in connection with the proposed acquisition of McGill Manufacturing Co. Inc., by Emersub XXVI Inc., a subsidiary of Emerson, until midnight (ET) on Wednesday, Jan. 24.

The tender offer was originally scheduled to expire on Jan. 17. Emersub XXVI has commenced a cash tender offer for all outstanding shares of common stock of McGill for $93 per share of common stock.

Emerson reported that as of Jan. 17, approximately 1.15 million shares of McGill common stock had been tendered which, when combined with the approximately 279,000 shares not yet tendered but subject to option agreements, represent 98.6 percent of the McGill shares outstanding.

The extension is due to the previously announced Federal Trade Commission request for additional information to Emersub XXVI and McGill in conection with the acquisition of McGill. Emerson and McGill are complying with the request.

McGill, based in Valparaiso, Ind., manufactures bearings and electrical products primarily for industrial use.

Emerson Electric Co., based in St. Louis, manufactures a broad range of electronic, electrical and other products for consumer, commercial, industrial and government and defense markets.

#90018b0707 01/18/1990 ~Business Wire

VERNON HILLS, IL (JAN. 18) BUSINESS WIRE - Scotsman Industries, Inc. (NYSE: SCT) reported Thursday that pursuant to the Lead Contamination Control Act of 1988 (the ''Act''), the United States Environmental Protection Agency (the ''EPA'') has issued final and new proposed lists of water cooler models which may have water tanks with interior surface

linings containing more than 0.2 percent lead and water cooler models in which lead solder was used to connect internal parts of the coolers.

The EPA's lists included some water coolers manufactured by Halsey Taylor, a division of a Scotsman subsidiary. Neither of the lists are related to Halsey Taylor's current production. All of Halsey Taylor's current products are ''lead free'' as defined by the Act and thus fully comply with all statutory requirements.

The EPA's final list of coolers which may contain tanks with more than 0.2 percent lead included the six Halsey Taylor models which had been on the proposed list issued by the EPA last April. In the comments which accompanied the list, the EPA noted that it had tested a limited number of coolers and that it was unable to determine how many coolers within each listed model category actually contained a tank with lead in excess of 0.2 percent. The EPA included models on its list even if it had found as few as one unit bearing that model designation to contain a tank lining with lead over the 0.2 percent limit. Halsey Taylor believes that the EPA failed to comply with the requirements of the Act and is considering filing suit to challenge the EPA's action.

Under the Act, publication of this final list does not itself result in a recall of listed models. The Consumer Product Safety Commission (''CPSC'') is conducting an investigation based upon the EPA's list and must enter an order under the Act before Halsey Taylor can be required to repair, replace or recall and provide a refund with respect to any of the coolers on the list.

Halsey Taylor is a division of Scotsman Group, Inc., a subsidiary of Scotsman Industries. Halsey Taylor's business accounts for less than $25 million in annual revenues. Scotsman Industries, Inc. is a market leader in the manufacture of commercial refrigeration products, with a primary market focus on the food service industry. The global manufacturing and marketing of ice machines is the largest component of Scotsman Industries' business.

STAMFORD, CT (JAN. 18) BUSINESS WIRE - Burton G. MacArthur, Jr. was Thursday elected executive vice president, newsprint and kraft, of Champion International Corporation.

In this position, he will have the responsibility of directing the manufacture and the sale of products from the company's mills in Lufkin

and Sheldon, Texas and Roanoke Rapids, N.C. Since joining Champion in 1974, he has managed the company's order services, production planning, and management information systems.

He received an A.B. from Harvard College in 1970 and an M.B.A. from The Amos Tuck School of Business Administration at Dartmouth College in 1974.

MacArthur succeeds Richard E. Olson. Olson will remain an executive vice president and will have responsibility for technology, engineering, major projects, manufacturing support, and international licensing. Since joining Champion in 1967, he has held a variety of manufacturing and technical positions, including managing the engineering and construction of the company's Quinnesec pulp mill. Olson succeeds Mr. Judson Hannigan who is retiring.

Champion is one of the America's leading manufacturers of paper for business communications, commercial printing, publications, newspapers. Headquartered in Stamford, Connecticut, the company owns or controls 6.4 million acres of timberlands in the U.S. and is a major manufacturer of plywood and lumber.

STAMFORD, CT (JAN. 18) BUSINESS WIRE - Richard L. Porterfield was Thursday elected to the newly created position of senior vice president, organizational development and human resources.

In this position, he will be responsible for the company's human resource programs and its extensive efforts to establish a more participative management style throughout the company.

Porterfield's most recent assignment was vice president - organizational development project. Prior to that, he served as general manager of the company's Alabama timberlands region and was subsequently named director of participative management and administration for the company's forest products operations.

A native of Marion, Ohio, Porterfield received his B.S. in forestry and business from Ohio State University, his M.S. in forest economics from North Carolina State University, and his Ph.D. in forestry and economics from Yale University. He also completed the advance management program at Harvard University.

He taught forestry and conducted research at the University of Arkansas at Monticello and at Mississippi State University before joining Champion in 1979 as manager of technical development in the company's timberlands division.

Champion is one of the America's leading manufacturers of paper for business communications, commercial printing, publications and newspapers. Headquartered in Stamford, the company owns and controls 6.4 million acres of timberlands in the U.S. and is a major manufacturing of plywood and lumber.

#90018b0723 01/18/1990 ~Business Wire
LEXINGTON, MA (JAN. 18) BUSINESS WIRE - Unitrode Corp. (NYSE:UTR), a

manufacturer of electronic components and subsystems, Thursday announced that it has lifted a voluntary shipping hold imposed in early December on certain military products manufactured in its Semiconductor Products Division, which are not subject to a subsequent hold issued by the Defense Electronics Supply Center (''DESC'').

The products being released represent about 25 percent of the total placed on hold by Unitrode. The release of the remaining 75 percent of the products, those subject to the DESC hold, depends upon a successful audit of Unitrode's Watertown, Mass., facility by DESC scheduled for late January and formal release of the hold by DESC.

Unitrode has offered to re-test or replace (at its option and expense) approximately $2.5 million of products which may have had inspection deficiencies. The company indicated that it is impossible to estimate how much of this total will actually be returned.

Commenting on the announcement, Howard Wasserman, president and CEO of Unitrode, said, ''We have isolated and are releasing those products which are subject only to our hold and which are unaffected by this problem. Further, our plan includes specific steps to re-test the products which may have been affected. We have also set up several ongoing review procedures to prevent a similar problem in the future.

''It is important to note that we have continued to manufacture, test, and prepare products for shipment during this period so that now we can better respond to our customers' needs.''

Referencing the DESC hold, Wasserman added, ''DESC's personnel have cooperated fully with us in expediting a review of our program leading to resumption of shipments. We are committed to providing our customers with reliable products, which conform to military specifications, as soon as possible. We hope to meet DESC's requirements and begin to ship the products currently under the DESC hold by the end of February.''

In addition to discrete semiconductors, Unitrode also manufactures power management integrated circuits, switching power supplies, and data conversion products. Its products are sold throughout the world for a variety of defense/aerospace, industrial, computer/telecommunications, data processing and consumer applications.

CLINTON, NJ (JAN. 18) BUSINESS WIRE - Foster Wheeler Corp., announced Thursday that its Foster Wheeler Power Systems unit had completed the sale to an institutional investor of a 49-1/2 percent limited partnership interest in its 99 megawatt cogeneration facility located at Martinez, Calif.

The proceeds from the sale ammounted to $20 million cash, of which approximately $8 million will be reflected in Foster Wheeler consolidated after-tax results of operations for the last quarter of 1989.

The combined cycle facility is fueled, in part, by waste gas from an adjacent Tosco refinery. Electricity and steam from the facility is in turn supplied to the Tosco plant.

Surplus electricity power is sold to Pacific Gas & Electric under a long-term contract. The plant has been operating successfully since June 1987. A subsidiary of Foster Wheeler Power Systems, Foster Wheeler Martinez, will continue to operate the facility.

Foster Wheeler Corp. is an international engineering, construction, manufacturing and management services organization with 23 subsidiaries operating worldwide. The corporations's headquarters are at Clinton, N.J.

#90018b0733 01/18/1990 ~Business Wire

MONTGOMERY, AL (JAN. 18) BUSINESS WIRE - Colonial BancGroup (NASDAQ: CLBGA) Thursday released fourth quarter and year-end results for 1989. The figures reflect the outcome of the company's previously announced balance sheet restructuring completed in the fourth quarter of 1989.

As previously reported, the balance sheet restructuring consisted primarily of a $31 million write-down of goodwill, a $4.5 million write-down of the value of certain buildings obtained through the company's acquisition program, and a $6 million additional provision to the loan loss reserve.

This restructuring created a one-time charge to earnings for the fourth quarter ended Dec. 31, 1989, of $41.5 million, resulting in a fourth quarter loss of $41,861,000, or $6.43 per share. This compares with 1988 fourth quarter earnings of $1,961,000, or 29 cents per share.

For the year 1989, the restructuring contributed to a loss of $37,834,000, or $5.81 per share, compared with 1988 earnings of $7,907,000, or $1.22 per share.

Robert E. Lowder, chairman and chief executive officer, announced the year-end figure. "As I stated in December," said Lowder, "BancGroup's board, in conjunction with our accountants and other advisors, determined that the restructuring would result in a more accurate reflection of present day values, consistent with marketplace recognition of the reduced value accorded to goodwill."

Lowder continued, "Colonial BancGroup enters 1990 with a significantly strengthened balance sheet. Our loan loss reserve equal to 1.4 percent of net loans and 140 percent coverage of nonperforming assets is among the strongest in our competitive market.

"Moreover, BancGroup's primary capital of 5.8 percent remains above regulatory minimums; our total capital of 8.0 percent of assets is significantly above the seven percent standard used by the Federal Reserve to describe bank holding companies in Zone One, the highest rated of the capital tiers used by the agency."

Also today, Colonial's board of directors declared a quarterly dividend of 15 cents a share on Class A common stock and five cents a share on Class B common stock. The dividends will be paid on Feb. 13, 1990, to shareholders of record as of Feb. 6, 1990.

Colonial BancGroup is an Alabama bank holding company based in Montgomery with more than 70 offices statewide.

MELBOURNE, Australia (JAN. 18) BUSINESS WIRE - Broken Hill Proprietary Co. Ltd. (NYSE:BHP) announced that the Managing Director of Ok Tedi Mining Ltd., Dick Carter, has confirmed that a road blockade Thursday by landowners near the Ok Tedi Mine in Papua New Guinea has temporarily closed the mine.

BHP holds 30 percent equity interest and is the operator of the Ok Tedi Mine.

The blockade follows negotiations between the landowners and the national Government of Papua New Guinea about Government compensation, including payments for the road which runs between the mining township of Tabubil and the Ok Tedi mine site.

A PNG Government delegation is traveling to Ok Tedi tomorrow to discuss the issues with the landowners.

Carter said the landowners' blockade had prevented today's shift getting to the mine or the mill. He said the demonstration had been peaceful. There had been no destruction of property.

Carter hoped the issue between the landowners and the Government would be resolved very soon so the mine could return to normal operations.

The Broken Hill Proprietary Co. Ltd. is an international resources company with three principal lines of business: oil and natural gas, minerals, and steel. Headquartered in Melbourne, it operates in 25 countries on six continents. U.S. operations are headquartered in San Francisco.

NEW YORK (JAN. 18) BUSINESS WIRE - Kyocera Corp. (NYSE: KYO) and AVX Corp. (NYSE:AVX) Thursday reported that they have completed the previously announced merger of AVX into a subsidiary of Kyocera.

Under the terms of the merger, AVX stockholders will receive 0.430 American Depositary Share (ADS) of Kyocera for each share of AVX common stock. Based upon the closing price of Kyocera ADS on January 17, 1990, of $82.00, AVX stockholders will receive the equivalent of $35.26 per share.

As a result of the merger, AVX will become a subsidiary of Kyocera Corp. The merged companies will have a leading position in the worldwide ceramic market. Kyocera's estimated consolidated sales for the current fiscal year will be approximately $2.94 billion, giving effect to the merger.

The transaction is believed to be the first merger between public companies in Japan and the United States accomplished through an exchange of shares.

Kyocera Corp., of Kyoto, Japan, is a global manufacturer of technical ceramics for semi-conductor and other applications, electronic components, optical instruments and electronic equipment. AVX Corp., of New York, is a leading manufacturer of multi-layer ceramic, tantalum and glass capacitors.

BUFFALO, NY (JAN. 18) BUSINESS WIRE - Directors of Niagara Share Corp.

have declared a distribution of $0.15 per share payable March 12, 1990 to shareholders of record Feb. 16, 1990.

Of the foregoing amount, $ .09 was designated as a distribution from long-term capital gains and $ .06 was designated as a distribution from net investment income.

It is anticipated that the next distribution will be made in December from 1990 realized capital gains and net investment income.

Niagara Share Corp. is a publicly traded investment fund whose shares are listed on the New York Stock Exchange. Its domestic and foreign securities portfolio is committed to investments which, in the opinion of management, have prospects of superior long-term appreciation. Net assets on Dec. 31, 1989, were $229,762,615, equal to $17.15 per share.

#90018b0757 01/18/1990 ~Business Wire

CALGARY, ALBERTA (JAN. 18) BUSINESS WIRE - Stratabound Minerals Corp. (ASE:SB) has received additional assay results from its recent 26-hole drilling program on the CNE zinc-lead-silver property near Bathurst, New Brunswick.

Stratabound has a 100 percent working interest in the property, subject to a 1 percent net smelter return royalty.

Results from drillholes 89-10 through 89-18 were released on Dec. 21, 1989. Assays from holes 89-19 to 89-33 are presented below.

The latest results include 55.8 feet grading 17.29 percent zinc, 5.34 percent lead, 3.53 oz./ton silver, and 0.031 oz./ton gold (89-23); 41.3 feet of 17.98 percent zinc, 8.19 percent lead, 6.31 oz./ton silver and 0.034 oz./ton gold (89-30); and 61.4 feet of 8.91 percent zinc, 2.84 percent lead, 2.01 oz./ton silver and 0.022 oz./ton gold (89-32).

The results of the program appear to significantly increase the potentially mineable open-pit tonnage, particularly south of line 1+50N, and confirm the down-plunge continuity of ore-grade mineralization below the proposed pit floor.

Stratabound has staked 18 claims on the western boundary of the Stratmat Mine property, currently being developed for production by the Noranda Group. Stratabound's holdings in the Bathurst camp now total 4,960 acres, and include the CNE, CNE West, Captain, Taylor Brook, Stratmat North and Stratmat West properties.

BATON ROUGE, LA (JAN. 18) BUSINESS WIRE - Southeastern Control Systems Inc. OTC (Pink Sheets) Thursday announced the opening of its manufacturing facility in Baton Rouge.

The facility has 50,000 square feet of usable space and the company is currently using apprximately 30,000 square feet. The plant is equipped with the modern computer operated metal fabrication equipment necessary to produce the comapny's security hollow metal products and sliding door locking device.

The facility is currently being rented. Negotiations are in process to either long term lease or acquire the facility and the metal fabrication equipment. There are currently ten full time employees working in the facility with plans to expand to as many as twenty immediately after Jan. 1, 1990.

The move to manufacturing its own product puts the company in control of its own destiny. The products can now be produced and delivered in a sequence that best meets the customer's needs and at the same time

maximizes the company's cash flow. Management believes that producing its own product will increase gross margins and cash flow.

Southeastern Control Systems Inc. specializes in the design and manufacture of sliding door locking devices, security hollow metal, plate walls, grating walls, steel furniture and steel accessories for the detention industry. In addition, the company provides service and repair for all detention equipment in various facilities regardless of manufacturer. The company has served the detention industry since 1977.

BEVERLY HILLS, CA. (JAN. 18) BUSINESS WIRE - Nalcor Inc., the parent company of National Lock Corp., Thursday announced that it has completed its purchase of Weslock Corp. and Modern Faucet Corp. from J.P. Industries.

''Since Nalcor's principals have had experience in running all of these companies, definitive plans are in place. There will be no radical changes in staffing, marketing or the product lines of any of the

companies,'' say Nalcor officials.

''National and Weslock complement each other nicely and this acquisition, coupled with continued new product development, should significantly enhance Nalcor's ability to service the home security market. Additionally, Modern Faucet will bring forward a number of new products in the plumbing specialties area.''

Privately held Nalcor was formed after a leveraged buy-out of 86-year-old National Lock Hardware in April 1988. Nalcor's principals and top managment are veterans of the hardware industry and include a number of former Weslock and Modern executives.

With headquarters in Beverly Hills, and manufacturing facilities in Sikeston, Mo., Nalcor Inc. manufactures a complete line of locksets, entry handles and deadbolts under the National Lock brand name and markets home security products under the Nalcor label.

CINCINNATI (JAN. 18) BUSINESS WIRE - On Nov. 21, 1989, Cincinnati Microwave Inc. (NASDAQ: CNMW) announced that it expected to report a loss for 1989.

The company announced Thursday that it expects its net loss for such year to be in the range of $4 million to $5 million. The company expects to be in a position to release its definitive financial results for the fourth quarter and for the year 1989 in early February 1990.

The expected loss is principally associated with limited shipments of SOLO and new ESCORT radar warning receivers in the fourth quarter of 1989 at levels significantly below expectations. Production has been limited due to component and manufacturing problems the company is experiencing. The backlog of unshipped orders for the SOLO and new ESCORT at Dec. 31, 1989 was approximately $6.4 million.

The company has made progress in overcoming its production problems and is now shipping SOLO in acceptable quantities. The company began shipping new ESCORT in small quantities in December 1989 and will be shipping in increasing quantities throughout the first quarter.

Cincinnati Microwave Inc. and its subsidiaries manufacture and market a variety of electronic products. Cincinnati Microwave Inc.'s common shares are traded in the NASDAQ National Market System under the symbol CNMW. For

additional information, please contact Shareholder Relations, Cincinnati Microwave Inc., One Microwave Plaza, Cincinnati, Ohio, 45249, (513) 489-5400.

#90018b0803 01/18/1990 ~Business Wire

SOMERVILLE, NJ (JAN. 18) BUSINESS WIRE - Beatrice D'Agostino, president and chief executive officer of Bancorp New Jersey Inc. (NASDAQ, OTC: BCNJ) Thursday announced consolidated financial results for the fourth quarter and the year ended Dec. 31, 1989.

Consolidated net income for the fourth quarter was $841,000, or 31 cents per share, compared to $834,000, or 31 cents per share, for the same period in 1988. Net income for the year increased to $3,353,000, or $1.24 per share, vs. $3,341,000, or $1.24 per share, in 1988.

Commenting on the annual results D'Agostino stated, ''the year 1989 brought to a resounding conclusion six years of economic expansion in the deregulated environment of the financial industry. These economic cycles, ever present in our financial markets should be managed with prudent judgment and flexible strategies that provide stability and favorable returns to depositors and shareholders.

''Bancorp has been able to report earnings growth despite the adverse operating environment for financial institutions during 1989. This is the result of a conservative commitment to enhance income across economic cycles.''

''Bancorp New Jersey's annual interest income on earning assets increased 15 percent. This was impacted by a 22 percent increase in interest expense and increased operating costs. This narrowing of net interest margins has been experienced by the financial industry due to competitively high interest rate structures,'' commented D'Agostino. ''The annual return on average assets, as a measure of profitability, continues above industry averages at 1.25 percent.''

Consolidated total assets for the bank holding company on Dec. 31, 1989 were $282.0 million, an increase of 7.2 percent from the $263.1 million reported a year ago. The recently announced agreement to acquire a branch office in Finderne (Bridgeport Twp., N.J.) is expected to increase assets by approximately $10 million,'' added D'Agostino.

Net loans increased by $18.8 million, or 9.5 percent , to $217.1 million, while stockholders' equity grew to $47.0 million, or 16.68 percent of total assets at Dec. 31, 1989. Book value at the year end was $17.54 per share. On Dec. 22, 1989, Bancorp announced a 500,000 share stock repurchase program.

Bancorp New Jersey Inc., which is headquartered in Somerville, is the parent company of the 118-year-old New Jersey savings bank, a wholly owned subsidiary with six offices in Somerset, Hunterdon, and Mercer counties. New Jersey Savings Bank is a member of the Federal Deposit Insurance Corp.

#90018b0810 01/18/1990 ~Business Wire

FREMONT, CA (JAN. 18) BUSINESS WIRE - Vitalink Communications Corp. (NASDAQ: VITA) announced Thursday the appointment of two new marketing executives, Maureen Lawrence, as assistant vice president of product management, and Dana Hendrickson, as director of business development.

Both positions report to Paul Schaller, vice president of marketing.

Lawrence's responsibilities in her newly created position include product management and product marketing. Hendrickson will be responsible for business development and marketing communications. Hendrickson replaces Randy Fardal, who resigned to pursue other interests.

Lawrence joins Vitalink with over ten years of marketing experience, having served most recently at Chipcom Inc. as vice president of marketing. She spent four years at Chipcom, a supplier of fiber optic and broadband Ethernet products, where she was responsible for product management, marketing communications and customer training.

Prior to joining Chipcom, Lawrence worked for Digital Equipment for six years in various product management and product marketing positions, most recently as manager of product marketing for the networks and communications marketing division. She marketed Digital's LAN products, IBM interconnect products and wide area network products.

Before Digital, Lawrence worked as a software engineering manager for Raytheon Missile Systems Division for six years. Raytheon manufactures a variety of missile and radar systems.

Lawrence, 41, received her B.S. in engineering physics at the University of Toledo, Ohio and an M.S.E.E. at Lowell University in Massachusetts. She has also done graduate work in biomedical engineering and business administration.

Hendrickson joins Vitalink from 3Com Corp. where he spent approximately one and half years, most recently as director of business development for the Enterprise Systems Division. In that position, Hendrickson created and expanded business relationships with computer system OEMs and large LAN value-added resellers.

Vitalink Communications Corp. (NASDAQ: VITA) manufactures and markets a complete family of LAN interconnection products. Vitalink is the leading supplier of Ethernet and token ring remote bridges and also offers TCP/IP routers and network management.

#90018b0813 01/18/1990 ~Business Wire

READING, MA (JAN. 18) BUSINESS WIRE - MASSBANK Corp. (NASDAQ:MASB), the holding company for MASSBANK for Savings, Thursday announced net income of $2,668,000, or 99 cents per share for the year ended Dec. 31, 1989, as compared to net income of $4,917,000, or $1.17 per share for the same period in 1988.

Net income for the fourth quarter of 1989 was $275,000, or 11 cents per share compared to net income of $1,154,000, or 41 cents per share for the comparable period in 1988. During the quarter, MASSBANK added $850,000 to

its allowance for possible loan losses of $875,000, and a charge of $500,000 through a write down of the valuation of its (insubstance) foreclosed real estate to more accurately reflect current real estate values.

Non-performing loans amount to $2,036,000, while other real estate owned and insubstance foreclosures combined totalled $3,780,000 at Dec. 31, 1989 versus $6,440,000 in non-performing loans at Sept. 30, 1989. After the addition and the charge-off previously mentioned, the allowance for possible loan losses at Dec. 31, 1989 amounts to $1,225,000, or 60.2 percent of non-performing loans and 11.9 percent of total loans outstanding.

Net interest income for the fourth quarter of 1989 totalled $2,391,000, compared with $2,819,000 for the fourth quarter of 1988. Contributing to this decline was a higher ratio of non-performing assets (non-performing loans, insubstance foreclosed real estate, and other real estate owned) during the fourth quarter of 1989 as compared to the fourth quarter of 1988, which depressed interest income for the period.

Also contributing to the decline in net interest income was an increase in interest expense, the result of a change in the composition of the company's deposits and a competitive market for deposits which bid up deposit rates.

During the three month period ended Dec. 31, 1989, the company continued the repurchase of capital stock by acquiring an additional 148,500 shares in the open market. As of Dec. 31, 1989 the company has repurchased 1,015,949 shares. This program has helped to improve the book value of the remaining shares outstanding from $28.42 on Dec. 31, 1988 to $30.31 at Dec. 31, 1989.

WAYNE, NJ (JAN. 18) BUSINESS WIRE - Union Camp Corp. Thursday reported earnings of 90 cents per share in the fourth quarter of 1989, down 21 percent from $1.14 per share in last year's record fourth quarter.

Net income was $62,208,000, compared to $78,460,000 in the fourth quarter of last year. Sales for the period were $676,017,000, compared to $685,641,000 in the same period last year.

For the full year, the company earned a record $4.35 per share, a 2 percent increase over $4.25 per share for 1988. Net income was $299,400,000, compared to $295,146,000 last year. Sales for 1989 increased 4 percent to $2,761,337,000 from $2,660,918,000 in 1988.

#90018b0823 01/18/1990 ~Business Wire

PUNTA GORDA, FL (JAN. 18) BUSINESS WIRE - First Federal Savings Bank of

Charlotte County (NASDAQ:FSCC) Wednesday reported that consolidated net earnings for the second quarter ended Dec. 31, 1989, were $789,701, or 26 cents per share.

This is a decrease from the $1,547,321 in net earnings reported for the second quarter ending Dec. 31, 1988. Total net earnings for the six months ended Dec. 31, 1989, were $1,542,327 as compared to $2,353,068 for the six months ending Dec. 31, 1988.

The substantial decrease in net earnings is due to the fact that in the quarter ending Dec. 31, 1987, the Savings Bank earned a profit, before taxes, of $1,750,330 on the sale of a ten-acre parcel of land adjacent to the Savings Bank's Murdock, Fla., branch office, although this profit was partially offset by a loss of $323,787 as a result of the sale of $5,954,113 in equity securities.

For the quarter ending Dec. 31, 1989, the Savings Bank was not involved in the sale of any land or equity securities.

Total assets as of Dec. 31, 1989, were $339,828,480, a three percent increase over total assets of $329,906,931 as of June 30, 1989. During the six-month period, loans receivable, loans held for sale and mortgage-backed securities increased .3 percent or $795,418 to $271,472,110, as of Dec. 31, 1989, from $270,676,692 as of June 30, 1989.

At Dec. 31, 1989, interest-bearing deposits in other banks were $49,378,332, or an increase of $7,773,833, or 18.7 percent, over the $41,604,499 held in interest-bearing deposits on June 30, 1989. Deposits at the Savings Bank increased $10,319,410, or 3.6 percent from $285,121,556 as of June 30, 1989, to $295,440,966 as of Dec. 31, 1989.

Stockholders' equity increased 1.7 percent, or $710,233, to $41,843,835 as of Dec. 31, 1989, from $41,133,602 as of June 30, 1989. This represents an approximate book value of $13.18 per share and 12.3 percent of total assets.

First Federal meets and exceeds all three capital requirements as set forth by the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (''FIRREA'').

First Federal, located in southwest Florida, has seven offices servicing Charlotte and south Sarasota Counties, and its common stock is traded on the NASDAQ National Market System under the symbol ''FSCC.''

#90018b0825 01/18/1990 ~Business Wire
PALM SPRINGS, CA (JAN. 18) BUSINESS WIRE - Citing the organized construction industry's commitment to quality, new technology, and labor-management training programs, the elected leadership of major contractor associations and the General Presidents of the building trades unions assure the nation of their ability to meet the demand for construction in the 1990's and to attract and train the skilled work force needed to do the job.

The contractor and labor officials, who had formed the Construction Industry Labor-Management 1990's Committee last October, met here during the AFL-CIO Building and Construction Trades Department's governing board meeting to plan a course of action.

The committeee previewed a video presentation on the industry, the first step of a program to demonstrate to the public the advantages that the organized construction industry has over its competition. Special emphasis will be placed on the high quality training programs which have been developed through joint labor-management efforts.

The committee will devote much of its efforts to strengthening the ability to contractors and unions to exchange information and new techniques to help build their market share. The labor-management representitives will also reach out to younger workers to promote the opportunities available in the industry and the value of their training and skills development programs.

The management associations participating in the meeting were: the National Association of Construction Boilermakers, National Constructors Association, Mechanical Contractors Association of America, National Electrical Contractors Association, National Erectors Association, and the Sheet Metal & Air Conditioning Contractors National Association.

#90018b0834 01/18/1990 ~Business Wire
NEW YORK (JAN. 18) BUSINESS WIRE - The following is a summary of a presentation Thursday at the New York Society of Security Analysts by Peter J. Boni, president of On-Line Software International Inc.

Peter J. Boni, president of On-Line Software International Inc., (NYSE:OSI) Thursday told the New York Society of Security Analysts that the company is moving forward aggressively with its five-point program to build upon its leadership position in the IBM systems software and

professional services business.

''By centering our strategic direction around the five-point program of 'Focus, Leverage, Partner, Expand and Improve,' On-Line Software is emerging as a more cost-efficient and streamlined organization,'' Boni said. ''Today, we are making the transition from being a product-oriented company to a solution-oriented company. This serves to make us far more productive, and increases our differentiation and competitive advantage.''

Boni also indicated that in the second half of fiscal 1990 and into fiscal 1991, anticipated new product announcements would add to the company's growth.

Steven G. Levenson, senior vice president and chief financial officer, discussed On-Line Software's recently-announced second quarter results, in which profits increased significantly.

For the quarter ended Nov. 30, 1989, income before extraordinary gain increased to $774,000, or 13 cents per share, compared to a loss before extraordinary gain of $975,000, or 16 cents per share, for the comparable period last year. The quarter ended Nov. 30, 1988 included an extraordinary gain of $531,000, or 9 cents per share. Revenues for the second quarter increased 7.7 percent to $21,728,000, from $20,182,000 last year.

''Additional focus and leveraging of our strengths have led to efficiencies that, in addition to cost controls, have resutled in a more than doubling of our operating margin to 9.3 percent of revenues this quarter compared to a margin of 4.5 percent of revenues for this fiscal year's first quarter.

Second quarter profits would have surpassed $1 million, but the company recorded a severance expense of $400,000 resulting from the management restructuring announced last October,'' Levenson told the analysts.

On-Line Software International is a NYSE company headquartered in Fort Lee N.J.. The firm, celebrating it 20th anniversary, combines consulting and educational services with a full range of systems software designed to enhance the productivity of IBM computer systems users.

From 17 domestic and international offices, and a distribution network that services over 25 foreign countries, On-Line Software offers CICS and DB2 productivity software, and development systems products, combined with educational/consulting services that are designed to develop and maintain on-line and data base systems for IBM environments.

#90018b0848 01/18/1990 ~Business Wire
ROCHESTER, NY (JAN. 18) BUSINESS WIRE - Eastman Kodak Company has received FDA approval to extend the applications of Kodak SureCell chlamydia test kits to male and infant patients.

Previously, Kodak's test for detection of one of the most common sexually transmitted diseases had been available only for use on adult women.

The new applications have special significance for urologists, pediatricians, neonatologists, and OB/GYN specialists who will be able to diagnose and prescribe treatment regimens while the patient is still in the office.

Now Type 1 swabs can be used to collect male urethral samples and cytology brushes can be used for endocervical samples in women. In addition, ocular swabs can be used to collect conjunctival or nasopharyngeal samples from infants as an aid in the diagnosis of chlamydial conjunctivitis and respiratory infection.

Chlamydia is responsible for an estimated 4 million cases of infection in the United States each year. The majority of patients with uncomplicated genital infection have few or no symptoms. If left untreated, chlamydia can result in serious complications such as cervicitis, urethritis, endometritis, pelvic inflammatory disease and sterility. Infants born to infected mothers can contract eye infections and possibly pneumonia.

Unlike hospital lab culture tests, which take two or more days to produce results, the Kodak SureCell chlamydia test can be performed in approximately 20 minutes.

In addition, the chlamyida test offers superior sensitivity, specificity and ease of interpretation. Results are displayed in a unique, easy-to-see test pattern and can be read by comparing a pattern of three dots to a chart included with each test. No special testing equipment is needed. And everything needed to run the test

is included in the kit. Kodak SureCell chlamydia test kits are available in 10-test kits, 25-test kits and in 100-test kits. Note: Kodak and SureCell are trademarks.

#90018b0849 01/18/1990 ~Business Wire

MEMPHIS, TN (JAN. 18) BUSINESS WIRE - National Commerce Bancorporation (NASDAQ/NMS: NCBC) Thursday announced fourth quarter and year-end earnings.

For the fourth quarter ended Dec. 31, 1989, net income was $6,450,000, a 15.9 percent increase over the $5,564,000 reported for the like period a year earlier.

Adjusted for the five percent stock dividend declared in November 1989, earnings per share for the quarter rose 15.1 percent to 61 cents per share from 53 cents per share in 1988 (64 cents vs. 56 cents on a pre-stock dividend basis).

For the fourth quarter, the company's return on average assets and return on average common equity, were 1.42 percent and 20.28 percent respectively compared with 1988 fourth quarter returns of 1.43 percent and 20.01 percent.

For the year ended Dec. 31, 1989, net income totaled $23,321,000, a 13.6 percent increase over 1988. Adjusted for the five percent stock dividend, earnings per share were $2.21 in 1989, compared to $1.96 in 1988, a 12.8 percent increase ($2.32 vs. $2.06 on a pre-stock dividend basis).

For 1989, return on average assets was 1.38 percent, compared to 1.40 percent for 1988, while return on average equity was 19.28 percent, compared to 19.45 percent for 1988.

Bruce E. Campbell Jr., chairman and chief executive officer, commented that the reduction in deposit costs and the related improvement in net interest income in the late fourth quarter was an encouraging development. Additionally, the company enjoyed a 17.9 percent increase in non-interest income during the quarter.

Campbell also noted the company's balance sheet strength. Government and government agency securities increased 76.1 percent vs. fourth quarter 1988. Non-performing assets, composed of non-accrual loans, renegotiated loans, and other real estate, amounted to 0.69 percent of the quarter's average net loans, down form 0.94 percent at Sept. 30, 1989.

The year-end allowance for loan losses was 1.8 times the combination of these non-performing assets. He also noted the company's 15.4 percent growth in deposits in 1989 to $1,469,785,000. Stockholders' equity increased by 14.3 percent to over $130,000,000.

Non-interest income, other than broker/dealer revenue, increased by an aggregate of $1,375,000 compared to 1988. Broker/dealer revenue generated by Commerce Investments was $111,000 less than fourth quarter 1988, although the unit continued to operate profitably for the period.

ACTON, MA (JAN. 18) BUSINESS WIRE - CML Group Inc. (NYSE:CML), a leading specialty consumer marketing company, reported that the board of directors in a meeting held Thursday, rejected the revised unsolicited proposal by Irwin Jacobs to acquire all of the stock of CML in a cash merger transaction at $25 per share.

Jacobs' original proposal at $23 per share was rejected by the CML board on Dec. 4, 1989.

In a letter to Jacobs regarding the board's decision, Charles M. Leighton, chairman of the board and chief executive officer, advised Jacobs that his revised proposal, like his original proposal, did not reflect the bright current and future prospects of CML.

CML's high-quality products are sold under the tradenames Britches of

Georgetowne, The Nature Company and NordicTrack.

CANTON, MA (JAN. 18) BUSINESS WIRE - Perception Technology Corp. (NASDAQ:PCEP), a leader in the voice processing industry, announced Thursday the formation of a new division devoted exclusively to the Electronics Publishing Market.

The formation of this division is the result of today's completion of the acquisition by Perception Technology Corp. and its wholly-owned subsidiary PTC Technology Corp., of certain assets of BDR Audiotex Inc., a Canadian based firm that has a strong presence in this market.

The Electronic Publishing Market encompasses directory and newspaper publishers, radio stations and telephone companies. The acquisition of BDR strengthens Perception's ability to penetrate the Electronic Publishing Market by enhancing its product line with an entry-level, turnkey audiotex solution and a wide array of information services.

The combined resources of both companies position Perception as the total solution provider in the industry with the broadest spectrum of products, services and support.

The purchase price for the BDR Audiotex Inc. assets acquired was U.S. $800,000, 20,000 shares of Perception Technology Corp. stock, forgiveness of a loan Perception made to BDR of U.S. $150,000 and the granting of a warrant to purchase 50,000 shares of Perception stock at U.S. $15 per share.

Perception Technology designs, manufactures, markets and supports a family of interactive voice processing systems that provide users with direct access to central data bases through touchtone telephones.

     #90018b0857 01/18/1990 ~Business Wire
DALLAS (JAN. 18) BUSINESS WIRE - L&N Housing Corp. (NYSE: LHC) reported a net loss of $2,271,000, or $1.03 per share, for the fourth quarter of Fiscal 1989 as compared to net income of $895,000, or 41 cents per share, for the same period in 1988.

For the year ended Dec. 31, 1989, the company reported net income of $383,000, or 17 cents per share, as compared to a net loss of $2,370,000, or $1.08 per share, for Fiscal 1988.

During the quarter ended Dec. 31, 1989, the company wrote down its investments in marketable securities by $3,161,000. The write-down does not affect stockholders' equity, since marketable securities are carried at the lower of cost or market value, and will not affect dividends in subsequent periods since the charge cannot be recognized for tax purposes. Prior to the write-down, operations produced net income of $890,000, or 40 cents per share, in the December quarter.

The company previously declared and paid a dividend of 40 cents per share which represented 100 percent of operating earnings generated during the quarter. During the year ended Dec. 31, 1989, the company distributed a total of $1.61 per share in dividends. A portion of the dividend will be a return of capital; stockholders will be notified by letter of the amount.

The board of directors also announced that the annual meeting of the stockholders of the company will be April 18. The record date for stockholders to vote at the annual meeting will be March 1. The anticipated mailing date of the proxy statement and annual report is March 16.

HOUSTON (JAN. 18) BUSINESS WIRE - National Convenience Stores Inc. (NYSE:NCS) announced results for its second fiscal quarter and six months

ended Dec. 31, 1989.

The company recorded a net loss for the second quarter of fiscal 1990 of $655,000, or 3 cents per common share, compared with a net loss of $2,054,000, or 9 cents per share, for the second quarter of fiscal 1989. Sales for the quarter were $247,429,000, compared with $271,937,000 for the same period last year.

For the six months ended Dec. 31, 1989, the company recorded a net profit of $6,739,000, or 30 cents per common share, vs. a net loss of $717,000, or 3 cents per common share, for the six months ended Dec. 31, 1988.

Sales for the first half of fiscal 1990 were $533,021,000, compared with $547,265,000 for the first half of fiscal 1989. V.H. Van Horn, president and chief executive officer, said, ''Sales in the quarter declined below prior year levels by nine percent, primarily because we were driving sales very aggressively at this time last year with discount pricing and a major special promotion.

''The financial impact of this sales decline was more than offset by a major improvement in merchandise margins. Our program to restore margins, including a return to traditional convenience store pricing, resulted in merchandise margins of 41.0 percent for the second quarter of fiscal 1990 vs. 34.7 percent for the same period last year.''

Van Horn said that the company had completed merchandise resets in its top 100 stores, a project which not only introduces a large number of new products to the store, but also matches the merchandise offering to the demographics of the neighborhood each store serves.

All Stop N Go stores will receive the new product selections over the next 18 months.

''Our new product offering is contemporary, exciting and tailored to the neighborhoods we serve. Customer response has been terrific and preliminary sales results are showing favorable trends,'' Van Horn said. National Convenience Stores Inc. operates approximately 1,100 Stop N Go stores in four Sunbelt states.

#90018b0873 01/18/1990 ~Business Wire

LATHAM, N.Y. (JAN. 18) BUSINESS WIRE - Mechanical Technology Inc. (OTC:MTIX) announced Thursday that its annual meeting of shareholders, originally scheduled for Feb. 16, has been postponed to Thursday, March 15.

MTI also announced that it is continuing negotiations with its bank lenders to restructure its outstanding bank debt and expects that an agreement will be reached shortly.

Harry Apkarian, chairman of the board and chief executive officer, said that MTI was not in compliance with certain financial covenants in its bank loan agreements as of the end of the most recent fiscal year on Sept. 30, 1989. He attributed this to the steep decline in MTI's earnings last year. As was reported previously, MTI suffered a net loss of almost $3 million in fiscal 1989 compared to net income of more than $3 million in the prior year.

Apkarian added that MTI and its lenders have been discussing for some time a new set of covenants and other revisions to the terms of its loan agreements. He also noted that MTI has not yet made a $1 million principal payment, which was due on Jan. 2 under its primary loan agreement, pending finalization of current negotiations.

The delay in reaching an agreement has prevented MTI from completing its financial statements for fiscal 1989. As a result, the company has not yet been able to file certain portions of its required reports with the Securities and Exchange Commission (SEC) and the National Association of Securities Dealers (NASD). The company has, however, applied to NASD for an exception to its filing requirements to permit the continued inclusion and trading of its common stock on NASDAQ.

The delay in completing its fiscal 1989 financial statements has also prevented the company from completing its annual report to shareholders for fiscal 1989 and has made it necessary to postpone the annual meeting. The rescheduled meeting will be held on March 15 at 2:30 p.m. at the Mohawk Golf Club in Schenectady, N.Y.

MTI, located in Latham, N.Y., is a science-based, growth enterprise dedicated to the development and manufacture of high-technology products and systems serving the test/measurement and defense/aerospace markets. MTI had sales of $73.2 million in fiscal 1989.

LAKE WORTH, FL (JAN. 18) BUSINESS WIRE - Suburban Bankshares Inc., reported a 56.35 percent increase in net income from $378,000, or 28 cents per share for the year ended Dec. 31, 1988, to $591,000 or 49 cents per share for the year ended Dec. 31, 1989.

For its fourth quarter of 1989, the company reported net income of $153,000 or 13 cents per share, as compared to $189,000, or 16 cents per share for its fourth quarter of 1988. Although fourth quarter earnings for 1989 were lower than that for the fourth quarter of 1988, fourth quarter earnings for 1989 represented a 27.50 percent increase over third quarter earnings for 1989.

Suburban Bankshares Inc., is a one bank holding company, with four banking offices located in West Palm Beach and Lake Worth, Fla. At Dec. 31, 1989, the company had consolidated assets of $197 million, deposits of $165 million and total shareholders' equity of
$9 million.

CHERRY HILL, NJ (JAN. 18) BUSINESS WIRE - Subaru of America Inc. announced Thursday that its board of directors has selected a special committee to consider the proposal made on Jan. 15 by Fuji Heavy Industries.

The unsolicited proposal by Fuji is to acquire, at $6 per share, the 50.4 percent of the company's common stock which Fuji does not already own.

In response to inquiries from shareholders about the adequacy of the $6 offer, Marvin S. Riesenbach, executive vice president and chief financial officer of Subaru of America, said the special committee would study the proposal made by Fuji and will report to the board the committee's recommendation concerning an appropriate response to Fuji's proposal, which is fair to, and in the best interest of, the company's shareholders other than Fuji.

Riesenbach further stated that it is likely that this procedure will result in a negotiation with Fuji concerning the share price and other terms of the proposal.

The special committee appointed by the board of directors of Subaru of America will include: Harvey Lamm, Subaru's chairman and chief executive officer; Thomas Gibson, president and chief operating officer; Marvin S. Riesenbach, executive vice president and chief financial officer; and Philip Lustbader, group vice president and general counsel for Subaru of America.

The company also announced that, as a result of the proposal by Fuji Heavy

Industries Ltd., the annual meeting of shareholders normally held in late February will be deferred.

#90018b0884 01/18/1990 ~Business Wire

WATERTOWN, MA. (JAN. 18) BUSINESS WIRE - Lifeline Systems Inc. (NASDAQ:LIFE) -- manufacturers of Lifeline(r), the nation's leading Personal Response System -- is the first to adapt its products so the physically challenged can answer routine phone calls and/or signal for emergency help from their homes.

In excess of 10 million individuals with spinal cord injuries, arthritis, multiple sclerosis, cerebral palsy, muscular dystrophy, and other disabilities are anticipated to benefit from Lifeline and its new ''Access Package.''

Lifeline consists of a call button that's pressed at home to answer a ringing telephone or signal for help. Telephone conversations can be held without having to move, by using the Lifeline communicator with speaker phone. In an emergency, the call button signals the communicator to notify Lifeline's 24-hour response center.

Certified personnel answer the call over the speaker phone and send immediate assistance, such as a neighbor, relative, medical professional, or the police.

Lifeline's new ''Access Package'' assists individuals who are unable to press the call button. Now, those who can make any type of physical movement -- from raising an eyebrow to turning a wrist -- can activate a specially designed switch to answer the phone or call for emergency assistance.

''When Lifeline Systems developed the nation's first Personal Response System in 1974, we knew that people with a variety of lifestyles could benefit from the peace of mind and security Lifeline brings,'' said Arthur Phipps, president, Lifeline Systems Inc.

''For several years, our research and development department has specifically analyzed the needs of the physically challenged,'' Phipps continued. ''We found that most people with disabilities -- such as those with paraplegia -- can use our standard Lifeline system, by pressing the call button. And now, with the 'Access Package,' those who have difficulty pushing the button due to arthritis, stroke, or quadriplegia can also use Lifeline.''

Lifeline's ''Access Package'' consists of the AT314 adaptable transmitter and a selection of external switches. The switches capitalize on a physically challenged individual's most consistent and reliable movement. Examples include:

-- a pillow switch that can be activated by the head in bed;

-- a sip or puff switch, aotivated by breathing;

-- wobble and rocking lever switches, activated by gross body movements; and

-- a highly sensitive electronic switch, activated by the smallest of motions, such as raising an eyebrow.

As part of the ''Access Package,'' Lifeline also offers a special smoke detector. In case of fire, Lifeline's response center automatically receives a signal and notifies the fire department.

''The Lifeline smoke detector is invaluable, particularly for those who can't move quickly, such as wheelchair users,'' said Richard Reich, vice president of engineering, Lifeline Systems Inc.

Lifeline, the nation's first and leading Personal Response System, is manufactured in the United States by Lifeline Systems Inc. of Watertown, Mass. Lifeline is provided to a quarter of a million people throughout North America. It is available directly from Lifeline Systems or though more than 2,000 health care facilities. For more information about Lifeline and the new ''Access Package,'' call 1-800-LIFELINE (1-800-543-3546).

BRIDGEPORT, CT. (JAN. 18) BUSINESS WIRE - People's Bank (NASDAQ:PBCT) announced Thursday that its board of directors has declared a quarterly cash dividend of 18 cents per share on the common stock.

The dividend is payable Feb. 14, 1990 to shareholders of record at the close of business on Feb. 1, 1990.

According to David E.A. Carson, president and chief executive officer of People's Bank, People's Mutual Holdings, which owns 25.3 million shares of People's Bank, has waived receipt of its dividend on 24.8 million of its shares, resulting in a dividend payout to quarterly earnings ratio of 38.7 percent.

People's Bank, with assets of $7.1 billion, serves the Connecticut market thorugh a network of 77 locations, and electronic (ATM) and telephone banking systems.

A leading mortgage lender in the state, People's is also a major provider of credit cards, consumer and commerical banking services.

#90018b0897 01/18/1990 ~Business Wire

BRIDGEPORT, CT. (JAN. 18) BUSINESS WIRE - People's Bank (NASDAQ:PBCT) Thursday reported net income of $3.6 million or 11 cents per share for the quarter ended Dec. 31, 1989.

This compares with net income of $8.1 million or 25 cents per share for the fourth quarter of 1988. The bank also reached a milestone, with total assets at $7.1 billion as of Dec. 31, 1989. The 1989 results include a previously announced increase in the provision for loan losses to $15.8 million for the fourth quarter.

The bank also reported that its board of directors had approved a quarterly dividend of 18 cents per share payable on Feb. 14, 1990 to stockholders of record at the close of business on Feb. 1, 1990.

In addition to the increased provision for loan losses, the 1988 fourth quarter results also reflect increased non-interest income -primarily increased net security gains and higher fee based revenues -and declines in net interest income, non-interest expense and income taxes compared to the fourth quarter of 1988.

For the year, the bank reported net income of $32.5 million, or $1 per share, vs. $36.6 million in 1988. This decrease is primarily attributable to increases in the provision for loan losses and non-interest expenses, partially offset by increased net security gains and other non-interest income. Per share comparisons are not applicable, as People's converted to stock ownership in July 1988.

''Our decision to increase the provision for loan losses during the fouth quarter was necessary given the weakening trends in the Connecticut real estate market. We are pleased that despite this increase we reported a profit for the quarter and maintained our dividend policy,'' said David E.A. Carson, president and chief executive officer.

The provision for loan losses for the fourth quarter of 1989 was $15.8 million, an increase of $13.1 million over the provision for loan losses in the 1988 fourth quarter. For the full year 1989, the provision for loan losses was $31.1 million, an increase of $17.8 million over the $13.3 million provision in 1988.

Net interest income for the fourth quarter of 1989 was $40.4 million, a decrease of $3.7 million from the $44.1 million posted in the fourth quarter of 1988. For the full year 1989, net interest income totaled $165.1 million, an increase of $5.7 million from the 1988 results.

People's Bank serves the Connecticut market through a network of 77 locations, and electronic (ATM) and telephone banking services. A leading mortgage lender in the state, People's is also a major provider of credit cards, consumer and commercial banking services.

#90018b0898 01/18/1990 ~Business Wire

ST. JOSEPH, MISSOURI - MNX Inc. (OTC: MNXI)(''MNX''), a nationwide truckload carrier, reported consolidated operating revenues of approximately $39 million for the quarter ended Dec. 30, 1989, an increase from $22 million for the fourth quarter ended Dec. 31, 1988.

Approximately $14 million of the fourth quarter 1989 revenues were earned by Mark VII, MNX's intermodal subsidiary which commenced operations in the second quarter of 1989 and was purchased by MNX on July 2, 1989.

MNX plans to report two special charges in the fourth quarter. They are: 1) a non-cash contribution of approximately $1.9 million to the company's Employee Stock Ownership Plan (ESOP) and 2) an adjustment to equipment depreciation of approximately $4.2 million. As a result of these charges, the fourth quarter loss will be greater than expected.

MNX's ESOP was established in 1985 to give employees ownership in MNX

common stock at no cost to the employees. The ESOP owns approximately 585,000 shares, or 12 percent of the outstanding common stock of MNX. The fourth quarter contribution will allow the ESOP to allocate the remaining 400,000 unallocated shares to employees in 1990.

The equipment depreciation charge results from a decline in the value of used tractors and the refusal, to date, of a major equipment manufacturer to fulfill a trade value agreement. MNX purchased 100 trucks in the fourth quarter of 1989 and plans to purchase an additional 310 tractors in the second and third quarters of 1990.

#90018b0904 01/18/1990 ~Business Wire

WOBURN, MA. (JAN. 18) BUSINESS WIRE - MedChem Products Inc. (AMEX:MCH) announced Thursday that the United States District Court for the District of Massachusetts has issued a decision confirming its intention to issue a preliminary injunction against MedChem which would be effective at some future date, probably Feb. 1, 1990.

The Court declared its intention to enjoin MedChem on the effective date from selling its AMVISC product, but would allow MedChem to continue to market its AMVISC PLUS product to those physician who prefer it to the plaintiff's product. MedChem will be required, however, should it choose to sell AMVISC PLUS, to post adequate security to protect the plaintiff's interest regarding their patent infringement claim.

The terms of such security will be determined at a hearing before the Court on Jan. 23. For its fiscal year ended Aug. 31, 1989, MedChem had sales of approximately $800,000 of its AMVISC PLUS product.

While the ruling from the Court addressed only the issuance of a preliminary injunction, the Court did indicate that monetary damages ror MedChem's past infringement of the plaintiff's patent would probably be based upon the plaintiff's lost profits for sales that Pharmacia would have made, had there been no infringement by MedChem, rather than on the basis of a reasonable royalty. The assessment of damages on a lost-profits basis would result in a monetary judgement significantly greater than damages calculated in a research royalty basis.

Further, the Court has determined that it will allow MedChem to continue experimentation that is underway or planned with respect to other products. In particular, the Court would permit MedChem to proceed with experimentation regarding the use of its hyaluronic acid product for the treatment of temporomandibular joint disfunction, subject to appropriate

security arrangements for any royalties that may be payable.

MedChem Products Inc. develops, manufactures and markets biomedical products -- principally, AMVISC and AVITENE -- for use in opthalmic and surgical markets. These products, derived from naturally occurring biomaterials by utilizing proprietary processing technologies, help surgeons to perform delicate operations more safely and effectively.

#90018b0913 01/18/1990 ~Business Wire

MEMPHIS, TN. (JAN. 18) BUSINESS WIRE - Union Planters Corp. (the corporation) (NYSE:UPC) reported a net loss for the fourth quarter of 1989 of $17.9 million or 95 cents per share.

The loss was primarily the result of a $16.0 million special addition to the corporation's loan loss reserves and to $7.8 million in unusual litigation and litigation related expenses. No tax benefits were involved with either of these charges. The loss for the quarter, when combined with the net loss incurred during the first nine months, brings the loss for the year to $22.3 million, or $1.19 per share.

In commenting on the results, Benjamin W. Rawlins, chairman and chief executive officer, stated: ''While we did not set out for it to be that way, 1989 turned out to be a year of clean-up for us. We are not happy with the results, but we have committed ourselves to address problems quickly upon identification. As a result we believe we have set aside sufficient reserves and taken the necessary write-downs to contain the unusual charges to 1989.''

The corporation reported a loss of $972,000, or 5 cents per share, in the fourth quarter of 1988, and had net earnings of $22.7 million, or $1.20 per share, for the full-year 1988.

The corporation's board of directors declared the regular quarterly cash dividend of 12 cents per share payable Feb. 16, 1990, to shareholders of record Feb. 2, 1990.

The corporation's results included the results of National Commerce Corp. whose only subsidiary is the the First National Bank of New Albany, Miss., Citizens Bank and Trust Co. of Wartburg, Tenn., and Steiner Bank in Birmingham, Ala. All of the acquisitions were consummated Nov. 30, 1989.

The results of Steiner Bank and Citizens Bank of Wartburg (both accounted for as purchase acquisitions) are included from their date of acquisition,

and the results of National Commerce Corp. (accounted for as a pooling of interest) are included from the beginning of the earliest period presented. Union Planters Corp. is a multi-bank holding company headquartered in Memphis. Its principal bank subsidiary is Union Planters National Bank (UPNB) in Memphis.

The corporation's Mississippi bank subsidiaries are United Southern Bank headquartered in Clarksdale and the First National Bank of New Albany. The corporation's other Tennessee bank subsidiaries are: Citizens Bank of Cookeville, Bank of Roane County in Harriman, the First National Bank of Crossville, Merchants State Bank of Humboldt, First Citizens Bank of Hohenwald, Bank of Trenton and Trust Co., Pickett County Bank and Trust Co. in Byrdstown, Cumberland City Bank and Citizens Bank and Trust Co. of Wartburg.

The corporation also has one bank, Steiner Bank, in Birmingham, Ala.

Union Planters Investment Bankers Corp., a former subsidiary of UPNB, was transferred to the corporation in late 1989. It has one significant subsidiary, Union Planters Investment Bankers Group Inc.

WASHINGTON (JAN. 18) COMTEX - The 8-K report filed at the SEC shows on Dec. 29, 1989, Nalcap Holdings Inc. sold all its shares of its wholly owned subsidiary, Nalcap Leasing Ltd., to Barclays Bank of Canada for a total price of $35.46 million. That price was payed via a bank draft valued at $26.49 million plus Barclays Bank's assumption of the indebtedness of Nalcap to ABN Bank of Canada for the sum of $8.97 million as of a purchase-agreed date.

The cash portion of the sale was applied by Nalcap Holdings Inc. to Barclays Bank to reduce Nalcap's outstanding indebtedness to Barclays Bank for the aggregate amount of $26.49 million owed by Nalcap to Barclays.

In connection with the agreement, Nalcap Leasing reduced its stated capital to $30.41 million from $40.69 million and distributed the remaining $10.27 million to Nalcap Holdings in the form of a promisory not payable to Nalcap Holdings. Further, Nalcap Leasing assigned certain equipment leases to United Bison Resources Ltd., a subsidiary of Nalcap Holdings, in consideration for $660,500 in indebtedness owed by Nalcap Leasing to United Bison.

WASHINGTON (JAN. 18) COMTEX - The 8-K report filed at the SEC shows Financial Performance Corp. announced its independent accountant could not audit its financial statements for its fiscal year ended Sept. 30, 1989. Financial Performance lacks sufficient funds to engage its independent accountant to audit its fiscal 1989 year, and stated its dissatisfaction with the fees charged by its independent accountant for the audit for its fiscal year ended Sept. 30, 1988.

Financial Performance has, however, released an unaudited statement for its fiscal year 1989, as prepared by its independent auditor. This statement indicates losses of $860,684, or $0.12 per share, on revenues of $126,540 for the fiscal year ended Sept. 30, 1989.

This compares with losses of $908,011, or $0.15 per share, on revenues of $357,276 for the previous fiscal year.

The amendment will authorize the company to issue 25 million shares of common stock and 25,000 shares of preferred stock.

Drug Guild's executive office is located at 350 Meadowland Parkway, Secaucus, NJ 07094 and its telephone number is (201) 348-3700.

-30- 627

#90018c0060 01/18/1990 ~Comtex

WASHINGTON (JAN. 18) COMTEX - Alpha-Omega Capital Inc. filed a Form 8-K with the SEC stating on Dec. 26, 1989, it filed reaudited financial statements with the SEC for the fiscal year ended Dec. 31, 1988. Alpha-Omega states the reaudit of the previously published financials was required when an investigation into the financial condition in July, 1989, revealed the existence of an unrecorded bank and numerous previously unrecorded expenses.

The reaudited financials revealed a decreased cash position of Alpha-Omega as previously reported from $437,754 to $116,925, and decreased working capital position from $370,385 to $56,291.

The reaudited financials further showed a decrease in total assets from $1,329,675 to $1,101,980, increased deficit since inception from $150,114 to $381,074, decreased revenues from $253,832 to $233,832 and increased net loss from $111,850 to $342,810.

Alpha-Omega reports that its litigation counsel has advised the company that he was withdrawing from two cases because of non-payment from the company. These cases involve a claim for approximately $60,000 in advertising expense which Alpha-Omega authorized on behalf of the Joyce's Submarine Sandwich advertising fund and a claim made by Mr. David Meaux for transfer of a $100,000 promissory note from a Joyce's franchiseee held by Alpha-Omega.

Alpha-Omega's failure to engage new counsel or make sufficient payments to its old counsel will cause these cases to be defaulted against the company. Alpha-Omega states that such default judgements could severely jeopardize its continued existence.

Alpha-Omega's executive office is located at 14001 E. Iliff Ave., Suite 101, Aurora, CO 80014 and its telephone number is (303) 751-6690.

WASHINGTON (JAN. 18) COMTEX - The 8-K report filed at the SEC shows on Dec. 29, 1989, MorningStar Foods Inc. completed an amendment to a credit agreement dated March 31, 1988. In doing so, it entered into a new senior credit agreement with Bankers Trust of Delaware that provides MorningStar with $10.00 million of bridge financing.

In connection with the agreement, MorningStar confirmed the sale of some of its regional dairy operations is under consideration, in keeping with a strategy to focus on specialty dairy operations. Proceeds from any such sales will go toward reducing indebtedness under the senior credit agreement.

The company also intends, through a private placement of equity, to raise additional capital to retire indebtedness under the senior credit agreement and to provide for future operations. The nature of the securities issued will depend upon the market conditions at the time of the offering. MorningStar is also investigating other financial alternatives.

The executive offices of MorningStar Foods are located at 5956 Sherry Lane, Suite 1100, Dallas, TX 75225-6522. Its telephone number is (214) 360-4700.

JERUSALEM (JAN. 18) - Israeli troops Thursday shot and wounded at least 15 Palestinians in scattered clashes with demonstrators in the occupied territories, Palestinian sources said.

The worst unrest was reported on the Gaza Strip, where nine people were shot and where the army closed five elementary schools indefinitely after pupils took part in anti-Israeli protests.

Six other Palestinians were shot on the West Bank, including two in the village of Kfar Jib near Ramallah where security forces arrested 30 Palestinians late Wednesday, the sources said.

Sixty Palestinians from the territories have been arrested over the past 24 hours, a senior PLO official in Tunis said earlier Thursday.

Bassam Abu Sherif, advisor to Palestine Liberation Organisation Chairman Yasser Arafat, said those arrested were "working seriously to advance the Middle East peace process."

Reports of the arrests, with many taking place in the West Bank town of Nablus according to Mr. Abu Sherif, coincided with new efforts to reactivate peace efforts.

Israeli Defense Minister Yitzhak Rabin is in Washington to discuss a five-point U.S. framework for Israeli-Palestinian dialogue with U.S. Secretary of State James Baker.

Egyptian Foreign Minister Esmat Abdel Meguid is also in Washington for similar discussions, although no tripartite U.S.-Israeli-Egyptian meeting is planned this week.

#90018d0770 01/18/1990 ~French/German News Agency

BUCHAREST (JAN. 18) - Two daughters of the exiled former Romanian monarch Michael I arrived here from Switzerland Thursday on their first visit to their homeland since their father was deposed more than 40 years ago.

Forty-year-old Margarita, who is first in line to the succession, gave a V-for-Victory sign after addressing well-wishers who gathered at the airport to greet the sisters with bouquets of flowers.

Margarita said they wanted to see the "damage" in the country sustained from the rule of ousted leader Nicolae Ceausescu during their week-long stay here.

Sophie, 33, burst into tears with emotion after stepping from their plane to face the cameras of the world press.

The family of Michael I -- who has five daughters -- has never returned to Romania since the king was overthrown by the communists in 1947. Margarita and Sophie live with their father in Versoix near Geneva.

QUITO (JAN. 18) - Chilean president-elect Patricio Aylwin will tone down relations with South Africa and strengthen them with Eastern European countries, his foreign minister designate Enrique Silva Cimma said here Thursday.

Mr. Silva said in a television interview that Mr. Aylwin plans to resume diplomatic relations with Cuba if that country's communist government promises to stop backing revolutionary movements in Latin America.

On December 14, Mr. Aylwin, 71, a Christian Democrat, won the first free elections held in Chile in 16 years of military dictatorship. He has since designated his cabinet, which will be sworn in March 11.

Mr. Silva said Chile's future government will "tone down" its relations with South Africa, to signal its disagreement over the apartheid system.

He said political changes occurring in Eastern Europe were "fascinating.

Mr. Silva was attending here a meeting of the Socialist International for Latin America and the Caribbean.

#90018d0930 01/18/1990 ~French/German News Agency

SANTIAGO (JAN. 18) - The new Chilean Government of president-elect Patricio Aylwin will be sworn in March 11, not March 14, the Constitutional Tribunal decreed Thursday.

The decision, which is unappealable, backed current President Augusto Pinochet's interpretation of a constitutional provision covering changes of government.

Mr. Aylwin, a 71-year-old Christian Democrat, had interpreted the constitutional provision as saying that three days had to transpire between the resignation of Mr. Pinochet's government and the swearing in of the new administration.

Twenty heads of state and government will attend Mr. Aylwin's swearing in ceremony, which will take place before all members of the new parliament at its new seat in Valparaiso, 110 kilometers (65 miles) northwest of here.

On December 14 last year, Mr. Aylwin won the first general elections held in Chile in 16 years of military dictatorship, with 55 per cent of the vote.

#90018d5720 01/18/1990 ~French/German News Agency

BEIJING (JAN. 18) - China's inflation rate should be slightly higher than 18 percent for 1989, or about the same level as the previous year when inflation hit a record 18.5 percent, New China News Agency (NCNA) reported.

However, Western observers said the official figures are well below the real level. They estimate that inflation was between 30 percent and 4O percent in 1988 and at some 25 percent in 1989.

New price rises contributed seven percentage points to the 1989 inflation rate, the rest resulting from price rises in the previous year, according to Chen Yuan, deputy governor of the People's Bank of China, quoted by NCNA on Wednesday.

Overall, he added, prices were fairly stable in 1989, particularly in the last quarter of the year.

The State Statistical Bureau said at the end of December that the inflation rate in the 11 months to November was 19 percent, compared with the same period in 1988.

To throttle the highest rate of inflation since 1949, the government - which had removed price controls on certain products - was forced to adopt stringent austerity measures in September 1988.

#90018d5910 01/18/1990 ~French/German News Agency

POTOSI, Missouri (JAN. 18) - Convicted killer Gerald Smith died by lethal injection Thursday, the 121st person to be put to death in the United States since capital punishment was restored in 1976.

Mr. Smith, 31, had asked that he be executed, but death penalty opponents filed an appeal seeking a stay Wednesday afternoon with the U.S. Supreme Court.

The high court rejected the appeal, 7-2, and just after midnight authorities administered a lethal injection as the condemned man's wife, an unidentified female, and his lawyer watched.

Mr. Smith was convicted of beating to death Karen Roberts in St. Louis in

1980. In a letter to a newspaper, he said he killed her because she had given him a venereal disease.

"If she were living now, I would do it all over to her," he said.

He also was convicted of the 1985 slaying of a death row inmate.

#90018d5960 01/18/1990 ~French/German News Agency

HONG KONG (JAN. 18) - Improved afternoon buying interest sent the Hang Seng Index 16.83 points higher Thursday to finish at 2,771.67.

Turnover however shrank to 526 million Hong Kong dollars (67.4 million U.S.) against Wednesday's 679 million dollars (87 million U.S.).

Share prices see-sawed in the morning as the trading floor lacked directions, dealers said.

They added that a better showing on the Tokyo bourse boosted sentiment here later during otherwise listless trading.

#90018d5990 01/18/1990 ~French/German News Agency

SINGAPORE (JAN. 18) - More companies are setting up their Operational Headquarters (OHQ) in Singapore, according to the Economic Development Board (EDB).

An EDB statement Wednesday said seven international firms established OHQs in the republic last year, bringing the total number to 30 since an incentive scheme was introduced in 1986.

The OHQ scheme is aimed at attracting large multinational corporations to use Singapore as their regional business centre. Firms moving here under the scheme are entitled to a range of privileges, including a preferential 10 per cent corporate tax rate instead of 32 percent, for at least 10 years.

To qualify for OHQ status, the company needs to have significant operations in its headquarters, including business planning, sourcing, research and development and fund management.

The EDB said more companies, especially Hong Kong companies and those based in the British colony which did not qualify as OHQs were also choosing Singapore as the site for their regional headquarters.

"This trend is likely to continue as the Asia-Pacific region, including

ASEAN, continues to grow," it said.

The Association of South East Asian Nations (ASEAN) groups Brunei, Indonesia, Malaysia, the Philippines, Singapore and Thailand.

Major companies with OHQs here include the Japanese electronics giant Matsushita and Dutch electronics leader Philips.

PARIS (JAN. 18) - France's external trade balance improved sharply in November, showing a deficit of 2.569 billion francs (446 million dollars) compared with a sharply increased deficit in October of 8.769 billion francs (1.52 billion dollars) on a revised basis.

Official, seasonally-adjusted figures published on Thursday showed that in the first 11 months of 1989 the deficit totalled 43.610 billion francs compared with 27.908 billion francs in the same period of 1988.

Imports were slightly down in November at 101.497 billion francs compared with 104.770 billion, while exports grew to 98.928 billion francs from 96.001 billion in October.

Exports covered imports to the extent of 97.47 percent compared with 91.63 percent the previous month.

On an unadjusted basis, the November deficit was 3.886 billion francs after a deficit of 7.310 billion francs in October. The total deficit since January was 44.772 billion francs compared with a deficit of 29.519 billion during the same period of 1988.

Unadjusted imports totalled 108.600 billion francs in November compared with 110.867 billion in October, while exports rose to 104.714 billion francs from 103.557 billion the previous month. The ratio of coverage was 96.42 percent compared with 93.41 percent.

The balance on industrial goods, including military equipment, improved sharply to show a deficit of 1.832 billion francs on an adjusted basis compared with a sudden deficit of 9.442 billion francs in October.

The surplus on military equipment recovered to 3.709 billion francs from 1.36 billion francs in October.

The overall balance was strengthened by the sale of eight Airbus aircraft representing 2.497 billion francs for the French trade figures compared with five aircraft and 1.612 billion francs on October.

France had an adjusted trade deficit with the rest of the European Economic Community (EEC) of 5.368 billion francs in November after a deficit of 6.082 billion francs in October. The deficit with West Germany was 4.464 billion francs after a deficit of 5.053 billion francs.

The deficit with Japan was 2.191 billion francs after a deficit of 2.300 billion. The deficit with the United States was 2.786 billion francs after 3.111 billion francs in October.

TOKYO (JAN. 18) - Japanese oil importers have agreed to pay 18.50 dollars a barrel for Chinese crude in the three months to March, up from 17.40 dollars in the December quarter, a Japanese news agency reported Thursday.

Jiji Press also said that imports of Chinese crude would remain at 66.7 million barrels in 1990 under an agreement reached between China's Chemical and Industry Export Corp. and the Japan-China Oil Importers Council in Beijing.

Chinese oil is estimated to have accounted for 8.1 percent of Japanese imports last year.

KUALA LUMPUR (JAN. 18) - Malaysia Airlines has concluded a one billion dollar (370 million U.S.) financing agreement with Bank Bumiputra Malaysia Berhad for its expansion programme, Bernama news agency said Thursday.

The bank arranged a package with several overseas financial institutions to finance Malaysia Airlines' purchase of two Boeing 747-400 and nine Fokker 50 aircraft, Bernama quoted Bank Bumiputra executive director Mohamed Said Mohamed Ali as saying.

Mr. Said declined to give further details apart from saying that the deal

was concluded several months ago.

Malaysia Airlines said earlier it planned to spend 5.5 billion dollars (2.04 billion U.S.) to modernise its fleet. It has placed orders for four more Boeing 747-400s, 10 Boeing 737-400s, six Boeing 737-500s and eight Airbus Industrie A330-300s.

LONDON (JAN. 18) - The British company Smiths Industries has been chosen to develop the navigation sytems of the planned European fighter plane to be built by West Germany, Britain, Italy and Spain, the company said on Thursday.

The contract could be worth some 450 million pounds (more than 700 million dollars), he said.

The company said that the project was unlikely to be abandoned, despite threats that West Germany might withdraw, because Europe needed the aircraft.

On Wednesday, West German Foreign Minister Hans Dietrich Genscher, in a radio interview broadcast in West Germany, supported a demand by his Liberal Party that the project be abandoned.

He said that one of the arguments against the project was its high cost, and he noted that the West German government had not decided on the project. Another consideration was the reduction of forces, and other barriers separating East and West Europe, he said.

LONDON (JAN. 18) - British-based multinational Lonhro and Impala Platinum of South Africa have agreed in principle to merge their adjoining platinum interests in South Africa's western Transvaal, Lonrho has said here.

The companies hope the merger will create an enlarged mining operation capable of being developed rapidly to produce 1.5 million ounces of platinum group metals per year by 1997, given appropriate market conditions, Lonrho said in a statement.

Last year Lonrho's platinum output was 346,000 ounces, a figure which the group hopes to increase by a factor of four over five years. It also hopes to increase platinum profits five or sixfold in the same period.

Under the terms of the agreement Impala will transfer its new Karee mine,

still in the development stage, and some additional mineral rights, to Lonrho's Western Platinum in exchange for 25 percent of the enlarged Western Platinum's equity and 27 percent of the profits from the expanded mine.

Lonrho's contributions are its existing Western Platinum and Eastern Platinum mines, along with some adjacent mineral rights.

Eastern Platinum, brought into production last year, is in the Bophuthatswana nominally independent tribal homeland and remains legally a separate operation from the merged Western and Karee which are in South Africa,
but the entire operation will be managed as a single entity.

"The news looks highly positive for Lonhro on a five year viewpoint, and should result in the group's minerals extraction and refining division becoming the main engine of profits growth over this period," Nomura Research Institute, the research arm of Japanese-based securities house Nomura, said of the deal.

SOFIA (JAN. 18) - Former Bulgarian leader Todor Zhivkov is under detention pending an investigation into allegations that he caused "national hostility" and "embezzled public funds," the Bulgarian state prosecutor's office said Thursday.

The special inquiry panel named to carry out the investigation is headed by Andrei Lukanov, the right-hand man of the new leader Petar Mladenov, the BTA news agency cited the office as saying.

Mr. Mladenov took over on November 10 when Mr. Zhivkov was ousted after 35 years in power.

The special committee had discovered "information" on "crimes committed by Mr. Zhivkov and his entourage," the statement said.

These involved abuse of authority and mismanaging "particularly large public funds", according to the report, signed by state prosecutor Evtim Stoimenov.

It said the former hardline party chief was suspected of "particularly serious abuses of power", though it did not elaborate.

Several prosecutors would be involved in the investigation, BTA said.

#90018d7550 01/18/1990 ~French/German News Agency
LONDON (JAN. 18) - The level of wage rises in Britain on an annualised basis stood at 9.25 percent in November, the same as in October, according to figures released Thursday by the department of employment.

The increase was in line with market predictions, and suggested a stabilisation in pay rises at the higher level after rising from 8.75 percent in July and August to nine percent in September.

In February to May, when the data were calculated on a different basis, the increase rate also stood at 9.25 percent.

The November pay increase level on an annualised basis stood at 9.25 per cent in the services sector, but was down to 8.75 percent in the manufacturing sector from nine percent in October.

The slowdown in the manufacturing sector was encouraging at a time when fears of inflationary pressures are growing in Britain, but several wage disputes since the end of November, including strikes by ambulance workers and trouble at Ford and British Aerospace suggest that the figures could worsen in the coming months.

A study published Wednesday by the wage research institute Incomes Data Services estimated that pay rises would be between 7.5 and 10 percent in the first half of 1990 despite government appeals to keep wage increases down.

COLOMBO (JAN. 18) - Sri Lanka is to amend a 1988 banking law to allow foreigners and non-residents to open secret foreign currency bank accounts, Foreign Minister Ranjan Wijeratne announced here Thursday.

Mr. Wijeratne told reporters here that strict anonymity would be ensured and severe action would be taken against those who attempted to flout the secrecy laws which will cover the new accounts.

Laws are to be introduced in the Sri Lankan parliament shortly, he said without giving details of the scheme.

Financial sources said the move was aimed at attracting much needed hard currency. The government already allows Sri Lankan expatriates to save their foreign exchange in local accounts without paying taxes.

TOKYO (JAN. 18) - Economic experts and high-ranking government officials from Poland will visit Japan Saturday to research Japanese labor-management relations, the labor ministry said Thursday.

During their 20-day stay in Japan, the group will visit industrial plants, municipal government offices and supermarkets.

The group aims to study labor-management relations in Japan, as Poland plans to modify its government-planned economy to a market-oriented one, the ministry said.

Eight Japanese economists will visit Poland for a month starting February 26 as part of Japan's effort to help Poland vitalize its economy, it said.

The two countries will compile a joint report on the research by March 1991, it added.

THE HAGUE (JAN. 18) - Former Dutch finance minister Onno Ruding has a good chance of being named to head a new special development bank for Eastern Europe, diplomatic sources said here Thursday.

Mr. Ruding, officially put forward by the Dutch government Wednesday, is currently the only known candidate to head the European Bank for the Reconstruction and Development of Eastern Europe, the sources said.

His candidacy had evoked "no negative reactions" and "quite a few positive responses" among the 36 countries and financial institutions who attended a conference in Paris this week on establishing the bank, they added.

The conference gave itself just eight weeks to hammer out a final draft of the new bank's statutes. The participants, who will be involved in the new bank, hope to sign an agreement in March so that the bank can be operational later this year.

Almost all the European participants had offered to host the headquarters of the new bank, diplomatic sources said here. But they stressed that Mr. Ruding's candidacy for the top job was not linked to whether Amsterdam would be chosen for the headquarters.

Mr. Ruding of the Christian Democratic Party was in the governments of Ruud Lubbers in 1982-1986 and 1986-1989, and has also served as president of the International Monetary Fund's interim committee.

PARIS (JAN. 18) - French company Thomson-CSF said Thursday it did not intend to launch a takeover bid for troubled British electronics giant Ferranti, but was discussing other forms of cooperation with the group.

The state-owned defence group said in a statement that it reserved the right to reconsider the possibility of launching a takeover bid if another company did so, or if there were a substantial change in Ferranti's situation.

A Ferranti spokesman said in London that Thomson's stated decision not to launch a takeover "clears the air for our talks to other partners," adding that Ferranti was holding discussions with several other groups.

Ferranti would continue talks with Thomson on other forms of collaboration, he added.

But Thursday's announcement from Thomson sent Ferranti shares plunging in London, where they were down nine pence at 28 in early afternoon trading.

Thomson-CSF had originally expressed interest in Ferranti along with British Aerospace, but the British aeronautics firm later pulled out.

Ferranti, which discovered last year it had lost millions of dollars in an alleged false contracts fraud involving a U.S. subsidiary, had been hoping to find someone willing to buy the group or at least take a stake and inject 150 million pounds (250 million dollars) by February.

It said on Friday that it was "unlikely" that anyone would make such a move before the deadline, and called an extraordinary shareholders' meeting for February 5 to approve a 187.1 million pound new share issue.

The false contracts scandal involving U.S. subsidiary International Signal and Control (ISC) cut 176 millon pounds from the group's capital and reserves, and Ferranti said last week it it had pre-tax losses of 15.4 million pounds (25 million dollars) in the six months to September.

After tax and minority interests, these losses represented a new drain of some 15 million pounds on the group's capital and reserves.

#90018d8610 01/18/1990 ~French/German News Agency
LONDON (JAN. 18) - Britain's International Computers Limited on Thursday unveiled a powerful new minicomputer which it said would boost ICL's plans to become the leading supplier of mid-range systems in Europe.

The company, which is a subsidiary of the STC communications group, also announced that the European Commission had placed an order worth one million European Currency Units (700,000 pounds, or 1.2 million dollars) for the new machine.

ICL chairman Peter Bonfield told reporters here that the new DRS 6000 series of computers meant that the firm had "taken the high ground."

"We are the first in the market," he said.

The DRS 6000, which is based on the simplified chip design known as RISC, for Reduced Instruction Set Computer, is a mid-size machine capable of working at very high speed and of being connected to up to 1,000 terminals at once, ICL said.

The new machine uses the popular UNIX operating system, which aims to allow computers of different types to communicate between themselves easily, and which has been adopted by the European Commission for its own computer systems.

An ICL statement said the company's order book grew by 21 per cent in the first half of last year, while sales rose 19 per cent over the same period in 1988, to 773 million pounds (1.3 billion dollars).

Operating profits were up eight per cent to 58.4 million pounds (96 million pounds).

The company, which has been advertising heavily in European countries, said

that its share of the UNIX system market in Europe had risen to six per cent in 1989, from less than one per cent two years earlier.

#90018d8670 01/18/1990 ~French/German News Agency

MUNICH, West Germany (JAN. 18) - The Sankyo Company, Japan's second largest pharmaceuticals group, has taken a majority stake in Luitpold-Werk of West Germany, the firm which handled the deal said Thursday.

The Goldman Sachs brokerage said that the Karreth family, which had controlled the company since its founding in 1910, would retain a minority stake.

It did not give a price for the deal, and Luitpold-Werk refused to confirm press reports giving a figure of 220 million Deutsche marks (137.45 million dollars).

Luitpold-Werk, which makes anti-inflammatory creams, employs 1,500 people and has annual sales of 200 million Deutsche mark (125 million dollars).

Sankyo has consolidated annual turnover of around 3.6 billion Deutsche marks (2.25 billion dollars), Goldman Sachs said.

#90018d8730 01/18/1990 ~French/German News Agency

JOHANNESBURG (JAN. 18) - Gold mines of Anglo American, South Africa's largest mining corporation, said Thursday its pre-tax profit rose marginally by 0.5 percent to 376.7 million rands (147.2 million dollars) in the last quarter of 1989.

After appropriations, available profit for the quarter was up 4.6 percent at 126.1 million rands (49.3 million dollars). In the third quarter, distributable profit was 120.5 million rands (44.6 million dollars).

In Transvaal Province, gold production dipped to 32,531 kilograms (71,568 pounds), two percent lower than the previous quarter's 33,098 kilograms.

Anglo executives told journalists that a fire at their Western Deep Levels mine west of Johannesburg had affected production for the quarter by as much as 850 kilograms. The fire broke out in late October and is still burning.

They blamed a virtually unchanged gold price for the quarter of 32,492 rands (12,704 dollars) per kilogram (2.2 pounds) and a 0.4 percent increase in unit costs to 20,416 rands (7,982 dollars) per kilogram for what they described only as "satisfactory" results.

At Vaal Reefs, in Transvaal Province, gold production was virtually unchanged at 19,067 kilograms (19,102 in September).

Profit before tax was 25.7 million rands (10.05 million dollars) higher than the previous quarter at 217.3 million rands (84.9 million dollars).

After appropriations, profit available improved by 15.4 percent to 77 million rands (30.1 million dollars).

In Anglo's Freegold mines of Orange Free State Province, available profits declined by 10.8 percent to 82.6 million rands (32.3 million dollars) for the quarter.

The lower profits are attributed to an increase in capital expenditure at 87.9 million rands (34.3 million dollars) and a 3.9 percent rise in unit costs to 27,432 rands (10,726 dollars) per kilogram.

Production in Freedgold mines rose marginally from 27,649 kilograms in the September quarter to 27,710 kilograms in the last quarter.

TOKYO (JAN. 18) - Minolta Camera Co. said Thursday its Austrian subsidiary had set up a joint marketing unit in the Soviet Ukraine.

The joint venture, to be named Minolta-Trading-Ukraine, will be capitalized at 31.5 million rubles or some 500 million yen (3.4 million U.S. dollars) and will be located in Kiev, capital of the Ukraine.

Thirty-three per cent will be owned by Minolta Austria Gesellshaft GmbH and the remainder by Ukrinvaljuttorg, a trading company owned by the Ukraine government, Minolta said.

The joint firm will import consumer products for sale at shops accepting only hard currency and will also import products such as copiers and cameras from the Austrian firm, it added.

#90018d9070 01/18/1990 ~French/German News Agency

TOKYO (JAN. 18) - Mazda Motor Corp. chairman Norimasu Furuta said Thursday that the Japanese carmaker still hoped to produce cars in Europe with Ford Motor Co. but refused to rule out the possibility of another partner.

Mr. Furuta told a news conference that the company was anxious to set up a

joint production facility in Europe ahead of the integration of European Economic Community (EEC) markets in 1992.

"We have already started our discussions with Ford," he said. "We will give our top priority to discussions with Ford. However, we are not eliminating or excluding any possibility in the future." Mazda already has close ties with Ford which owns 23.4 percent of the Japanese carmaker.

Mr. Furuta ruled out the possibility of production in Eastern Europe. "I don't think that Eastern Europe will be the place of our choice," he said.

Major Japanese carmakers have already announced plans to produce cars in Europe, notably in Britain. Suzuki Motor Co. Ltd. announced last week a joint venture to produce cars in Hungary while Daihatsu Motor Co. Ltd. is considering a plan for a production facility in Poland.

ZURICH, Switzerland (JAN. 18) - American Airlines is to restructure its European network, axing some routes in Switzerland, France and West Germany,

and inaugurating others in other countries, the company said here Thursday.

Flights from the United States to Geneva, Lyons, Hamburg and Stuttgart would be stopped from April 1, a company spokesman in Zurich said.

At the same time, the company would start new services between Chicago and Munich, Duesseldorf, London and Glasgow, and from Miami to London.

American Airlines had also decided to postpone for a year new services from the United States to Helsinki, Warsaw and Barcelona, which had been due to begin later this year.

The total number of weekly flights between the United States and Europe would rise from 119 to 145, the spokesman said.

The changes were designed to make the best use of the company's aircraft, he added.

#90018d9390 01/18/1990 ~French/German News Agency
LONDON (JAN. 18) - Pharmaceuticals group SmithKline Beecham said Thursday that it had put its three food labels up for sale.

The Beecham group had bought milk-based dessert maker Ambrosia, yeast-based savoury paste Marmite and the Bovril meat-based drink and flavouring label from Generale Occidentale in April 1980.

The three together had sales totalling 80 million pounds (133 million dollars) in the year ended in March, almost double the previous year's 47 million pounds.

SmithKline Beecham, which was formed last year with the merger of British group Beecham and U.S. concern Smithkline Beckman, is shedding the food labels as part of a strategy of refocussing its activities on pharmaceuticals and beauty products.

PARIS (JAN. 18) - French glassmaking and industrial group Saint-Gobain on Thursday estimated its consolidated net profit for last year at 4.3 billion French francs (743 million dollars), up six per cent from 1988.

Excluding exceptional revenue, mainly from the sale of the Societe Generale d'Entreprise engineering company and the Sofiltra-Poelman company, the group's estimated net profit was 3.6 billion francs (622 million francs), 17 per cent higher than its 1988 result.

Profit per share was 69.3 francs (11.9 dollars) compared to 70.4 francs in 1988.

Consoldiated sales for last year were estimated at 66 billion francs (11.4 billion dollars), a 12 percent increase from 1988.

Sales in France accounted for 30 percent of the total, sales in other European countries 37 percent and sales in the Americas 21 percent.

LAGOS (JAN. 18) XINHUA - THE NIGERIAN GOVERNMENT HAS ANNOUNCED THAT ANY COMPANY WHICH MAKES DONATIONS TO A POLITICAL PARTY FOR POLITICAL PURPOSES WILL BE GUILTY AND LIABLE TO A FINE.

THE NIGERIAN NEWSPAPER "THE GUARDIAN" SAID TODAY THAT ANY COMPANY OR ITS OFFICIAL WHO FLOUTS THE REGULATION CONTAINED IN A NEWLY LAUNCHED COMPANIES DECREE WILL BE GUILTY OF AN OFFENCE AND BE FINED AN AMOUNT EQUAL TO THE DONATION OR GIFT.

THE PAPER EXPLAINED THAT THE AIM OF THE NEW REGULATION IS TO PREVENT THE CORRUPTIVE INFLUENCE BY SO-CALLED "MONEY BAGS" FROM GETTING INTO NIGERIAN POLITICS.

THERE ARE TWO GOVERNMENT-SPONSORED POLITICAL PARTIES IN THE NIGERIAN SOCIETY. ONE IS THE NATIONAL REPUBLICAN CON- VENTION (NRC), THE OTHER IS THE SOCIAL DEMOCRATIC PARTY.

THE NIGERIAN GOVERNMENT ANNOUNCED THE CREATION OF THE TWO GRASS-ROOTS POLITICAL PARTIES ON OCTOBER 7, LAST YEAR AND PROMISED TO HAND OVER POWER TO ONE OF THEM BY 1992 THROUGH THE ON-GOING POLITICAL TRANSITION PROGRAMME.

POLITICIANS WHO SERVED IN THE FORMER AND THE CURRENT ADMINISTRATIONS ARE NOT ALLOWED TO JOIN EITHER OF THE TWO PARTIES SO THAT THE FUTURE THIRD REPUBLIC OF NIGERIA COULD HAVE A CLEAR CUT WITH THE NATION'S PAST.

LONDON (JAN. 18) XINHUA - ONE OF NORTHERN IRELAND'S LEADING ROMAN CATHOLIC BISHOPS TODAY CONDEMNED THE IRISH REPUBLICAN ARMY (IRA) AND ITS POLITICAL WING, SINN FEIN, AS EVIL AND SINISTER.

BISHOP EDWARD DALY OF LONDONDERRY SAID THE IRA, UNEQUIVOCALLY SUPPORTED BY SINN FEIN, HAD CARRIED OUT "MURDERS OF HUNDREDS OF INNOCENT PEOPLE.

"THEY HAVE WRECKED PEOPLE'S LIVES, HOMES AND HAPPINESS ... THEY HAVE BROUGHT HEARTBREAK TO FAMILY AFTER FAMILY," DALY SAID IN ONE OF THE CHURCH'S SHARPEST ATTACKS ON THE IRA, WHICH IS FIGHTING TO END BRITISH RULE IN NORTHERN IRELAND.

"THE IRA HAS BEEN RESPONSIBLE FOR FAR MORE BLOODY DAYS AND FAR MORE MURDERS THAN ANY OTHER ORGANIZATION OR ARMY IN THIS COUNTRY IN THE LAST 20 YEARS," HE SAID.

DALY SAID THE IRA WAS RUTHLESS AND THAT NOTHING COULD LEGITIMISE OR OFFER JUSTIFICATION FOR ITS DEEDS.

HE MADE HIS STINGING CRITICISM AS GERRY ADAMS, SINN FEIN'S PRESIDENT, SUGGESTED THAT A CATHOLIC BISHOP SHOULD HEAD AN INQUIRY INTO THE KILLING OF THREE ROBBERS IN A BRITISH ARMY AMBUSH IN BELFAST.

DR CAHAL DALY, THE BISHOP OF DOWN AND CONNOR, HAS HIMSELF CALLED FOR AN INDEPENDENT INQUIRY.

LONDON (JAN. 18) XINHUA - A BRITISH SHIP PLANNING TO DUMP POWER STATION ASH IN THE NORTH SEA RETURNED TO HARBOR TODAY AFTER ENVIRONMENTALISTS THREANTED TO LAY A BOOM ON ITS PATH.

THE RETURN OF THE NATIONAL POWER VESSEL MVA TO BLYTH HABOR, ON THE NORTHEAST ENGLISH COAST, PROMPTED THE ENVIRONMENTAL GROUP GREENPEACE TO CLAIM VICTORY IN ITS BATTLE TO STOP THE DUMPING.

A GREENPEACE SPOKESMAN SAID THEY HAD SAILED INFLATABLE VESSELS TO FOLLOW THE SHIP OUT TO SEA AND TOLD THE CAPTAIN THEY INTENDED TO PLACE A PLASTIC BOOM IN FRONT OF THE SHIP.

THE CAPTAIN THEN TOLD GREENPEACE HE WOULD RETURN THE SHIP TO THE HABOR WITHOUT DUMPING THE CARGO.

GREENPEACE HAS BEEN ASKING THE BRITISH GOVERNMENT TO PROVIDE PROOF THAT FLY-ASH DOES NOT HARM THE ENVIRONMENT.

CAMPAIGNER PAUL HORSMAN SAID: "WE KNOW THAT HARM IS BEING CAUSED BY THE ASH DUMPING BECAUSE IT HAS CREATED A CONCRETE-LIKE DESERT ON THE SEA BED."

OTTAWA (JAN. 18) XINHUA - THE CANADIAN GOVERNMENT HAS BEEN BLAMED BY CRITICS FOR ALLOWING SOVIET FISHERMEN TO OPERATE OFF CANADA'S ATLANTIC COAST.

TWO HUGE SOVIET TRAWLERS HAVE BEEN ALLOWED TO CATCH TURBOT OFF THE COAST OF CANADA'S ATLANTIC PROVINCE OF NEWFOUNDLAND BECAUSE THE CANADIAN GOVERNMENT SAYS CANADIAN FISHERMEN CAN'T DO IT.

"THIS PARTICULAR SPECIES SWIMS MORE DEEPLY AND CANADIANS DON'T KNOW HOW TO CATCH IT," AN AIDE TO CANADIAN FISHERIES MINISTER TOM SIDDON SAID TUESDAY.

THIS CONTENTION HAS OUTRAGED NEWFOUNDLAND LIBERAL PARTY MEMBER OF PARLIAMENT GEORGE BAKER AND OTHER CRITICS, ACCORDING TO LOCAL PRESS REPORTS TODAY.

"THAT'S A STUPID ARGUMENT, CANADIANS HAVE BEEN CATCHING THESE FISH FOR HUNDREDS OF YEARS," BAKER SAID.

CABOT MARTIN, HEAD OF THE NEWFOUNDLAND INSHORE FISHERIES ASSOCIATION, SAID THAT SOVIETS SHOULD NOT HAVE BEEN UP THERE FISHING AT ALL. "THEY ARE CARRYING ON THE GREAT TRADITION THAT THE SEA IS THERE TO BE PLUNDERED," HE SAID.

AN OFFICIAL WITH THE FEDERAL FISHERIES DEPARTMENT TUESDAY CONFIRMED THE TWO SOVIET FACTORY-FREEZER TRAWLERS HAVE BEEN ALLOWED TO CATCH AND SELL THE FISH TO A CONSORTIUM OF ABOUT 30 CANADIAN FISH-PROCESSING COMPANIES.

SINCE DECEMBER WHEN THE OPERATION BEGAN, THE SOVIETS HAVE CAUGHT ABOUT 400 TONNES. THEY WILL BE ALLOWED TO 2,000 TONNES BY THE END OF JANUARY.

HAYWARD, CA (JAN. 18) PR NEWSWIRE - Nellcor Inc. (NASDAQ: NELL) announced today that it has signed an agreement to provide its OEM pulse oximetry module to Mennen Medical Inc., a patient monitoring and diagnostic systems company based in Clarence, N.Y. Nellcor's OEM module will be offered as a configured option for Mennen's Horizon 1100 adult and neonatal patient monitors and as a configured or modular option for their Horizon 2000 adult and Horizon 2110 neonatal patient monitors. The addition of the OEM module to the product line will enable Mennen Medical to offer Nellcor's advanced pulse oximetry technology, including C-LOCK(TM) ECG synchronization, and to utilize the complete line of Nellcor proprietary adhesive sensors.

Mennen's Horizon 1100 and 2000 series of bedside monitors currently measure a wide range of physiologic parameters including ECG, respiration/apnea, temperature, heart rate and invasive and/or non-invasive blood pressures. By incorporating Nellcor's high-performance, motion-resistant pulse oximetry modules into the Horizon 1100 and 2000 series, Mennen will be able to expand the capabilities of these multiparameter monitoring instruments to include measurement of oxygen saturation for patients in the neonatal environment as well as a wide range of other critical care settings.

Mennen Medical Inc. designs, manufactures, installs and services hospital monitoring and diagnostic systems for critically ill patients throughout the world. Mennen's software-based monitoring and data management systems are custom-configured for intensive care and cardiac care units, cardiac catheterization labs, shock trauma units and other critical care hospital settings.

Nellcor Inc. designs, manufactures and markets high-performance electronic monitoring instruments for patient safety and management in operating rooms, recovery rooms, intensive care units and other areas of the hospital. Nellcor is the leading producer of pulse oximeters used in hospitals for the continuous measurement of patient oxygen status.

SANTA BARBARA, CA (JAN. 18) PR NEWSWIRE - Mentor Corporation (NASDAQ: MNTR) today reported record third quarter sales and sharply increased earnings for the period ended Dec. 31, 1989.

Net income for the quarter was $1,980,000 compared to $1,402,000, an increase of 41 percent. Earnings per share were 18 cents for the quarter, a 38 percent increase over the 13 cents per share last year.

Revenues for the quarter were $12,206,000, compared to $10,186,000 last year, an increase of 20 percent.

Net income for the year was a record $6,059,000, equal to 56 cents per share, compared to $4,541,000, or 42 cents per share last year, an increase of 33 percent.

Revenues for the year were also a record, reaching $36,601,000, compared to $31,468,000 last year, an increase of 16 percent.

Mentor Chairman Christopher J. Conway said, "Sales growth was especially strong in surgical products. Urology implants increased more than 30

percent, while cosmetic and reconstructive surgical implants were up 25 percent. Earnings growth continues to be stronger than sales growth due to improvements in both gross margins and operating income."

Conway noted that this has been an excellent year for Mentor. "We have had record or near record earnings in each of the three quarters reported this year. We expect equally impressive results in the fourth quarter."

Mentor Corporation produces surgically implantable medical devices and disposable medical products for hospital and home healthcare.

PASADENA, CA (JAN. 18) PR NEWSWIRE - Countrywide Mortgage Investments Inc. (NYSE: CWM) today announced unaudited earnings of $2,176,000, or $.16 per share, based on 13,645,000 weighted average shares outstanding, for the fourth quarter ended Dec. 31, 1989.

In addition, the company's board of directors declared a cash dividend of $.16 per share for the quarter. The quarterly dividend is payable March 1 1990 to shareholders of record on Jan. 31, 1990.

The comparable year-ago quarter produced net earnings of $3,303,000, or $.24 per share, based on 13,645,000 weighted average shares outstanding.

Unaudited net earnings for the year ended Dec. 31, 1989, were $8,645,000, or $.63 per share based on 13,645,000 weighted average shares outstanding. Prior-year net earnings were $9,322,000, or $.94 per share based on 9,959,521 weighted average shares outstanding.

The company finances a $116 million portfolio of adjustable-rate mortgage-backed securities and $228 million portfolio of fixed-rate mortgage-backed securities with short-term borrowings.

Countrywide Mortgage Investments Inc., a real estate investment trust, invests in fixed- and adjustable-rate, single-family, first-lien residential mortgages, mortgage securities and other related investments. Countrywide Mortgage was sponsored by Countrywide Credit Industries Inc. (NYSE: CCR), which, through its subsidiaries, Countrywide Asset Management and Countrywide Funding Corp., provides management services and a source of mortgage investments.

PITTSFORD, NY (JAN. 18) PR NEWSWIRE - SelecTronics, Inc. (NASDAQ: SELE), a leading developer and manufacturer of handheld electronic reference products, today announced the appointment of Anthony Blazina as vice president of manufacturing.

Blazina heads the manufacturing, warehousing and distribution networks for SelecTronics' wide range of handheld electronic reference products for the business, consumer and education markets. He oversees purchasing and procurement, as well as design and development specifications.

Between 1976 and 1984, Blazina rose from product development manager for the Marantz Company Pianocorder division to vice president and a director of the company. Marantz is a well-known distributor of consumer electronic products including stereos, tape decks, video tape recorders, televisions and speakers. Blazina was directly responsible for new product development, Far East manufacturing, marketing, strategic planning and general management.

"Anthony Blazina was hired based on his successful past achievements, as well as his 18 years of experience in the consumer electronics market," said Mike Weiner, president and CEO of SelecTronics. "Our growing manufacturing and distribution networks, based throughout the world, require highly skilled and knowledgeable individuals to ensure smooth and productive operations. Blazina's leadership abilities will help SelecTronics manufacture, warehouse and distribute products in an efficient and cost-effective manner."

Most recently, Blazina was president of Zena, Inc., a North Carolina-based management consultant firm. His responsibilities included marketing and sales, as well as support services that included product design and development, production engineering and computer programming.

Previous to his tenure at Zena, Blazina held the position of president of Anevka, Inc., a manufacturer of digital electronics and loudspeakers. Blazina took the company from $0 to $5 million in sales within two years. Prior to Marantz, Blazina worked at Superscope Tape Products, Inc., in the capacity of general manager and chief engineer.

SelecTronics, Inc., manufactures and markets handheld electronic publishing devices including the WordFinder(R) series of pocket-size dictionaries, thesauruses and spell checkers; the handheld Electronic Bible; the Datastor(TM) 8000 series of databanks; several foreign language translators; and the recently announced Random House Electronic

Encyclopedia, the world's first pocket-sized electronic encyclopedia.

In October 1989, SelecTronics announced an agreement in principle to merge with Microlytics, a Pittsford, N.Y., based software company. The merger is expected to close by the first quarter of 1990. The combined companies will become one of the largest suppliers of products in the handheld reference category of electronic publishing and the largest supplier of linguistic software technology to the OEM market.

CONTACT: Anthony Blazina, VP-manufacturing, 716-248-3875, or Mike Weiner, president and CEO, 716-248-3875, both of SelecTronics; or Connie Connors of Connors Communications, 212-431-9300, for SelecTronics

JACKSON, MI (JAN. 18) PR NEWSWIRE - Consumers Power Company, Michigan's largest utility and the state's largest private landowner, invested $14.3 million in 1989 on new and existing efforts to enhance and protect the environment. In the past 25 years, Consumers Power has invested approximately $1.5 billion on projects which benefit the environment.

Environmental investments for new projects in 1990 are estimated to more than double the 1989 expenditures, due primarily to the planned replacement of coal burners at Unit 3 of the company's James H. Campbell generating plant near Port Sheldon.

A breakdown of Consumers Power's 1989 environmental expenses includes: - $10 million during the year for ongoing environmental protection activities. Projects include sulfur dioxide emission control at the utility's 17 coal- or oil-fired electric generating units, air and water quality activities and monitoring tests which verify purity, measures for minimizing and storing fly ash, and sound abatement.

- $4.2 million in 1989 investments for new protection measures including erosion restoration and control efforts, land beautification, air pollution prevention devices, wildlife protection and habitat enhancement, and groundwater contamination prevention activities.

- In addition to the above expenditures, Consumers Power now burns low-sulfur coal at all of its coal plants. Utilizing the cleaner fuel cost customers an extra $41 million in 1989 compared with buying the same amount of high-sulfur coal.

"Consumers Power employees are working diligently every day to have a positive impact on the environment, by leaving the water as clean as we found it and minimizing our emissions into the atmosphere," said Gordon L. Heins, the utility's senior vice president of energy supply.

"We are a company conscious of our environmental responsibilities and dedicated to enhancing the state we live and work in," Heins said.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

PALO ALTO, CA (JAN. 18) PR NEWSWIRE - Southwall Technologies Inc. (NASDAQ: SWTX) today announced it has signed an agreement to supply its proprietary Heat Mirror(TM) films to Hankuk Glass Inc., the largest glass manufacturer in South Korea.

"This agreement gives Southwall immediate, excellent access to a large and growing market for insulating windows," said Bruce J. Alexander, Southwall president and chief executive officer. "Approximately 40 million square feet of insulating glass was sold in South Korea last year. Hankuk believes our Heat Mirror products will further strengthen and expand their leadership in this market."

Heat Mirror thin films selectively block portions of the electromagnetic spectrum, allowing visible light to pass through while reflecting heat back to its source. Windows incorporating Heat Mirror films provide both insulation and clear solar shading as well as blocking more than 99.5 percent of the ultraviolet solar radiation that causes fading damage to furnishings. Southwall manufactures six varieties of Heat Mirror films for different climates and/or building designs.

Southwall Technologies Inc. designs and produces thin film coatings that selectively absorb, reflect or conduct certain types of electromagnetic radiation. Southwall products are sold into the architectural, automotive electronics and aerospace markets.

BALTIMORE (JAN. 18) PR NEWSWIRE - MNC Financial (NYSE: MNC) today completed its merger with Equitable Bancorporation, of Baltimore, creating a $25 billion-asset institution headquartered and managed in Baltimore,

which will rank among the nation's top 25 bank holding companies.

"The new merged organization combines two highly successful and compatible companies," said Alan P. Hoblitzell Jr., MNC chairman and chief executive officer. "We firmly believe this merger will increase our ability to effectively serve our customers and at the same time increase shareholder values."

"Our principal focus moving forward as the leading banking organization in the mid-Atlantic marketplace will be directed towards achieving high levels of customer satisfaction. Today marks the beginning of an intensive customer communications effort which will continue through mid-year, when we expect to have fully integrated all of the two banks' branch facilities, accounts and support systems," Hoblitzell said. By the end of June, Equitable Bank's operations will be fully merged into Maryland National Bank, he said.

"This combination insures that a locally-managed financial institution sensitive to local needs and services will be able to provide for those needs and services over the long term in a cost- effective manner," according to Hoblitzell.

Effective today five former directors of Equitable Bancorporation will join the MNC Financial board of directors. They are: H. Grant Hathaway, former president and chief executive officer of Equitable, who will become a vice chairman of MNC and chairman of Maryland National Bank; Alfred Lerner, former chairman of Equitable; Earl L. Linehan, president of Woodbrook Capital, Inc.; George V. McGowan, chairman and chief executive officer of the Baltimore Gas and Electric Company; and the Rev. Joseph A. Sellinger, S.J., president of Loyola College.

The merger was announced on July 12, 1989, and received regulatory approval from the Federal Reserve Board Dec. 19, 1989.

PITTSBURGH (JAN. 18) PR NEWSWIRE - Chambers Development Co. Inc. (AMEX: CDVB) today announced contracts and awards totaling more than $1.7 million in revenues over the next one to three years.

Chambers was awarded contracts for waste disposal and hauling from Allegheny Ludlum Corp. (NYSE: ALS), and for five plants at Mine Safety Appliances (NASDAQ: MNES) in Pittsburgh.

John G. Rangos Sr., president and CEO, said the new commercial contracts continue to position Chambers as a leader in the environmental services industry.

"These are important contracts because they represent recognition of Chambers by major industries that using Chambers as a disposal and hauling contractor gives companies a competitive advantage. These companies also realize that long-term disposal can only be guaranteed by large well-run companies," he said.

Chambers Development Co., headquartered in Pittsburgh with regional offices in Harrisburg, Pa., is a leading environmental firm offering services in collection, hauling, recycling and landfill development. The company also provides security services through its wholly owned subsidiary, Security Bureau Inc.

CINCINNATI (JAN. 8) PR NEWSWIRE - In an innovative example of corporate and community cooperation, Ford Motor Company, together with General Electric, today contributed $50,000 to hire an economic development coordinator for the City of Lincoln Heights, Ohio.

Ronald L. Peaker, chairman of Ford's Community Relations Committee in Cincinnati, presented the check to local community leaders at the Hamilton County Development Company's annual meeting. The City of Lincoln Heights is located nearby Ford's Sharonville Transmission Plant which employs 2,300 people.

The money will be used to hire an economic development coordinator whose primary role will be to work with city officials to seek out ways to stabilize and improve the city's economic position. Ford and GE will share the estimated $50,000 cost of an "Enterprise Zone Coordinator. The initial commitment is for one year.

"We believe this is a unique partnership between the public and private sector," said Peaker. "Ford is excited about the long term benefits because it will allow Lincoln Heights to chart its own future."

He pointed out that Ford has been part of the Cincinnati community for close to 40 years -- 32 of the years through the Sharonville Transmission Plant. The Sharonville Plant, along with the Batavia Transmission Plant and the Ford district sales offices, employ nearly 5,000 people in the surrounding communities.

"As one of the top private-sector corporations in Cincinnati in terms of employment, Ford is proud to be involved in programs like this that benefit the community," Peaker said.

Last year, Ford commissioned and underwrote a $30,000 study by the National Council for Urban Economic Development to look for ways to help Lincoln Heights. As a result of that study, Ford Motor Company, General Electric, the City of Lincoln Heights, the City of Sharonville, and the Hamilton County Development Company (HCDC) decided to enter this partnership.

ROCHELLE PARK, NJ (JAN. 18) PR NEWSWIRE - Cellular phones are an important telecommunications tool that benefit not only business people, but those in all walks of life. Today, the use of mobile communications is being enlisted to help provide care for the homeless.

Metro One is providing cellular mobile phone service to New York City Relief (NYCR), an organization of businesspeople established to feed, clothe and shelter New York City's homeless.

"We are supplying cellular service to this organization to help care for the needy and possibly even help them get back on their feet," said Metro One President and General Manager E. Lee Kaywork. "Through the use of cellular, NYCR will be able to help bring immediate aid to the homeless wherever in the city they are located."

Operating from its base in Stony Brook, N.Y., NYCR's buses will be stocked and equipped with food, clothing and medical supplies and dispatched in each weekday morning to assigned locations in the city where the buses

will dispense needed services.

The rear compartments of the buses will house a mobile medical clinic. Fully-trained doctors and nurses will provide first aid, physical examinations and testing. Referrals will be made to the appropriate New York City medical facilities on the basis of the physical exams. The medical term will also provide materials and substance abuse and AIDS counseling. Each bus will be staffed with one driver and six helpers to distribute food and clothing.

According to Kaywork, besides meeting basic telecommunications needs for the vehicle, the cellular phones will enable NYCR staffers to contact organizations right from the buses to help the homeless on the streets.

"Cellular is again proving its worth, not only as a business tool but as a technology that can provide emergency services and help for everyone, anywhere," said Kaywork. "Anything we can do to assist the homeless not only helps them, but makes for a better society for everyone."

As operator of the largest cellular sales and service distribution network in the New York/New Jersey area, Metro One, established in 1984, provides cellular telephone service across the metropolitan region covering New York City, reaching north to Westchester, Rockland and Putnam counties, and extending east to the tip of Long Island.

#90018p0052 01/18/1990 ~PR Newswire

MENLO PARK, CA (JAN. 18) PR NEWSWIRE - Activision, a leading publisher of entertainment software and video games, today announced its first two titles for the 16-bit Sega Genesis(R) video game system. These titles, "Hard Yardage" and "Tongue of the Fatman" were premiered in the Sega booth at the Consumer Electronics Show earlier this month and are scheduled to release in September.

"Tongue of the Fatman" is an outrageous title that comes to the Genesis after enjoying a following since its release on IBM/compatible personal computers last fall. The colorful, animated action takes place in the year 2550 as Mondu-the-Fat, undefeated champion and host of the Fight Palace, invites players to experience unusual hand-to-hand combat. Players choose from several of the most ruthless lifeforms to master -- each with their own individual skills and tortuous weapons -- and go at it one-on-one for huge sums of money.

"Hard Yardage" brings realistic, blood-and-guts football to the Genesis machine with three-dimensional, detailed animation of plays. Presented through two different on-the-field angles, the game simulates exhibition or regular season play and lets players choose from one of 16 teams -- each team with its own strengths, unique playbooks and superstars. With features such as the "Slo-Mo Instant Replay," players can relive their best (or worst) moments on the field.

"We've had an excellent relationship with Sega of America for many years and we're pleased to be one of the first third-party publishers to introduce titles for the Genesis machine," said Bruce Davis, chairman and CEO of MEDIAGENIC (NASDAQ: MGNC). According to Davis, Sega is clearly excited by the early success of the Genesis and suggest that they have surpassed original first year projections in just the first six months since its introduction.

Activision's parent company is MEDIAGENIC, an international publisher of floppy-disk, cartridge and CD-based entertainment software headquartered in Menlo Park. MEDIAGENIC publishers include Activision, Infocom, Gamestar, Electric Dreams and ZSoft. The company also serves as an exclusive distributor for Absolute Entertainment, Interplay Productions, Dynamix Inc., Sierra On-Line, System 3, Vivid Images Ltd. and Motion

Picture House.

#90018p0053 01/18/1990 ~PR Newswire

SAN DIEGO (JAN. 18) PR NEWSWIRE - Wavetek Corp. (NASDAQ: WVTK) reported sales of $22,427,000 and net income of $827,000 or 9 cents per share for the first quarter ended Dec. 30, 1989. This compares to $21,356,000 and net income of $165,000 or 2 cents per share for the first quarter of the prior year.

Commenting on the first quarter results, Fred Sehnert, president and chief executive officer said, "We are encouraged by the progress made as a result of the Company's focused redirection. Signs of this progress are evident in three major areas: Overall business results, continued balance sheet improvement, and strategically directed growth through acquisitions."

New orders for the company totalled $26 million. CT Systems Inc. which was acquired effective Oct. 1, 1989, contributed $1,700,000 of that amount. This compares with $20,200,000 for the same period in the prior year. The majority of this increase was due to the receipt of large distributor stocking orders associated with our CATV business. Backlog at the end of the quarter totalled $29,200,000. The profit improvement resulted from increased gross margins, overall expense control, and the contribution from CT Systems Inc.

The balance sheet continues to strengthen. Inventories, before the inclusion of CT Systems' products totalling $2,600,000, decreased approximately $1,500,000. In addition, the company is funding the acquisition of CT Systems Inc., with cash generated from operations.

Wavetek Corp., headquartered in San Diego with facilities and offices in California, Florida, Indiana, New York, West Germany, Hong Kong and the United Kingdom, produces a broad line of electronic test and measurement equipment and related products.

#90018p0054 01/18/1990 ~PR Newswire

LIVERMORE, CA (JAN. 18) PR NEWSWIRE - Triad Systems Corp. (NASDAQ: TRSC) today reported revenues of $33.1 million for the first fiscal quarter ended Dec. 31, 1989, up from $32.1 million in the like period of the prior

year.

Operating profit for the quarter improved significantly to $4.1 million, a 153 percent increase over the $1.6 million of fiscal 1989's first quarter. Net income of $0.3 million was down from $3.2 million in the comparable period of 1989, reflecting an increase of $3.2 million in interest costs primarily associated with Triad's $80 million of senior extendible reset notes issued in connection with Triad's August 1989 recapitalization. Earnings per fully diluted share in the first quarter of fiscal 1990 were 2 cents, compared to 36 cents in the same pre- recapitalization period of 1989, when the sale of a 178-acre parcel near the company's Triad Park business and commercial development generated approximately 25 cents per fully diluted share.

"Our operating results exceeded expectations for the quarter," said Triad President and Chief Executive Officer James R. Porter. "Service revenues increased 9 percent to $17.5 million from $16.1 million last year, more than offsetting a slight decrease in system sales revenues. Our Information Services operations continued to expand, with more than 13,000 automotive counter positions now utilizing our Electronic Catalog."

Porter added that healthy increases in Triad's Warehouse and Retail Automotive operations nearly offset a decline in its Retail Hardgoods revenues, attributable to a decrease in system sales. Automotive Division system sales, meanwhile, were similar to those of the first quarter of last year.

"Cash flow from operations is better than projected," he added, "and we did an excellent job of increasing the lease portfolio of our TSC Leasing subsidiary, adding to an already substantial source of liquidity."

Triad designs, develops, manufactures and supports computer systems which service the automotive parts aftermarket, retail hardgoods dealers and dental practices. It also provides lease financing to a substantial portion of its customers through its TSC Leasing subsidiary.

ATLANTA (JAN. 18) PR NEWSWIRE - The Dornbush Group, one of the South's largest providers of public distribution, contract warehousing, freight transportation, international trade services, transportation brokering, and foreign trade zone operations has entered into an acquisition agreement with Itel Distribution System, a subsidiary of Itel Corp. effective Feb. 1.

Itel Corp., a $1.7 billion Chicago-based company, is the world's largest intermodal container leasing company and the largest independent lessor of rail cars in the United States. Itel Distribution operates 22 distribution centers with over 5.5 million square feet throughout the U.S. providing third-party logistics and distribution services. Itel Corp. also holds significant minority equity ownership of Southern Pacific Corp. and American President Companies, Ltd.

The Dornbush Group is best known for its core organization, Southeastern Bonded Warehouse which is the oldest and largest warehousing service in the region. In the past 11 years, Robert Dornbush expanded SEBW from 400,000 square feet to over 2 million square feet and enlarged The Dornbush Group to include contract warehousing; a trucking and brokerage firm; international distribution services; and management of trade zone operations at Atlanta Tradeport.

Though joining the Itel Company, The Dornbush Group will continue to operate under its own name and be known as a division of Itel Distribution Systems. Robert Dornbush will remain president.

With the addition of The Dornbush Group and its 15 Atlanta distribution centers and Memphis facility, Itel Distribution Services will now serve its customers from 38 distribution centers with over 7.5 million square feet located strategically throughout the nation.

NEW YORK (JAN. 18) PR NEWSWIRE - The Bear Stearns Companies Inc. (NYSE: BSC) today announced the declaration of a 5 percent common stock dividend and a 14 cent quarterly cash dividend, and also announced earnings for the company's second fiscal quarter ended Dec. 31, 1989.

The 5 percent stock dividend represents the fourth time the company has increased the dividend on the common stock in the past 18 months through either cash dividends or stock dividends. Alan C. Greenberg, chairman and chief executive officer, stated, "The board's action today reflects our confidence in where the company is going and our satisfaction with the results of the first six months of fiscal 1990."

The board of directors declared a cash dividend of 14 cents per share on the common stock outstanding, payable Feb. 28, 1990 to shareholders of record Feb. 15, 1990. The board also declared an 81-7/8 cents cash dividend payable April 15, 1990 to shareholders of record on April 2, 1990 on the outstanding shares of adjustable rate cumulative preferred stock.

The 5 percent common stock dividend declared today by the board of directors is to be distributed Feb. 28, 1990 to shareholders of record

Feb. 15, 1990. The cash dividend declared today will be paid in respect of common stock issued and outstanding on Feb. 15, 1990 and consequently will not be paid on the newly issued shares to be distributed as a stock dividend.

DETROIT (JAN. 18) PR NEWSWIRE - Comerica Inc. (NASDAQ: CMCA), an $11.5 billion Detroit-based bank holding company, will be the first bank in the Detroit area to acquire Unisys (NYSE: UIS) newly announced high- speed digital electronic imaging system to process checks and other payment instruments.

Comerica is the fourth major bank in the country to announce the selection of Unisys as its principal image processing vendor in the high-speed payment systems area. Others are Chase Manhattan, Huntington Bancshares, Columbus, Ohio; and The Northern Trust Co., Chicago. The Unisys IIPS system will be added to Comerica's current item processing system, which processes more than 1 million prime pass items daily during peak volume periods.

The IIPS system consists of Unisys V Series mainframe computers, which capture the magnetic-ink character recognition (MICR) data from the bottom line of checks; the DP1800 high-speed reader/sorter, which can process 1,800 checks per minute; the IC1800 image camera, a module that integrates with the DP1800 to capture electronic images of both sides of checks at

the same 1,800 item per minute rate; a storage and retrieval module (SRM), which stores the check images; and high- resolution graphical display workstations, where operators encode dollar amounts and handle other data correction and balancing tasks. The ICPS software is tailored to bank check processing applications. Future software will be tailored to such applications as credit card remittance processing and bank lockbox operations. By eliminating the repetitive manual handling of paper checks, which is currently a normal feature of bank check processing operations, the Unisys system can dramatically increase the volume of checks banks can accommodate, while offering other benefits, such as reduced errors, improved customer services, and greater control over cash management.

Comerica provides banking and trust services to corporate customers and individuals through twelve affiliate banks with more than 200 offices in Michigan, Ohio and Texas and through facilities in major cities elsewhere in the United States.

Unisys Corp. is a $10 billion manufacturer of commercial information systems, defense systems and related services. It has more than 80,000 employees and 60,000 customers in more than 100 countries.

KALAMAZOO, MI (JAN. 18) PR NEWSWIRE - Stryker Corporation (NASADAQ-NMS: STRY) reported today that net sales for the year ended Dec. 31, 1989 were $225,860,000, representing a 26 percent increase over sales of $178,636,000 in 1988. Net earnings for the year increased 21 percent to $19,230,000 from $15,860,000 in 1988 and net earnings per share increased 21 percent to $.82 from $.68 in 1988.

During the fourth quarter of 1989, net sales increased 27 percent to $60,488,000 from $47,688,000 in the fourth quarter of 1988. Net earnings were $4,870,000, equal to $.21 per share, compared to $3,900,000, or $.17 per share, in 1988, representing a 25 percent increase in net earnings and a 24 percent increase in net earnings per share for the quarter.

Sales of surgical products increased 34 percent in the year and 30 percent in the fourth quarter of 1989 compared to 1988. The leading surgical sales gains came from Osteonics orthopaedic implants, arthroscopy products and powered surgical instruments.

Sales of medical products increased 4 percent in the year and 16 percent in the fourth quarter of 1989 compared to 1988. The company said it is very pleased with the fourth quarter sales performance of its medical division and is optimistic about the future prospects for its medical

products.

International sales increased 28 percent in the year led by Osteonics orthopaedic implant and powered instrument sales by the company's Pacific and European divisions. International sales were 27 percent of total sales in both 1989 and 1988.

Stryker Corporation develops, manufactures and markets specialty surgical and medical products including orthopaedic implants, powered surgical instruments, arthroscopy systems and patient handling equipment for the world market.

PITTSBURGH (JAN. 18) PR NEWSWIRE - Equimark Corp. (NYSE: EQK) today announced consolidated net income, before a special one-time bank shares tax charge, of $24,738,000, or $2.03 per common share, for the year ended Dec. 31, 1989.

This represents an increase of $4,486,000, or $0.32 per share, over comparable recurring earnings for 1988 of $20,252,000, or $1.71 per share, exclusive of a special net gain from certain significant transactions that occurred in the fourth quarter of 1988. Year-to-year, earnings exclusive of special items increased 22.2 percent and related earnings per share increased 18.7 percent. Consolidated net income, including the effect of the special tax charge of $2,342,000, was $22,396,000, or $1.81 per share in 1989. For comparison, consolidated net income for the year ended Dec. 31, 1988 was $25,280,000, or $2.21 per share, which is inclusive of a special net gain of $5,028,000, or $0.50 per common share, from the

significant fourth quarter 1988 transactions.

Equimark's consolidated net income, before the special tax charge, was $7,260,000, or $0.54 per common share, for the fourth quarter of 1989. This represents an increase of $619,000, or 9.3 percent, over net income of $6,641,000, or $0.58 per share, for the fourth quarter of 1988, which is exclusive of the special net gain. Inclusive of all special gains and expenses, consolidated net income was $6,646,000, or $0.49 per share, in the fourth quarter of 1989, as compared to $11,669,000, or $1.08 per share in the fourth quarter of 1988.

Equimark Corp. is a diversified financial services institution with $3.8 billion in assets.

BETHLEHEM, PA (JAN. 18) PR NEWSWIRE - Union Pacific Corp. (NYSE: UNP) announced today that earnings from continuing operations reached a record $595 million, a gain of 6 percent or $36 million over last year; earnings per share were $5.62, compared with $4.90 in 1988.

Although net income of $595 million in 1989 was $49 million below 1988 earnings, which included the earnings and one-time impact of the gains from the sale of the discontinued refinery operations, earnings per share were down less than 1 percent. Earnings per share in 1989 reflected the benefits of the corporation's stock repurchase program and the Dutch auction completed in early June 1989.

EL SEGUNDO, CA (JAN. 18) PR NEWSWIRE - Farr Co. (NASDAQ: FARC) today announced the purchase of 40,000 shares of its outstanding common stock on the open market for the Employee Stock Ownership Plans (ESOPs) the company established in September 1989.

The stock was purchased at $9.375 per share.

Allan B. Foy, president and chairman of Farr Co., commented: "We are pleased to have begun the acquisition of the shares for our ESOPs at this price. We intend to remain alert for opportunities to increase the holdings of the ESOPs in the future, although we have no timetable for purchases.

"We believe the ESOPs afford our employees an additional avenue for sharing in the future progress of the company."

Farr Co. is a leading producer of filters for particulate, liquid and gaseous filtration systems. The company has nine manufacturing facilities in the United States as well as plants in Canada and England.

PASADENA, CA (JAN. 18) PR NEWSWIRE - Hershey Oil Corp. (AMEX, Toronto: HSO) today announced that Ralph O. Kehle, chairman and chief executive officer, has assumed the additional duties of chairman of the executive committee, a post previously held by A.L. Hershey.

Hershey, who continues as a member of the company's board of directors, was instrumental in founding the company in 1968 through the formation of a joint venture with a major oil company in Canada.

Kehle said: "Mr. Hershey has played a central role in the company's development since its inception more than 20 year ago. We thank him for his many years of dedicated service and for his stewardship during the industry's difficult time in the mid-decade."

Commenting on operations, Kelhe said, "Our primary focus continues to be on increasing the company's reserves of oil and natural gas. In this respect, we anticipate a very active first quarter in 1990. Development wells are scheduled for two of the company's key projects in Canada, Coleman North and Benjamin Creek. A third test, an exploratory wildcat, at the company's 1.2 million acre concession in the Otway Basin off the coast of South Australia has been abandoned as a dry hole. Each of the development wells in Canada has the potential for delineating significant new reserves.

"We remain optimistic about our ability to continue building the company's reserves and cash flow in line with our strategic growth plan."

Separately, Kehle stated that the company's shareholders' common stock purchase rights plan, previously announced, became effective on Dec. 31, 1989.

Hershey Oil is an independent oil and gas company with operations in Canada and the United States.

#90018p0078 01/18/1990 ~PR Newswire

BOSTON (JAN. 18) PR NEWSWIRE - Bank of Boston Corporation (NYSE: BKB) reported today net income of $70 million for the year ended Dec. 31, 1989 and $9 million for the fourth quarter. Net income per common share was 80 cents for the year and 8 cents for the quarter on both a primary and fully diluted basis. These results reflected the previously announced provision for credit losses of $722 million in the year and $280 million in the quarter and $199 million in gains from the sale of the corporation's credit card business and settlement of a portion of its pension obligations.

Net income in 1988 was $322 million in the full year and $83 million in the fourth quarter. On a fully diluted basis, net income per share in 1988 was $4.43 and $1.13, respectively.

Consolidated net interest revenue, on a fully taxable equivalent basis, was $1,193 million for the full year and $285 million for the quarter. For the same periods a year ago, it was $1,172 million and $306 million. Interest margin was 3.64 percent for 1989, compared with 3.86 percent for 1988. For the fourth quarter, margin was 3.31 percent, compared with 3.95 percent in 1988. The decline in margin partially reflects the higher level of nonperforming assets which reduced net interest revenue by approximately $65 million in the yearly comparison and $23 million in the

quarterly comparison. Net interest revenue benefited in both comparisons from a higher level of earning assets. Net interest margin in the fourth quarter of 1989 was down slightly from the third quarter's 3.39 percent.
Noninterest Income

Noninterest income for the year was $894 million in 1989, compared with $696 million in the prior year. For the fourth quarter, noninterest income was $381 million in 1989 and $184 million in the previous year. Fee-based income increased $33 million, or 7 percent, in 1989 and $4 million in the fourth quarter.

Increased noninterest income also benefited from higher other income which included the fourth quarter 1989 recording of a $147 million gain from the sale of its pension obligations. Gains in the 1989 from mezzanine and venture capital businesses were $36 million lower in the yearly comparison and $17 million lower in the quarterly comparison.

SECAUCUS, NJ (JAN. 18) PR NEWSWIRE - The Genlyte Group Incorporated (NASDAQ: GLYT) today announced an increase of 19 percent in earnings per share for the fourth quarter of 1989 and an 8 percent increase for the full-year 1989.

For the three months ended Dec. 31, 1989, sales increased by 4 percent to $130,075,000 from $125,098,000 in the same period in 1988. Operating

profit increased by 6 percent to $11,001,000, or 8.5 percent of sales, from $10,413,000, or 8.3 percent of sales, a year ago. Net income went up by 19 percent to $3,212,000 from $2,705,000 in 1988 and earnings per share improved to 25 cents from 21 cents.

For the full year ended Dec. 31, 1989, sales increased by 4 percent to $511,267,000 from $492,853,000 in 1988; operating profit went up by 6 percent to $44,184,000 from $41,710,000; net income increased by 7 percent to $12,343,000 from $11,525,000 and earnings per share improved to 95 cents from 88 cents. Operating profit as a percent of sales was 8.6 percent versus 8.5 percent for 1988.

Commenting on the results, David E. Momot, president of Genlyte, said that while sales were up, order input slowed in the latter part of the year because of softness in the market. He went on to say that the increase in operating profitability came from selling price increases and reductions in certain overhead expenses, partially offset by planned higher-than-normal spending for new product development and introductions. Mr. Momot said he considered the higher new product expenses as investments which are expected to have a positive impact in 1990 and beyond. Mr. Momot also stated that interest expense was up due to higher average interest rates, partially offset by lower average borrowings, and concluded by saying that total debt was reduced by $5,605,000 to $162,895,000 from $168,500,000 at the end of 1988.

Genlyte is a leading manufacturer of lighting fixtures and controls for the commercial, industrial and residential markets.

PITTSBURGH (JAN. 18) PR NEWSWIRE - Equimark Corp. (NYSE: EQK) today announced that it has concluded in substance its negotiations with the Federal Deposit Insurance Corp. (FDIC) concerning the previously announced FDIC-assisted recapitalization of National Bancshares Corporation of Texas (NBC) (NASDAQ: NBCTC).

The parties intend to sign a definitive assistance agreement later this month.

Among the principal components of the recapitalization are the following:

New Capital A capital infusion of approximately $116 million (net of expenses) will be made through the merger of NBC Acquisition Corp., a corporation formed by Equimark's EquiManagement Inc. subsidiary solely to recapitalize NBC, with and into NBC.

As a result of the merger NBC's existing shareholders will own approximately 2 percent of the outstanding new common stock. In exchange for its services in structuring and implementing the recapitalization, EquiManagement will receive 10 percent of the new common stock. Equimark and EquiManagement will be the largest common shareholders of NBC, together owning approximately 40 percent of the new common stock to be outstanding after the merger.

The merger is subject to the approval of 66-2/3 percent of the shareholders of NBC.

FDIC Assistance The FDIC will provide assistance directly to the NBC subsidiary banks in an amount sufficient to virtually eliminate the negative equity position of those banks after the banks' assets (other than assets initially transferred to the special assets pool) and liabilities have been marked to market. Twenty percent of the initial assistance will be in cash and the balance will be in the form of a promissory note from the FDIC payable quarterly over one year after the consummation date.

Equimark Corp. is a diversified financial services institution with $3.8 billion in assets.

#90018p0083 01/18/1990 ~PR Newswire

NEW YORK (JAN. 18) PR NEWSWIRE - CrossLand Savings, FSB (NYSE: CRL), reported today a loss of $31.7 million in the fourth quarter ended Dec. 31 1989, compared to the 1988 fourth quarter loss of $68.7 million. For the year ended 1989, CrossLand reported a loss of $191.7 million compared to

net income of $15.3 million in 1988.

The 1989 fourth quarter loss of $31.7 million included an unrealized loss of $22.3 million resulting from the lower-of-cost-or-market (LOCOM) adjustment of its high-yield, non-investment grade securities ("High Yield") portfolio, a $9.3 million writeoff loss representing the balance of an investment, net charges of $4.9 million on certain real estate investments, and a gain of $6.4 million on the sale of approximately $43 million of its credit card portfolio. A $4.5 million non-cash charge in lieu of income tax expense was also recorded as a result of the early adoption of SFAS-96 (Accounting for Income Taxes).

The loss for the year included a $143.6 million writedown of goodwill, provision for possible loan losses of $50.9 million, a $22.3 million LOCOM adjustment to its high yield portfolio, and an $18.0 million charge in lieu of income tax expense resulting from the effect of the adoption of SFAS-96. The 1989 fourth quarter loss per share was $3.04 (primary and fully diluted) versus $5.65 (primary) and $3.99 (fully diluted) loss per share for the 1988 fourth quarter. For the full year, the loss per share was $16.85 (primary and fully diluted) compared to $1.81 (primary) and $.84 (fully diluted) loss per share for 1988.

Net interest income increased in the fourth quarter to $41.8 million from $35.6 million in the third quarter but was down from the $67.7 million for the 1988 fourth quarter. Net interest income decreased in 1989 to $212.0 million from $274.1 million in 1988. The provision for possible loan losses recorded was $7.5 million in the fourth quarter and $50.9 million for the year compared to $6.5 million and $25.4 million for the respective 1988 periods.

Based in New York, CrossLand Savings is among the largest savings institutions in the United States, serving over one million customers through over 110 retail banking and over 50 loan production offices nationwide.

DALLAS (JAN. 18) PR NEWSWIRE - CAI Corp., a Dallas-based investment firm, today announced its purchase of a $60-million preferred stock issue of Commercial Federal Savings & Loan, a subsidiary of Omaha, Neb.- based Commercial Federal Corp. (NASDAQ: CFCN).

CAI Corp. acquired the stock from PasoTex Corp. of El Paso, Texas, and is working with CFCN management and regulatory authorities to convert the 600,000 shares of stock into tangible capital within 60 days, according to Robin R. Glackin, president and chief executive officer of CAI Corp.

Commercial Federal Savings & Loan is an approximate $5.5-billion thrift with operations in Nebraska, Colorado, Kansas and Oklahoma. Commercial Federal Corp. operations include mortgage banking, insurance, stock brokerage and consumer financing.

"We have confidence in the future of Commercial Federal Savings and Loan," said Glackin. "As the largest thrift in Nebraska, it is well positioned in the delivery of consumer financial services -- a business sector with which we are very familiar. We think growth in this sector represents the only viable strategy for a thrift in today's regulatory environment."

In addition, Glackin said the steady, consistent growth of the Midwest economy influenced CAI Corp.'s purchase of the thrift stock.

Commercial Federal Savings & Loan is recognized for its delivery of retail

financial services.

Glackin formerly served as president and CEO of $9-billion First Texas Savings Assn. of Dallas. He is the sole shareholder of CAI Corp.

GREENWICH, CT (JAN. 18) PR NEWSWIRE - UST (NYSE: UST) today announced that 1989 net earnings increased l7 percent to $l90. 5 million, compared with $162.2 million in 1988, marking the 29th consecutive year of net earnings growth for the company.

Primary earnings per share for 1989 rose l6 percent to $l.63, compared with $1.41 in 1988.

Net sales for the year ended Dec. 31, 1989 were $682.5 million, a l0 percent gain over net sales of $618.5 million in 1988.

Net earnings for the fourth quarter of 1989 were $45.0 million, an increase of l4 percent over net earnings of $39.4 million for the similar period in 1988. Primary earnings per share for the fourth quarter increased 15 percent to 39 cents per share, vs. 34 cents per share for the fourth quarter of l988. Net sales for the fourth quarter increased l4 percent to $l78.0 million, up from $156.2 million for the corresponding 1988 period.

Included in the fourth quarter and year end results is a pretax charge of $4.5 million, amounting to 2 cents per share, resulting from the present value of future payments due the former president of the company under terms of his employment agreement.

The Tobacco and Wine segments posted sales gains for both the fourth quarter and the year, while the Other segment posted a sales gain in the fourth quarter. Other segment sales declined for the year due to the absence of two nontobacco-related businesses sold in the third quarter of 1988. Moist smokeless tobacco sales were primarily responsible for the increase in the Tobacco segment.

Domestic unit volume for moist smokeless tobacco increased 3.7 percent in 1989, to 520.2 million cans, compared with 501.5 million cans for 1988. Fourth quarter unit volume increased 5.5 percent on sales of 131.5 million cans, compared with the similar l988 period. The year and fourth quarter included an extra shipping day. On an equivalent shipping day basis, unit volume would have increased by 2.9 percent for the year and 2.3 percent

for the fourth quarter. Unit volume for the fourth quarter of 1989, as compared to the fourth quarter of 1988, was adversely affected by an unusually high holiday shipping pattern in December 1988.

UST, through its subsidiaries, is a leading producer and marketer of moist smokeless tobacco products including Copenhagen, Skoal, Skoal Long Cut, and Skoal Bandits.

ST. PETERSBURG, FL (JAN. 18) PR NEWSWIRE - Milton Roy Company (NYSE: MRC) today announced that it has completed the purchase of Automated Custom Systems Incorporated of Orange, Calif. and its sister operation, Environmental Testing Company of Aurora, Colo. The two companies are involved in the production and distribution of automotive emissions testing equipment and analytical instrumentation. The companies also perform emissions compliance testing for both governmental regulatory agencies and automotive manufacturers.

Under the terms of the purchase agreement, Milton Roy paid an initial $4 million for the two companies and will pay up to an additional $4.3 million over the next four years based on operating results. The two companies had combined 1989 revenues of $5.5 million.

Commenting on the acquisitions, Milton Roy President, Richard E. Schmidt, stated: "The prospects for these two companies are excellent and we look for their addition to enchance Milton Roy's 1990 operating performance. We have a strong management team in place to direct these companies and to optimize their future growth. Their addition to Milton Roy represents a solid step forward in expanding our analytical instruments business into high growth areas such as environmental and emissions testing."

Milton Roy Company manufactures a broad range of analytical instrumentation and process control products for use in industrial, educational and laboratory applications.

AUSTIN, TX (JAN. 18) PR NEWSWIRE - EDS announced today it has signed a contract with the Texas Comptroller's Office to assist in the development, implementation and operation of an automated accounting system for the State of Texas.

The work is part of a program adopted into law by the Texas Legislature in 1987 to improve the state's ability to manage financial assets under a uniform accounting system.

The Uniform Statewide Accounting System (USAS), will standardize and automate administrative accounting procedures among approximately 250 agencies. The system's goal is to improve efficiencies among the 10 organizations that control and monitor the state's accounting and reporting functions and provide government officials with accurate and up-to-date information on expenses and state finances.

In addition to helping develop USAS, EDS will provide on-site operations support and maintenance from the Comptroller's Austin office. EDS will also assist in the development of training materials and provide training to the agencies using USAS.

KPMG Peat Marwick has developed and will customize the accounting applications that serve as the system's foundation and provide assistance during its implementation.

EDS, based in Dallas, is the leader in providing technology-based solutions for the management and movement of data, voice and image information. EDS' stock is traded on the New York Stock Exchange under the symbol GME. With customers in all 50 states and 27 countries around

the world, EDS reported revenues of $4.8 billion in 1988. EDS' State Operations Division Central Region is based in Austin.

MEDFORD, MA (JAN. 18) PR NEWSWIRE - Regional Bancorp, Inc. (NASDAQ: REGB) the holding company for Medford Savings Bank, announced today that its board of directors has adopted a shareholder rights plan.

According to Thomas F. O'Connor, president of Regional Bancorp, "The shareholder rights plan has been under careful consideration for a number of months. Although the rights plan is not intended to prevent a takeover of Regional Bancorp and will not do so, it is designed to deal with unilateral actions by hostile acquirers that could deprive the board of directors and the shareholders of their ability to determine Regional Bancorp's destiny and to obtain fair value for their shares."

Under the plan, the rights would become exercisable 10 days after a public announcement that a person has become the beneficial owner of 15 percent

or more of Regional Bancorp's common stock, 10 business days after the commencement of a tender offer that would result in the ownership of 15 percent or more of the common stock, or upon the declaration by the board of directors that a person who is the beneficial owner of 10 percent or more of the common stock is an "adverse person."

The distribution of the rights does not dilute the shareholders' ownership of Regional Bancorp nor does it affect reported earnings per share.

Regional Bancorp, Inc. is the holding company for Medford Savings Bank, a Massachusetts-chartered savings bank. The bank offers a wide variety of services to both business and retail customers throughout eastern Massachusetts, from seven retail banking locations north of Boston.

SECAUCUS, N.J. (JAN. 18) PR NEWSWIRE - The Genlyte Group Incorporated (NASDAQ: GLYT) today announced an increase of 19 percent in earnings per share for the fourth quarter of 1989 and an 8 percent increase for the full-year 1989.

For the three months ended Dec. 31, 1989, sales increased by 4 percent to $130,075,000 from $125,098,000 in the same period in 1988. Operating profit increased by 6 percent to $11,001,000, or 8.5 percent of sales, from $10,413,000, or 8.3 percent of sales, a year ago. Net income went up by 19 percent to $3,212,000 from $2,705,000 in 1988 and earnings per share improved to 25 cents from 21 cents.

For the full year ended Dec. 31, 1989, sales increased by 4 percent to $511,267,000 from $492,853,000 in 1988; operating profit went up by 6 percent to $44,184,000 from $41,710,000; net income increased by 7 percent to $12,343,000 from $11,525,000 and earnings per share improved to 95 cents from 88 cents. Operating profit as a percent of sales was 8.6 percent versus 8.5 percent for 1988.

Commenting on the results, David E. Momot, president of Genlyte, said that while sales were up, order input slowed in the latter part of the year because of softness in the market. He went on to say that the increase in operating profitability came from selling price increases and reductions in certain overhead expenses, partially offset by planned higher-than-normal spending for new product development and introductions. Mr. Momot said he considered the higher new product expenses as investments which are expected to have a positive impact in 1990 and beyond. Mr. Momot also stated that interest expense was up due to higher average interest rates, partially offset by lower average borrowings, and concluded by saying that total debt was reduced by $5,605,000 to $162,895,000 from $168,500,000 at the end of 1988.

Genlyte is a leading manufacturer of lighting fixtures and controls for the commercial, industrial and residential markets.

STATE COLLEGE, PA (JAN. 18) PR NEWSWIRE - United Federal Bancorp Inc. (NASDAQ-NMS: UFBK) today reported earnings for nine months ended Dec. 31, 1989.

Net income was $4,375,000 or $0.85 per share compared with net income of $3,127,000 for the same period last year. Net interest income rose 21.5 percent to $13,303,000 vs. $10,951,000 a year ago.

At Dec. 31, 1989, United Federal had total assets of $482,056,000 and stockholders' equity of $91,304,000 or $17.72 per share.

For the three months ended Dec. 31, 1989, United Federal reported net income of $1,536,000 or $0.30 per share, compared to net income of $326,000 in the same quarter last year. The prior year results were affected by the reinstatement of the Pennsylvania Mutual Thrift Institutions Tax.

Reflected in the current quarter was the effect of marking to market the bank's high yield investment portfolio which resulted in a pretax charge to earnings of $455,000. During the quarter a pretax gain of $815,000 was recognized on the partial sale of the company's Federal Home Loan Mortgage Corp. preferred stock.

United Federal Savings Bank converted from mutual to stock ownership in February 1989 through the issuance of 5,175,000 shares of common stock at $9.00 per share.

In discussing the results of the period, Charles C. Pearson Jr., president and chief executive officer, stated, "During our first nine months as a publicly held stock company we have experienced a period of growth and profitability, while at the same time maintaining extremely high asset quality." Pearson continued, "United Federal's loan delinquency ratio remains among the lowest in the country. We have added an additional $500,000 to the provision for possible loan losses in recognition of our changing loan asset mix."

United Federal Bancorp is the holding company for United Federal Savings Bank, a federally chartered savings bank. The bank conducts its operations from its home office in State College, Pa., and 10 full-service offices located in Bellefonte, Centre Hall, Clearfield, Philipsburg and Huntingdon Pa.

#90018p0106 01/18/1990 ~PR Newswire

BARRIE, ONT (JAN. 18) PR NEWSWIRE - InterTAN Inc. (NYSE: ITN) announced today that consolidated sales for the second quarter of its 1990 fiscal year were $208,165,000, an increase of 3 percent over prior year sales of

$202,182,000. Net income for the three months ended Dec. 31, 1989 was $17,468,000 compared to net income of $18,171,000 in the same quarter of the prior year. Earnings per share for the quarter ended Dec. 31, 1989 decreased by 3 percent to $1.97 based on 8,864,000 average shares outstanding compared to $2.04 based on 8,889,000 shares for the same quarter last year.

For the six months ended Dec. 31, 1989, consolidated sales totaled $347,277,000, up 4 percent from sales of $335,029,000 in the first six months of fiscal 1989. Net income for the first half was $21,167,000, against earnings of $21,510,000 for the same prior year period. Earnings per share on average shares of 8,839,000 decreased by 1 percent to $2.39 for the six months ended Dec. 31, 1989 against $2.41 for the same period last year on 8,910,000 average shares.

Softness in lower end microcomputer demand and competitive pricing pressures in cellular telephones retarded Christmas sales and earnings in Canada which was not fully offset by robust sales in the United Kingdom and France. Nevertheless, cash flow remained strong and allowed the company to pre-pay the $35,906,000 note owed to Tandy more than a year early. This should permit meaningful interest savings in the coming fiscal year.

#90018p0107 01/18/1990 ~PR Newswire

NEW YORK (JAN. 18) PR NEWSWIRE - HRE Properties (NYSE: HRE) announced today that it has notified a group of investors that it is redeeming 595,229 HRE shares owned by them at yesterday's closing price of $22-5/8.

The group includes Milton Cooper, Dr. Norman Orentreich, The Kimco Corp., Kimco Development Corp., Shufro Rose & Ehrman, Delafield Asset Management and others, who collectively own 1,189,800 shares or approximately 19.8 percent of HRE's outstanding shares. The shares being redeemed represent the group's holdings in excess of 9.9 percent of HRE's common shares outstanding.

In commenting on the trust's decision to redeem the group's shares, Charles J. Urstadt, chairman, president and chief executive officer of the trust, stated, "While we have held and may continue to hold discussions with representatives of the group from time to time, we have determined that their actions and interests are adverse to the best interests of the trust and its shareholders. Furthermore, the trustees have concluded that despite any disclaimers made by members of the group, they are all acting in concert." Urstadt added, "The trustees believe that the repurchase of

these shares at the current market price will benefit HRE's remaining shareholders. As a result of this purchase we will reduce the number of shares to be purchased pursuant to our previously announced 1 million share repurchase program."

Pursuant to HRE's declaration of trust, the per-share redemption price is the closing price of HRE shares on the New York Stock Exchange on Jan. 17, resulting in a total cost for all shares being redeemed of approximately $13.5 million. The redemption notice directs members of the group to surrender their shares for purchase on Jan. 26, 1990. The redemption provisions of the declaration of trust were adopted by the trust's shareholders in 1982.

HRE is a self-administered real estate investment trust providing investors with a means of participating in ownership of income-producing properties with investment liquidity.

#90018p0112 01/18/1990 ~PR Newswire

MINNEAPOLIS (JAN. 18) PR NEWSWIRE - Control Data Corporation (NYSE: CDA) kicked off the decade today by announcing a new series of departmental computers that employ the highest performance technology available. The new line, called the Control Data 4000 series, is built upon reduced instruction set computer (RISC) architecture.

The Control Data 4000 also uses systems software and networking components that comply with open systems standards, so the computer can fit easily into existing computing environments. The four Control Data 4000 models are binary-compatible and run Classix, Control Data's version of the UNIX operating system, which is System V- and POSIX-compliant.

The Control Data 4000 delivers single-processor performance comparable to systems such as Digital Equipment's newly announced VAX 9000 at a fraction of the price. "The Control Data 4680 is the first UNIX-based RISC system that combines very high RISC processor performance with substantial input/output capabilities," Ousley said.

The high-end Control Data 4680 system derives its exceptional power from MIPS Computer Systems' third-generation bipolar RISC technology, innovative architecture and highly efficient system software. It uses the MIPS R6000 CPU chip tightly coupled to a floating point unit. Its 592 KB multilevel cache gives efficient access to program instructions and data at high processing speeds.

The 4680 features an advanced I/O subsystem. Multiple independent VME buses provide a cumulative 200-MB-per-second I/O bandwidth that can support hundreds of users simultaneously.

The midrange and low-end Control Data 4380, 4360 and 4340 models offer performance of 18 to 20 equivalent VAX MIPS.

Along with advanced VLSI semiconductor technology, 4000 models offer robust optimizing compilers, a tuned UNIX port and a wide range of third-party application software.

The Control Data 4680 is available in May. Control Data 4380, 4360 and 4340 models are available now.

Control Data Corporation provides solutions for customers' complex data collection, processing and communications needs by integrating hardware, software and services. The company is headquartered in Minneapolis.

POUGHKEEPSIE, N.Y. (JAN. 18) PR NEWSWIRE - Sono-Tek Corporation, developers and manufacturers of unique ultrasonic spray nozzle systems, announced today the appointment of Paul Hammond as director of marketing and sales. Hammond has gained extensive management experience in the marketing and sales of high technology products both in the semiconductor and medical products markets during his tenure with Cambridge Instruments PLC in the United Kingdom and Cambridge Medical Instruments, Inc. His background includes selling and marketing internationally in Europe and Japan.

Hammond's international experience is an important factor in Sono- Tek's program to expand its sales into foreign markets. Recently, the company singed an agreement with Tomita, Ltd., a Japanese firm, under which Tomita will market and sell Sono-Tek's products in Japan.

#90018p0117 01/18/1990 ~PR Newswire

NEW YORK (JAN. 18) PR NEWSWIRE - Squibb Diagnostics, a division of Bristol-Myers Squibb Company (NYSE: BMY), announced it has received approval from the U.S. Food and Drug Administration for its diagnostic radiopharmaceutical, CardioGen-82R (rubidium Rb-82 generator).

CardioGen-82R is a myocardial perfusion agent used in the diagnosis of heart disease. It is the first and only positron emitting radiopharmaceutical to be approved by the FDA.

Positron Emission Tomography (PET) is a high technology nuclear medicine imaging technique which produces high resolution images of the heart as if held in hand, cut in cross section or examined three- dimensionally.

A positron-emitting drug is injected into a patient intravenously, carried to the heart via blood flow and visualized by a positron camera, providing immediate diagnostic information. Its short half-life allows for rapid repeat studies.

Because of its convenience, CardioGen-82R should contribute to increased usage of PET technology, believed to hold great promise in the advancement of diagnostic imaging of the heart. The ability of this technique to evaluate coronary disease with a very high degree of accuracy is a major step beyond the conventional anatomic imaging techniques.

CardioGen-82R is the first positron emitter available in convenient generator form. Other positron emitting drugs are produced from costly, on-site cyclotrons, and require the expertise of several highly trained personnel to operate.

The introduction of CardioGen-82R will provide PET facilities with a ready supply of rubidium-82. Further, it should lower the cost of PET imaging since the generator is used with an automated infusion system, developed and patented by Squibb diagnostics, and which is operated by a single, trained technologist.

Squibb Diagnostics is a worldwide leader in the diagnostic contrast agent and radiopharmaceutical market. Bristol-Myers Squibb is a diversified pharmaceutical company whose principal businesses are pharmaceuticals, consumer products, nutritionals and nonpharmaceutical health care products.

LOWELL, MA (JAN. 18) PR NEWSWIRE - Courier Corporation (NASDAQ: CRRC), the Lowell-based printer of books, Bibles, technical manuals and software documentation, today reported net income of $82,000, or 5 cents per share, for the first quarter of fiscal 1990 compared to $2,686,000, or $1.46 per share, for the same period a year ago. Sales for the first quarter of 1990 were $22,909,000 compared to $23,902,000 a year ago. This year's first quarter includes 13 weeks compared to 14 weeks for the prior year's quarter.

Prior year earnings include an after-tax gain of approximately $2.5 million, or $1.35 per share, from the sale of Courier's 50 percent interest in NADCO Directory Management Corp. and $112,000, or 6 cents per share, of net income from NADCO prior to the sale.

Earnings from operations were comparable to a year ago. Significant productivity gains were achieved in each of the company's operations resulting in an improvement in the gross profit percentage. Recent additions to Courier's sales force, initiated to penetrate new markets and attract new customers, contributed to increased selling expenses. In addition, administrative expenses in the prior year included a $260,000 "credit" related to the company's overfunded pension plans. These plans were terminated in 1989 and as a result the "credit" has been eliminated in this year's first quarter, replaced by interest income of approximately $100,000 on the excess assets of these terminated plans. Sales in this year's 13-week first quarter increased a modest 3 percent over the comparable 13-week period in the prior year, reflecting the impact of a softening economy.

James F. Conway, Jr., chairman of Courier, stated, "We are pleased with the productivity improvements achieved in each of our manufacturing operations; however, sales growth was below our expectations. We have responded with aggressive actions designed to attract new customers, further diversifying our business and offsetting a slowing economy."

Courier is traded over-the-counter and its NASDAQ symbol is CRRC.

NEW YORK (JAN. 18) PR NEWSWIRE - The Pan Am Shuttle is offering passengers who fly on just two one-way segments between now and Feb. 11, 1990 free accommodations at La Costa Hotel & Spa in Carlsbad, Calif.

Passengers who fly between two and five segments on the Pan Am Shuttle will receive two free nights at La Costa, based on a four night total stay. In addition, qualifying passengers will receive 50 percent off a Pan Am roundtrip economy class companion ticket between Boston, New York or Washington and Los Angeles or San Diego.

Pan Am Shuttle passengers who fly on six or more segments, will receive

three free nights at La Costa based on a six night stay, plus an automatic upgrade to a suite. The qualifying passengers will also receive a choice of either a free Pan Am economy class companion ticket to San Diego or Los Angeles from Boston, New York or Washington, or a roundtrip clipper class upgrade for two on the nonstop transatlantic portion of the trip.

This offer is open to all members of WorldPass, Pan Am's frequent flyer program. Instant enrollment is available. To ensure receipt of the award, passengers should hand in a mileage tracking coupon along with their ticket, or enter their WorldPass number into an Automated Ticketing Machine before each Pan Am Shuttle flight. In early March, qualifying passengers will automatically receive the highest award for which they qualify.

The Spa Award is valid from March 15, 1990-Jan. 31, 1991 and the Air Travel Award may be used from either March 15, 1990-June 23, 1990 or Sept. 9, 1990-Jan. 31, 1991. Certain terms and conditions apply. Limit one award per WorldPass member.

La Costa Hotel & Spa offers 23 tennis courts, two championship golf courses, heated pools, spa facilities, restaurants and nightly entertainment.

NEW CANAAN, CT (JAN. 18) PR NEWSWIRE - Smith Corona Corp. (NYSE: SCO) today announced that for the second quarter ended Dec. 31, 1989, the company reported net income of $12 million, or 40 cents per share, compared with net income of $13.9 million, or 46 cents per share, for the comparable quarter ended Dec. 31, 1988, on a pro forma basis to reflect the company's public offering. Sales for the quarter were $128.8 million compared to $126.9 million, for the quarter in 1988.

For the first six months ended Dec. 31, 1989, net income was $28.3 million or 94 cent per share, on revenues of $281 million, compared to 1988 pro forma net income of $26 million, or 86 cents per share, on revenues of $258.9 million for the comparable period in the prior year. Results for 1988 include charges of 5 cents and 10 cents for the three months and six months, respectively, related to a now-terminated Supplemental Performance Plan.

G. Lee Thompson, chairman and chief executive officer of Smith Corona, said, "Despite a continued softening in the economy evidenced throughout the retail sector, we were able to turn in a reasonable performance. Earnings for the quarter reflect a weaker retail environment than in the prior year's quarter and inventory write-downs. Without these write-downs, results would have been almost equal to last year's second-quarter levels before the Supplemental Performance Plan charges."

In view of an anticipated continuing softness at the retail level, the company will continue its shortened workweek at its Cortland facility until such time as inventory levels are fully in line with demand and will also furlough about 100 additional people.

Thompson noted that the recent Consumer Electronics Show held in Las Vegas "Smith Corona's new products were enthusiastically received by the trade and everything that we saw or head about in the way of competitive offerings leads us to believe that we will continue to lead the industry in features and value. However, we expect intense competition from Far Eastern competitors on a price-alone basis. We have lived through this kind of operating environment before and we have demonstrated that our quality products and consumer reputation will enable us to remain the leading company in our industry."

#90018p0125 01/18/1990 ~PR Newswire

LOS ANGELES (JAN. 18) PR NEWSWIRE - CalFed Inc. (NYSE: CAL), the consumer-based financial services company, today reported net earnings for 1989 of $82.4 million, or $3.12 per fully diluted share, compared to $134.0 million, or $4.94 per fully diluted share, for 1988.

The company's net earnings for the final quarter of 1989 rose 22 percent to $23.6 million, or $0.88 per fully diluted share, from $19.3 million, or $0.74 per fully diluted share, for the fourth quarter of 1988.

The 1989 fourth quarter was highlighted by the company's orderly attainment of three new regulatory capital requirements; an improvement in the bank's interest-rate spread; additional growth in the bank's retail

deposits; and the signing of three transactions which will further reduce the company's direct investment in real estate in line with management's strategy to convert non-interest-earning assets to interest-earning assets.

Net interest income for the company's financial services segment in the 1989 fourth quarter was $106.8 million compared to $114.1 million for the same period in 1988. For the year, net interest income was $411.4 million compared to $477.2 million in 1988. The year-to-year decline was the result of a compression in California Federal Bank's interest rate spread, most notably in the first and second quarters of 1989. However, at Dec. 31, 1989, the bank's interest rate spread was 39 basis points higher than at the end of 1988.

Despite a residential market characterized by reduced home buyer interest, intense competition among mortgage lenders and a preference among borrowers for fixed-rate loans, California Federal Bank originated $1.1 billion in new real estate, commercial and consumer loans during the fourth quarter, and a total of $4.3 billion for 1989. This compares to $1.9 billion and $8.3 billion for the same 1988 periods.

During the fourth quarter, California Federal Bank exceeded the rigorous new capital standards imposed on all thrift institutions by federal regulators effective Dec. 7, 1989. The initial phase calls for minimum tangible, core and risk-based capital levels of 1.5 percent, 3.0 percent and 6.4 percent of assets, respectively. At Dec. 31, 1989, the bank continued to exceed these requirements with 2.8 percent, 4.4 percent and 6.7 percent, respectively.

California Federal Bank's increased emphasis on generating retail deposits continued to produce results during the fourth quarter of 1989. At Dec. 31 the bank's $12.3 billion in retail deposits comprised 79 percent of total deposits. Retail deposits grew a total of $600 million from the end of 1988.

Consumer demand for the Cal Fed Saver's Annuity, the tax-deferred annuity developed specifically for California Federal Bank customers, continued at a strong pace during the fourth quarter. By the end of the quarter, annuity sales had exceeded $200 million, doubling management's original sales targets for 1989, the product's introductory year.

During the fourth quarter, the company finalized a series of transactions through which it will achieve significant further reductions in its direct investment in real estate.

#90018p0127 01/18/1990 ~PR Newswire

PHILADELPHIA (JAN. 18) PR NEWSWIRE - United Valley Bank (UVB) announced today its year-end operating results for 1989.

UVB closed its first full year with operating profits of $262,011 -- a swing of more than $839,800 from opening losses in 1988.

United Valley Bank also reported significant increases in assets, deposits and loans, which doubled in 1989. Total assets increased 95 percent to $74,088,711. Deposits increased 125 percent to $63,651,965. UVB's loan portfolio similarly increased 111 percent to $46,787,633.

UVB officers are pleased with the bank's performance in the early stages of the company's development. Board Chairman Jack Hoopes, pointed to the bank's operating profit as an indication of promised future growth for United Valley.

Hoopes said, "Even with the inclusion of the questionable Pennsylvania State Shares Tax in our fourth quarter operating results, which seriously diminished actual net income, United Valley Bank posted positive numbers for the year." UVB's 1989 net income decreased from $262,011 to $66,211 after applying the embattled State Shares Tax to the new bank's balance sheets.

Hoopes added, "The final income figure of $66,211, as affected by the shares tax, does not reflect United Valley's real performance for the year."

Tom Lynch, president of United Valley Bank, attributed UVB's profitability in only its second year to the bank's highly competitive rate structures and unique business banking system. Lynch stated, "As a small financial services institution, UVB is afforded the flexibility to tailor our products to the needs of small to medium-sized businesses."

Lynch also credited the enthusiastic participation of UVB's board of directors in helping to develop the bank's rapidly expanding customer base. Lynch explained, "Our board is comprised of successful businesspersons and entrepreneurs who understand the distinct needs of developing firms. At UVB, we have built upon their designs to create a truly customer-oriented banking program."

United Valley Bank is a full-service, FDIC-insured commercial bank with offices in Wayne, Pa., and Center City Philadelphia.

#90018p0129 01/18/1990 ~PR Newswire

NEWTOWN SQUARE, PA (JAN. 18) PR NEWSWIRE - ARCO Chemical Co. (NYSE: RCM) reported 1989 net income of $405 million, or $4.22 per share on revenues of $2.7 billion.

For the quarter ended Dec. 31, 1989, net income was $75 million, or $0.78 per share on revenues of $606 million.

Harold A. Sorgenti, president and chief executive officer, commented: "Our gross profit of $818 million in 1989, down from $913 million in 1988, reflected significantly lower styrene margins as worldwide supply/demand came into balance. Also, the company's total sales volumes were lower due to a slowdown in key U.S. housing, automobile, and durable goods markets. Partially offsetting these declines were margin improvements in the company's core businesses other than styrene."

The $95 million decrease in gross profit in 1989 vs. 1988 included, in part, a $99 million decrease in total volumes and a $140 million decrease in styrenics margins, partially offset by $183 million of margin improvements in the Company's non-styrenic businesses. Gross profit in 1989 was also affected by operating cost increases due to maintenance turnarounds in Rotterdam, the Netherlands, and Bayport, Texas; a full year of operations at the plant in Fos-sur-Mer, France, and the polyols plant in Channelview, Texas; and the write-off of a chlorohydrin-based propylene oxide unit. Environmental charges in 1989 were $11 million lower than in 1988 on a pre-tax basis.

Volume decreases in the fourth quarter 1989 compared with a year earlier reflect, in addition to lower demand, additional purchases by customers during the fourth quarter of 1988 in anticipation of price increases in propylene oxide and styrene.

Interest expense for 1989 was down $12 million compared with 1988 due to lower average debt outstanding, partially offset by higher average interest rates. Other income was $44 million in 1989 compared with $78 million in 1988. The $34 million decrease resulted, in part, from $12 million lower interest income. Also, earnings from investments in affiliates declined $20 million in 1989 primarily due to lower styrene margins at the company's joint venture in Japan. The company's fourth quarter provision for income taxes reflects increased utilization of available foreign tax credits for the year

LOS ANGELES (JAN. 18) PR NEWSWIRE - Broad Inc. (NYSE: BRO) today completed its acquisition of the core financial services businesses of Integrated Resources, Inc. (NYSE: IRE) for a cash purchase price of $95 million, subject to an initial 15 percent hold-back by Broad Inc.

Included in the purchase are: 1) approximately $2.2 billion of annuity reserves which were acquired on an assumption reinsurance basis from Integrated Resources Life Insurance Company by Anchor National Life Insurance Company; 2) Integrated Resources Asset Management Corporation (IRAM), which has approximately $1.75 billion of assets under management; 3) Royal Alliance Associates Inc., a broker-dealer with approximately 3,000 registered representatives nationwide; 4) Resources Trust Company, a Denver-based company with approximately 116,000 custodial accounts, and 5) a Denver-based administrative company which services the acquired annuity business.

The parties indicated that, as provided in their definitive agreement, the final purchase price for these businesses reflected significant downward adjustments, primarily attributable to a significant decline in the value of Integrated Life's high-yield bond portfolio in recent months.

The acquisition does not include Financial Clearing Services Corp., a financial clearing firm which Integrated expects to liquidate promptly, nor the tax-sheltered annuity and ordinary life business of Integrated Resources Life Insurance Company, which previously have been sold to separate third parties.

Broad Inc. is an investment-grade financial services company which has total capital of approximately $550 million. Its lead life insurer, Sun Life of America, is a 100-year-old "Fortune 500" company rated "A+" by A.M. Best for over a quarter century. Together, its life insurance companies, Sun Life of America, Anchor National and First SunAmerica rank in the top two percent of all U.S. life insurance companies in both assets and annuity premiums.

CANTON, OH (JAN. 18) PR NEWSWIRE - Diebold, Incorporated (NYSE: DBD) today reported improved net sales and earnings for the fourth quarter of 1989 and the year ended December 31, 1989.

In the quarter ended December 31, 1989, Diebold's net income increased 19 percent to $10,949,000, or $.83 per share, compared with 1988 fourth

quarter net income of $9,214,000, or $.70 per share. Net sales were $127,361,000 in the 1989 fourth quarter, a 9 percent increase compared with $117,156,000 in the fourth quarter of 1988.

For the year ended December 31, 1989, Diebold's net income increased 16 percent to $36,230,000, or $2.75 per share, compared with $31,340,000, or $2.38 per share in 1988; (this excludes non- recurring income from an accounting change of $4,484,000, or $.34 cents per share, for the 1988 period). Net sales in 1989 increased 4 percent to $468,883,000 versus $450,571,000 in 1988.

Diebold, Incorporated (NYSE: DBD) is a world leader in the automation of self-service transactions and security systems. The Company provides software and customer service for these systems. Headquartered in Canton, Ohio, Diebold maintains offices worldwide.

ST. LOUIS (JAN. 18) PR NEWSWIRE - Emerson Electric Co. (NYSE: EMR) announced today that it has extended the expiration date in connection with the proposed acquisition of McGill Manufacturing Co. Inc. (NASDAQ: MGLL), by Emersub XXVI Inc., a subsidiary of Emerson, until midnight New York City time on Wednesday, Jan. 24.

The tender offer was originally scheduled to expire on Jan. 17. Emersub XXVI has commenced a cash tender offer for all outstanding shares of common stock of McGill for $93 per share of common stock. Emerson reported that as of Jan. 17, approximately 1.15 million shares of McGill common stock had been tendered which, when combined with the approximately 279,000 shares not yet tendered but subject to option agreements, represent 98.6 percent of the McGill shares outstanding. The extension is due to the previously announced Federal Trade Commission request for additional information to Emersub XXVI and McGill in connection with the acquisition of McGill. Emerson and McGill are complying with the request.

McGill, based in Valparaiso, Ind., manufactures bearings and electrical products primarily for industrial use.

Emerson Electric Co., based in St. Louis, manufactures a broad range of electronic, electrical and other products for consumer, commercial, industrial and government and defense markets.

#90018p0139 01/18/1990 ~PR Newswire

SAN DIEGO (JAN. 17) PR NEWSWIRE - IRT Corp. (AMEX: IX) today announced revenues of $4,745,000 and earnings of $149,000 or 3 cents per share for the third quarter of its 1990 fiscal year ended Dec. 31, 1989. For the comparable period in the prior fiscal year, IRT reported $3,702,000 in revenues and a net operating loss of $1,881,000 or 39 cents per share.

For the first three quarters of its current fiscal year, the company reported revenues of $15,877,000 and income of $1,589,000 or 29 cents per share, compared with the comparable period of the previous fiscal year which had revenues of $12,930,000 and net operating loss of $870,000 or 18 cents per share. Income for the first three quarters, discounting the effects of other income in both fiscal years, has increased from a loss of $3,828,000 in the previous year to a profit of $745,000 in fiscal 1990.

The financial results for the previous fiscal year have been restated to reflect the disposal of discontinued operations.

IRT's contract backlog at the end of the third quarter was $4,476,000, up 44 percent, compared with $3,116,600 at the end of the third quarter of the previous fiscal year.

"I am pleased with our third-quarter results," said John W. Battin, president and chief operating officer of IRT. "In addition to our continued financial progress, we expanded our sales and marketing organizations in the United States and established a European marketing network during the quarter. The signing of Electronic Instruments to represent us in Europe is a key step toward making IRT a world-wide leader in its field."

Electronic Instruments, a manufacturer and distributor of electronic design, production, and test equipment, is based in Brussels, Belgium and Paris with subsidiaries across Europe.

IRT Corp. is a major supplier of industrial real-time X-ray systems, with more than 500 systems installed, and is the technology leader in automated X-ray inspection systems with computerized defect recognition capability. The company develops and manufactures inspection and process monitoring systems, including integrated systems for electronics, automotive, aerospace, and defense applications. The company also operates a commercial radiation processing facility which provides high-energy electron-beam processing for a number of commercial applications.

BETHLEHEM, PA (JAN. 18) PR NEWSWIRE - Union Pacific Resources Co. (UPRC), the exploration, production and minerals subsidiary of Union Pacific Corp. (NYSE: UNP), has made four new offshore discoveries in the Gulf of Mexico during the second half of 1989.

Three of the four discoveries have been confirmed with successful offset wells. The discoveries, all fully owned by UPRC, are: Brazos A-2, High Island East Addition A-200, Ship Shoal 263 and West Cameron South Addition 604. Water depths for the four blocks range from 65 feet to 280 feet. Platform plans are being finalized. Production from the first platform is expected to commence in the fall of 1990, with all four discoveries in production by late 1991. Although only one of the four discoveries has been tested, net initial production from these four discoveries is anticipated to be in the range of 80 to 100 million cubic feet per day.

MEXICO CITY (JAN. 18) PR NEWSWIRE - Michael J. Hershman, president of the Fairfax Group Ltd./Fairfax Consultants Ltd., announced today that the corporate investigations and security firm has opened an office here which will specialize in executive protection, individual and corporate security in addition to the company's usual services.

The new venture, which will be known as the Fairfax Group of Mexico (FFGM) is located in the heart of Mexico City at Mariano Escobedo 510- P.H. The company will offer a range of services designed to meet the special security needs of both local and foreign corporations, and governments in Central and South America.

Hershman named Enrique Stieglitz as the president of Fairfax Group of Mexico. Prior to joining Fairfax, Stieglitz was president and chief executive officer of Negocios Stika, S.A. de C.V., a financial consultants firm in Mexico City.

In addition to the new office, Hershman also announced the company will open later in 1990 a special security training center just outside Mexico City. Similar to the Fairfax Group's facility in Norfolk, Va., the center will instruct security personnel in the techniques of executive protection hostage prevention and specialized security measures.

"Unfortunately, many companies with offices outside the United States are

faced with the very real concern that one of their principals, or a member of their families, will be assaulted or kidnapped. This office will offer customized security plans which are designed to protect and minimize risk to corporate personnel. Additionally, we have the expertise to assist in hostage negotiations, should that prove necessary," said Hershman.

When it opens next fall, the security training center will work with Fairfax employees, as well as the existing security personnel of its clients and local nationals contracted by Fairfax. Personnel will be trained in a range of special security techniques, including how to safeguard against kidnapping, how to handle threats and assaults, and alternative rescue techniques.

The Mexico office also will help the Fairfax Group to better serve its government clients in Central and South America who face similar concerns.

The Fairfax Group, and its sister company in New York City, Fairfax Consultants Ltd., is a management consultant firm which offers a range of services in corporate investigations and security. In addition to all types of individual, building and corporate security, the firm also offers high-level investigative, audit and analytical services worldwide.

#90018p0145 01/18/1990 ~PR Newswire

NEW YORK (JAN. 18) PR NEWSWIRE - Bankers Trust Company, AT&T and Talisman Communications today announced an agreement to market a new financial service for 900 telephone service sponsors. The service, called Audiotex Cash Movement, has been jointly developed by the three companies.

Audiotex Cash Movement is an integrated escrow and disbursements service for participants using caller-paid (900) numbers and the AT&T MultiQuest(SM) product line. The service protects and streamlines the collection, reconciliation and disbursement of receivables generated by companies using caller-paid services. Financing of receivables due from 900 programs will be available in early 1990. As much as 80 percent of the expected premium billing revenue may be financed to help maximize a sponsor's cash flow.

Avis Rent-A-Car Systems, Inc., will be among the first major sponsors to use the Audiotex Cash Movement program for its interactive weather service.

AT&T MultiQuest service allows large numbers of callers the opportunity to speak with subject-matter experts or to access computer databases.

According to 700/800/900: The Intelligent Network, third edition, from Strategic Telemedia, the 900 caller-paid industry is expected to grow to $3 billion annually by 1993.

Bankers Trust Company is a $59 billion global merchant bank. Bankers Trust's Corporate Trust and Agency Group is a worldwide provider of trustee and related agency services for more than 4,000 corporate and government entities in 51 countries. The group services more than $400 billion in securities.

AT&T is a global leader in the movement and management of information. That includes providing long distance telecommunications services through the company's Worldwide Intelligent Network, as well as systems, products and services that combine communications and computers.

Talisman Communications provides Fortune 500 companies, charities, governments and their agencies with caller-paid (1-900) and sponsor-paid (1-800) telephone services. Talisman's integrated family of services provides creative, technical and financial facilities to the audiotex industry.

#90018p0147 01/18/1990 ~PR Newswire

CHARLOTTE, NC (JAN. 18) PR NEWSWIRE - NCNB Corp. (NYSE: NCB) today reported net income for 1989 of $447.1 million, an increase of 77 percent over net income of $252.5 million in 1988.

Earnings per share rose 59 percent to $4.62, compared to $2.90 per share the previous year. NCNB achieved a return on equity of 20.45 percent in 1989, a substantial increase from the return on equity of 15.55 percent in 1988.

The company increased its dividend per common share by 17 percent in 1989, from 94 cents to $1.10 per share.

"I am pleased to announce another excellent earnings performance by NCNB in 1989," said Hugh McColl, chairman. "NCNB vaulted into the top ranks of U.S. banking companies not only on the basis of assets, which now total $66.2 billion, but by the more important measures of sheer earnings power and profitability.

"This strong earnings performance was only one of NCNB's many tremendous accomplishments in 1989," continued McColl. "We completed the acquisition

of NCNB Texas four years ahead of schedule.

"The profitability and successful integration of NCNB Texas exceeded our most ambitious expectations. At the same time, our southeastern bank turned in another record year. Loan quality at NCNB improved in 1989, even in the face of a slowing economy.

"We greatly expanded our capital base, raising $1.7 billion of new capital in 1989, including nearly $700 million of common equity. And we further strengthened our liquidity position through strong core deposit growth. NCNB enters the 1990s with dynamic earnings momentum and proven financial strength."

In the fourth quarter of 1989 NCNB earned $136.2 million, a 112-percent increase from $64.3 million in the same period of 1988. Earnings per share rose 88 percent to $1.30.

Improved credit quality was a factor in NCNB's strong performance in 1989. Net charge-offs declined to $147.1 million, or .45 percent of average loans and leases in 1989, compared to net charge-offs of $147.5 million, or .83 percent of average loans, in 1988. This decline was achieved despite an increase in loans of $15.5 billion in 1989 to $34.4 billion at year end.

Nonperforming assets declined to $446.1 million at the end of 1989, down from $461.3 million at the end of the third quarter. Nonperforming assets also decreased as a percent of net loans and leases to 1.30 percent at the end of the year, a decline from 1.39 percent at the end of the third quarter.

NCNB increased its allowance for loan and lease losses to $465.5 million, or 1.35 percent of net loans and leases at the end of 1989, up from 1.22 percent one year earlier. The allowance provided 118-percent coverage of nonperforming loans and leases at the end of 1989.

CONTACT: Rusty Page, 704-374-5667, or Susan Carr, 704-374-8059, both of NCNB Corporation.

#90018p0149 01/18/1990 ~PR Newswire

SAN ANTONIO, TX (JAN. 18) PR NEWSWIRE - National Bancshares Corporation of Texas (NBC) (NASDAQ: NBCTC) today announced that in connection with its previously announced FDIC-assisted recapitalization, it has filed registration statements with the Securities and Exchange Commission with respect to a common stock rights offering to NBC shareholders and with respect to a debt exchange offer.

NBC will issue to each of its shareholders of record as of a record date to be established 2-1/2 transferable common stock purchase rights for each 100 shares of common stock. The rights in the aggregate will provide for the purchase of 296,738 shares of common stock (after taking into effect the one-for-100 reverse stock split which is a component of the recapitalization). Each full right entitles its holder to purchase one share of common stock at the price per share paid by other investors in the recapitalization. The recapitalization is not contingent on the results of the rights offering, and shareholders are not required to exercise rights.

In addition, NBC will offer to exchange $1,000 principal amount of increasing rate senior subordinated debentures due 2006 and 10 transferrable common stock purchase warrants for each, $1,000 principal of its currently outstanding 10 percent convertible subordinated debentures due 2006 (NASDAQ: NBCGC). The exchange is contingent upon acceptance of the offer by holders of at least 85 percent of the principal amount of the 10 percent convertible subordinated debentures.

The registration statements contain further information concerning the securities offered and the recapitalization.

The registration statements relating to the securities described above have not yet become effective. The securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This press release shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of the securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities law of any such state. The offering will be made only by means of a prospectus.

Copies of the prospectuses contained in the registration statements may be obtained from Jack C. Hebdon Jr., National Bancshares Corporation of Texas 430 Soledad St., San Antonio, Texas 78205, telephone 512-229-2311.

#90018p0150 01/18/1990 ~PR Newswire

PHILADELPHIA (JAN. 18) PR NEWSWIRE - Philadelphia Electric Co. (NYSE: PE)

said today that electric sales, spurred by continuing economic development in Southeastern Pennsylvania, set another new company record in 1989.

PE's electric sales for 1989 totaled 32.675 billion kilowatt hours (kwh), surpassing the previous record of 32.239 billion kwh, set in 1988, by 1.4 percent.

Joseph F. Paquette Jr., PE chairman and chief executive officer, said the new record was set despite a much cooler summer in 1989. For example, electric sales in July and August were down l.4 percent and 8.6 percent, respectively, compared with 1988.

On a weather-corrected basis, he said, PE electric sales in 1989 surpassed 1988 by about 3 percent.

Paquette said actual 1989 sales bettered 1988 in nine of 12 months, signifying healthy economic growth in the area. "Economic activity in southeastern Pennsylvania remains strong," he said, "and adequate, reliable electric service continues to be a driving force in our regional economy."

Also, he said, the economy will benefit now that the company's new nuclear capacity has virtually eliminated expensive, undependable oil from its generation mix.

The company reported electric sales in December 1989, totaled 2.876 billion kwh, compared with sales of 2.701 billion kwh in December 1988, an increase of 6.5 percent.

ATLANTA (JAN. 18) PR NEWSWIRE - BellSouth (NYSE: BLS), a U.S.-based telecommunications company, has signed an agreement to take an equity stake in Communication-Developpement (Com-Dev), the communications branch of Caisse Des Depots-Developpement (C3D), a holding company that coordinates and manages the consulting and engineering subsidiaries of Caisse Des Depots et Consignations (CDC).

The agreement allows BellSouth to take a minority stake in Com-Dev's cable networks.

One of three leading cable network concerns in France, Com-Dev currently has a majority position in 21 cable franchises in France, including franchises in areas such as northwest Paris, Marseille, Dunkerque, Rennes, Strasbourg, Avignon and Metz. Com-Dev's customer base represents over

130,000 subscribers. With 2.1 million homes in its franchise areas, Com-Dev projects that by 1998 they will be serving over one million subscribers.

BellSouth will participate in the operation of these cable systems and will be involved in the provision of direct marketing and customer services through its French subsidiary, DATECH, which is based in Metz, France.

According to Mr. Jean-Marc Simon, President-Directeur General of C3D, Com-Dev is eager to develop its cable business because there is a lot of growth and promise in the European cable industry. Mr. Simon believes that one of the most efficient and cost-effective ways to achieve this goal is to foster a partnership with an experienced network operator, such as BellSouth.

Both Mr. Francois Jouven, President and Directeur-General of Com-Dev, and Mr. Alain Louchez, Directeur General of BellSouth International France, confirmed that the cooperative agreement between the two companies is aimed at providing Com-Dev customers, who are located throughout France, the highest quality cable service possible.

CDC, one of the largest financial institutions in the world, has $56 billion in assets and manages over $228 billion in assets. BellSouth, with $28 billion in assets, is the largest provider of basic telephone service in the U.S. and is one of the largest telecommunications companies in the world.

NEW YORK (JAN. 18) PR NEWSWIRE - Joseph Timpanaro has been named vice president and general manager-NYNEX Logistics Services, a new division of NYNEX Enterprises.

The new division was launched Jan. 1 to provide Third-Party Logistics Services on a national basis. The group is located at NYNEX Enterprises' Manhattan headquarters, 441 Ninth Ave.

In his previous position, Timpanaro was vice president-business development, NYNEX Enterprises Company.

Timpanaro brings more than 19 years of extensive managerial and financial experience at New York Telephone and NYNEX Enterprises to his present position directing the company's Third-Party Logistics line of business.

As a Third-Party Logistics provider, Enterprises offers a complete materials management package -- managing a client's products from the point of origin to the final destination.

Enterprises' Third-Party Logistics Services offerings include:

-- Contract Warehousing -- Inventory Control/Management
-- Transportation Brokerage Services
-- Purchasing and Procurement Support -- Customer Service Support
-- Logistics Information Systems Support

Timpanaro joined NYNEX Enterprises in October 1983, as assistant secretary. In that capacity he was responsible for the financial, operational and organizational planning functions which helped develop NYNEX Enterprises into a major material management company supporting the NYNEX family of companies. He was named vice president of marketing in January 1986.

In 1988, Timpanaro was appointed vice president of business development, during which time he was responsible for strategic planning and the development of several new business initiatives for Enterprises. His most recent responsibilities included the planning and business development to introduce NYNEX into the Third-Party Logistics industry.

Timpanaro joined New York Telephone in 1971. Prior to that he held various engineering positions in digital design and computer-controlled automatic test systems with Sperry Gyroscope, PRD Electronics and Hydro Systems, Inc.

NYNEX Enterprises is a subsidiary of NYNEX Corporation (NYSE: NYN). Enterprises provides cost-effective integrated materials management and technical services for the NYNEX family of companies, including purchasing contracting, quality control, testing, inventory management and distribution.

NEW YORK (JAN. 18) PR NEWSWIRE - The American Stock Exchange announced that the initial public offering of The Inefficient-Market Fund Inc., of New York City, began trading 4 million common shares today.

The Inefficient-Market Fund is a newly formed, non-diversified, closed-end management investment company.

Trading under ticker symbol IMF, the common stock opened on 1,000 shares at 12.

The Inefficient-Market Fund, organized in October 1989, is designed for long-term investment through a portfolio primarily consisting of equity securities of companies with relatively small market capitalizations that Smith Barney, Harris Upham & Co. Inc. said it believes to be inefficiently valued and therefore underpriced. The fund's principal objective is capital appreciation.

The Inefficient-Market Fund's investment adviser is Smith Barney, a leading investment banking, securities trading and brokerage company that serves domestic and foreign companies, governments and institutional and individual investors. The fund's administrator is Mutual Management Corp. a Smith Barney affiliate.

DUBLIN, OH (JAN. 18) PR NEWSWIRE - Cardinal Distribution, Inc (NASDAQ: CDIC) today announced a 53 percent increase in net earnings and a 21 percent increase in net sales for its third fiscal quarter, ended Dec. 31, 1989. For the first nine months, net earnings from continuing operations increased 55 percent while net sales increased 26 percent.

For the third quarter, net earnings were $3,337,000, or $.32 per share on a fully diluted basis, versus $2,177,000, or $.26 per share fully diluted, for the same quarter last year. Net sales for the quarter were a record $220,735,000 compared to the prior-year quarterly total of $182,820,000.

For the first nine months of the fiscal year, net earnings from continuing operations were $8,496,000, or $.84 per share on a fully diluted basis, up from $5,494,000, or $.68 per share fully diluted, for the comparable fiscal 1989 period. Net sales for the nine months were $634,246,000 versus 502,195,000 for the year-earlier period. In the fiscal 1988 period, a non-recurring gain from the sales of, and net earnings from, Cardinal's discontinued wholesale food operations made net earnings $10,239,000, or $1.13 per share fully diluted.

Robert D. Walter, chairman and chief executive officer, said the results indicated that strong sales and earnings trends were continuing. He added that sales gains were achieved primarily in the hospital business and in new geographic markets. Walter noted that the internal sales growth rate continues to exceed the industry's and has occurred without significant cost increases, resulting in improved profitability.

Cardinal Distribution supplies pharmaceuticals, medical and surgical supplies, and related health products to drug stores, hospital pharmacies, and other customers located primarily in the Midwestern and Northwestern United States.

CHARLOTTE, NC (JAN. 18) PR NEWSWIRE - On January 16, 1990 an individual filed a petition with the U.S. Court of Appeals for the Eleventh Circuit petitioning the court to review and set aside the Order of the Board of Governors of the Federal Reserve System, dated December 22, 1989, approving the acquisition of Florida National Banks of Florida, Inc. (NASDAQ: FNBF) by First Union Corporation (NYSE: FTU). The petitioner also seeks a stay of the Federal Reserve Board's Order.

Among other things, the petitioner alleges violations of the Community Reinvestment Act by First Union's Florida banking subsidiary. The Federal Reserve Board's Order approving the acquisition was based in part on First Union's agreement to implement additional programs in compliance with the provisions of that Act. The acquisition is scheduled to close on January 29, 1990.

First Union believes that the petition is without merit and that the petitioner lacks standing to bring this action. Accordingly, First Union anticipates that the acquisition will be consummated on January 29, 1990, as scheduled.

READING, PA (JAN. 18) PR NEWSWIRE - Richard P. Hoverter, 57, Meridian Bancorp Inc. (NASDAQ: MRDN) group executive vice president who directed the personnel activities of the company through more than 20 bank and several non-bank mergers, has retired after 33 years of service, the company announced today.

At the time of his retirement, Hoverter was responsible for human resources, government affairs, legal affairs, corporate communications, and was a member of the executive staff of Meridian's chairman and chief executive officer, Samuel A. McCullough. Over the course of his career,

he also had responsibility for community relations, advertising and corporate planning.

According to McCullough, Hoverter will continue to serve as a consultant for corporate staff-related projects.

Hoverter began his banking career in 1957 as a teller and administrative trainee with Mt. Penn Trust, which was merged into Berks County Trust Co. He joined the personnel department in 1961, was named assistant personnel manager in 1963, and promoted to personnel manager in 1964, the year Berks County Trust became American Bank, a Meridian predecessor. He was named assistant vice president in 1972, senior vice president in 1978, executive vice president in 1984, and group executive vice president in 1988.

From 1964 to the present, Hoverter managed and directed human resources for the company as it grew from a $177 million bank with nine offices and 482 employees to a nearly $12 billion financial services corporation with more than 200 banking offices, 16 subsidiaries with nationwide operations and more than 6,000 employees.

Throughout his career, Hoverter has been recognized for his expertise in the personnel field as an innovator in the human relations aspects of mergers and acquisitions. In 1969, he was on loan for one year to the federal government in a program with the National Alliance of Businessmen.

"Dick's role in our company has been unique because of his mix of talents and insights," McCullough said. "He has been a trusted advisor and friend to me and to many other employees throughout the company."

Hoverter's professional affiliations have included the Manufacturers Association of Berks County, the Berks County Chamber of Commerce, the Pennsylvania Bankers Association, the American Bankers Association, the American Society of Personnel Administration, and the American Society of Training Directors.

NEW YORK (JAN. 18) PR NEWSWIRE - Shell Gas Nigeria B.V., acting on behalf of the Nigeria LNG Project, has exercised its purchase options for the two Swedish-built LNG carriers, namely hull number 559 and 564, owned by Zenit companies.

The ownership of the two vessels was transferred on Jan. 10 to a recently formed Bermuda company, Enellengee Ltd., a subsidiary of Nigeria LNG Ltd.

The parties involved in the transaction concluded the transfer at a ceremony at Shell Centre, London, today.

The purchase has been financed initially by a loan facility to Enellengee Ltd. from a banking consortium comprising Citibank N.A., Credit Lyonnais and Hong Kong Shanghai Banking Corp. Ltd. The loan facility will also be used by Enellegee Ltd. for the refurbishment of the two Swedish-built ships and the purchase and refurbishment of a further two vessels.

It is Enellengee Ltd.'s intention that LNG 559 and LNG 564 will be initially time-chartered over a four-year period to two LNG sellers in the Far East. Heads of agreement have already been signed for this purpose and formal time charters are expected to be executed in the near future. The ships will enter service in the Far East following refit and refurbishment.

In 1995 the ships are intended to commence operations for the transportation of LNG from Nigeria to customers in Europe and the U.S. East Coast.

#90018p0170 01/18/1990 ~PR Newswire

DES MOINES, IA (JAN. 18) PR NEWSWIRE - Oliver H. Hagen, president and chief executive officer, announced today that First Interstate of Iowa Inc. (NASDAQ: FIIA), a multi-bank holding company, recorded net income of $12,658,000, or 84 cents per share fully diluted, for the year ended Dec. 31, 1989 compared to $3,177,000, or 27 cents per share, for 1988. The company's 1989 earnings were the highest in its 20-year history.

First Interstate of Iowa earned $3,114,000, or 21 cents per share fully diluted, for the three months ended Dec. 31, 1989, which was a 3.4 percent increase from $3,013,000 for the corresponding quarter in 1988.

Upon announcing the company's record earnings, Hagen stated, "First Interstate of Iowa's return on average equity of 18.81 percent and return on average assets of 1.12 percent reflect the record earnings achieved in 1989. The company's excellent operating results were accomplished through improved credit quality, higher net interest income and lower operating expenses. It is evident Iowa's vastly improved economy and the extraordinary efforts of our employees have resulted in the company's full recovery from the credit quality and earnings problems associated with the farm crisis of the mid-1980's."

Hagan went on to note the 1989 net loan losses amounted to only $955,000, or .16 percent of average loans. The related loan loss expense was

reduced 57 percent from 1988 to $956,000. The improvement in credit quality was also evidenced by the 18 percent reduction in nonperforming loans to $10,819,000 during 1989. The company continued to maintain a strong allowance for loan losses, which amounted to 131 percent of nonperforming loans and 2.39 percent of total loans at Dec. 31, 1989.

Net interest income increased 13 percent to $41,754,000 in 1989 from $36,956,000 for the previous year. The higher level of net interest income earned in 1989 was reflected in the net interest margin, which increased to 4.24 percent from 4.08 percent for 1988. Operating expenses declined 9.3 percent, or $4,768,000, in 1989 as a result of a $6,785,000 reduction in losses associated with 1988 litigation.

In his closing remarks, Hagen said, "I am very pleased our company achieved its goal of exceeding 1988's $9,961,000 of net income from normal operations. It was a goal we established in early 1989 and one which we were determined to achieve. We will continue to position the company so we can provide superior service and products to our customers while building a foundation on which to enhance our present level of financial performance."

First Interstate of Iowa owns the controlling interest in 13 Iowa banks and a computer service company. The 13 banks are located in Algona, Cresco, Des Moines, Estherville, Fort Dodge, Greenfield, Kalona, Marengo, Mason City, Sigourney, Sioux City, Spencer and Urbandale.

PITTSBURG, TX (JAN. 18) PR NEWSWIRE - Pilgrim's Pride Corporation (NYSE: CHX), an east Texas-based chicken firm, today reported net sales of $162.7 million for the first quarter ended Dec. 30, 1989, a 9 percent increase

over net sales of $149.9 million for the comparable period in fiscal 1989. Net income for the quarter totaled $209,000, or $.01 per share, compared with income for the previous year's quarter of $867,000 or $.04 per share.

According to Lonnie A. "Bo" Pilgrim, chairman and chief executive officer, lower chicken prices offset in part by improved results from the further processed and prepared foods operations, lower feed costs and improved results from the company's egg operations caused the decrease in operating results compared to the same quarterly period last year.

Pilgrim's Pride Corporation is the fifth largest producer of poultry products and the 18th largest egg producer in the United States, producing more than 825 million pounds of dressed poultry and 41 million dozen table eggs annually. Pilgrim's Pride now employs more than 7,800 persons and operates processing plants, distribution centers, hatcheries and feed mills in Texas, Arkansas, Oklahoma, Arizona and Mexico.

Products are sold under the "Pilgrim's Pride" label to supermarkets, fast food chains and food service customers. The company's primary distribution is through retailers and fast food outlets in the Central, Southwestern and Western United States and through the food-service industry nationally.

MORRIS PLAINS, N.J. (JAN. 18) PR NEWSWIRE - Warner-Lambert Co.'s (NYSE: WLA) Consumer Health Products Group today announced national introduction of Fresh 'n Brite denture toothpaste, the first two-layer gel/paste in the denture toothpaste category.

Fresh 'n Brite combines the breath-freshening of a gel with the stain removal and whitening power of a paste. It has received the "ADA

Acceptable" seal from the American Dental Association.

Fresh 'n Brite will compete in the $30 million U.S. denture toothpaste market. The total denture cleanser market in the United States is projected to grow to about $170 million during 1990. In 1988, the gel/paste segment accounted for about 20 percent of sales.

"We're confident that Fresh 'n Brite will be welcomed by the 31 million Americans who wear dentures," said Kathryn Fredell, senior product manager for Fresh 'n Brite, Consumer Health Products Group.

"The introduction of Fresh 'n Brite represents a terrific opportunity," said Fredell. "One product has dominated the denture toothpaste market but only because there has been no serious competition. With a superior product and an aggressive promotional effort, Fresh 'n Brite should become a major force in the market."

Beginning today, 3 million trial-size samples of Fresh 'n Brite will be distributed nationwide along with cents-off coupons. Many of these samples and coupons will be placed in packages of Efferdent, Warner-Lambert's market-leading denture cleanser. The association with Efferdent will be reinforced to consumers in package graphics, sampling and other promotional activities. The decision to associate the products stems from research showing that two of every three denture wearers soak and brush their dentures, the cleaning method recommended most by dentists. An even larger percentage of Efferdent users, about 80 percent soak and brush.

Other leading products marketed by the Consumer Health Products Group of Warner-Lambert are: Listerine antiseptic and Listermint mouthwashes, Lubriderm skin lotion, Benadryl antihistamine and Schick razors and blades.

Warner-Lambert is a worldwide company devoted to developing, manufacturing and marketing quality health care and consumer products. It employs approximately 34,000 people.

MINNEAPOLIS (JAN. 18) PR NEWSWIRE - Pillsbury Inc., a subsidiary of Grand Metropolitan PLC, announced today a $140 million program of investment in product quality, customer service and cost reduction, which will strengthen the strategic position of its three grocery businesses -- Bakery Products, Green Giant and Pizza.

To be implemented over the next 18 months, the program is the latest step in Grand Met's strategy to reshape Pillsbury as a key competitor in the 1990s.

This major investment will finance the expansion and modernization of some plants and distribution centers, the realignment and consolidation of several leading product lines and the closing of some facilities.

The program will result in the elimination of up to 1,300 positions, the majority of which will occur in 1991. Some 800 new jobs will also be created during the program's 18-month period.

Ian A. Martin, chairman and chief executive officer of Pillsbury, said, "This is a further investment in the continued enhancement of a company that is becoming steadily more competitive."

Martin said the announcement of any plant and distribution center closings was made well ahead of actual shutdowns to allow employees affected to gain maximum benefit from job transition assistance.

"Every employee affected by these actions will receive a comprehensive benefits and severance package," Martin said. "All employees will be offered extensive job transition assistance which includes outplacement counseling, testing and skills assessment, benefit counseling and education workshops."

Pillsbury is part of the Food Sector of Grand Metropolitan PLC, an international food, drinks, and retailing company with annual sales of over $15 billion.

WOODLAND HILLS, CA (JAN. 18) PR NEWSWIRE - Brajdas Corp. (NASDAQ: BRJS) today reported a net loss of $416,944, or $.14 per share, for its third fiscal quarter ended Nov. 30, 1989. This contrasts with net income of $265,969, or $.09 per share, in the comparable quarter a year earlier.

Sales for the third quarter were $14,738,824 versus $15,239,177 a year earlier.

For the nine months ended Nov. 30, 1989, Brajdas' net loss was $783,346, or $.27 per share, on sales of $46,285,697. In the year- earlier nine-month period, the company recorded net income of $1,953,295, or $.66 per share, on sales of $48,404,669.

Allan Klein, corporate vice president, operations and administration, attributed the quarter's loss to deteriorating gross profit margins and increased selling, general and administrative expenses in the face of weak sales.

"We have taken further steps to curtail this downward spiral," Klein said, "including closing all Bradas Microtech branches except Santa Clara. With the continued slow to no growth outlook for the electronics industry, we are currently reviewing the need for additional cutbacks in overhead expenses."

He noted, however, that its Cypress Electronics division opened a new branch during the quarter in Huntsville, Ala., to service Florida, Georgia and Alabama territories, which have been experiencing stronger market conditions. Also, the Lynkers product line, sold by the BEC Division, is surpassing Brajdas' projected expectations.

Brajdas Corp. is primarily engaged in the wholesale distribution of electronic components through its principal division, Cypress Electronics, which is based in Santa Clara, Calif. Ranked as the 22nd largest electronics distributor in the United States, the company maintains regional sales offices and warehouse facilities in 11 cities.

CHICAGO (JAN. 18) PR NEWSWIRE - Inland Steel Industries Inc. (NYSE: IAD) today reported consolidated 1989 net earnings of $119,697,000 or $3.15 per common share, contrasted with 1988's record results of $262,078,000 or $7.39 per share.

Although consolidated fourth quarter net earnings were $6,708,000 or nine cents per share, the company incurred a pre-tax loss of $2,717,000. The fourth quarter net earnings were down 63 percent from the preceding quarter, and contrasted to the $57,539,000 or $1.63 per share of the fourth quarter in 1988.

Chairman Frank W. Luerssen said the slowdown in domestic economic growth sharply affected the company's fourth quarter business and led to disappointing results for the year.

Consolidated sales slightly exceeded the previous year's record of $4,068,015,000, totaling $4,146,698,000 in 1989. The increase resulted from an expansion of the service center business segment, which registered

record 1989 sales.

Consolidated fourth quarter sales were $953,542,000, 8 percent below the comparable 1988 period, which totaled $1,037,065,000.

HOUSTON (JAN. 18) PR NEWSWIRE - Transco Exploration Company, managing general partner and majority owner of Transco Exploration Partners, Ltd. (NYSE: EXP), announced today that it has received final approval from the Texas Parks and Wildlife Department and other regulatory authorities to submerge an out-of-service production platform in the Gulf of Mexico as part of the state's new "Rigs to Reefs" program. This is the first such artificial reef to be established offshore Texas under the program.

Located approximately 90 miles offshore Galveston on High Island Block A-492, the 210-foot structure will be toppled and submerged in 195 feet of water to create an artificial reef environment and enhance fish habitation in the Gulf.

TXP ceased production on High Island A-492 in November 1987, and the deck section and production facilities were removed from the structure in December 1989. The remaining subsurface jacket section will create the

artificial reef.

"TXP has been an active participant for many years in the development of energy resources in the Gulf of Mexico," said John H. Lollar, president and chief operating officer, Transco Exploration and Production Company. "The 'Rigs to Reef' program allows Transco and other companies to turn otherwise unusable structures into artificial reefs that will have lasting value in helping to replenish fishing resources, develop reef mass and enhance marine life in the Gulf of Mexico."

In addition to donating the offshore structure, TXP is also making a financial contribution to the "Rigs to Reefs" program. A portion of the funds will be used to install and maintain navigational buoys over the Transco 492 artificial reef until new nautical maps are drawn.

ANNANDALE, VA. (JAN. 18) PR NEWSWIRE - Ameribanc Investors Group (NASDAQ-NMS: AINVS), parent company of Ameribanc Savings Bank, in response to inquiries regarding the recent drop in its share price, announced that it expects earnings for the year ended Dec. 31, 1989, to be consistent with prior estimates by the company of approximately $7.2 million, or approximately $1.10 per share on a fully diluted basis.

Commenting on the pervasive negative reports about the thrift industry generally, which have even extended to Ameribanc Savings Bank, specifically, Arthur C. Weid, chairman of the board of trustees said: "We are concerned that recently the company's stock price has been depressed as a result of pessimistic evaluations of the thrift industry as a whole, rather than a specific evaluation of Ameribanc itself. Our preliminary data for the 1989 earnings has not indicated any factors that would adversely impact year-end results. Our fourth quarter earnings were on target and should produce year-end earnings at approximately the level of our previous estimates.

Weid continued: "We believe the fundamentals of our company remain very sound and we are continuing our efforts to sell the company. We are pleased with our deposit growth and our cost of funds in comparison with our competitors. As to asset quality, we do not anticipate any surprises as a result of the widely reported softening of the Washington area commercial real estate market. We do not expect that year-end figures will show any increase in the percentage of substandard assets or delinquent loans compared to the previous quarter and we are comfortable with the level of loss reserves. The bank, as reported to the appropriate regulatory authorities, is in compliance with all three of the

new regulatory capital requirements (core, tangible and risk- based). I personally am at a loss to correlate the recent weakness in our share price with the strengths demonstrated from last year's operations. Our expected return on assets of 60 basis points, a critical measure of performance, should continue our historical record of high performance when compared to our peers."

The company stated that it anticipates release of its fourth quarter and year-end earnings in two weeks.

#90018p0191 01/18/1990 ~PR Newswire

MIAMI (JAN. 18) PR NEWSWIRE - Carnival Cruise Lines, Inc. (AMEX: CCL) reported record revenues of $1.148 billion for its fiscal year ended Nov. 30, 1989, reflecting a 91 percent increase from $599.7 million for fiscal year 1988. Net income was $193.6 million ($1.44 EPS) versus $196.4 million ($1.46 EPS) for the 1988 fiscal year.

The company also announced that it is increasing its regular quarterly dividend to 12 cents from 10 cents per share. The dividend has been declared for the fiscal quarter ending Feb. 28, 1990, payable March 14, 1990, to stockholders of record Feb. 28, 1990.

The 1989 revenue increase was primarily attributed to additional capacity provided by cruise ships of Holland America Line and its tour businesses acquired in January 1989, and to the opening of Carnival's Crystal Palace Resort & Casino and the acquisition of an adjacent hotel property now incorporated into the casino complex. The slight decline in net income reflects increased interest expense and reduced interest income associated with the use of funds for the Holland America acquisition, and higher costs incurred in connection with the start-up of the resort and casino.

Net income for the fourth quarter ended Nov. 30, 1989, was $21.3 million ($0.16 EPS) on revenues of $231.1 million compared to net income of $42.1 million ($0.31 EPS) on revenues of $130.5 million posted during the final quarter a year earlier. The results for the quarter were impacted by the seasonality of Holland America Line and its afffiliated companies, and additional expenses incurred in connection with the opening of the final phase of Carnival's Crystal Palace. Additionally, the fourth quarter of 1988 benefited from a non-recurring gain of approximately $6 million.

MT. LAUREL, NJ (JAN. 18) PR NEWSWIRE - Avant-Garde Computing Inc., a maker of network monitoring and management systems, reported today that yesterday its plan of reorganization was confirmed by the U.S. Bankruptcy Court in Trenton, N.J.

Confirmation came 180 days after it filed for protection under the provisions of Chapter 11 of the U.S. Bankruptcy Code. In accordance with the provisions of the plan of reorganization, the company will sell substantially all of its assets to Boole & Babbage Inc. (NASDAQ: BOOL), of Sunnyvale, Calif., and Boole & Babbage will assume certain liabilities of Avant-Garde. Closing of this transaction is expected to occur on Jan. 31, 1990.

Thereafter, Avant-Garde will commence an orderly liquidation in accordance with its confirmed plan. Boole & Babbage will pay Avant-Garde $4 million plus an amount equal to net worth of Avant-Garde on Jan. 31, 1990, as adjusted pursuant to the agreement between Avant-Garde and Boole & Babbage.

Shareholders of record on Jan. 17, 1990, will receive two payments for each share of stock held. The first payment, which sould be sent by Avant-Garde within approximately 45 days, will be $0.375 per share. The final payment will be made after all expenses and claims of the bankruptcy

proceedings are satisfied. The value and time of that payment can only be estimated at this time. Avant-Garde's preliminary estimates, however, indicate that the total payment received by shareholders under the plan should exceed $.52 and may be as much as $.62.

HARRISBURG, PA (JAN. 18) PR NEWSWIRE - Harsco Corp. (NYSE: HSC) announced todat that the U.S. Army has exercised one of the two remaining options (132 vehicles each) for M9 Armored Combat Earthmovers (ACE) currently manufactured by BMY Combat System, a division of Harsco's Defense Group.

As a result, Harsco will record a fourth quarter 1989 loss provision of $21 million on this option. As previously reported, Harsco has filed a claim as to the untimely exercise of the ACE options and expects to file a similar claim due to the exercise of this option. It is the company's position that the unit price on option three and all subsequent options is subject to renegotiation. A similar loss could be incurred on the remaining, unexercised option unless Harsco's claims are favorably resolved beforehand.

Harsco Corp., a diversified industrial company, conducts its business through 13 divisions and has 21 varied classes of products and services, principally for defense, industrial, commercial, and construction applications.

#90018p0197 01/18/1990 ~PR Newswire

NORFOLK, VA. (JAN. 18) PR NEWSWIRE - Sovran Financial Corporation (NYSE: SOV) today reported net income of $269.2 million for 1989, an 11 percent increase over the $243.1 million earned in 1988. On a per share basis, net income was $4.49 for 1989, 10 percent above the $4.09 earned in the prior year.

Net income for the fourth quarter of 1989 of $72.6 million was 7 percent above the $68.1 million earned in the same quarter of 1988. On a per share basis, net income for the fourth quarter of 1989 was $1.21, a 5 percent increase over the $1.15 for the prior year's fourth quarter.

Albert B. Gornto, Jr., chairman of the board and chief executive officer,

attributed the earnings increases for the year and for the fourth quarter principally to higher levels of net interest income and modest growth in noninterest expenses. The increase in net interest income was primarily the result of higher levels of earning assets, particularly loans. Noninterest expenses were essentially unchanged in the fourth quarter from the same quarter last year and increased 5 percent for the full year of 1989.

Return on average assets (ROA) for 1989 was 1.14 percent, unchanged from the 1988 ratio, while return on average shareholder's equity (ROE) of 17.71 percent was slightly lower than the previous year's ratio of 17.89 percent. For the fourth quarter, annualized ROA of 1.18 percent and ROE of 18.40 percent were below exceptionally strong ratios of 1.25 percent and 19.41 percent for the respective periods in 1988.

The allowance for loan losses of $196.6 million on December 31, 1989 and $180.0 million at year end 1988 represented 1.18 percent of total loans for both years. The allowance at the end of 1989 was 2.6 times the level of year-end nonperforming loans.

Nonperforming assets decreased 20 percent to $114.0 million at December 31 1989, or .68 percent of total loans and other real estate, from $142.4 million or .93 percent at the end of 1988. The decline was primarily due to the sale of an office building in Richmond, Virginia, during the fourth quarter of 1989. Sovran acquired the building through foreclosure in April 1988.

Net charge-offs for 1989 were $72.4 million or .45 percent of average total loans, compared with $65.4 million for 1988, which also represented .45 percent of average total loans. For the fourth quarter of 1989, net charged off loans of $22.1 million were below the $26.9 million for the same period in 1988. As a percent of average total loans, annualized net charge-offs for the fourth quarter of 1989 were .53 percent, a decline from .71 percent for the fourth quarter of 1988.

Total assets on December 31, 1989 were $25.4 billion, 13 percent higher than on the same date in 1988. Earning assets of $22.4 billion at the end of 1989 were up 14 percent over 1988. Loans, net of unearned income, of $16.7 billion at December 31, 1989 exceeded loans on the same date last year by 9 percent. Deposits totaled $18.7 billion at the end of 1989, a 7 percent increase over the December 31, 1988 level. Equity capital at the end of 1989 was $1.6 billion, 13 percent above the level a year ago and represented 6.3 percent of total assets.

#90018p0198 01/18/1990 ~PR Newswire

NEW YORK (JAN. 18) PR NEWSWIRE - Pfizer Inc. (NYSE: PFE) today reported a 9 percent sales increase and a 6 percent decline in earnings in the fourth quarter.

Worldwide sales for the quarter were $1,494 million, compared to $1,368.2 million in 1988. Net income for the quarter was $133.3 million, compared to $141.6 million the previous year.

Earnings per share for the quarter were $0.79, down 6 percent from $0.84 in 1988. Continued strengthening of the U.S. dollar reduced fourth-quarter sales by 2 percentage points and turned what would have been modest income growth into a 6 percent decline.

For the full year 1989, sales were $5,671.5 million, a 5 percent increase over the $5,385.4 million reported for 1988. Net income was $727.3 million, an 8 percent decline from the $791.3 million in 1988. For 1989, earnings per share were $4.31, an 8 percent decline from the $4.70 reported last year.

Pfizer's decline in net income in 1989 is partially a result of high marketing expenses to support the launches of several new products and continued strong investment in the company's research pipelines. The effect of the strengthening U.S. dollar in 1989 reduced sales growth by 3 percentage points and approximately doubled the company's earnings decline. The year-to-year comparison was also negatively affected by about $35 million in one-time gains reported in "other income" in 1988.

Sales gains were reported for the quarter in all of Pfizer's business segments: Health care, 9 percent; consumer products, 12 percent; specialty chemicals, 6 percent; animal health, 9 percent; and specialty minerals, 11 percent. Within the health care segment, pharmaceutical sales increased 11 percent, and sales of hospital products 3 percent.

Edmund T. Pratt, Jr., chairman and chief executive officer, said, "We are very pleased with the reception by the medical community of our two most recently launched products, Procardia XL and Diflucan."

"In just three months on the U.S. market, Procardia XL reached about $40 million in sales while Diflucan, a unique antifungal drug recently introduced in several major international markets, achieved sales of some $44 million," Pratt said. "These products, combined with our other cardiovascular drugs, Cardura and Minipress XL (newly introduced abroad); our new antibiotic drugs, Unasyn and Sulperazon; our new dental rinse, Plax; and our innovative products for the paper industry; contributed more than $520 million in sales in 1989.

"But our expenses have grown faster than sales because the cost of launching these new products is substantial and our commitment to research and development remains vigorous," Pratt explained. "Although these investment expenses will again be high in 1990, the sales momentum of our new products is increasing. Moreover, several other exciting products are expected to receive approval this year. We have already introduced one, Norvasc for the treatment of angina and hypertension, in the United Kingdom and Ireland.

"In fact," Pratt concluded, "Pfizer has never been better poised to enter a new decade. Our investment of more than $3 billion in R&D during the '80s has built our strongest research pipeline ever in all our businesses -- a pipeline that is just beginning to reach the marketplace."

#90018p0199 01/18/1990 ~PR Newswire

CAMBRIDGE, MA (JAN. 18) PR NEWSWIRE - Biogen, Inc. (NASDAQ: BGEN) and Genentech, Inc. (NYSE: GNE) have entered into a cross-license agreement for human recombinant gamma interferon in the United States. Under the agreement, each company will be able to sell its gamma interferon product in the United States for specific therapeutic and diagnostic applications. At the same time, Biogen granted Genentech a non-exclusive worldwide license for process patents relating to the secretion of proteins.

Biogen has conducted clinical trials in the United States with Immuneron(R) gamma interferon for treatment of two conditions, rheumatoid arthritis and venereal warts. Later this year, Biogen expects to complete a Phase II trial in the United States with Immuneron as treatment for venereal warts. Biogen's gamma interferon product is being developed in the United States through the Biogen Medical Products Limited Partnership.

Genentech has filed a Product License Application with the Food and Drug Administration to seek approval to market Actimmune(tm), gamma interferon to treat patients with chronic granulomatous disease (CGD). CGD is a rare, inherited disorder which is characterized by an impaired immune system. In addition, Genentech is conducting Phase III clinical trials to evaluate Actimmune's usefulness in treating infections in patients who have endured severe trauma, and as an adjunct therapy in the treatment of patients with malignant melanoma and small-cell cancer of the lung.

Biogen is a leading biotechnology company principally engaged in developing genetically engineered pharmaceuticals. As a result of its early research, Biogen now derives revenues from five products being sold

by its licensees in various countries. Biogen currently directs its research and development into areas where the Company has particular strength -- AIDS, inflammation and selected cancers.

Genetech, Inc. is a leading biotechnology company focusing on the development, manufacture, and marketing of pharmaceuticals produced by recombinant DNA technology. Genentech markets two products that produce over $100 million in sales each, Protropin(R), human growth hormone, for the treatment of children with growth hormone inadequacy, and Activase(R), t-PA, a clot dissolving drug for the treatment of heart attacks.

#90018p0201 01/18/1990 ~PR Newswire

CHICAGO (JAN. 18) PR NEWSWIRE - Harris Bankcorp today announced that its 1989 net income was $52,294,000, down from $90,098,000 in 1988. The primary reason for the decline was a special $50 million addition to the corporation's allowance for possible losses on lesser developed country credits reported in the third quarter of 1989. Adjusting for the special charge to earnings, Harris Bankcorp would have recorded net income of $90,294,000, essentially the same level of earnings on a year- to-year basis.

Fourth quarter net income was $28,314,000, up 62 percent from 1988 fourth quarter earnings of $17,526,000 when the corporation settled a long-standing dispute with the U.S. Department of Labor. In the absence of this settlement, quarterly earnings would have risen 22 percent. B. Kenneth West, chairman and chief executive officer, attributed the remainder of the favorable earnings comparison primarily to higher levels of non-interest income during the recent quarter. Fourth quarter return

on assets increased to .92 percent from .63 percent in the comparable 1988 quarter.

Net interest income on a fully taxable equivalent basis amounted to $108.0 million during the fourth quarter, a 2 percent improvement from the same quarter one year ago. Average earnings assets rose 11 percent from $9.37 billion to $10.41 billion in the current quarter. Net interest margin, the other principal determinant of net interest income, narrowed from 4.52 percent to 4.13 percent in 1989. This reflected, in part, both a reduction in the level of non-interest bearing supporting funds and lower interest income on loans classified as non-performing.

Non-interest income rose 27 percent from the same quarter last year to $69.2 million. Trust revenue, charge card fees and service charges on deposits all experienced strong growth, while foreign exchange income declined. Miscellaneous sources of non-interest income increased by $11.2 million to $19.1 million primarily as a result of gains from sales of leased asset residuals and from a settlement with a third party involving a troubled credit.

Non-interest expenses were $112.1 million in the quarter, down $3.4 million or 3 percent from the 1988 fourth quarter. During last year's fourth quarter, the corporation recognized approximately $10.6 million of expense for settlement of the Department of Labor dispute. After adjustment for this non-recurring cost, non-interest expenses would have increased 7 percent quarter-to-quarter.

Income tax expense increased by $4.9 million in the fourth quarter, primarily reflecting higher pretax income.

ERDING, WEST GERMANY (JAN. 18) PR NEWSWIRE - Interflug, the airline of the German Democratic Republic, has reached agreement in principle with Amadeus to become a partner in the new travel computer reservation system established by Air France, Iberia, Lufthansa and SAS.

This important development was announced today by Curt Ekstrom, president and CEO of Amadeus, at the official inauguration of the $200 million computer center in Erding, near Munich. It is expected to be the first of a series of deals that will link airlines, railways and hotels in the newly democratized eastern countries with the Amadeus Global Travel Distribution network.

At the same event, Air Afrique officially signed documents in the presence of 500 international guests attending the opening, conducted by Bavarian Minister President Dr. Max Streibl, giving the African airline membership in Europe's largest computer reservations system. The signing brings to 23 the number of partners in Amadeus, which started in June 1987. More than 100 additional airlines are in the process of becoming participants in the system, joining the four founding shareholders.

So far, 20,000 European terminals are being served with the various Amadeus informational products and booking products. When it is fully operational, the Amadeus global core will be able to serve up to 100,000 terminals in travel agencies worldwide.

At the same time as developing its computer center in Europe, Amadeus has established links with CRSs on other continents, such as Abacus in South East Asia. These links will grow to form a global ring, providing service to travellers and travel agents on a total worldwide basis. Talks are in progress with a number of other CRS organizations on the development of this concept.

WILMINGTON, DE (JAN. 18) PR NEWSWIRE - ICI Advanced Materials has been named the primary supplier of superconductive ceramic materials in a contract awarded to an international consortium by the United Kingdom's Department of Trade & Industry (DTI).

DTI is funding 50 percent of the contract, which was granted for the testing and evaluation of superconductors as well as microwave devices, sensors and actuators, and has a total value of $2.6 million (pounds 1.65

million). Other organizations in the consortium include Plessey Research, Lucas Automotive Systems and Birmingham University. The announcement was made by Charles (Sid) Saunders, ICI Advanced Materials vice president-New Business Development, at SC Global 90/Expo, Long Beach, Calif.

Under the contract, the consortium will develop microwave devices, sensors and actuators, and identify superconductor and microwave device applications. ICI will produce superconductive materials in complex shapes for test and evaluation by Plessey -- an expert at microwave testing and measurement. Lucas Automotive Systems will perform testing of sensors and actuators and the University of Birmingham will perform design and basic R&D. Research will focus on three broad areas: new compositions displaying higher transition temperature; fabrication of RF and microwave devices; sensors and actuators.

ICI Advanced Materials is a business unit of ICI Americas with international headquarters in Wilmington. The company specializes in superconductive ceramics processing, properties research and applications.

NEW YORK (JAN. 18) PR NEWSWIRE - Frederick Thompson has been named president of Bozell Public Relations New York, Linda Robinson, president and CEO of Robinson, Lake, Lerer & Montgomery announced today. Thompson will join Bozell on Feb. 1. Bozell Public Relations is a division of Robinson, Lake, Lerer & Montgomery Inc.

Thompson comes to Bozell from Manning, Selvege & Lee where he was senior vice president, consumer products and services and the creative and strategic director for the past three years. Accounts under his management included Procter & Gamble, VISA, Universal Studios, the Bahamas Wines of Germany and the Barcelona Olympics, among others.

Previously, Thompson was senior vice president, group director at Burson-Marsteller. At Burson he was responsible for major consumer and business-to-business accounts. In addition, he was instrumental in the successful start-up of Burson's Lifestyle/Sports Marketing Group.

"Over the past three years Bozell Public Relations has built a strong base of clients, with particular expertise and success in marketing communications. Fred's breadth and depth of experience, his leadership, and his creative and fresh approach are well know in the industry. We know Fred will be a great asset to Bozell," Robinson said.

Thompson stated, "Bozell is an agency that shares my vision and, through

its approach to client services, has already embarked on the mission of how marketing communications must be positioned in the 1990s -- a discipline that encompasses a broad range of issues facing a client from environmental and health concerns to community relations. I have been impressed with the high degree of service and professional competence of Bozell, and I am excited about the opportunity of working with such a talented group."

Robinson also announced today that Barbara Molotsky, senior vice president and general manager of Bozell Public Relations Chicago has been named president of that office.

"In the year that Barbara has been with us, Bozell Public Relations Chicago's business has more than doubled. Under her leadership, the Chicago office has earned a prominent place as one of the most respected in the community," Robinson said. "Barbara's appointment recognizes her significant contribution to the company."

MELVILLE, N.Y. (JAN. 18) PR NEWSWIRE - Spire Realty & Development, a Melville, N.Y.-based real estate firm with projects and properties nationwide, has announced the acquisition of more than five percent of Wedgestone Financial (NYSE: WDG), a Boston area real estate investment trust. Spire has made a 13D filing with the Securities & Exchange Commission regarding the transaction. Spire now holds 290,000 of 5.8 million outstanding shares of Wedgestone Financial.

"Our share in Wedgestone represents a strengthening of our existing commitment to the greater Boston area and entire New England region," said Ed Lapidus, one of Spire's two principal owners. "We haven't made any further plans regarding Wedgestone, but we're keeping all of our options open," he said.

Spire Realty & Development has been active in the Boston and New England real estate markets for several years. They are currently a bidder in the selection process to determine the developer of the highly coveted Sargents Wharf site in Boston Harbor. Spire will also build a shopping mall in Millbury, Mass. near the Massachusetts Turnpike, which will be named Spire Town Center. Spire Realty is also a participant in the Times Square redevelopment project in New York City, with a large project to be announced in the near future.

In 1988, Wedgestone reported a net loss of over $11 million on revenues of $11.85 million. This included the establishment of a $15 million allowance for losses caused by declining values of properties securing loans or owned as a result of foreclosure.

SAN DIEGO (JAN. 18) PR NEWSWIRE - General Instrument Corp.'s (NYSE: GRL) VideoCipher Division is now shipping its new VideoCipher II Plus Descramblers for integration into home satellite TV systems, the company reported.

Initial shipments are fulfilling the first orders from the Division's 21 licensed manufacturers.

Approximately 50 percent of the modules manufactured in January will be VideoCipher II Plus units, the company said. As part of a manufacturing ramp-up, company officials said VideoCipher II Plus production is expected to reach 100 percent by the end of February.

"These initial shipments kick off an industry-wide transition to the VideoCipher II Plus higher security environment, which will promote the long-term growth and health of the home satellite TV market," said Dr. Jerry Heller, Division executive vice president of encryption products and advanced development.

VideoCipher II Plus capability demonstrations are scheduled to be held at the General Instrument Corp. exhibit booth at the SBCA/STTI Las Vegas '90

trade show, Jan. 22-24, at Bally's Hotel in Las Vegas.

VideoCipher II Plus is a second generation product of the VideoCipher II descrambling system, which is the North American home satellite TV industry's de facto encryption standard. VideoCipher II descramblers are now used by approximately 650,000 households to receive the widest range of authorized subscription programming available in the television market today.

In addition to significantly enhancing system security, VideoCipher II Plus technology expands the number of tier bits available for delivery of subscription services from 56 to 256, which means a nearly limitless number of new channels for home satellite TV viewing. VideoCipher II Plus technology also expands the subscriber capacity for the system to 50 million households.

General Instrument is the industry leader in cable TV electronics, coaxial cable and satellite TV encryption systems. The company's primary strategies are directed toward communications systems. The company's common stock is listed on the New York, Midwest, Pacific and London stock exchanges.

#90018p0225 01/18/1990 ~PR Newswire

LATROBE, PA. (JAN. 18) PR NEWSWIRE - Kennametal Inc. (NYSE: KMT) today reported that sales for the December 1989 quarter totaled $136 million, up 22 percent from the $111 million of sales in the same quarter a year ago.

Excluding sales of Garrett Industrial Supply Co., a company acquired by Kennametal in June 1989, sales were up 7 percent from the prior year. Net income for the December 1989 quarter totaled $6.0 million or 58 cents per share, compared with $5.8 million or 56 cents per share for the December 1988 quarter.

For the six months ended December 1989, Kennametal earned $12.5 million or $1.20 per share, up 6 percent over earnings in the same period last year of $11.8 million or $1.14 per share. Sales rose 22 percent to $271 million for the six months ended December 1989, compared with $223 million in the prior year. Excluding Garrett Industrial Supply, sales were up 6 percent from the prior year.

Quentin C. McKenna, chairman of the board and chief executive officer, said that although sales increases occurred in most of the company's markets, the rate of growth in the United States continued a slowing trend

which began in the September 1989 quarter. Excluding Garrett Industrial Supply, domestic metalworking sales in the December 1989 quarter increased 5 percent over the same quarter a year ago but were down from the 6 percent growth rate experienced in the September 1989 quarter.

In reviewing results, McKenna noted that, as expected, the gross margin percentage has declined from the December 1988 quarter level primarily because of inclusion of Garrett Industrial Supply's lower gross margin percentage. Operating expenses have also increased over last year's level because of the acquisition of Garrett Industrial Supply as well as planned increases in spending in the areas of research and development, sales and marketing, and new software development. McKenna added that Garrett Industrial Supply had performed somewhat lower than expected through the first six months of fiscal 1990, primarily the result of lower sales during the period.

In looking to the March 1990 quarter, McKenna indicated that he expects Kennametal's traditional, domestic metalworking sales to be flat or slightly down from the March 1989 quarter. The company's recent acquisition of J&L America Inc. in January 1990 is expected to have a minor, negative impact on earnings in fiscal 1990. Given this, he stated earnings for the March 1990 quarter should exceed earnings in the December 1989 quarter but fall below the March 1989 level.

DETROIT (JAN. 18) PR NEWSWIRE - ANR Pipeline Company (ANR) and Northern Indiana Public Service Company (NIPSCO) have completed construction of a second interconnection between the two companies' systems.

The new 20-inch-diameter pipeline interconnection was placed in service on Monday, Jan. 15, 1990. The project connects ANR's transmission line in Lake County, Ind., to NIPSCO's distribution system in Highland, Ind., and thus improves the overall reliability of NIPSCO's system by providing increased volumes and pressures in a critical portion of its system.

In addition to giving NIPSCO additional flexibility in operating its gas system and increased access to lower-cost gas supplies, which benefits all of its customers, the new interconnection will provide additional benefits to the economy of northwest Indiana because industrial customers there will have additional natural gas supply options which will enhance their competitive position in their markets.

"This new interconnection will enable ANR to transport an additional 200 million cubic feet of natural gas per day into the NIPSCO system," said James F. Cordes, chairman and chief executive officer of ANR Pipeline Company.

"The capability exists to increase capacity to 300 million cubic feet per day with an expansion of the new interconnection," Cordes noted.

ANR Pipeline Company is a subsidiary of The Coastal Corporation (NYSE: CGP), a Houston-based diversified energy firm. Together with its subsidiaries, Coastal has $8 billion in assets and operations in natural gas transmission and storage, gas and oil exploration and production, refining and marketing, coal, trucking and independent power production.

ST. LOUIS (JAN. 18) PR NEWSWIRE - McDonnell Douglas (NYSE: MD) today announced two management appointments at its McDonnell Douglas Canada subsidiary: Gene Siddall was named president of McDonnell Douglas Canada and Les Gordon was named executive vice president.

Siddall replaces Garret G. Ackerson, who was appointed chairman of McDonnell Douglas Canada for the duration of the management transition.

In making the announcement, Joe B. Pirkle, vice president and general manager of Product Center Operations for Douglas Aircraft Co., said, "Both Gene and Les have demonstrated the kind of leadership and vision needed to broaden the contributions of McDonnell Douglas Canada to the success of our aircraft."

The subsidiary, which is based in Toronto, builds about 25 percent of the MD-80 airframe and makes components for the MD-11 tri-jet and the F/A-18 Hornet.

Siddall was formerly vice president and general manager of McDonnell Douglas' Tulsa, Okla., facilities. Prior to that, he spent seven years as vice president and general manager of McDonnell Douglas' electro-

mechanical division. Siddall joined McDonnell Douglas in 1957 as an associate engineer on the F-4 Phantom program.

Gordon was most recently vice president of operations for McDonnell Douglas Canada. Gordon, who joined the company in 1966 as an assistant to the vice president of administration, has also directed McDonnell Douglas Canada's material, program development and fiscal operations.

BLUE BELL, PA (JAN. 18) PR NEWSWIRE - RE/MAX realtors in the region are today introducing their Photo-Trieve System of shopping for homes.

Photo-Trieve is designed to provide maximum convenience and time savings for busy home buyers.

The system will provide home buyers with up to 10 full-color photographs of each RE/MAX listed home. Using pictures and information sent via telephone modem from a host computer in Blue Bell, each of the more than 100 RE/MAX offices in the tri-state area will be able to show clients up to 20 homes per hour in color, from the comfort of their RE/MAX offices. Color printouts of listed homes are available.

Agents will have access to up-to-the-minute information on mortgage rates from the system. They'll also be able to communicate with the computer by means of portable terminals, which can even work on their car phones.

#90018p0244 01/18/1990 ~PR Newswire

BOISE, ID (JAN. 18) PR NEWSWIRE - West One Bancorp (NASDAQ-NMS: WEST) reported fourth quarter earnings of $8.8 million, or 71 cents per share, a $1.5 million or 20 percent increase over fourth quarter 1988. Net income for the year ended Dec. 31, 1989, was $33.6 million, a $7.3 million, or 28 percent, increase over 1988. On a per-share basis, net income for the year ended Dec. 31, 1989, was $2.72, compared to $2.15 a year ago.

"West One Bancorp's performance improved in terms of almost all operating measurements in 1989. Earnings performance reflected strong economic conditions in the Northwest, loan growth and a high quality loan portfolio " said Daniel R. Nelson, chairman and chief executive officer. "We also made excellent progress toward accomplishing our long-term goal--to become

a major regional bank holding company serving the western states."

Net interest income for fourth quarter 1989, adjusted for tax-exempt income of commercial loans and state and municipal bonds, increased $4.0 million, or 12 percent, over fourth quarter 1988. The increase was attributable to average earning assets growth of $336.8 million, or 10 percent over the same period. The growth occurred in loans which averaged $2.5 billion in fourth quarter 1989, 20 percent above the same quarter a year ago. Loans represent the highest yielding component of earning assets and accounted for 69 percent of earning assets during fourth quarter 1989 compared to 63 percent during fourth quarter 1988.

Tax equivalent net interest income for the year ended Dec. 31, 1989, increased by $21.3 million, or 16 percent, over last year. Contributing factors were average earning assets which increased $339 million, or 10 percent, and a 21 basis point increase in net interest margin to an average of 4.23 percent for 1989.

The provision for credit losses was $2.3 million for fourth quarter 1989, a $0.5 million, or 18 percent, decline from fourth quarter 1988. For the year ended Dec. 31, 1989, the provision for credit losses was $6.8 million a 39 percent reduction from the $11 million expensed during 1988. Net charge-offs represented .48 percent of average loans for 1989 compared to .57 percent for 1988. At Dec. 31, 1989, the allowance for credit losses represented 1.82 percent of total loans and 158 percent of nonaccrual loans.

Nonperforming assets decreased $5.5 million to $34.6 million at Dec. 31, 1989, a 14 percent improvement from a year ago. As a percentage of total assets, nonperforming assets declined to .79 percent at Dec. 31, 1989, compared to 1.01 percent a year ago.

Noninterest income increased $2.8 million, or 27 percent in fourth quarter 1989 from a year earlier. For the year ended Dec. 31, 1989, noninterest income improved $8.4 million, or 21 percent over the same period a year ago due to increased business activities and restructured pricing for deposit services.

Noninterest expense increased $4.3 million or 14 percent in the fourth quarter 1989 from the same quarter in 1988. For the year ended Dec. 31, 1989, noninterest expense was $139.3 million, compared to $116.8 million in 1988. Noninterest expense for 1989 reflected a full year of activity for banks acquired under the purchase method late in 1988 and non-recurring expenditures attributable to renaming the company and its subsidiaries.

Total assets surpassed $4 billion for the first time in the company's history during 1989 and were $4.3 billion at Dec. 31, 1989, a 9 percent

increase from year-end 1988. Shareholders' equity increased to $272.5 million as of Dec. 31, 1989, a $26.3 million, or 11 percent, gain over last year.

The board of directors of West One Bancorp today declared a cash dividend of 22 cents per share on common stock outstanding to shareholders of record March 30. The dividend is payable April 19.

#90018p0245 01/18/1990 ~PR Newswire

WAUKEGAN, IL (JAN. 18) PR NEWSWIRE - Outboard Marine Corp. (NYSE: OM) announced today that sales for the three months ended Dec. 31, 1989 were $233 million or down 12 percent from sales of $264 million for the same period last year. Sales for last year's quarter have been adjusted to exclude sales from the discontinued Lawn-Boy and Cushman businesses which were sold in the fall of 1989.

An industry-wide decline in demand for U.S. marine products began in the spring of 1989 and continued through the summer, fall and into the winter. As a result, U.S. sales were down 17 percent in the quarter. International sales for the quarter were up 7 percent.

Worldwide sales by the boat group increased 12 percent over last year, primarily as a result of the acquisition of Chris Craft. Shipments of

domestic outboard motors were about 30 percent below last year in the quarter whereas retail sales of domestic outboard motors were down considerably less or approximately 10 percent below last year. As a result dealer inventories of outboard motors are below last year and should not restrict shipments once retail demand improves.

Primarily as a result of the continued low level of demand, the company incurred a loss for the quarter ended Dec. 31, 1989. The company normally incurs a loss in this quarter as a result of level production and a seasonably low level of sales.

The net loss for the three months ended Dec. 30, 1989 was $15.3 million or 79 cents per share as compared to net earnings from continuing operations of $1.2 million or 6 cents per share for the same period last year. Net earnings for last year's quarter have been adjusted to exclude earnings from the discontinued Lawn-Boy and Cushman businesses which were sold in the fall of 1989.

Outboard Marine Corp. is a worldwide manufacturer and distributor of marine engines and recreational power boats.

WILKES-BARRE, PA. (JAN. 18) PR NEWSWIRE - The board of directors of Franklin First Financial Corp. (NASDAQ: FFFC) today declared a fourth-quarter dividend of 13 cents for each share of common stock payable March 1, 1990, to shareholders of record Feb. 15.

This marks the fifth consecutive quarter that Franklin has declared a dividend since going public in August 1988.

Elmer J. Klimchak, chairman and chief executive officer stated, "We are delighted to be able to declare a dividend each quarter since going public nearly a year and a half ago despite these extremely competitive times."

Shareholders of record have the option of participating in Franklin's Dividend Reinvestment Plan which allows automatic accumulation of additional shares without a broker's fee. Shareholders whose stock is held in nominee name must change their ownership status in order to participate in the plan.

Franklin First Financial Corp.'s common stock is listed on the NASDAQ National Market Securities Exchange. Its price at the close of business on Jan. 17, was $11.375, an 18 percent appreciation from one year ago. Franklin First Financial Corp. is headquartered in Wilkes- Barre. Franklin First Federal Savings Bank, the wholly owned subsidiary of Franklin First Financial Corp., is a federally chartered, federally insured savings bank with total assets of $828,383,000 as of Sept. 30, 1989. The bank conducts operations throughout northeastern Pennsylvania through its 19 full-service offices.

#90018p0251 01/18/1990 ~PR Newswire

HOUSTON (JAN. 18) PR NEWSWIRE - Vista Chemical Co. (NYSE: VC) today announced earnings per share of $1.33 and net income of $14.1 million for the first fiscal quarter of 1990, ended December 31, 1989. This compares to earnings per share of $2.04 and income of $30.8 million, before an unusual item, for the same period last year.

Sales for the quarter were $170.1 million, compared to $191.2 million reported for the same quarter in fiscal 1989. A 20 percent decline in prices more than offset the benefit of a nine percent increase in volumes for the quarter. The price decline was due primarily to substantially lower polyvinyl chloride (PVC) prices, reflecting highly competitive worldwide market conditions. First quarter results also reflect higher interest expense resulting from the financial restructuring completed in July 1989. On a per share basis, the lower earnings were partly offset by the reduction in shares outstanding resulting from stock repurchases in fiscal 1989.

Earnings per share for the first quarter were down 38 percent from fourth fiscal quarter 1989 results. The decline reflects a seven percent decrease in product prices, substantially due to lower prices for PVC products.

#90018p0252 01/18/1990 ~PR Newswire

RICHMOND, VA (JAN. 18) PR NEWSWIRE - Crestar Financial Corporation reported $103.8 million in net income for 1989, 17 percent more than the $88.5 million earned in 1988. All prior period results have been restated to reflect the merger with Colonial American Bankshares, Inc. on May 1, 1989, a transaction that was accounted for as a pooling of interests. Primary earnings per share in 1989 were $3.28 compared with $2.85 in 1988, an increase of 15 percent. Return on assets was .97 percent, return on total equity was 14.43 percent and return on common equity was 15.06 percent.

For the fourth quarter, net income of $27.5 million in 1989 represented a 23 percent improvement over the $22.3 million earned in 1988. Earnings per share were $.86 compared with $.71 earned in the fourth quarter of last year. Return on assets was 1.01 percent, return on total equity was 14.72 percent and return on common equity was 15.31 percent.

"We are very pleased with our 1989 results, particularly with the strength of our net interest margin and overall credit quality," said Richard G. Tilghman, chairman and chief executive officer. "Both ROA and ROE improved substantially, we increased our reserve for loan losses during the year and we improved our capital position. Core deposit growth continues to outpace earning asset growth, and the average yield on our earning assets has improved significantly."

Net interest income for the year was up 7 percent, reflecting a 7 basis point improvement in the net interest margin and a 3 percent increase in average earning assets. Average loans increased by 2 percent, driven by 8 percent growth in average commercial loans.

The 1989 loan loss provision was $44.8 million compared with $53.1 million taken in 1988. Net charge-offs totalled $42.3 million or .55 percent of average loans in 1989 compared with $73.1 million or .97 percent of average loans in 1988. Domestic net charge-offs improved substantially from 1988 to 1989, declining from $51.1 million or .68 percent of average loans in 1988 to $42.3 million or .55 percent of average loans in 1989. There were no foreign charge-offs in 1989, compared with $22.0 million in 1988.

Nonperforming assets of $75.1 million at Dec. 31, 1989 were .97 percent of loans and foreclosed properties. This compares with $54.3 million or .70 percent of loans and foreclosed properties at Dec. 31, 1988 and $63.7 million or .82 percent of loans and foreclosed properties at Sept. 30, 1989. The allowance for loan losses was equivalent to 1.20 percent of

loans and 124 percent of nonperforming assets at Dec. 31, 1989.

Noninterest income of $148.0 million in 1989 increased 5 percent over 1988. Strong growth in trust income and service charges on deposit accounts was offset by a $6.5 million drop in income from nonrecurring items. These items include gains from the sale of fixed assets in both years, gains on the settlement of pension obligations in both years, interest on tax refunds received in 1988 and securities losses of $3.8 million taken in the fourth quarter of 1988. Excluding these items, noninterest income increased 10 percent over 1988.

Noninterest expense was $22.2 million or 7 percent higher than 1988, primarily as a result of higher personnel costs. However, the number of full-time equivalent employees dropped by 2 percent to 6,029 as of Dec. 31 1989.

Crestar Financial Corporation is the holding company for three banks with operations in Virginia, Maryland and the District of Columbia. It serves these communities through 252 banking offices. Other subsidiaries provide insurance, brokerage, mortgage banking, leasing and investment advisory services. At Dec. 31, 1989, Crestar had total assets of $11.4 billion and total deposits of $8.5 billion.

EL SEGUNDO, CA (JAN. 18) PR NEWSWIRE - INFONET Services Corp. and MCI Communications Corp. (NASDAQ: MCIC) today anounced that MCI has agreed to purchase 25 percent of the outstanding shares of the international value-added data network which operates in the United States and over 100 countries worldwide.

MCI, which owns and operates the second largest telecommunications network in the world, will purchase shares formerly held by Computer Sciences Corporation (CSC) and becomes the largest shareholder in INFONET.

The other shareholders of INFONET, which provides integrated computing and communications services worldwide and holds marketing and support agreements in 34 countries, are the major telecommunications administrations (PTT's) of European and Asia Pacific countries.

"We feel certain that INFONET's worldwide support organization, its strong relationship with the telecommunications administrations and its existing global network will greatly strengthen our global service capabilities," Roberts added.

William R. Hoover, chairman and president of CSC, said, "The MCI transaction represents an excellent return on investment for CSC's shareholders and provides a significant opportunity for INFONET to further the scope of its planned strategic efforts by the addition of a U.S. carrier."

INFONET also said it and CSC will continue to work together on appropriate system integration opportunities involving the requirement of integrated networking and computing services.

INFONET, in addition to expanding the reach of its global packet switch network, has been rapidly introducing a widening range of value-added products and services for use by its global customer base.

OAKBROOK TERRACE, IL (JAN. 18) PR NEWSWIRE - Telesphere Communications Inc. (AMEX: TSP), a full service interexchange carrier and provider of enhanced telecommunication services, told the media today that it had concluded a tentative agreement with Morningstar Foods of Dallas, to provide direct dial long distance and WATS services to Morningstar's 51 dairy and sales locations.

Morningstar Foods, formerly the Dairy Group of the Southland Corp., was purchased in a leveraged buyout led by Duncan, Cook & Co. in April 1988. Its product line is primarily fluid milk, ice cream, novelties and cultured products.

Nick Jent, Telesphere's senior vice president for sales and marketing, noted that ''a single, high quality, cost-effective system from Telesphere was needed to streamline the communications process for Morningstar which has made an important corporate decision to consolidate their long distance service. As a single source, national carrier, we can provide superior network quality and call routing capabilities to help improve and expand their telecommunication system.''

Speaking for Morningstar, Robert Nielson, MIS director for the company, said ''Telesphere proposed a flexible and cost-effective solution to the problem of managing communications between our widely scattered offices. I expect the voice network configuration that Telesphere will implement for us will enhance our customer service and increase our competitive edge.''

Telesphere Communications, Inc. operates a nationwide state-of-the- art, digital fiber optic network and provides long distance network services, operator services, interactive 900 services and other enhanced communications services.

Morningstar Foods is one of the largest manufactures and distributors of dairy products in the United States. A privately held company, Morningstar serves over 10,000 customers nationwide.

#90018p0256 01/18/1990 ~PR Newswire

BLUE ISLAND, IL. (JAN. 18) PR NEWSWIRE - Heritage Financial Services, Inc. (NASDAQ/NMS: HERS) today reported the seventh consecutive year of record net income.

For the year ended Dec. 31, 1989, net income was a record $7,070,000, or $1.76 per share, up 9 percent over the $6,457,000, or $1.61 per share earned in 1988.

Fourth-quarter net income was a record $1,808,000, or 45 cents per share, compared to $1,787,000, or 45 cents per share earned in the 1988 fourth quarter.

Per share data has been adjusted to reflect a five-for-four stock split paid in July 1989.

Richard T. Wojcik, chairman and chief executive officer, said higher earnings in the 1989 periods resulted primarily from increases in net interest income generated by strong loan growth. Loans at Dec. 31, 1989, were up 14 percent to $361 million.

At year-end 1989, total assets were $609 million, an increase of $66 million, or 12 percent, over $543 million at Dec. 31, 1988.

Wojcik said asset growth was due in part to the opening of three branches in 1989. "The branching network strengthens our market position and expands our presence in rapidly developing areas in southwest Cook County and adjacent Will County."

Heritage Financial Services, Inc. is a multibank holding company headquartered in southwest suburban Chicago. It operates eight banking offices located in Blue Island, Crestwood, Oak Lawn, Tinley Park (2), Orland Park, Palos Heights and Mokena.

SOMERS POINT, N.J. (JAN. 18) PR NEWSWIRE - Action Savings Bank, SLA (NASDAQ: ANSL) today reported net income of $335,000, or $.30 per share, for the three months ended Dec. 31, 1989, compared to $857,000, or $.78 per share, for the three months ended Dec. 31, 1988.

At Dec. 31, 1989, the bank had assets of $292.8 million, deposits of $232.2 million, and stockholders' equity of $19.5 million, or 6.65 percent of assets.

"The downturn in earnings primarily reflects the general downturn in the real estate market," noted Robert J. DiDomenico, chairman of the board and chief executive officer. Interest income was adversely affected by an increase in nonperforming assets, which rose to 4.72 percent of total assets at Dec. 31, 1989, compared to 3.21 percent at Sept. 30, 1989, and 1.48 percent at Dec. 31, 1988.

"During the upcoming months, Action will continue to monitor closely its construction and real estate loan portfolio. In addition, the bank has begun to diversify its activities by increasing its mortgage banking operations and commercial lending," commented DiDomenico.

Action Savings Bank, SLA, headquartered in Somers Point, operates seven offices in Atlantic and Cape May counties, New Jersey.

BALTIMORE, (JAN. 18) PR NEWSWIRE - Legg Mason, Inc. (NYSE: LM) announced operating results for its third fiscal quarter and the nine months ended Dec. 31, 1989.

For the quarter, revenues were a record $63,606,000, a 13 percent increase from revenues of $56,176,000 in the corresponding quarter of 1988. Net

earnings rose 35 percent to a record $3,700,000 from $2,747,000. Earnings per share, although not a record, rose 34 percent to $.43 from $.32.

Revenues, net earnings and earnings per share for the quarter also compared favorably to results in Legg Mason's second fiscal quarter ended Sept. 30, 1989. In that quarter, revenues were $62,001,000, net earnings were $3,429,000 and earnings per share were $.40.

For the nine months, net earnings rose 101 percent to a record $10,183,000 from $5,054,000 in the corresponding period of the prior year. Revenues rose 15 percent to a record $185,010,000 from $160,199,000. Earnings per common share doubled from $.59 to $1.18, also a record.

Commenting on the company's operating results, Raymond A. Mason, chairman and chief executive officer said:

"All segments of our business contributed to gains in our revenues and earnings for the quarter and nine month period. Brokerage commission revenues improved, and results from our investment advisory activities were especially strong."

Legg Mason, Inc. headquartered in Baltimore, is a holding company which provides securities brokerage, investment advisory and other financial services through its wholly owned subsidiaries.

TINTON FALLS, NJ (JAN. 18) PR NEWSWIRE - Keptel Inc. (NASDAQ: KPTL) today announced sales for the fiscal 1990 first quarter ended Dec. 31, 1989, of $13,013,000, a 74 percent increase over the $7,472,000 reported for the same quarter a year ago.

Net income of $603,000, or 13 cents per common share, on a primary basis for the quarter represents a 20 percent increase over the $503,000, or 11 cents per common share, reported last year.

Richard K. Laird, president and chief executive officer, said, "Heavy shipments of our Network Interface Products to all of the Bell Telephone Companies along with a good showing from our CATV products follows a similar performance during the fourth quarter and throughout last year. In addition, this quarter includes revenues of approximately $3 million from our recent Comfab Technologies acquisition and approximately $1 million from the Armiger product line which was acquired last January. Looking ahead, the integration of Comfab's sales and administrative departments into Keptel along with the planned future sales in all of the company's product areas leaves us optimistic for another growth year."

Keptel Inc. designs, manufactures and markets a diversified range of telecommunication and CATV test equipment as well as a full range of voice and data connection products.

#90018p0269 01/18/1990 ~PR Newswire

MONTREAL, (JAN. 18) PR NEWSWIRE - Alcan Aluminium Ltd. (NYSE: AL) today reported consolidated net income of US$835 million for the year ended Dec. 31, 1989, compared to the record level of $931 million achieved in 1988.

After preference share dividends, net income for the year was $3.58 per common share, compared to $3.85 for 1988. The results for 1989 included net non-operating gains of $69 million, or 30 cents per share.

Alcan's return on average common equity of 18.7 percent compares to 23.5 percent in 1988.

Fourth quarter consolidated net income was $142 million, or 60 cents per share, compared to $255 million, $1.09 per share, in the comparable quarter of 1988. Earnings for the fourth quarter included a non- operating gain of $9 million, or 4 cents per share, arising from a reduction in the company's shareholding in Nippon Light Metal Co. Ltd.

Fourth quarter earnings were below the year-ago quarter and declined against the third quarter, principally reflecting lower fabricated products shipments and certain non-recurring costs. These costs related to the start-up of the Laterrire smelter and the associated closure of a potline at Arvida as well as the incremental cost of purchased alumina and power for the Quebec smelters. Commenting on the 1989 results, David Morton, chairman and chief executive officer, noted that, while not equalling the record level of 1988, earnings were almost double those of 1987 and still represented a healthy return on shareholders' equity. He further commented, "The easing of the supply-demand balance for aluminum has brought ingot prices down from the very high levels attained in 1988. Despite some signs of weakness in demand towards the end of the year, fabricated product shipments for 1989 were 5 percent above 1988, evidence of our continuing emphasis on higher added-value products."

Earnings for the year were well spread through the group, with all areas operating profitably although generally below the previous year's levels. North American demand has shown some weakness in the fourth quarter, most notably in the automotive and construction markets. Growth in Europe and the Pacific region remained positive although less strong than in 1988. Average price realizations for fabricated products rose slightly above the 1988 level but this increase was not sufficient to recover higher costs, principally of raw materials and labor.

HOUSTON (JAN. 18) PR NEWSWIRE - The Coastal Corporation (NYSE: CGP) today announced that its Coastal Chem, Inc., subsidiary plans to construct a $65 million methyl tertiary butyl ether (MTBE) plant at its Cheyenne, Wyo., location.

Construction of the 4,000-barrel-per-day plant will require approximately 20 months and is scheduled to begin upon completion of detailed engineering and environmental permitting work. The plant, which will employ about 25 persons on a full-time basis, will be constructed on the existing Coastal Chem site at Cheyenne. It will include 500,000 barrels of seasonal MTBE storage capacity.

MTBE is a specialty chemical used as an octane enhancer and as an oxygenate for motor gasolines. It is used extensively in the Rocky Mountain region to achieve mandatory oxygen content requirements during winter months in order to reduce carbon monoxide levels.

Although the plant's primary product will be MTBE, approximately 26

million gallons per year of methanol will also be produced. This methanol will be used to produce the MTBE, and it can also be marketed as an alternate motor fuel.

The methanol and MTBE will be marketed by another Coastal subsidiary, Coastal Refining and Marketing, Inc.

Leo C. Smith, Coastal Chem's president, noted that the plant will utilize regionally supplied butane and natural gas feedstocks provided, in part, by Colorado Interstate Gas Company, another affiliate.

Coastal Chem, Inc., based in Cheyenne, produces nitrogen-based fertilizers and livestock-feed supplements, carbon dioxide and low-density ammonium nitrate (LODAN) for industrial uses. Total annual sales are 520,000 tons with 230,000 tons of agricultural products and 290,000 tons of industrial products.

The Coastal Corporation is a Houston-based diversified energy firm. Together with its subsidiaries, Coastal has $8 billion in assets and operations in refining and marketing, coal, chemicals, natural gas transmission and storage, gas and oil exploration and production, trucking and independent power production.

ATLANTA, (JAN. 18) PR NEWSWIRE - Delta Air Lines (NYSE: DAL) today filed an application with the United States Department of Transportation for five routes to Japan. The Delta action is in response to the DOT's recently announced 1990 U. S. - Japan Gateways proceeding. Delta's application included the following routes:

-- Los Angeles - Tokyo
-- Honolulu - Tokyo
-- Portland, Oregon - Nagoya
-- Honolulu - Nagoya
-- Atlanta - Tokyo

Under the expanded U. S. - Japan aviation agreement, the DOT can certify carriers to serve three additional routes to Tokyo and three routes to points in Japan other than Tokyo. Delta stated that it will seek the routes named above in the order of priority listed, noting that the Los Angeles - Tokyo route is its highest priority because of the large number of passengers requiring additional service between the two cities. The airline said its large presence in Los Angeles (one of the top two

carriers in passenger boardings) makes it ideally suited to serve the needs of those passengers.

Delta presently provides daily service to Tokyo through the Portland, Oregon gateway. The flight originates and terminates in Atlanta, affording Atlanta-Tokyo passengers convenient one-stop, single-plane service. On the new Japan routes Delta proposes to initially use the popular international range Lockheed 1011 aircraft. It will introduce the new McDonnell Douglas MD-11s on its Pacific routes as they are delivered beginning in mid 1991. Delta has orders and options for 40 of the new technology MD-11 aircraft which flew for the first time on January 10, 1990.

PRINCETON, NJ (JAN. 18) PR NEWSWIRE - CYTOGEN Corp. (NASDAQ: CYTO) announced today the appointment of Peter C. Nowell, M.D., to its Scientific Advisory Board.

Dr. Nowell is currently professor of pathology and laboratory medicine at the University of Pennsylvania School of Medicine and served as chairman of the department from 1967 through 1973. He is also deputy director at the University of Pennsylvania Cancer Center and a consultant to the Philadelphia Children's Hospital.

A pioneer in the study of the cellular nature of cancer, Dr. Nowell has authored nearly 300 articles in the field and received numerous awards and distinctions. Most recently he was a recipient of the Mott Prize from the General Motors Cancer Research Foundation and in 1989 was awarded the Fred W. Stewart Award from Memorial Sloan-Kettering Cancer Center and the Phillip Levine Award from the American Society of Clinical Pathologists.

Dr. Nowell received his B.A. degree from Wesleyan University in Connecticut and holds an M.D. degree from the University of Pennsylvania School of Medicine. He is a member and past president of the American Society for Experimental Pathology. He serves on the editorial review boards of a number of major cancer publications and has been selected to serve on a variety of national committees.

Additional members of the CYTOGEN Scientific Advisory Board include Lewis Thomas, M.D., president emeritus, Memorial Sloan-Kettering Cancer Center and university professor, State University of New York at Stony Brook; Leonard Jarett, M.D., professor and chairman, Department of Pathology and Laboratory Medicine, University of Pennsylvania; Fred Karush, Ph.D., professor, Department of Microbiology, University of Pennsylvania; Jack L.

Strominger, M.D., professor of biochemistry, Harvard University; and Peter A. Ward, M.D., professor and chairman of the Department of Pathology, University of Michigan Medical School.

CYTOGEN Corp. is a biopharmaceutical company which has developed proprietary systems for linking drugs and diagnostic agents to monoclonal antibodies in order to optimize the function of the antibody as a delivery vehicle. With major emphasis on human cancer, current product development efforts at CYTOGEN are focused on improved cancer diagnostic imaging agents and the targeted delivery of cancer therapeutic agents directly to tumor sites.

HOUSTON, (JAN. 18) PR NEWSWIRE - General Homes Corp. (NYSE: GHO)

announced today that it will be paying a solicitation fee to eligible brokers and dealers for soliciting tenders in its offers to exchange its new Series B Convertible Preferred Stock for any and all of its outstanding 12-3/4 percent Subordinated Notes due 1998 and its outstanding 15-1/2 percent Subordinated Notes due 1995. The fee will be payable only if the exchange offers ae consummated. A condition to consummating the exchange offers is the tender of at least 90 percent in principal amount of each series of the subordinated notes.

As of Jan. 17, 1990, approximately 65 percent in principal amount of the 12-3/4 percent notes and approximately 58 percent in principal amount of the 15-1/2 percent notes had been tendered.

General Homes is circulating a supplemented prospectus and other material to brokers and holders of notes. To comply with applicable laws, General Homes has extended the expiration of the exchange offers to 5:00 p.m., New York City time, on Thursday, Feb. 1, 1990.

The exchange offers had been scheduled to expire on Thursday, Jan. 18. General Homes has asked its lenders for an extension of the Jan. 19 deadline for completion of the exchange offers under its senior secured credit agreement.

As previously announced, General Homes' special shareholders' meeting to approve certain matters in connection with the exchange offers has been adjourned to January 19, and may be further adjourned in the absence of a quorum.

TULSA, OK (JAN. 18) PR NEWSWIRE - The board of directors of ONEOK Inc., (NYSE: OKE) Tulsa-based energy company, today declared a quarterly dividend of 38 cents per share on its common stock, representing an increase of three cents per share.

J. D. Scott, chairman of the board, president and chief executive officer, announced that the dividend will be paid February 15 to shareholders of record January 31. The new dividend is 8-1/2 percent more than the 35 cent per share dividend paid in each of the previous two quarters.

Scott also said that the new dividend rate will equate to 19 cents per share after giving effect to the 2-for-1 stock split approved today by shareholders at the company's annual meeting. The stock split will become effective at the close of business Thursday, Feb. 1.

The board also declared a regular quarterly dividend of 59.375 cents per share on its preferred stock, Series A, unchanged from the previous quarter, and also payable Feb. 15 to shareholders of record Jan. 31.

THOROFARE, NJ (JAN. 18) PR NEWSWIRE - Checkpoint Systems Inc. (NASDAQ: CHEK) today reported net revenues of $17,302,000 in its fourth quarter ended Dec. 31, 1989, up 26 percent compared to net revenues of $13,693,000 in the last quarter 1988.

The record quarter contributed significantly to the highest annual net revenues in company history of $50,750,000, up 14 percent compared to net revenues of $44,370,000 in 1988. Fourth quarter 1989 net earnings were also a record at $3,597,000, or $.39 per share, up 130 percent over last year's fourth quarter of $1,567,000, or $.17 per share. For 1989, net earnings were $5,603,000, or $.61 per share, compared to $1,065,000, or $.12 per share, for 1988.

Gerald W. Klein, president and chief operating officer, reported, "The record revenues were a result of strong domestic and international demand from numerous retail establishments. The 5 percent improvement in gross profit margin was achieved by production efficiencies created by investment in target manufacturing operations over the last two years. The increase in net revenues, the improved gross profit margins and tight control on selling, general and administrative expenses all contributed to the increase in net earnings." Klein further stated "that Checkpoint was not affected by the Campeau Corporation's Chapter 11 bankruptcy filing for its Federated Department Stores and Allied Stores subsidiaries. Encouraged by our record figures, we look forward to 1990 and the new decade with confidence."

Checkpoint Systems Inc. is the leading developer and manufacturer of advanced microprocessor and radio frequency-based security systems. Using detectable, paper-thin, disposable circuits, Checkpoint's Electronic Signatures(R) systems identify items or people in retail, institutional, industrial and commercial applications.

LOS ANGELES, (JAN. 18) PR NEWSWIRE - In conjunction with the establishment last month of two divisions within the USA Group of Mattel Inc. (NYSE: MAT), Robert Sansone, USA Group president, today announced the promotion of five key executives.

In the Boys and Preschool Toys Division, headed by Leonard M. Croft, president, Phillip Jacobs has been promoted from vice president to senior vice president-sales; Ronald Kesselman from vice president to senior vice president, marketing and product development-Preschool Toys; and Bob Rao from vice president to senior vice president, marketing and product development-Boys Toys.

In the Girls and Activity Toys Division, headed by Jill Elikann Barad, president, Joseph A. Cristina has been promoted from director to vice president-finance and administration.

In addition, Ramon Fuentevilla, formerly vice president-sales and news business development, has been promoted to senior vice president- sales, reporting to Sansone.

Jacobs, 39, began his Mattel career in 1976 as an account manager, and was promoted to district sales manager in 1978, director-field sales in 1981, and vice president-regional sales in 1984. He had previously worked in sales for the Ideal Toy Corporation. Born in Portsmouth, Va., he is a 1972 graduate of the University of Florida.

Kesselman, 46, joined Mattel as vice president-new business development in 1988 after holding senior management positions with Revell Inc., Placo Products and Coleco Industries. He received a bachelor of science degree from the University of Wisconsin in 1964, and an MBA from Northwestern University in 1969.

Rao, 48, held senior management positions with Aurora Products, Tyco Toys and Coleco Industries before joining Mattel as vice president- product design in 1988. Born in Patterson, N.J., he holds a bachelor of science degree from Farleigh Dickinson University.

Cristina, 33, joined Mattel as manager-finance in 1985 after serving as head-finance at Hughes Aircraft and supervisor-cost accounting at Sinclair Paints. He was promoted at Mattel to director- business administration in 1986, and director-finance and administration in 1988. Born in Pittsburgh Cristina received a bachelor's degree in finance from Indiana University of Pennsylvania in 1978, and an master of business administration from the University of Southern California in 1982.

Fuentevilla, 48, was born and raised in Havana, Cuba, and received a bachelor's degree from the University of Florida in 1963. He joined Mattel in 1981 as vice president-field sales, and became vice president/ general manager of a product division in 1986, and vice president-sales and new business development in 1988. He previously held positions with Max Factor, M&M Mars and Armour & Co.

Mattel Inc. is a worldwide leader in the design, manufacture and marketing of children's toys. With headquarters in Hawthorne, Calif., Mattel has offices and facilities in 19 foreign countries, and markets its products in more than 100 nations around the world.

WAUKEGAN, IL (JAN. 18) PR NEWSWIRE - Outboard Marine Corp. (NYSE: OM) today named James C. Chapman as chief executive officer. He will retain the title of president, which he has held since 1985.

Today's action by OMC's board of directors had been planned, following the announcement in December that Charles D. Strang would step down as chief executive officer.

Chapman, 58, joined OMC in 1978 as director of manufacturing and was named vice president of manufacturing later that year. He was instrumental in refocusing OMC's manufacturing strategy during the early 1980s, concentrating on lowering manufacturing costs and producing the highest quality marine engines in the industry.

Chapman was also instrumental in the company's recent vertical integration into boat manufacturing. Beginning in 1986, OMC assembled 10 boat companies into the OMC Boat group, the fastest growing boat manufacturing organization in the industry.

During 1989, Chapman helped guide the sale of OMC's Cushman and Lawn-Boy divisions, both non-marine businesses, in order to concentrate management attention on the rapidly growing recreational marine business.

Prior to joining OMC, Chapman was director of facilities for the automotive division of Rockwell International from 1967-78. He also served in a number of management capacities with the Chrysler Corp., including manager of manufacturing engineering.

A native of Detroit, Chapman received a bachelor's degree (cum laude) in mechanical engineering from the University of Detroit, and a master of business administration from the University of Detroit.

He and his wife Bette reside in Antioch, Ill.

PROVIDENCE, RI (JAN. 18) PR NEWSWIRE - Terrence Murray, chairman, president and chief executive officer of FLeet/Norstar Financial Group, and chairman of Fleet National Bank, has been elected to a three-year term as a Class A Director of the Federal Reserve Bank of Boston.

Each Federal Reserve Bank has nine Directors. Three Class A Directors represent member commercial banks in the Federal Reserve District.

Directors of Federal Reserve Banks have broad responsibilities, ranging from the supervision of the Reserve Bank -- assigned by the Federal Reserve Act -- to making recommendations on monetary policy.

The Federal Reserve System is the nation's central bank. It provides essential services to the banking community, and it functions as a bank for the federal government. The Federal Reserve also sets and implements monetary policy for the United States. The exercise of this unique and important responsibility has a major impact on how much money and credit

is available to the economy.

Murray is a former member of the Federal Reserve System's Federal Advisory Council. A director of the A.T. Cross Company, Lincoln, R.I., he is a member of the Association of Reserve City Bankers and serves as chairman of its Government Relations Committee. He has also served on the Government Relations Council of the American Bankers Association, and is a former member of the board of directors, executive committee, emerging issues committee, and chairman of the membership committee of the Association of Bank Holding Companies.

Fleet/Norstar Financial Group is a $33 billion diversified national financial services company listed on the New York Stock Exchange. Fleet/Norstar has approximately 1,000 offices in 40 states. Its lines of business include commercial and consumer banking, mortgage banking, consumer finance, asset-based lending, trust banking, student loan processing, and investment banking.

ROSEMONT, IL (JAN. 18) PR NEWSWIRE - Comdisco, Inc., (NYSE: CDO) the world's largest independent computer and high technology leasing company, today announced record revenues of $458 million for the first quarter of fiscal 1990. This represents an increase of 22 percent over the prior-year period.

The company also announced record first-quarter net earnings of $25 million, or 60 cents per share, compared with $23 million, or 55 cents per share, for the year-earlier period. This represents a 9 percent increase over the prior-year period.

Commenting on first-quarter results, Kenneth N. Pontikes, chairman of the board and president, stated, "We achieved record remarketing revenues in the first quarter of fiscal 1990 continuing our momentum in this important part of our business. We believe that Comdisco is on the road to becoming one of the world's largest high technology asset managers."

The board of directors today increased the quarterly cash dividend from 6 cents to 7 cents per share. The dividend will be payable on March 19, 1990, to stockholders of record as of Feb. 16. As of Dec. 31, 1989, Comdisco had 40,782,451 shares of common stock outstanding.

Comdisco is engaged primarily in buying, selling and leasing new and used computers, communication and other high technology equipment. It also arranges related financings. The company, through a wholly owned subsidiary, provides disaster recovery services for computer users. Comdisco's common stock is listed on the New York and Midwest Stock Exchanges.

OAKBROOK TERRACE, IL (JAN. 18) PR NEWSWIRE - Telesphere Communications, Inc. (AMEX: TSP), a full-service interexchange carrier and provider of enhanced telecommunication services, announced today that it has contracted to provide operator-assisted calling services to Brandeis University in Waltham, Mass. Services will be provided to more than 2,500 dormitory rooms as well as to faculty and administration offices at AT&T competitive rates. Installation of services at the 3,000-student university is expected by Jan. 16, 1990. The Brandeis infirmary is a member of the Massachusetts Hospital Association, which has long endorsed Telesphere Services to its membership.

Commenting on the agreement, Nick Jent, senior vice president for sales and marketing at Telesphere, stated, "Providing the latest in phone services to Brandeis highlights our commitment, capability and flexibility to niche markets. The university's decision to use Telesphere was based on network and service quality and the fairness of our rates to the caller."

Telesphere Communications, Inc., operates a nationwide state-of-the- art, digital fiber optic network and provides long distance network services, operator services, interactive 900 services and other enhanced communications services.

COLUMBUS, OH (JAN. 18) PR NEWSWIRE - American Electric Power's (NYSE: AEP) net earnings totaled $628,917,000 in 1989, an increase of 0.3 percent over 1988 earnings of $626,843,000. Earnings per share in 1989 were $3.25 an increase of 1 cent or 0.3 percent over per-share earnings of $3.24 in 1988.

Earnings for the fourth quarter were $177,044,000, an increase of 10.4

percent over earnings of $160,315,000 for the same quarter of 1988. Earnings per share for the quarter were 91 cents, an increase of 8 cents or 9.6 percent over per-share earnings of 83 cents in the fourth quarter of 1988.

Per-share earnings for 1988 and 1989 are based on 193.5 million average shares outstanding.

Operating revenues for 1989 were $5.140 billion, an increase of 6.2 percent over 1988 revenues of $4.841 billion. Fourth quarter revenues were $1.383 billion, up 12.2 percent from $1.232 billion in 1988.

The 1989 earnings and revenues were affected significantly by an increase in sales of electric energy to other utilities, according to W.S. White, Jr., AEP chairman and chief executive officer. Recent unseasonably cold weather accounted for the considerable improvement in fourth quarter earnings and revenues.

American Electric Power is the parent holding company of eight operating electric utilities providing service to 7 million people in seven East-Central states.

KENTON, OH (JAN. 18) PR NEWSWIRE - Larry Winner, vice president of operations for Imperial Cup Corp. has announced the company's acquisition of select assets of National Cup Co. of Dover, Del., effective Jan. 17. National Cup manufactures hot and cold drink cups, and a full line of popcorn cups and tubs. The company is a regional cup manufacturer serving the concession market.

The purchased assets, totaling $2.8 million, include selected cup-forming equipment, machinery and raw materials. These assets will be initially relocated at Imperial Cup's Salisbury, Md. plant.

"Imperial Cup is now better able to service the concession market with a broader range of products, rounding out its required cup line for the food service industry," said David Kaplan, vice president of sales and marketing with Imperial Cup. "This acquisition is another step in Imperial Cup's strategic plan for growth in the industry," he added.

Last month, Imperial Cup acquired select assets of Americup of Sandusky, Ohio. Those assets, totaling $889,000 included all cup-forming equipment and related tooling, finished products and raw materials.

Headquartered in Kenton, Imperial Cup operates plants in Kenton, Lafayette Ga., Visalia, Calif. and Salisbury, Md. The company designs, prints and manufactures a complete line of paper, plastic and poly-coated cups, which are marketed nationally and internationally, and distributed domestically via Imperial Cup's own truck fleet. Imperial Cup is a subsidiary of Federal Paper Board Company, Inc. (NYSE: FBO)

#90018p0327 01/18/1990 ~PR Newswire

DETROIT (JAN. 18) PR NEWSWIRE - Ford Motor Company (NYSE: F) has pledged to continue the aggressive campaign it has been waging since 1983 against manufacturers and distributors of counterfeit auto replacement parts. Any look-alike parts which use Ford Motor Company trademarks or are designed and packaged to create the impression they are genuine Ford parts are considered counterfeit.

"Our intention is to uncover, expose and put out of business companies and individuals who are foisting generally substandard and often unsafe counterfeit automotive replacement parts on American consumers as genuine Ford parts," said Kenneth W. Myers, marketing manager for the Ford Parts and Service Division.

Ford, in cooperation with local and federal law enforcement authorities, has raided counterfeit parts operations in Michigan, California, New York, Arizona, New Jersey, Minnesota, and Washington, D.C. The raids have resulted in the seizure of more than 1 million pieces of packaging for parts worth many millions of dollars.

In addition, Ford has filed 18 lawsuits against more than 40 corporations and individuals and sent 130 "cease and desist" letters to distributors of counterfeit or simulated parts. So far, every case that has been concluded has been resolved in Ford's favor.

Counterfeit parts are generally substandard in quality and in many instances pose a potential safety hazard. For example, according to testimony before a congressional sub-committee, counterfeit brake shoes are being marketed that are severely deficient in braking power and bogus gas tank caps lack safety valves that can help prevent fires in case of an accident. Counterfeit parts range from power steering belts and defective turn signals to alternators, filters and ignition modules. According to Myers, "Our inspections have yet to find one of these phony parts which measures up to Ford specifications."

The retail sale of automotive replacement parts in the United States is estimated at more than $50 billion annually. According to a congressional study, American consumers spend more than $3 billion each year buying counterfeit or imitation auto parts -- equal to a loss of 210,000 legitimate U.S. jobs.

Myers advises car owners to buy from legitimate distributors, check cartons carefully for the manufacturer's name and be wary of unusually low prices until you are absolutely sure the part is genuine.

#90018p0328 01/18/1990 ~PR Newswire

WASHINGTON (JAN. 18) PR NEWSWIRE - AT&T (NYSE: T) today announced it will file a special tariff with the Federal Communications Commission to offer its residential, business and international customers special Valentine's Day discounts on long-distance telephone service.

In its filing, AT&T is asking the FCC for approval to declare Wednesday, Feb. 14, as an additional day of holiday calling.

Citing the impact of Monday's service disruption, AT&T Chairman Robert E. Allen said, "We are making this gesture to underscore how much we value our relationship with our customers, knowing there is no way to make up for the inconvenience they may have experienced."

AT&T's special holiday prices, discounted on average 33 percent from regular weekday prices, will apply on all out-of-state direct-dialed long-distance calls made by residence and business customers on AT&T's public network. Evening rates will apply to all other out-of-state switched business services except those that do not have time-of-day discount schedules, such as 900 service.

In addition, the economy rate will apply to all direct-dialed international calls.

AT&T also said its 800 Service Assurance Plan will be extended to cover this extraordinary situation. Under this program, customers of AT&T's 800 services are eligible to receive a credit on their bills up to the monthly service charge.

AT&T said a 10-minute, direct-dialed coast-to-coast call between 8 a.m. and 5 p.m. on Valentine's Day will cost $1.58. At normal weekday prices, between 8 a.m. and 5 p.m., that call would usually cost $2.50.

On international calls, the economy rate will apply all day for calls to all 158 countries and areas that can be dialed directly through the AT&T network. For example, a five minute direct-dialed call from anywhere in the mainland U.S. to Japan ordinarily costs $8.01 from 2 p.m. to 8 p.m., $6.51 from 8 p.m. to 3 a.m., and $5.40 from 3 a.m. to 2 p.m. On Valentine's Day, a five minute call will cost $5.40 at any time.

#90018p0330 01/18/1990 ~PR Newswire

PITTSBURGH (JAN. 18) PR NEWSWIRE - Westinghouse Credit Corp. today announced record net income for 1989 of $157.4 million, an increase of 17 percent from 1988.

Net income for the fourth quarter of 1989 was $46.7 million, an increase of 117 percent from the year-ago period.

William A. Powe, chairman of Westinghouse Credit, attributed the year's record earnings to significantly higher levels of loans and marketable securities, and to gains from sales of equity interests in financing transactions. These positive factors were partially offset by a decline in net interest yields and an increase in reserves appropriate to the growth in assets.

The sharp increase in fourth quarter results reflected a lower addition to reserves, compared to the year-ago period, which had exceptional loan growth of $1 billion.

Westinghouse Credit Corp., with total assets of more than $9 billion, is one of the nation's largest business finance companies. It is the principal subsidiary of Westinghouse Financial Services Inc., which is owned by Westinghouse Electric Corp. (NYSE: WX).

HOUSTON (JAN. 18) PR NEWSWIRE - National Convenience Stores Inc. (NYSE:NCS) announced results for its second fiscal quarter and six months ended Dec. 31, 1989.

The company recorded a net loss for the second quarter of fiscal 1990 of $655,000, or 3 cents per common share, compared with a net loss of $2,054,000, or 9 cents per share, for the second quarter of fiscal 1989. Sales for the quarter were $247,429,000, compared with $271,937,000 for the same period last year.

For the six months ended Dec. 31, 1989, the company recorded a net profit of $6,739,000, or 30 cents per common share, vs. a net loss of $717,000, or 3 cents per common share, for the six months ended Dec. 31, 1988. Sales for the first half of fiscal 1990 were $533,021,000, compared with $547,265,000 for the first half of fiscal 1989.

V.H. Van Horn, president and chief executive officer, said, "Sales in the quarter declined below prior year levels by nine percent, primarily because we were driving sales very aggressively at this time last year with discount pricing and a major special promotion. The financial impact of this sales decline was more than offset by a major improvement in merchandise margins. Our program to restore margins, including a return to traditional convenience store pricing, resulted in merchandise margins of 41.0 percent for the second quarter of fiscal 1990 vs. 34.7 percent for the same period last year."

Van Horn said that the company had completed merchandise resets in its top 100 stores, a project which not only introduces a large number of new products to the store, but also matches the merchandise offering to the demographics of the neighborhood each store serves. All Stop N Go stores will receive the new product selections over the next 18 months.

MINNEAPOLIS (JAN. 18) PR NEWSWIRE - Norwest Corp. (NYSE: NOB) today reported record net income for 1989 of $237.0 million, compared with net income of $211.2 million in 1988, an increase of 12.2 percent. Net income per common share for 1989, on a fully diluted basis, was $2.50, compared with $2.22 in the same period a year ago, an increase of 12.6 percent. Return on common equity was 19.6 percent and return on assets was 1.06 percent for 1989, compared with 19.3 percent and 1.03 percent in 1988.

For the fourth quarter of 1989, Norwest had record earnings of $61.1 million, a 9.3 percent increase from the $55.9 million earned in the fourth quarter of 1988, and 1.8 percent above the $60.1 million earned in the third quarter of 1989. Fully diluted net income per common share was 65 cents, compared with 59 cents in the fourth quarter of 1988, an increase of 10.2 percent. Return on common equity was 19.6 percent and return on assets was 1.02 percent, compared with 19.4 percent and 1.06 percent, respectively, in the fourth quarter of 1988.

Norwest Corp. is a $24.3 billion diversified financial services organization providing banking, banking related and specialized financial

services through 1,150 offices in 47 states and internationally.

#90018p0348 01/18/1990 ~PR Newswire

ATLANTA (JAN. 18) PR NEWSWIRE - Contel Corp. (NYSE: CTC) today announced it has completed arrangements to obtain a $1.3 billion interim loan that will be used to finance its planned acquisition of the Kentucky, Alabama and Tennessee cellular telephone properties of McCaw Cellular Communications Inc. (NASDAQ: MCAWA).

The loan will be made by a banking syndicate led by The Chase Manhattan Bank, N.A.

Under terms of a definitive agreement signed today, the loan to Contel will be due July 5, 1991, and will bear interest at floating rates based on several leading market indices. Based on current market conditions, which are subject to change, the interest rate would be approximately 8.75 percent. Contel said permanent long-term financing for the acquisition is expected to include a combination of debt and equity. Goldman Sachs & Co. and Salomon Brothers Inc. have been retained as advisors to Contel and Contel Cellular in arranging permanent financing for the acquisition.

Contel also announced it has received all state approvals necessary to complete the acquisition, and has been granted Federal Communications Commission approval to proceed with the transfer of cellular licenses in the markets being acquired. Contel said it expects to close the acquisition before the end of February.

In October 1989, Contel announced that, through its subsidiary Contel Cellular Inc. (NASDAQ: CCXLA), it had signed a definitive agreement with McCaw Cellular to purchase McCaw's cellular telephone properties in Kentucky, Tennessee and Alabama. The $1.3 billion purchase price represents an average price-per-POP of $205, excluding property, plant, and equipment of the systems to be purchased. ("POPs" refers to the population of a market area multiplied by a company's percentage ownership in the cellular system serving that market.)

The acquisition, the largest in Contel's 28-year history, will nearly double the size of Contel Cellular's company-controlled operations, and will move the company from the 13th to the sixth largest cellular company in the U.S.

Contel Cellular is a 90-percent owned subsidiary of Contel Corp., which retains controlling interest in the company through its ownership of 90

million shares of Class B common stock.

Contel, a company with $3 billion in annual revenues and sales, provides a broad range of telecommunications products and services.

CLEVELAND (JAN. 17) PR NEWSWIRE - George F. Varga has been named president and chief executive officer of GE-Tungsram, the lighting joint venture between General Electric and Tungsram.

"In this important assignment, George Varga will be responsible for growing the GE-Tungsram lighting business, with particular emphasis on the European market," said John D. Opie, senior vice president, GE Lighting. "He is an experienced international businessman who will provide vision and leadership for all GE- Tungsram business functions, including engineering, marketing, productin and sales."

Varga was born in Hungary and educated there through high school. He has economics degrees from Western Maryland University and Stanford University (M.A.). A graduate of GE's Financial Management Program and fluent in six languages, Varga has had GE assignments in San Jose (California), Madrid, Zurich, and Mexico City. He is currently director of GE Plastics' Speciality Products Operation in Bergen Op Zoom, The Netherlands.

His appointment is effective February 5, 1990. Varga will be located in Budapest, Hungary, headquarters city for the GE-Tungsram joint venture.

General Electric purchased 50 percent plus one share of Tungsram for $150 million. Tungsram is one of Hungary's largest industrial companies with 12 manufacturing plants and annual sales of approximately $300 million, 85 percent of which comes from exports.

#90018p0364 01/18/1990 ~PR Newswire

DALLAS (JAN. 18) PR NEWSWIRE - L&N Housing Corp. (NYSE: LHC) reported a net loss of $2,271,000, or $1.03 per share, for the fourth quarter of Fiscal 1989 as compared to net income of $895,000, or 41 cents per share, for the same period in 1988. For the year ended Dec. 31, 1989, the company reported net income of $383,000, or 17 cents per share, as compared to a net loss of $2,370,000, or $1.08 per share, for Fiscal 1988.

During the quarter ended Dec. 31, 1989, the company wrote down its investments in marketable securities by $3,161,000. The write-down does not affect stockholders' equity, since marketable securities are carried at the lower of cost or market value, and will not affect dividends in subsequent periods since the charge cannot be recognized for tax purposes. Prior to the write-down, operations produced net income of $890,000, or 40 cents per share, in the December quarter. The company previously declared and paid a dividend of 40 cents per share which represented 100 percent of operating earnings generated during the quarter. During the year ended Dec. 31, 1989, the company distributed a total of $1.61 per share in dividends. A portion of the dividend will be a return of capital; stockholders will be notified by letter of the amount.

The board of directors also announced that the annual meeting of the stockholders of the company will be April 18, 1990. The record date for stockholders to vote at the annual meeting will be March 1, 1990. The anticipated mailing date of the proxy statement and annual report is March 16, 1990.

#90018p0365 01/18/1990 ~PR Newswire

LEXINGTON, MA (JAN. 18) PR NEWSWIRE - Raytheon (NYSE: RTN) completed its fifth consecutive year of record sales, earnings and earnings per share, the company announced today.

Earnings rose 8.0 percent to $528.8 million on a sales increase of 7.4 percent to $8.796 billion. Earnings per share increased 9.0 percent to $8.01. Comparable results for 1988 were sales of $8.192 billion, earnings of $489.6 million and $7.35 earnings per share.

Pre-tax profits were up in all five business segments of the company. Pre-tax growth rates were particularly strong in several of Raytheon's commercial operations, including Aircraft Products (up 58 percent) and Energy Services (up 72 percent) segments and the company's educational publishing business (up 165 percent) -- providing the company with significant added profit growth.

Thomas L. Phillips, chairman and chief executive officer of Raytheon, said: "Raytheon demonstrated its strength in 1989 as a diversified, technology-based company. The increase in commercial profits contributed significantly to Raytheon's overall profit growth and provided balance to our continuing strong defense electronics business."

At year end, Raytheon's total backlog was a record $9.595 billion, including record funded U.S. Government orders of $6.974 billion. At the end of 1988, total backlog was $8.712 billion, including a government backlog of $6.759 billion.

The company also reported 1989 fourth quarter results. Sales for the quarter were $2.244 billion, up 1.6 percent from $2.209 billion a year earlier. Fourth quarter 1989 earnings were $137.0 million, up 7.6 percent compared to $127.3 million during 1988's fourth quarter. Earnings per share in the quarter were $2.07, up 7.8 percent compared to $1.92 for 1988's fourth quarter.

#90018p0366 01/18/1990 ~PR Newswire

OMAHA, NE (JAN. 18) PR NEWSWIRE - Wedding Information Network Inc. (NASDAQ: WINN), today announced revenues and earnings for the six months and quarter ended Dec. 31, 1989.

Revenues increased $122,675 or 10.5 percent and $143,444 or 20.7 percent for the six months and quarter ended Dec. 31, 1989, respectively, as compared to the same periods the prior year.

The company reported a net income of $134,487 or $.04 per common and common equivalent share for the six months ended Dec. 31, 1989, compared to a net loss of $(12,023) for the same period of 1988. Earnings for the quarter ended Dec. 31, 1989, were $130,118 or $.04 per share, compared to $78,093 or $.02 per share the prior year.

Commenting on the revenues and earnings results for the six months and quarter, Sanford L. Friedman, president of Wedding Information Network Inc., said sales and net revenue increases are due to improved performance of the company's Wedding Pages franchises resulting in higher royalties to the company. He also stated that improvement of the company's product is increasing sales in the field and attracting better-qualified people to operate its franchises.

Wedding Information Network Inc. is a franchisor and publisher of "The Wedding Pages," a comprehensive guide used to plan a wedding. Wedding Information Network Inc. currently operates in 72 geographic markets through a network of 37 franchises and one joint venture. Through this network, "The Wedding Pages" offers a sophisticated marketing program used by businesses that provide products and services to the bridal industry.

#90018p0367 01/18/1990 ~PR Newswire

CLEVELAND (JAN. 18) PR NEWSWIRE - Bearings, Inc. (NYSE: BER) today reported that net income for the second quarter ended December 31, 1989 was $4,148,000 versus $4,341,000 last year. Earnings per share were $.58 for both quarters. Sales increased by 4 percent to $158,749,000 compared with $153,301,000 last year.

For the six month period, net income increased by 3 percent to $8,311,000 versus $8,043,000 last year. Net income per share, however, increased by 8 percent to $1.15 compared with $1.06 last year due to higher net income and fewer average shares outstanding for the six month period. Sales for the first six months of the fiscal year were $315,334,000 versus $296,771,000 last year, an increase of 6 percent.

George L. LaMore, Chairman and Chief Executive Officer, said "The generally flat state of industrial activity has slowed our sector of the industrial distribution business. We have, however, continued to maintain our profitability by closely monitoring operating expenses in a very competitive market."

During the quarter, The Company acquired 123,600 shares of its common stock pursuant to a September 1988 Board authorization. As of December 31, 1989, the Company had Board authorization to acquire up to 252,000 additional shares of its common stock in open market and negotiated transaction, from time-to-time, depending on market conditions.

The Directors of Bearings, Inc. today also declared a regular quarterly dividend of $.16 per share payable on March 1 to shareholders of record at the close of business February 15.

Bearings, Inc. is the nation's leading distributor of bearings and power transmission components with 269 branches in 35 states and Puerto Rico.

ROSEMEAD, CA (JAN. 18) PR NEWSWIRE - SCEcorp, the parent company of Southern California Edison Company, announced record earnings for 1989, according to Howard P. Allen, chairman and chief executive officer.

Earnings per share for 1989 increased to $3.56, up 7 cents, or percent, from $3.49 last year.

Allen also reported that 1989 earnings per share for SCEcorp's nonutility subsidiaries (The Mission Group) increased 31 percent in 1989 to 46 cents per share, which more than offset a slight decline in utility earnings. Mission Energy Company contributed most of this increase. Nonutility earnings comprised 13 percent of SCEcorp's total earnings in 1989, up from 10 percent in 1988.

SCEcorp's net income for 1989 totaled $778 million, compared with net income of $762 million in 1988. Operating revenues for 1989 were $6.9 billion, up 10.4 percent from $6.25 billion in 1988.

SCEcorp's earnings in the fourth quarter of 1989 were 54 cents compared with 49 cents for the same period in 1988.

Fourth quarter net income totaled $119 million compared with $107 million in the final quarter of 1988. Operating revenues for the quarter totaled $1.62 billion, compared to $1.54 billion in the last three months of 1988.

CAROLINE, ALBERTA (JAN. 18) PR NEWSWIRE - Flectalon garments, the ultimate in thermal technology, will be introduced to North Americans for the first time during the Shot Show (Shooting, Hunting, Outdoor Trade Show) at the Las Vegas Convention Center this week.

Over 15,000 dealers are expected to attend this show where Raven Wear, an outdoor garment manufacturing company from Alberta, Canada, will present this revolutionary new product.

Constructed from very light polymer film, onto which a thin coating of aluminum has been deposited, Flectalon reduces heat loss by trapping small pockets of air in the matrix and reflecting back 95 percent of radiated body heat. This dual function gives the wearer both instant and constant warmth with less bulk and weight. Flectalon is non-allergenic and since it does not absorb water, it always retains it insulating values. The product can be produced in varying thicknesses from 50 g/m2 to 400 g/m2 for ultimate insulation use from light jackets to sleeping bags. Flectalon is long lasting and is machine washable. Raven Wear's Flectalon insulated outer garments and accessories are currently produced in the United Kingdom.

HAMMOND, IN (JAN. 18) PR NEWSWIRE - Northern Indiana Public Service Company, the primary subsidiary of NIPSCO Industries, Inc. (NYSE: NI), and ANR Pipeline Company today announced that they have completed construction of a $12 million interconnection between the two companies' pipeline systems.

The new interconnection, a joint venture of Northern Indiana Public Service and ANR, was placed in service on Monday, January 15, 1990. The 20-inch pipeline was constructed along an existing nine- mile long right-of-way running from the southwest corner of Merrillville, Ind. to Northern Indiana's transmission system in Highland, Ind.

"This project with ANR will give us additional flexibility in the operation of our gas system and increased access to lower-priced gas supplies, which will benefit all of our customers," said Jeffrey W. Yundt, Northern Indiana vice president and general manager of gas operations. An additional 200 million cubic feet of natural gas per day will now be available, he said.

Besides the potential for improving system reliability and lowering the cost of gas supplies, environmental benefits are possible in Northwest Indiana because industrial customers may burn more natural gas in place of other fuels to meet clean air standards. "Natural gas is a cleaner burning fuel offering significant environmental advantages over other energy sources," Yundt said.

Northern Indiana Public Service Company serves more than 585,000 natural gas customers in 28 counties. ANR is currently one of Northern Indiana's five gas pipeline suppliers and is a subsidiary of the Coastal Corporation.

#90018p0382 01/18/1990 ~PR Newswire

NEW LONDON, CT (JAN. 18) PR NEWSWIRE - NESB Corp. (NASDAQ: NESB) President and Chief Executive Officer Robin Honiss announced today that the board of directors of NESB Corp. has adopted a Preferred Stock Rights Plan and has declared a dividend distribution of one Right to purchase Preferred Stock of the company on each outstanding share of the company's common stock. The distribution is payable on Jan. 29, 1990, to stockholders of record on that date.

Commenting on the Rights Plan, Honiss stated that "The Rights are designed to assure that all of the company's stockholders receive fair and equal treatment in the event of any proposed takeover of the company and to guard against partial tender offers and other abusive tactics to gain control of the company without paying all stockholders a fair price for their investment in the company. The Rights are intended to enable all NESB Corp. stockholders to realize the long-term value of their investment in the company. They do not prevent a takeover, but should encourage anyone seeking to acquire the company to negotiate with the board prior to attempting a takeover. We have been considering this plan for several months, and it has not been adopted in response to any known effort to acquire control of the company."

Under the terms of the Rights Plan, each Right will entitle stockholders to buy one one-hundredth of a share of a newly issued series of NESB's preferred stock at a purchase price of $27. The Rights will be exercisable only if a person or group acquires 20 percent or more of the company's common stock, acquires or seeks to acquire 10 percent of NESB's common stock and is found by the board to be an Adverse Person, or announces an intention to conduct a tender or exchange offer for 20 percent or more of the company's common stock. The board will be entitled to redeem the rights at 1 cent per Right at any time before such acquisitions occur and upon certain conditions after such a position has been acquired.

If, after the Rights have been distributed and are transferable, the company should consolidate with or merge with and into any other entity and the company were not the surviving company, or, if the company were the surviving company but all or part of the company's common stock were

exchanged or changed into the securities of any other entity, or, if more than 50 percent of the company's assets or earning power were sold, each Right would entitle its holder to purchase, at the Right's then-current purchase price, a number of shares of the acquiring company's common stock or other securities having a market value at that time equal to twice the Right's purchase price.

Upon the acquisition of 20 percent or more of NESB's common stock by any person or group or an acquisition of 10 percent or more of NESB's common stock by any person and a determination by the board that such person is an Adverse Person because such person, among other things, might jeopardize the financial integrity of the company or prejudice the interest of NESB stockholders, depositors or customers, each Right would entitle its holder to purchase, at the Right's then-current purchase price a number of shares of NESB common stock having a market value equal to twice the Right's purchase price. In such a situation, Rights held by the acquiring person will not entitle such person, or any person to whom such Rights are assigned or transferred, to purchase any common stock or other securities of the company.

NESB Corp. is a registered bank holding company whose principal subsidiaries are the New England Savings Bank and OmniBank of Connecticut, Inc. The two bank subsidiaries operate 24 branches in Southeastern Connecticut from the Rhode Island border to Milford, Conn.

SCHAUMBURG, IL (JAN. 18) PR NEWSWIRE - Motorola, Inc. (NYSE: MOT) today reported record sales and earnings in 1989.

Sales for the full year increased 17 percent to $9.62 billion from $8.25 billion in 1988. Earnings rose to $498 million, or $3.83 per share, from $445 million, or $3.43 per share, a year earlier. Net margin on sales was 5.2 percent, compared with 5.4 percent a year ago.

Fourth-quarter sales were $2.65 billion, up 21 percent from $2.19 billion in the fourth quarter of 1988. Earnings were $132 million, or $1.01 per share, compared with $124 million, or 95 cents per share, a year ago. Net margin on sales was 5.0 percent versus 5.6 percent in 1988. Margin improvements in the general systems sector and communications sector were offset by a decline in the semiconductor products sector and a loss in the information systems group.

#90018p0389 01/18/1990 ~PR Newswire
NEW YORK (JAN. 18) PR NEWSWIRE - The New York Times Company (AMEX: NYT) said today it expects record earnings per share in a range of $3.35 to $3.40 for 1989. This includes a gain of $2.46 per share from the sale of its cable television system. This gain plus $.06 per share earned from cable operations prior to the sale date will be reported as discontinued operations in the company's 1989 results. Reported earnings from continuing operations for 1989 are expected to be in the range of $.83 to $.88 per share.

In 1988 the company reported earnings from continuing operations of $2.00 per share. The decline in 1989 earnings from continuing operations was primarily attributable to a weakness in the New York region's economy, which affected advertising lineage at The New York Times, and to the following three previously announced factors:

During 1989 the company reported that the earnings impact of its magazine

acquisitions structuring would peak at $.26 per share in 1990. It also said that start-up and depreciation costs of its new printing and distribution plant in Edison, N.J. and continued weakness in the New York region's economy would negatively affect 1990 earnings.

Arthur Ochs Sulzberger, chairman and chief executive officer, said that because of these factors, earnings from continuing operations are expected to be only moderately above the 1989 range of $.83 to $.88 per share.

NEW YORK, (JAN. 18) PR NEWSWIRE - Marvin Barasch, chairman of Universal Holding Corp. (NASDAQ: UHCO), reported that the company has received a number of inquiries with respect to yesterday's sharp drop in the bid and asked prices for Universal's stock.

Barasch noted that the drop in price occurred immediately following the public announcement that J.T. Moran & Co. Inc., a major market maker in the stock of Universal, had voluntarily ceased operations as a broker-dealer and he stated that he believed that the volatility of the stock was, in large part, a direct result of that announcement.

Barasch further stated that he knew of nothing with respect to the financial condition or operations of Universal of John Adams Life Insurance Company of New York (its principal subsidiary), or any heretofore undisclosed corporate developments, that reasonably relate to such market volatility. In fact, Barasch noted, the management of Universal is quite optimistic about the future of Universal.

Barasch also announced today that the New York State Insurance Department has refused to give its approval to the structure of the transaction contemplated by the agreement dated Sept. 7, 1988, in which Abigail Investment Corp. had agreed to buy $6.5 million of common and preferred stock in Universal. The transaction was subject to approval by the New York State Insurance Department because of Universal's ownership of John Adams Life Insurance Company of New York. Abigail has advised Universal that, in view of the action by the New York Insurance Department, Abigail will elect to terminate the acquisition agreement in accordance with its terms if approval is not obtained on or prior to Feb. 28, 1990. If the transaction is terminated, Universal will seek alternative sources of equity financing.

CLEVELAND (JAN. 18) PR NEWSWIRE - BP Oil Company announced today that it has sold its carbon products business including its two coke calcining plants in Moundsville, West Virginia and Lake Charles, Louisiana to joint purchasers Conoco, Inc. and Calcined Coke Corporation (Calco).

Specific financial details of the sale have not been disclosed.

The two calcining plants upgrade petroleum coke from three of BP's refineries and external sources for use primarily in the aluminum industry. BP has had an ownership in the Moundsville plant since 1957 and has owned the Lake Charles plant since 1985.

In explaining the upcoming sale, BP Oil Company president, John G. McDonald, commented, "While our carbon products division is a profitable business, it has more strategic value to Conoco and Calco than to BP."

Under a long-term agreement, the calcining plants will continue to use coke from BP's refineries in Toledo and Lima, Ohio and Alliance, Louisiana.

RICHMOND, VA (JAN. 18) PR NEWSWIRE - Signet Banking Corporation (NYSE: SBK) today reported earnings for the year and fourth quarter ended December 31, 1989. Excluding special items and securities gains, core earnings rose by 11 percent.

Consolidated net income for 1989 was $123.3 million, or $4.55 per share, compared with $152.5 million, or $5.71 per share, in 1988. Consolidated net income for the three months ended December 31, 1989 amounted to $32.7 million, or $1.22 per share, compared with $28.3 million, or $1.02 per share, for the 1988 fourth quarter.

Earnings in both years were favorably affected by non-recurring special items. The 1989 earnings performance included a fourth quarter after-tax gain of $10.8 million from the sale of approximately $83 million of credit card receivables. This gain was used to offset $9.6 million (after-tax) of solicitation and upfront systems costs incurred during the year in implementing more sophisticated credit card account acquisition and account management techniques. During the fourth quarter of 1989, $5.5 million (after-tax) of these expenses were recorded. This strategy has added approximately 350,000 new accounts to the portfolio during 1989.

Additionally, during the first and second quarters of 1989, Signet sold four branch banking offices outside its principal market area and realized after-tax gains totaling $2.3 million. Comparative 1988 results included a third quarter after-tax gain of $29.2 million from the sale of a subsidiary and $12.0 million of tax benefits recorded during the second and third quarters which were related to the less developed countries ("LDC") loan loss provisions made in 1987.

Signet Banking Corporation is a $12 billion multi-bank, multi-state holding company headquartered in Richmond, Virginia and is comprised of Signet Bank/Virginia, Signet Bank/Maryland and Signet Bank N.A. In addition to its 239 full-service banking offices throughout Virginia, Maryland and the District of Columbia, it also offers investment services including municipal bonds, government, federal agency and money markets

sales and trading, an internationl operation and specialized services for trust, leasing, asset based lending, cash management, real estate, insurance, consumer financing and investment banking.

MADISON, NJ (JAN. 18) PR NEWSWIRE - Raman (Ray) Kapur has been appointed president of Schering-Plough Animal Health, a worldwide operating component of Schering-Plough Corporation (NYSE: SGP). He assumes overall responsibility for the company's animal health business, which develops and markets a broad range of pharmaceuticals and biologicals for food-producing and companion animals.

He replaces Rodolfo C. Bryce, who has been appointed senior vice president-marketing and sales, Schering Laboratories.

Kapur joined the company in 1975 as a financial analyst in Schering-Plough International headquarters in Kenilworth, N.J. In 1977, he was named controller of Schering Corporation (Iran), the company's subsidiary in that country, later assuming positions as marketing services manager and manager. Kapur became marketing manager-Middle East office, Schering-Plough International, in 1981. In 1984, he was appointed to his most recent position, general manager of the company's subsidiary in India Fulford Ltd. (India).

Kapur graduated from Columbia College with a B.A. degree in economics and from Columbia University with an M.B.A. in finance and international business.

Schering-Plough is a research-based company engaged primarily in the discovery, development, manufacture and marketing of pharmaceutical and health care products worldwide.

MADISON, NJ (Jan. 18) PR Newswire - Schering-Plough Corporation (NYSE: SGP) today announced the appointment of Rodolfo C. Bryce as senior vice president-marketing and sales of Schering Laboratories, the company's U.S. prescription products arm.

Bryce replaces Charles M. Stroupe, who has been appointed president of

Wesley-Jessen, Schering-Plough's vision care business.

Bryce joined Schering-Plough in 1980 as finance director (Latin America) for Schering-Plough International. In 1983, he became general manager of Essex Farmaceutica Portuguesa Limitada, the company's subsidiary in Portugal. A year later, he was appointed a vice president and regional director in Schering-Plough's Latin American operations, headquartered in Miami, Fla. He became president of Schering-Plough Animal Health, his most recent position, in 1988.

Before joining Schering-Plough, he held various executive positions in finance and operations with TT Corporation in Peru, Belgium and the United States.

In his new position, Bryce will be responsible for marketing and sales in Schering Laboratories' prescription products business, which includes allergy and asthma medications, dermatologicals and anti- infectives, as well as anticancer and antiviral therapies.

Bryce holds a B.B.A. degree in financial management from Saint Mary's University in San Antonio, Texas.

Schering-Plough is a research-based company engaged primarily in the discovery, development, manufacture and marketing of pharmaceutical and health care products products worldwide.

STAMFORD, CT (JAN. 18) PR NEWSWIRE - GTE's (NYSE: GTE) board of directors today approved a 2-for-1 split of GTE's common stock, subject to shareholder approval of an increase in the corporation's authorized common shares at the annual shareholders' meeting on April 18.

"We are delighted that GTE's success in the marketplace has made it appropriate for us to split the stock," stated GTE Chairman and Chief Executive Officer James L. "Rocky" Johnson. "With the 57 percent increase in the market price of GTE's stock in 1989, and the 98 percent overall increase in the stock price over the last two years, it is desirable to reset the price of the stock at a level that is more attractive to our many investors," said Johnson. "There is no question that this is good news for the shareholders," he stated.

"An increase in the number of authorized shares is necessary to implement the stock split and provide flexibility for the future," Johnson said. Therefore, the board has recommended that the shareholders approve an

increase in authorized shares from 750 million to 2 billion shares at the annual meeting in April.

The GTE chairman also noted that the board of directors declared a regular quarterly dividend of 73 cents, the 219th consecutive dividend paid by GTE over the last 54 years.

"As for the future," Johnson said, "we remain committed to a dividend payout ratio at the high end of comparable companies, and we intend to continue our practice of considering dividend increases at the August board of directors' meeting. Maximizing shareholders' total return remains our most important financial objective," Johnson declared.

#90018p0410 01/18/1990 ~PR Newswire

NORTHBROOK, IL (JAN. 18) PR NEWSWIRE - International Minerals & Chemical Corporation (IMC) (NYSE: IGL) today reported earnings from continuing operations of $9.8 million, or 40 cents per share, for the second quarter ended Dec. 31, 1989.

"Sales and operating earnings from our three businesses were up nicely over the same period last year," said IMC Chairman and Chief Executive Officer George D. Kennedy. "Sales were $330.1 million versus $241.0 million last year, or a 37 percent increase. Operating earnings almost tripled to $20.1 million from $6.8 million a year ago.

"Six-month results for these businesses were favorable to last year also," Kennedy added. "We expected an upward trend in performance and we're pleased that it's developing."

Sales were $641.5 million versus $458.6 million, up 40 percent; operating

earnings were $34.9 million versus $12.8 million, up 173 percent.

"Pitman-Moore led the way with operating earnings of $9.2 million compared with $1.9 million in last year's second quarter," Kennedy said. "We continue to be pleased with results achieved from the first quarter acquisition of Coopers Animal Health, which has converted Pitman-Moore into the major world player in animal health and nutrition."

Mallinckrodt Medical and Mallinckrodt Specialty Chemicals produced year-to-year second quarter earnings gains of 53 percent and 49 percent, respectively.

"Sales of Optiray, our new nonionic x-ray contrast medium, were strong in the second quarter and exceeded our expectations," Kennedy reported. "The product has gained widespread acceptance.

"Operating performance was outstanding at our production plants in the specialty chemicals business, helping to increase margins."

Corporate expense was at the same level as a year ago excluding compensation costs tied to the price of IMC's common stock. For the first six months this year, the stock price improvement caused a $2.9 million increase in expense; last year, the stock price movement caused a $0.9 million decrease in expense.

"The large increase in operating earnings was offset by much lower results from IMC Fertilizer (IFL) and higher net financial expense," Kennedy said.

IMC's share of IFL earnings fell $5.8 million, or 41 percent, in the second quarter from year-ago results.

"The decrease in IFL earnings represented a 25 cents per share, year-to-year change in our second quarter bottom line," Kennedy said. "In the face of difficult market conditions, IFL delivered nicely in the first half. Were they not as disciplined and efficient as they are, the impact of weak prices would have been much greater."

Net financial expense was $14.7 million higher in this year's second quarter compared with a year ago. Part was higher interest expense from the zero coupon debt issued in last year's second quarter and from foreign borrowings assumed with the Coopers acquisition. The balance was from less excess cash which reduced interest income.

Net earnings for the second quarter were $9.5 million, or 39 cents per share, compared with $23.4 million, or 83 cents per share, a year earlier. Last year's second quarter results included an $8.4 million gain, or 35 cents per share, from the sale of an investment in a previously discontinued methanol joint venture.

Net earnings for this year's first half were $17.0 million, or 66 cents per share, compared with $52.2 million, or $1.86 per share last year.

IMC's principal businesses are Mallinckrodt Medical, Mallinckrodt Specialty Chemicals and Pitman-Moore. In addition, IMC owns approximately 38 percent of the common stock of IMC Fertilizer.

TROY, MI (JAN. 17) PR NEWSWIRE - MLX Corp. (NASDAQ: MLXX) announced today that the Company's Refrigeration & Air Conditioning Group is continuing to negotiate with its senior lenders as to the terms of the restructuring of the Group's senior credit facilities.

In November, MLX announced that the Group had reached an agreement in principle with the lenders for a new senior facility. Under the agreement in principle, the required principle payments would have been reduced for three years in exchange for an adjustment of the interest rates paid on the loans, warrants to purchase approximately 12.5 percent of the common stock of MLX, and a junior security interest in the stock of the Company's Specialty Friction Materials Group. In light of the recent drop in the MLX common stock market price and continued turmoil in the bond and equity markets, the Company has now determined that an alternative restructuring of the Refrigeration & Air Conditioning Group's credit facilities is required.

In order to provide the Company and the lenders additional time to develop an alternative restructuring program, the terms of the Group's existing loan facilities have been extended through Feb. 15, 1990, including a continuation of the existing interest rates and a continued deferral of the Sept. 30 and Dec. 31, 1989, term loan installments.

MLX is the largest independent nationwide distributor of commercial refrigeration and air conditioning equipment, parts and supplies, and a leading manufacturer of high energy friction products and components used in aircraft brakes and in clutches, brakes and transmissions for heavy duty trucks and off-highway equipment.

ERIE, PA (JAN. 18) PR NEWSWIRE - Zurn Industries Inc. (NYSE: ZRN), a leading designer and manufacturer of Environmental waste-to-energy equipment and systems and water control products, announced today that net income for the third quarter ended Dec. 31, 1989, increased 12 percent to $6,592,000.

Earnings per share for the period increased to $.53 from $.48 a year ago. Sales for the quarter were $143,364,000, up 21 percent from $118,056,000 last year.

For the nine months ended Dec. 31, 1989, net income was $19,702,000, 19 percent higher than last year's $16,558,000, with earnings per share reaching $1.59 compared to last year's $1.36. Sales for the period were $438,130,000, up 28 percent from last year's $341,283,000.

Backlog grew to $445,000,000, 27 percent higher than the previous year's $350,000,000. Waste-to-energy backlog was $295,000,000, up 28 percent from last year, while water control backlog was $117,000,000, up 54 percent. Other technologies' backlog declined 23 percent to $33,000,000, due primarily to reduced cooling tower backlog.

Zurn Chairman George Schofield stated that, "the impact of strong waste-to-energy earnings in the third quarter was partially masked by cost adjustments recorded on cooling tower projects yet to be completed." Schofield also noted that, "fourth quarter earnings are expected to be somewhat better than last year's strong comparable period, and orders activity for the company's waste-to-energy and water control segments continue to exceed the pace of a year ago."

ZEELAND, MI (JAN. 18) PR NEWSWIRE - The City of Zeeland's Board of Public Works has received a proposal from Consumers Power Company for the supply of wholesale electric energy.

"We're offering wholesale power to Zeeland at an estimated energy savings to the city of $353,000 per year," said Paul A. Elbert, the utility's vice president of marketing, rates and wholesale power.

"We're capable of supplying 50 megawatts of electricity immediately, with minimal capital cost to the city for tying into our transmission system and potential savings to the city of $2.9 million on its power supply improvement projects," Elbert told the Zeeland Board of Public Works. "With combined lower energy costs and capital additions, Consumers Power can serve Zeeland's electricity needs at an estimated savings of $5.2 million through the year 2000," Elbert stated.

Consumers Power would provide electric service to the city through two connections with its 138,000-volt transmission system, at an estimated reliability rate of one outage per 100 years, based on operating experience. With planned modifications to Consumers Power's transmission system, up to 100 megawatts of power would be available to Zeeland by the late 1990s, Elbert said.

"Consumers Power offers, in addition to reliable service at competitive rates, the ability and experience to respond to any emergency that may occur," Elbert added.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

PITTSBURGH (JAN. 18) PR NEWSWIRE - II-IV Inc. (NASDAQ-NMS: IIVI) today reported earnings for the second fiscal quarter ended Dec. 31, 1989.

Net earnings for the period were $362,000 ($0.14 per share) on record high revenues of $4,125,000. These results compare with net earnings of $396,000 ($0.15 per share) on revenues of $3,273,000 in the second fiscal quarter last year. Bookings for the current period also achieved a new record of $4,236,000 vs. $3,583,000 a year ago.

The 26 percent increase in revenues was primarily due to higher shipments of the company's laser optics to the industrial and medical markets. As anticipated, the decrease in net earnings reflects increased expenses relating to the company's investment in its Singapore manufacturing facility.

For the six months ended Dec. 31, 1989, II-VI reported net earnings of $673,000 ($0.25 per share) on revenues of $7,538,000. This compares to net earnings of $795,000 ($0.30 per share) on revenues of $6,536,000 for the same period a year ago.

Headquartered in Saxonburg, Pa., II-VI Inc. designs, manufactures and markets optical and electro-optical components and materials for precision use in infrared devices. The company's products are used in high-power lasers for industrial processing, lasers for surgery and other medical applications and military sensing systems.

#90018p0424 01/18/1990 ~PR Newswire
CLEVELAND (JAN. 18) PR NEWSWIRE - Pioneer-Standard Electronics, Inc. (NASDAQ: PIOS) today said that earnings for the fiscal third quarter ended December 31 were stronger than those of the preceeding two quarters, but fell short of the record level of the year earlier quarter.

Current year third quarter net income of the Cleveland-based distributor of electronic components and computer products amounted to $1,565,000, or 29 cents per primary share. Third quarter earnings were 21 percent greater than those of the current year's first quarter and 96 percent higher than those of the second quarter. A year ago, Pioneer had third quarter net income of $2,230,000, or 41 cents per share, a record for any quarter in the company's history.

Nine month net income amounted to $3,661,000, or 68 cents per primary

share, down from the record $5,879,000, or $1.09 per primary share, last year.

Preston Heller, Jr., chairman and chief executive officer, said that third quarter and year-to-date earnings were penalized by weakened demand for industrial electronics products which resulted in inadequate sales growth to offset expenses associated with expansion programs the company was committed to. He said that for the industry as a whole, calendar year 1989 sales were flat to down two percent.

Pioneer-Standard fiscal 1990 third quarter sales were $80,910,000, up two percent from the $79,458,000 of a year earlier. Nine month sales were $231,449,000, a three percent increase over the $225,624,000 of last year's first three quarters.

Pioneer-Standard markets a broad range of electronic components and computer products. The company and its affiliate, Pioneer/Technologies Group, Inc., serve most major markets through 41 locations.

PHILADELPHIA (JAN. 18) PR NEWSWIRE - International Mobile Machines Corp. (NASDAQ: IMMC), a leading provider of wireless digital telephone systems, today announced that the Ultraphone 100(R) Wireless Digital Loop Carrier (R) System has been rated GTE Standard and a two year purchasing agreement was signed with GTE Supply (NYSE: GTE).

The agreement became effective in December 1989, and applies to GTE Telephone Operations.

The rating of "GTE Standard" for the Ultraphone system was earned during the past 18 months after completing an intensive field trial, a thorough testing and evaluation program, and a comprehensive quality assurance review by GTE personnel.

"A rating of 'GTE Standard' is a major achievement for Ultraphone technology and IMM. GTE is a leading telecommunications company and earning their standard rating is unquestionably a significant milestone for us. It proves once again that the Ultraphone is a respected, quality product which is bringing wireless digital access into the telephone industry's mainstream," said William J. Hilsman, president and chief executive officer of IMM.

GTE Southwest, one of GTE's four operating companies, has Ultraphone systems in two West Texas communities -- Sonora and Eldorado. The system has proven to be a viable alternative for providing service.

IMM is a world leader in wireless digital access technologies. The company is engaged primarily in the production, sale and installation of Ultraphone, a digital radio-telephone system. Ultraphone systems are now operated by telephone companies in 12 states, Canada and Mexico.

IONIA, MI (JAN. 18) PR NEWSWIRE - Independent Bank Corporation (NASDAQ-NMS: IBCP), the Ionia-based bank holding company, today reported that its 1989 net income was 12 percent higher than in 1988. Net income rose to $2,714,000 from $2,425,000 in 1988. Fully diluted earnings per share were $1.08 compared to $1.10 per share a year earlier.

Loren C. Adgate, the company's president and chief executive officer, issued the earnings report, and went on to say, "I am pleased with the progress toward our goal of strong, sustainable earnings. Earnings in 1988 included an extraordinary item, tax benefits from an operating loss carryforward, totaling $600,000. Excluding the effects of this extraordinary item, income increased by 49 percent to $2,714,000 from $1,825,000 and earnings per share increased to $1.08 in 1989 from $.79 in 1988."

Adgate also pointed out that other significant factors should be noted in the year-to-year earnings comparison:

-- Certain investment securities were designated as "held for sale" and written down to current market value. As a result of this unrealized loss of $160,000, the company reported a $2,000 net loss on the sale of securities compared to a $241,000 gain in 1988.

-- Net interest income increased by more than 9 percent even though there was a falling market for most of the year.

-- The provision for loan losses decreased by $172,000 to $1,201,000 in 1989 from $1,373,000 in 1988 and the allowance for loan losses grew to $2,736,000 at Dec. 31, 1989, from $2,499,000 a year earlier.

In the fourth quarter of 1989, net income was $719,000 ($.28 per share, fully diluted). In 1988, net income for the same period was $797,000 ($.33 per share, fully diluted). 1988 earnings, however, included an extraordinary item of $227,000. Income before the extraordinary item totaled $570,000 ($.23 per share, fully diluted).

At Dec. 31, 1989, total assets were $328,301,000 compared to $312,732,000 at the end of the previous year. Total deposits grew to $293,280,000 from $278,854,000. Total loans outstanding grew by 9 percent to $221,280,000 from $202,965,000.

Shareholders' equity stood at $22,820,000 at Dec. 31, 1989, compared to $21,002,000 a year earlier. Fully diluted book value on those same dates was equal to $9.88 and $9.33 per share, respectively.

Independent Bank Corporation has three affiliate banks: Independent Bank, Ionia; Independent Bank West Michigan, Rockford; and Independent Bank South Michigan, Leslie. The three banks operate 26 offices serving 23 communities in western and central Michigan.

The company's common stock is traded in the over-the-counter market and quoted on the NASDAQ National Market System under the symbol IBCP.

PITTSBURGH (JAN. 18) PR NEWSWIRE - Fidelity Savings Association

(NASDAQ-NMS: FSVA) today announced results for the first fiscal quarter ended Dec. 31, 1989.

Net income for the period was $202,000 or $0.21 per share compared to net income of $332,000 or $0.34 per share for the same period last year. Fidelity indicated that while core earnings remained strong, increased operating expenses caused the overall decrease in net earnings.

Net interest income for the quarter rose 3 percent to $1,147,000 vs. $1,116,000 for the first quarter a year ago. At Dec. 31, 1989, the association had total assets of $163,293,000 and stockholders' equity of $13,727,000 or $14.04 per share.

The board of directors of Fidelity Savings today declared a quarterly dividend of $.06 per share on the association's common stock. The dividend is payable March 9, 1990, to stockholders of record Feb. 9, 1990. This represents the sixth consecutive cash dividend paid by Fidelity Savings.

Fidelity Savings Association is a Pennsylvania-chartered, FDIC-insured savings institution conducting business through six offices in Allegheny and Butler counties.

RACINE, WI (JAN. 18) PR NEWSWIRE - Johnson Worldwide Associates, Inc. (NASDAQ/NMS: JWAIA) today reported that for the first quarter ended Dec. 29, 1989, net sales increased 5 percent to $43.2 million from $41.3 million in the year earlier quarter. Income from continuing operations decreased to $501,000 or $.06 per share from $705,000 or $.09 per share in last year's first quarter.

Terence S. Malone, president and chief executive officer, commented, "Our recreational product sales in the first fiscal quarter are always much lower than the next two quarters when shipments of fishing, camping, diving and marine products reach their peak. Nevertheless, we are disappointed that early shipments of recreational products in the first quarter are down from a year earlier. Sales of inking and stamping products in the quarter are up nicely, reflecting the addition of the three new business added in the last year, plus continued growth of our established business."

Malone continued, "The second and third quarters are the key to JWA's 1990 fiscal year performance. The sporting goods trade continues to be optimistic regarding sales of fishing and camping products in 1990.

Dealers reduced inventories of our products throughout 1989 and we now

#90018p0438 01/18/1990 ~PR Newswire

NEW YORK (JAN. 18) PR NEWSWIRE - Sequa Corporation (NYSE: SQA) expects that results for the fourth quarter of 1989 will reflect a pre- tax loss of approximately $15.0 million that resulted from transactions related to the restructuring of the company's aerospace group.

In the late 1989 Sequa sold a majority interest in its Atlantic Research Corporation (ARC) subsidiary to another Sequa company, Chromalloy Gas Turbine Corporation. The action was designed to facilitate the transfer of technology between the two operations and to enhance their joint R&D activities, particularly in the field of advanced composite materials.

In a separate transaction, Sequa concluded a private placement of 7 percent of ARC shares with a major financial institution. This transaction enabled Sequa to raise new equity capital while maintaining a program to repurchase Sequa shares in the open market.

The $15.0 million pre-tax loss resulting from these transactions will reduce earnings for the fourth quarter of 1989 by $1.08 per primary share. However, the company anticipates that future tax benefits resulting from the restructuring may substantially exceed the $15 million pre-tax loss recorded for the 1989 period.

Apart from the negative effect of the fourth quarter transactions, Sequa anticipates that per share results from continuing operations for both the 1989 fourth quarter and the full year will surpass the company's operating performance for the same periods of 1988. Sequa expects to report final results for 1989 during the early part of March.

#90018p0439 01/18/1990 ~PR Newswire

COLORADO SPRINGS, CO (JAN. 18) PR NEWSWIRE - Cray Computer Corp. (NASDAQ: CRAY) announced today that it has commenced negotiations to acquire some of the manufacturing assets of GigaBit Logic Inc. in exchange for 1,625,000 shares of Cray Computer's common stock.

Cray Computer will also surrender the 200,000 shares of Class A preferred stock of GigaBit which it presently owns.

Neil Davenport, president and chief executive officer, stated that GigaBit has been an important supplier of gallium arsenide logic circuits for use

in development of the CRAY-3 computer system. "Our goal is to have in-house gallium arsenide foundry capabilities in order to have better supply and rapid turn around time on circuits which are critical to the Cray-3," he said. "We are acquiring the necessary equipment and process technology for that purpose. If the purchase is completed, we will move the equipment, the process and some experienced individuals to Colorado Springs later this year. It is our understanding that GigiBit will continue to maintain its own internal wafer fab capabilities." Davenport added that it is not Cray Computer Corporation's intention to sole source gallium arsenide circuits through this in-house capability. "We will continue to purchase circuits from other sources once the in-house foundry is operational. Our long term goal is to have two outside sources for gallium arsenide circuits in addition to in-house capabilities. We see this approach as being the most likely to yield competitive quality, lead time and price."

A February closing is anticipated if the negotiations are successful and if the Internal Revenue Service rules that the use of Cray Computer common stock will not adversely affect a ruling received by Cray Research Inc. when it spun off Cray Computer corporate stock to Cray Research stockholders last November.

Cray Computer was spun off from Cray Research as a separate company on Nov. 15, 1989 and is engaged in the design and development of the Cray-3 computer system.

NEW YORK (JAN. 18) PR NEWSWIRE - Kimberly Delsing has been named president and chief executive officer, Calvin Klein Cosmetics Co. She is currently executive vice president and is responsible for domestic sales, international business and advertising worldwide.

Her appointment was announced today by Robert M. Phillips, chairman of Unilever Personal Care Products Group U.S.A.

Calvin Klein Cosmetics Co., then part of Minnetonka Corp., was acquired last year by Unilever.

A native of Missouri, Delsing, 38, attended Maryville College, St. Louis, from which she holds an associate degree in nursing, and St. Mary's College, San Antonio, Texas. She was employed by Warner Cosmetics Inc. from 1976 to 1983 where she served in several sales positions. She joined Calvin Klein in 1983 as vice president and national sales manager.

Delsing was named to her current position in 1985.

She will report to Phillips who is also responsible for Unilever's Chesebrough-Pond's USA and Elizabeth Arden units.

Unilever (NYSE: UN) is an international corporation with extensive interest in food, household and personal care products. Its businesses in the United States are organized under Unilever United States Inc.

PONTIAC, MI (JAN. 18) PR NEWSWIRE - First Federal Savings Bank and Trust, a subsidiary of First Federal Bancorp, Inc. (AMEX: FFS), announced approval by its board of directors to consolidate bank operations at its Redford Office location.

The current Redford branch (22041 Grand River, Detroit) will be consolidated with the Southfield Office (27255 Lahser Road, Southfield, Mich.) The consolidation becomes effective Feb. 10, 1990.

"This consolidation will be implemented to address our immediate concern of profitability and greater efficiencies in operation," noted Leo D. Ottoni, president and CEO. "By continuing to strengthen our ability to meet the needs of shareholders and depositors alike, we renew our commitment to maintain a 54-year tradition of banking excellence within the communities we serve."

After the consolidation is implemented, First Federal Savings Bank and Trust will total 31 branches in six southeastern Michigan counties. First Federal was chartered over 54 years ago and currently employs approximately 475 people. First Federal Bancorp, Inc. had assets of $1.3 billion on Sept. 30, 1989.

First Federal Savings Bank and Trust is a member of the Federal Home Loan Bank System. Its deposits are insured by the Federal Deposit Insurance Corporation (FDIC).

MINNEAPOLIS (JAN. 18) PR NEWSWIRE - Minntech Corp. (NASDAQ: MNTX) reported today net earnings of $473,000 or 17 cents per share for the third quarter ended Dec. 31, 1989, compared to net earnings of $24,000 or 1 cent per common share for the third quarter of last year. Revenues for

the third quarter were $6,123,000, up 39 percent from revenues of $4,409,000 for the same period last year.

For the nine months ended Dec. 31, 1989, the company reported net earnings of $1,232,000 or 46 cents per common share compared to net earnings of $227,000 or 10 cents per common share for the first nine months one year ago. Revenues for the nine-month period were $17,317,000, a 38-percent increase from revenues of $12,498,000 for the first nine months last year.

Dr. Louis C. Cosentino, president, reported, "We continue to remain on plan for the fiscal year and are on track for an excellent fourth quarter and an exceptional year. Net earnings were 7.7 percent of revenues for third quarter and 7.1 percent year to date. We expect continued improvement in revenues and earnings in the fourth quarter."

Minntech Corp. is a leader in developing, manufacturing and marketing medical devices, sterilants and water filtration products. The company is expanding into new businesses based on its internally developed technologies in hollow fiber membrane devices, chemical sterilants, dialysis solutions and electronic products. Minntech Corp.'s common stock is traded on the national over-the-counter market under the NASDAQ symbol: MNTX.

DETROIT (JAN. 18) PR NEWSWIRE - This week, domestic automakers scheduled output of 87,058 units, 74.84 percent above last week's 49,794 but 43.27 percent below the year-ago week's 153,472, Automotive News said today.

So far this year, 175,856 cars have been assembled, 57.35 percent below the 412,332 completed at this point last year.

Truckmakers targeted output of 53,114 units this week, 62.83 percent above last week's 32,619, but 43.74 percent below the year-ago week's 94,416.

Year to date, 121,563 trucks have been built, 51.06 percent below the 248,368 assembled at this time last year.

This week's estimated auto production was shared as follows: General Motors, 38.76 percent; Ford Motor Co., 22.39 percent; Chrysler Motors, 10.45 percent; Honda of America Manufacturing Inc., 8.88 percent; Toyota Motor Manufacturing U.S.A., 4.94 percent; New United Motor Manufacturing Inc., 4.71 percent; Mazda Motor Manufacturing U.S.A. Corp., 3.94 percent; Nissan Motor Manufacturing Corp., U.S.A., 2.73 percent; Diamond-Star Motors, 2.56 percent; and Subaru-Isuzu Automotive, 0.64 percent.

#90018p0464 01/18/1990 ~PR Newswire

TROY, MI (JAN. 19) PR NEWSWIRE - Today, Standard Federal Bank (NYSE: SFB) reported net income for the year ended Dec. 31, 1989, of $45.7 million, or $1.48 per share, compared to $63.3 million, or $2.07 per share, for 1988. In 1988, net income included income from the cumulative effect of a change in accounting which amounted to $5.0 million, or $0.16 per share.

Net income for the three months ended Dec. 31, 1989, amounted to $10.1 million, or $0.33 per share, compared to $13.6 million, or $0.44 per share for the same period in 1988.

The principal reason for the reduction in earnings for both the three- and 12-month periods was narrower interest margins, caused by a prolonged period of relatively higher short-term interest rates and a flat yield curve.

Total assets at year end of $9.6 billion remained virtually unchanged from the year-ago totals, even after completing two acquisitions of companies with combined assets of approximately $1.1 billion during the year. In connection with the bank's plan to reduce its wholesale funding sources and increase its retail penetration, borrowed funds were reduced by $932 million during the year, while deposits increased $897 million to $6.2 billion.

On Dec. 7, 1989, the Financial Institutions Reform, Recovery and Enforcement Act ("FIRREA") became effective. The new Act, among other things, established more stringent capital standards for the thrift industry. At Dec. 31, 1989, Standard Federal was in full compliance with the new requirements.

Single-family home loan originations for the fourth quarter totaled a record $259.1 million, compared to $165.5 million for the same period in 1988. Single-family home loan originations for the year were also a record at $947.5 million, compared to $735.3 million for 1988. Total mortgage loan originations for 1989, of $991.4 million, exceed the $785.8 million originated in 1988 by over 26 percent.

Nonperforming assets continue to be well controlled at 0.38 percent of assets at Dec. 31, 1989, compared to 0.22 percent of assets at the end of 1988.

On Nov. 18, 1989, the bank consummated the acquisition of Peoples Savings Bank, F.S.B. of Monroe, Mich., a profitable, retail-oriented thrift which had total assets of $357 million at that date.

Standard Federal Bank, with assets of $9.6 billion, and 113 branch offices in Michigan and Indiana, is listed on the New York Stock Exchange under the symbol SFB.

MINNEAPOLIS (JAN. 18) PR NEWSWIRE - Jostens Inc. (NYSE: JOS) today reported record sales for the six months ended Dec. 31, 1989.

Net sales for the six months ended Dec. 31 were $329.2 million, a 15-percent increase over last year's volume of $285.2 million.

Net income was $15.5 million, a 17-percent gain over the $13.2 million reported a year ago. Earnings per share rose 15 percent to 39 cents versus 34 cents for last year.

H. William Lurton, chairman and chief executive officer, said, "Overall, I am pleased with our performance for the first six months, although our sales gain for the second quarter was less than anticipated because of delivery delays in our Scholastic Division. The outlook for our businesses continues to be encouraging and we expect fiscal 1990 to be another record year for Jostens."

Jostens Inc. is a leading provider of products and services for the youth, education, sports award and recognition markets. The Fortune 500 company is listed on the New York Stock Exchange under the symbol "JOS" and last year reported sales of $696 million.

#90018p0474 01/18/1990 ~PR Newswire

RICHMOND, VA (JAN. 19) PR NEWSWIRE - Central Fidelity Banks, Inc. (NASDAQ: CFBS) attained its fifteenth consecutive year of increased earnings in 1989 and significantly lower nonperforming assets while achieving record levels of total assets, loans, deposits and stockholders' equity at year end.

Net income for 1989 was $54,384,000 representing an increase of 9.9 percent over earnings of $49,497,000 recorded last year. Net income per share increased to $3.53 from $3.20 in 1988, up 10.3 percent.

Total assets as of December 31, 1989 were $5,335,200,000 having grown 12.8 percent over the prior year-end level. Total loans increased 9.9 percent to $3,528,927,000, while total deposits grew 10.6 percent to $4,142,304,000. Stockholders' equity at year-end was $378,493,000, and the book value per share of common stock was $24.52 versus $22.23 at the end of 1988.

Central Fidelity's return of average total assets of 1.14 percent and return on average stockholders' equity of 15.04 percent for 1989 were virtually the same as reported in the previous year.

For the fourth quarter of 1989, net income increased 13.5 percent to $14,354,000 compared with earnings of $12,649,000 for the fourth quarter of 1988. Net income per share for the period was $.93 versus $.82 in 1988 an increase of 13.4 percent.

Net interest income increased 15.3 percent for the year to $196,355,000. On a tax equivalent basis, the net interest margin for 1989 increased to 4.88 percent, compared with 4.78 percent for 1988.

For the fourth quarter, the net interest margin was 4.74 percent compared with 4.87 for the comparable 1988 quarter due principally to the generally lower rates of interest in the latter part of 1989. The margin decline, however, was offset by higher levels of earning assets to generate a 10.5 percent increase in net interest income to $50,961,000 compared with $46,110,000 for the same 1988 quarter.

Central Fidelity Banks, Inc. is a Richmond, Virginia based bank holding company with 185 offices located throughout Virginia.

TOYOTA CITY, JAPAN (JAN. 19) PR NEWSWIRE - Toyota Motor Corporation (NASDAQ: TOYOY) announced that it has begun purchasing automatic floor-washing equipment from Clarke Industries Inc. of the United States on an OEM basis, for sale through the company's 45 industrial vehicle outlets in Japan.

Toyota estimates the value of the arrangement at about $300 million ($2.1 million) annually.

Toyota will offer three models of the "Toyota Hi-Washer," with yearly sales anticipated to reach 500 units. The current market for industrial floor-washing equipment in Japan is about 4,000 units a year.

Toyota expects the market to grow in the future as companies place further emphasis on creating clean, attractive work environments for their employees, and as they work to raise efficiency in response to Japan's increasing labor shortage.

Clark will be supplying the equipment to Toyota Automatic Loom Works, Ltd. Toyota's affiliate in charge of individual vehicle manufacturing in Japan.

Outline of Clarke Industries Inc.
(1) Head office: St. Louis, Missouri, U.S.
(2) President: Robert H. Elken
(3) Sales: Roughly $100 million (approx. $14 billion)
(4) Work force: Approx. 700 employees

#90018p0488 01/18/1990 ~PR Newswire

LONDON (JAN. 18) PR NEWSWIRE - United Newspapers plc (NASDAQ: UNEWY) today announced the acquisition of Mentor Marketing Services BV, which trades as Expoconsult, for Dutch guilders (Dfl) 35 million ($18.4 million) with the price potentially increasing to a maximum of Dfl 75 million ($39.5 million) pending achievement of profit performance targets in 1990 of Dfl 9.25 million ($4.9 million).

Expoconsult is based in Maarssen, the Netherlands, and has a current schedule of 27 trade exhibitions in seven European countries and in Singapore.

The vendors of Expoconsult are warranting Dfl 9.25 million ($4.9 million) in pre-tax profits for the year ending Dec. 31, 1990. The net assets to be acquired are negligible.

The acquisition of Expoconsult is a significant strategic addition to United Newspapers' (UN) extensive exhibition interests, which includes MGB Exhibitions in the United Kingdom and four other companies in the United States.

The Expoconsult management team will aim to maintain the company's record of rapid growth as well as provide a platform for UN to expand its exhibition activities in European markets.

The acquisition provides UN with an international network of exhibition organizers operating a combined portfolio of 84 exhibitions and conferences, which are complemented by one of the most extensive magazine publishing businesses worldwide.

The acquisition will be made by United Newspapers Nederland B.V.i.o. Of the acquisition price, Dfl 60 million will be raised by the issue of 4,549,000 new UN ordinary shares (25 pence each) to the vendors on completion of the acquisition. Cazenove & Co. has agreed to purchase or procure purchasers for these new UN ordinary shares, which are being placed in the market jointly by price of 425 pence per share (or approximately $14 on an equivalent ADR basis).

Dfl 35 million of the proceeds of the new share placement will be retained by the vendors and Dfl 25 million will be held in escrow on behalf of the vendors. The balance of the acquisition price, Dfl 15 million, will be

covered by the issue in 1991 of UN ordinary shares at a price which will be determined at that time. The release of the cash in escrow and the issue of the UN shares will be dependent upon achieving the profit performance targets for the year ending Dec. 31, 1990.

The total of 4,549,000 new UN ordinary shares to be issued on completion of the acquisition will rank on an equal basis, in all respects, with the existing issued UN ordinary shares, including the right to receive the final dividend for 1989. Application has been made to The International Stock Exchange (London) for the new UN ordinary shares to be admitted to the official list. Dealings in the new ordinary shares are expected to commence on Wednesday, Jan. 24, 1990.

WICHITA, KS (JAN. 19) PR NEWSWIRE - Pizza Hut Inc., announced today that it has acquired 263 Winchell's Donut House units from Shato Holdings Ltd., of Vancouver, British Columbia.

"The acquisition, which affects 'surplus' Winchell's units located primarily in southern California, will allow us to immediately increase our penetration in key geographies on the West coast," said Greg Dollarhyde, vice president and general manager of new concepts for Pizza Hut.

The 263 units, located in 10 Western states, will be converted to Pizza Hut Delivery/Carryout facilities.

"The conversion process will actually take place over the next two years," Dollarhyde said. "The units will continue to be operated as Winchell's Donut Houses until we are ready to completely remodel the facilities."

Pizza Hut plans to modify the architectural design of the units to fit company standards for delivery units. No opening date for any unit has been identified at this time.

"Clearly, the new design will focus on pizza carryout, with bright color schemes and easy customer access," Dollarhyde noted. "We think our unit's design will cater to the busy lifestyle many Californians enjoy, while delivering a clear quality statement about our products."

Over 1,500 employees affected by the acquisition will have the opportunity to interview for positions with Pizza Hut. It is estimated nearly 6,400 additional jobs will be created as a result of the business transaction.

In summary, Larry Zwain, division vice president of the western division of Pizza Hut said "It's not often we have an opportunity like this presented for our consideration. The size, location and general building construction of the acquired units very closely matches the specifications we outline for any Pizza Hut Carryout/Delivery unit. We're very confident we'll be able to effectively manage the conversion process and continue to build our business in one of the most promising economic climates for pizza in the nation."

Last year, the Pizza Hut system sold well in excess of 330,000,000 pizzas from more than 6,200 restaurants, Express outlets and carryout/delivery units located in all 50 states and from more than 1,200 units located in nearly 60 foreign countries. Pizza Hut is headquartered in Wichita and is a wholly-owned subsidiary of PepsiCo Inc.

NEW ORLEANS (JAN. 18) PR NEWSWIRE - McDermott Marine Construction, a major operating unit of McDermott International, Inc. (NYSE: MDR), has received a deepwater turnkey contract from Freeport-McMoRan Energy Partners, Ltd. (NYSE: FMP) valued at approximately $21 million for a platform in Mississippi Canyon Block 365 of the Gulf of Mexico.

The contract calls for design, fabrication and installation of a jacket, deck and piles in 621 feet of water off the coast of Louisiana. This will be the first project using McDermott's new deepwater concept which allows fast track fabrication, lightweight structures, flexible configurations, and improved economics.

The FMP platform, a four-leg structure with four skirt piles, will

accommodate up to eight wells for phased drilling and production. Fabrication is scheduled to begin in early June 1990 with installation to take place in early summer 1991.

McDermott Marine Construction is a major operating unit of McDermott International, Inc., a leading worldwide energy services company. The company and its subsidiaries provide engineering and construction services to the oil and gas industry offshore and for industrial and utility facilities onshore. They also manufacture steam-generating equipment, defense products, and tubular products.

NEW YORK (JAN. 18) PR NEWSWIRE - Brian Dittenhafer, president of the Federal Home Loan Bank of New York (NYSE: FRE), announced today that the board of directors elected William J. Callahan, 48, to the position of senior vice president. Callahan will be responsible for marketing the bank's services.

"Recent legislation drastically changed the business environment for the Federal Home Loan Banks and the home finance industry, but at the same time opened up a wide range of marketing opportunities for us," Dittenhafer said. "Mr. Callahan's experience in banking, marketing and sales makes him especially well qualified to develop new business for the bank."

Prior to joining the bank, he was senior vice president of U.S. Treasury Bond Sales for Yamaichi International (America) Inc., New York City (1986-1989).

Callahan's career spans 25 years in the financial community, including 13 years in marketing and sales and 12 years in banking.

He holds a Bachelor of Science degree in economics from the Wharton School University of Pennsylvania, Philadelphia (1964).

AUSTIN, TX (JAN. 18) PR NEWSWIRE - The Continuum Co. Inc. (AMEX: CNU) announced that for the quarter ended Dec. 31, 1989, revenues were $21,666,000 compared to $16,058,000 for the quarter ended Dec. 31, 1988. During the most recent quarter, the company had net income of $2,675,000 or 61 cents per share, compared to net income of $23,000 or 1 cent per share last year.

For the nine months ended Dec. 31, 1989, revenues were $58,314,000 compared to $49,351,000 for the comparable period in the previous year. Net income for the nine months was $3,012,000 or 69 cents per share compared to $1,108,000 or 25 cents per share a year earlier.

License sales during the quarter were $2,188,000 and included the previously announced sale of a license to the Continuum's Client/Contract Administration ("CCA") System. License sales for the same quarter last year were $1,064,000.

Service revenues for the quarter totaled $19,478,000, a 30 percent increase over the same quarter a year ago while expenses other than marketing and administration grew only 19 percent, reflecting improved service personnel utilizations. Marketing and administration expenses decreased due to reduced legal expenses.

Ronald C. Carroll, chief executive officer, noted that increasing service revenue has required additional staffing. "Our staff is now approximately 790 employees throughout the world."

The Continuum Company is an international consulting and computer services firm based in Austin, Texas, serving the needs of life insurance and other financial services companies for computer software and services.

WARRENTON, OR (JAN. 18) PR NEWSWIRE - Vinsor Corp. (OTC) and A.B. Holding Group Inc. ("AB") announced today the closing of the previously announced merger of AB into a subsidiary of Vinsor.

As a result, 174,000 shares of a new series of 8.5 percent non-convertible preferred stock ($4 per share) were issued and 5,036,609 new common shares were issued bringing the total outstanding to 6,332,509 shares. An additional 250,000 common shares will be issued to the former

AB shareholders if the company reports net earnings after taxes of at least $1.5 million in the year ended Dec. 31, 1990.

Also announced was that effective immediately, the name of the corporation has been changed from Vinsor Corp. to A.B. Holding Group Inc.

Since 1978, AB (dba Ag-Bag Corp.) has been engaged and is the industry leader in the manufacture and sale of sealed feed storage farm bagging equipment and disposable storage bags.

The company is currently offering in a private placement up to $1.5 million of its 10 percent senior subordinated convertible debentures convertible into unregistered common stock at $0.75 per share. The closing of this offering is expected during the first quarter of 1990.

NEW YORK (JAN. 18) PR NEWSWIRE - CS First Boston today announced that it has established a separate merchant banking company to manage the group's principal investment activities. The firm also announced that William E.

Mayer will be chairman and chief executive officer of the new subsidiary, which will be called CS First Boston Merchant Bank.

John M. Hennessy, president and chief executive officer of CS First Boston said, "CS First Boston is strongly committed to the merchant banking business. The formation of our new merchant banking company, led by Bill Mayer, is a reaffirmation of that commitment."

Mayer said that the activities of the new merchant banking subsidiary will include all principal investments such as leveraged buyouts, venture capital, real estate, bridge lending, and workout situations. "The new company underscores merchant banking's importance to First Boston. It will direct the attention of some of our most senior bankers to the opportunities in merchant banking and will give clearer focus to this business."

Mayer said that investment decisions will be taken by the merchant bank's board, which, in addition to Mayer, consists of Allan P. Gibb, James R. Maher, Jeffrey M. Parker, and John M. Sanzo.

Hennessy said that because of Mayer's important new function in running the merchant bank, Hennessy will assume the role of chief executive officer of The First Boston Corp., previously held by Mayer. Mayer will continue to be involved in overall First Boston and CS First Boston activities through the First Boston Operating Committee, the Compensation and Stock Allocation Committee, and the CS First Boston Group Executive Committee.

CAMBRIDGE, MA (JAN. 18) PR NEWSWIRE - Walter M. Cabot, president and director of the Harvard Management Company (HMC) and deputy treasurer of Harvard University, will step down as president of HMC later this year. A search committee has been formed to find Cabot's successor.

HMC, which Cabot has headed since its formation in 1974, manages Harvard's assets and related accounts. These assets include the university's $4.5 billion endowment as well as its pension reserves and other funds.

President Derek Bok said, "Harvard is enormously grateful to Walter Cabot. His prudent stewardship of the university's funds has guided the university successfully through the vagaries of the financial markets over the past 15 years. Under his leadership, the HMC has attained excellent long-term investment results, built a talented and effective professional

staff, and achieved a reputation for quality within the financial community and the world at large."

Cabot, 57 suffered a heart attack in April. Although recovered from that attack, he said he wants to work at a less hectic pace than he has for the past 15 years. Cabot will continue as president until a new head of HMC is appointed, and current plans call for him to stay at HMC in a meaningful role.

Russell Reynolds Associates, Inc., a prominent executive search firm with a major practice in serving financial institutions, has been retained by the university to assist the search committee in finding a successor. Reynolds is working with a committee comprised of President Bok, corporation member Robert Stone, Overseer Richard Smith, HMC board member Ted Ladd, and chaired by D. Ronald Daniel, the university's treasurer.

Cabot came to HMC from the Wellington Management Company where he had been a director and senior vice president from 1967 to 1974. Previously he had been a security analyst and portfolio manager for the Putnam Management Company. At HMC, Cabot was instrumental in leading Harvard into the creation of a major private investment portfolio. These investments, now valued at over $1 billion, are in such diverse areas as real estate, venture capital, and oil and gas, among others. Harvard -- under Cabot's management -- has also been an investment innovator in establishing a major trading operation within HMC.

A 1955 graduate of Harvard College, Cabot received the M.B.A. degree from Harvard Business School in 1959. He served in the U.S. Army from 1955 to 1957.

Treasurer Daniel said he was "very impressed with the first-rate, professional organization that Walter Cabot has built over the past years. "Under Walter's leadership, the management company has become truly a world-class firm. We must now find a successor who can build on and extend Walter's commitment, creativity and innovation, and high standards of performance."

SEATTLE (JAN. 18) PR NEWSWIRE - The Boeing Co. will initiate employment screening Jan. 22 for its new manufacturing plant in Spokane, Wash.

Phil Kelly, Boeing Spokane project manager, said an employment announcement will appear in The Spokesman-Review newspaper Jan. 21 outlining how people interested in employment can make an appointment for

pre-employment screening.

"Two phone numbers will be listed in the ad," said Kelly. "A toll free '800' number will have recorded information describing needed job skills and other information. The other phone number, a local number, will give people an opportunity to set-up an appointment to begin the employment screening process."

Kelly stresses that callers should be patient. "We anticipate a great deal of interest in the Spokane area for jobs," he said, "but, I want to remind people that they should be patient. The first callers won't have any advantage over callers who can't get through immediately."

Hiring for Boeing Spokane will continue into 1991 until the plant reaches its goal of 350 to 400 employees.

"We will continue to hire people throughout this year and into next year," said Kelly. "So, people interested in employment should realize that Jan. 22 will not be the only day to make an appointment. It will continue over many months."

BELLEVUE, WA (JAN. 18) PR NEWSWIRE - Edmark Corp. (OTC Pink Sheets) today reported a net loss of $150,657, or $0.083 per share, for the second fiscal quarter ended Dec. 31, 1989. This compares to a net loss in the year-ago period of $34,044 or $0.019 per share. Sales for the quarter were $554,822 compared to $553,502 for the same period last year.

The loss for the first half was $136,183, or $0.075 per share, compared to a net profit of $169,679, or $0.094 per share, in the six months ended Dec. 31, 1988. Sales for the six-month period were $1,588,981, up 2.2 percent from $1,554,619 in the year-ago period.

"The results for the quarter are disappointing but not unexpected," said Sally Narodick, chief executive officer. "As we have reported in the past the TouchWindow product line continues to have profit margin problems, which are not expected to be resolved until year-end." Narodick also indicated that higher expenses for direct mail activities, research and development and the additions to the management team also contributed to the increased losses.

"Edmark sales as well as those in the industry have been slower than anticipated and these slower sales have intensified our loss for the quarter," Narodick said. "We have reviewed our organizational structure

and expenses, and have implemented several cost cutting moves in response to these trends.

"The TouchWindow situation, and the increased management and marketing expenses will continue to impact our results for fiscal 1990," Narodick said. "However, we remain excited about the long-term potential for the company."

Edmark Corp. publishes basic curriculum education materials in both print and software versions. Copies of Edmark's 1990 Educational Materials catalog and Software catalog are available from Edmark Corp., P.O. Box 3903, Bellevue, Wash., 98009-3903.

#90018p0558 01/18/1990 ~PR Newswire

OGDEN, UT (JAN. 18) PR NEWSWIRE - Thiokol Corp. (NYSE: TKC) today reported net income for its second quarter ended Dec. 31, 1989, increased 25 percent over the like quarter last year. Net income was $9.7 million or 51 cents per share, compared to prior year's $7.8 million or 40 cents per share. Net sales for the quarter were $288.7 million which represents a 2 percent increase over last year's $282.9 million.

For the first half of the fiscal year 1990, net income was $18.6 million, or 97 cents per share, 16 percent above last year's $16.1 million, or 84 cents per share. Net sales were $556.5 million for the first six months compared to $562.8 million last year.

Space sales of $142.2 million increased 15 percent in the second quarter while earnings of $11.5 million were up 76 percent. Greater production activity and higher profit margins on the Space Shuttle program accounted for a majority of the increase in sales and earnings. Castor IV and STAR motor sales and profits also increased as deliveries on these programs were greater than the prior year's quarter.

Second quarter Strategic sales declined 3 percent to $62.1 million and profits decreased to $3.5 million, compared to $5.0 million last year. Peacekeeper sales decreased due to fewer scheduled motor deliveries and Small ICBM sales were lower due to a partial program termination last year. Higher activity on the Trident program largely offset these lower sales. The decrease in earnings was caused by lower Peacekeeper sales and increased costs on the Trident and Peacekeeper programs.

Tactical sales decreased 9 percent to $44.6 million and earnings declined 14 percent to $4.3 million. Standard Missile sales decreased as unit prices dropped on the current year contract, however, program profit margins rose due to reduced production costs. Lower profit margins on several smaller programs contributed to most of the reduction in profits for the quarter.

Ordnance sales decreased 13 percent to $39.8 million in the second quarter while profits dropped to $.7 million compared to $1.6 million last year. The lower sales correlate to lower operating levels at the government-owned, contractor-operated ammunition plants. Profits decreased more than sales due to a reduction in third party ordnance contracts which carry higher profit margins.

Thiokol manufactures and markets high technology solid propulsion systems, ordinance, and composite products for space and defense.

#90018p0559 01/18/1990 ~PR Newswire

PEORIA, IL (JAN. 18) PR NEWSWIRE - Caterpillar Inc. (NYSE: CAT) today announced that profit for 1989 was $497 million, or $4.90 per share of common stock.

This compares with profit of $616 million, or $6.07 per share, for 1988. Profit declined as the benefit of higher sales was more than offset by higher costs.

Sales and revenues of $11.13 billion were a record, increasing $691 million, or 7 percent, from 1988, the previous record. Sales increased $627 million dollars -- about one-fourth from higher physical sales volume and the balance from improved price realization. Revenues of the company's financial subsidiaries were $244 million, up $64 million, or 36 percent.

The improvement in physical sales volume resulted primarily from greater demand for diesel and turbine engines.

Improved price realization resulted from price increases implemented to help recover inflation on costs, offset to some extent by the adverse effect of a stronger dollar. (The stronger dollar caused sales in some countries to translate into fewer U.S. dollars.)

Cost increases in 1989 were the result of: -- Higher material costs, which include price increases from suppliers and less benefit from hedging activity. (Most of the company's multi-year exchange contracts related to material purchases had been utilized by early 1989.)

-- Inflation on labor costs, including the full-year effect of the company's 1988 labor agreement with the UAW; 1989 labor agreements with other unions; wage increases for management and other salaried employees; and higher benefit costs.

-- A higher level of average employment, principally the full-year effect of employees added in 1988 as a result of sharply higher volume.

-- Higher start-up costs related to the company's factory modernization program.

-- Higher research and development costs for new and updated product programs.

-- Higher depreciation expense resulting from increased capital expenditures in 1988 and 1989.

These cost increases were partially offset by effects of a stronger dollar which favorably affected both manufacturing and selling, general, and administrative costs outside the United States when translated into U.S. dollars.

The company's emphasis on new product development and factory modernization, although adversely affecting profit in the short-term, will significantly enhance long-term competitiveness.

In addition to higher costs, sales mix was unfavorable because more engines with lower margins were sold in 1989 compared with 1988.

The company's effective tax rate declined to 26 percent of profit before tax, compared with a 31 percent rate in 1988. The lower rate was due to a shift in the geographic mix of where profits were earned and higher tax credits related to U.S. federal and state income taxes.

Fourth-Quarter Results Profit for the fourth quarter was $107 million, or $1.05 per share. This compares with $163 million, or $1.61 per share, in the same quarter of 1988. Profit declined, despite higher sales and revenues, because of higher costs and a reduction in the profit of the company's affiliated companies.

Sales and revenues of $2.76 billion were up $100 million from the same period a year ago. The increase resulted from improved price realization and a $16 million rise in financial subsidiaries' revenues. Physical sales volume declined slightly.

Fourth-quarter costs were higher for essentially the same reasons that full-year costs were higher than 1988.

The higher costs were partially offset by a lower effective tax rate -- 18 percent compared with 25 percent in the fourth quarter 1988. Both quarters included the favorable effect of adjusting the estimated annual effective tax rate to actual.

"Equity in profit of affiliated companies" was $7 million lower than a year ago due to lower profit at Shin Caterpillar Mitsubishi Ltd., the company's 50 percent-owned affiliate in Japan. Profit declined primarily because tax loss carryforwards available in 1988 were used up in early 1989.

Sales Inside the United States Sales inside the United States totaled $5.13 billion, an increase of $55 million, or 1 percent from 1988. Price realization improved, while physical sales volume declined slightly.

Dealer machine sales to end-users declined throughout the year, reflecting the tight monetary policy of the U.S. Federal Reserve Board. This policy had a particularly adverse impact on many U.S. industries that use Caterpillar equipment. The adverse effect was most acute in residential and commercial construction.

Most commodity prices eased slightly from 1988 peaks, but remained high enough to encourage additional replacement buying of machines. The largest sales gains occurred in metals mining and petroleum. Dealer sales to coal mines also rose.

Engine sales were higher primarily because dealers increased sales into most nontruck applications -- particularly for electric power generation. In addition, sales of turbine engines rose as U.S. companies involved in natural gas production and distribution increased replacement purchases.

Sales of heavy-duty truck engines increased slightly due to strong industry demand in the first half and greater user acceptance of these Caterpillar engines. Late in the year, however, demand for on-highway trucks fell, forcing truck manufacturers to lower production schedules. This, in turn, caused a drop in orders for heavy-duty truck engines.

Sales Outside the United States Sales outside the United States were $5.75 billion, 11 percent or $572 million higher than 1988. (Sales outside the United States were 53 percent of the worldwide total, compared with 50 percent in 1988.)

Increased physical sales volume accounted for most of the improvement. Adverse effects of the stronger dollar offset some of the benefits of price increases during the year.

Dealer machine sales rose in most selling areas, with demand especially strong in Europe, Brazil, Australia and the Far East.

Diesel engine sales increased significantly primarily for electric power generation. Demand for turbine engines used in oil and gas production also rose sharply.

HOUSTON (JAN. 18) PR NEWSWIRE - Continental Express announced today non-stop service from its Cleveland hub to Detroit City Airport effective on Feb. 1. This new service represents the continued expansion of Continental Express from Cleveland Hopkins Airport and will complement Continental Airlines departures from Detroit Metro Airport. The regional carrier will initiate service with six flights Monday thru Friday and a similar weekend schedule, totaling over 1170 available seats per week.

Continental Express will operate with the 30 passenger Embraer 120 Brasilia Aircraft. This aircraft is valued in excess of $6 million, providing leading technolgy and complete customer ammenities. The Brasilia features an EFIS (electronic flight instrument system) cockpit

similar to the newest commercial jet airliners. This system is commonly referred to as the "glass cockpit," due to the use of computerized screens in place of gauges and dials. The passenger cabin features overhead storage for carry on items, fold down work tables and inflight service.

Continental Express will offer introductory fares to customers traveling from Detroit City to Cleveland as low as $69 one-way, unrestricted. Those passengers connecting through Cleveland to another Continental Airlines flight can take advantage of opportune connecting fares. The Continental Express schedule provides convenient connections to over 125 Continental Airline departures to 130 destinations throughout the world. John Prendergast, president of the central region, said, "The service from Detroit City Airport will offer a favorable alternative for customers traveling to Cleveland Hopkins Airport. We feel the expansion of the Cleveland hub to Detroit City will assist in accommodating the business travelers wishing to depart from this accessible downtown airport."

FREMONT, Calif. (JAN. 19) PR NEWSWIRE - Everex Systems Inc. (NASDAQ: EVRX) announced today that it has leased 480,000 square feet of additional space immediately adjacent to its existing headquarters.

The space will be leased in a phased takedown over the next 18 months to allow Everex to gradually consolidate many of its activities under one roof. Everex currently occupies 14 buildings in Fremont and San Jose, Calif.

"This facility will provide Everex with flexibility for growth during the next few years," said Steve Hui, president of Everex. "The convenient location and phased takedown schedule will assure a minimum amount of disruption to our operations as we begin to occupy the new building," continued Hui.

The new lease will provide approximately 160,000 square feet of office space, 120,000 square feet of manufacturing space, and 200,000 of warehouse/additional manufacturing space.

Everex may maintain its leases on some of its existing facilities, depending of the company's needs at the time each lease is due to expire.

(JAN. 18) UPI - A construction crew in Portland, Oregon, Wednesday uncovered the body of a three-year-old girl missing for one week. Authorities called to the scene later dug up the bodies of a woman and an infant believed to be the child's mother and brother. Autopsies are planned to determine the cause of death.

Authorities in Platte City, Missouri, have charged an Army major with first-degree assault for throwing his wife from an 80-foot-high hotel balcony. The man claims he accidentally dropped his wife while sweeping her up in a romantic gesture. But a witness says the woman was pushed. The woman survived the fall and is expected to recover fully, but doesn't remember the incident.

American and European animal rights activists are calling for a boycott of L'Oreal to pressure the French cosmetics giant into halting tests on lab animals. In a statement, L'Oreal said it has been unable to find acceptable substitutes for certain animal tests. But it agreed to- quote- ''diminish, and if possible manage to halt these tests for its commercial products.''

By GARY SILVERMAN, UPI

WASHINGTON (JAN. 18) UPI - A children's hospital association released a report card on Medicaid Thursday that says the program is good for infants bad for older children and ''downright ugly'' for the sons and daughters of the working poor.

The analysis by the National Association of Children's Hospitals and Related Institutions said ''significant progress'' was made in 1989 when eligibility was expanded for the federal-state program that provides health care for the poor.

Under the new rules, coverage was given to pregnant woman and children under 6 with incomes below 133 percent of the federal poverty guideline. Previously, coverage was provided only up to the guideline, $10,060 for a family of three.

But the group said Congress earned ''incompletes'' for not extending benefits to older children or to families with incomes up to 185 percent of poverty, as was called for in a bill sponsored by Rep. Henry Waxman, D-Calif.

''Congress did some very good work this past session. But there is a very real danger that some members of Congress will be tempted to rest on their laurels this year,'' NACHRI President Robert Sweeney said.

''Even with these reforms, Medicaid is still the good, the bad and the ugly. It's good for infants. It's bad for little kids. And it's downright ugly for the children of the working poor. We've got a long way to go to turn this program into a health care safety net for kids.''

Sweeney said in an interview that 12 million American children lack health insurance and half of them are above the poverty line.

He said the failure to provide coverage for the working poor has led to a shortage of preventive care. An example of the consequences, Sweeney said, was the deaths of four children from measles this month at the Children's Hospital of Wisconsin in Milwaukee.

When Congress returns to work Jan. 23, the group said, it could erase another incomplete by allowing children to receive Medicaid on a ''presumptive'' basis while their applications are being reviewed.

Sweeney admitted the change could allow some children later found to be ineligible to receive aid, but said the risk was worth taking to prevent

delays of up to several weeks.

''Kids can't wait while adults debate,'' he said.

The group also called for allowing families whose medical expenses push their income below the poverty line to receive Medicaid, expanded coverage for at-home care and higher payments to doctors who treat Medicaid patients.

(JAN. 18) UPI - Court officials in Los Angeles say the judge in the McMartin Pre-School molestation trial plans to announce Thursday the verdicts in 52 of the 65 counts in the case. The jury says it's deadlocked in the other 13 counts. The judge will quiz jurors Thursday morning to determine if further deliberations will break that deadlock. The nearly three-year-old trial of former pre-school teachers Raymond Buckey and his mother Peggy McMartin Buckey is the longest, costliest criminal trial in U-S history.

Military officials at Elmendorf Air Force Base in Alaska say the search will resume at dawn Thursday for the missing pilot of an F-15 jet fighter. The plane's wreckage was discovered Wednesday... one day after it crashed on a mountain 30 miles west of Anchorage. NO sign of the pilot, although officials say it's possible he ejected from the plane and parachuted to safety.

The astronauts are spending their last full day in space stowing gear and winding up scientific experiments in preparation for Friday's pre-dawn landing at California's Edwards Air Force Base. But they'll take some time out of their busy schedule Thursday morning for a phone call from President Bush.

(JAN. 18) UPI - The head of the Drug Enforcement Agency says the Mexican Embassy has assured him it knows nothing about claims that a slain D-E-A agent was a drug smuggler. The claims were made in a documentary that aired Sunday on Mexico's government-owned t-v station. The program charged D-E-A agent Enrique Camarena... who was kidnapped and killed in 1985... was part of a Mexican cocaine ring.

Mexico's attorney general is refuting local news reports asserting that Camarena was NOT slain in Mexico five years ago. But he said he'd reopen the case if the evidence warranted. In recent days, several Mexican newspapers have published reports saying Camarena had links with drug traffickers and may still be alive.

A Mexican man is back behind bars in Los Angeles County after 31 years on the lam. Authorities nabbed Victor DeCasaus in Ontario, California, as he stepped off a flight from Florida. They say DeCasaus had been serving time on a manslaughter conviction stemming from a 1955 drunken driving accident but escaped from jail in 1959 and fled to Mexico. Attempts to return him to the United States were unsuccessful until Wednesday, when detectives received a tip that DeCasaus was in Florida.

(JAN. 18) UPI - The Hartford Whalers haven't exactly been world beaters on home ice this season, so coach Rick Ley was happy to see his team come from behind to earn a tie with the Boston Bruins.

It took a dramatic goal by Kevin Dineen with 17 seconds remaining in the third period Wednesday night to lift the Whalers to a 5-5 tie with the Bruins.

''It takes a lot of guts to come back like we did,'' said Dineen.

The Whalers erased a 3-0 deficit with four straight second-period goals, but Ray Bourque and Randy Burridge scored 1:53 apart early in the third period. The Whalers pulled Kay Whitmore and forced overtime when Dineen redirected a Ray Ferraro shot past Andy Moog with 17 seconds left in regulation.

''That's the first time that play worked for us,'' said Ley. ''We were 17 seconds away from a loss and it took a big effort to salvage a tie.''

Neither team had a shot in overtime.

The Whalers, who own the NHL's best road record (13-8-2), are 8-13-2 at home. Hartford is now 3-2-1 against Boston this season and is the only team to beat the Bruins more than twice.

Bourque had two goals and Craig Janney added three assists for Boston. Janney, who was born in Hartford and raised in nearby Enfield, set up goals by Garry Galley, Bobby Carpenter and Bourque.

Mikael Andersson, Randy Ladouceur, Scott Young, Pat Verbeek and Dineen had the goals for Hartford.

Galley gave Boston a 1-0 lead 2:45 into the game with a power-play goal. Janney dug the puck out of the right corner and centered to Galley, who unleased a slap shot from the point that eluded a screened Whitmore.

The Bruins moved to a 2-0 advantage midway through the first period when Janney backhanded a pass to the slot for Carpenter, who avoided a check from Brad Shaw and backhanded a shot past Whitmore's left skate. Bourque rushed up from his defensive position, took a pass from Janney and beat Whitmore to make it 3-0 at of the second period.

''We were lucky to be up 3-0,'' said Milbury.

The Whalers responded with unanswered goals by Andersson, Ladouceur, Young and Verbeek to move to a 4-3 lead.

After a Dave Babych shot hit Jim Wiemer, Andersson collected the loose

puck and beat Moog to the glove side from the slot at 6:55 to slice the margin to 3-1. Ladouceur made it 3-2 midway through the period after Ron Francis made a rink length dash.

Young knotted the score at 3-3 at 15:20 when he connected on a low slap shot. Verbeek gave the Whalers a 4-3 lead with 1:18 remaining in the period when he converted a feed from Dave Tippett.

Bourque scored on a powerplay at 3:41 of the third period to knot the score at 4-4. Burridge broke loose on a breakaway and beat Whitmore between the pads at 5:44 to boost Boston to a 5-4 edge.

The Bruins were without newly acquired center Dave Poulin, who was traded to Boston by Philadelphia on Tuesday for Ken Linseman. General Manager Harry Sinden said he doesn't expect Poulin to report until after the all-star break.

--- AROUND THE NBA ---

Elsewhere in the NHL, NY Islanders beat Montreal 6-3, Chicago topped Minnesota 3-1, and Edmonton iced Winnipeg 6-3.

Islanders 6, Canadiens 3

At Montreal, David Volek scored twice and Pat Lafontaine added his 40th goal of the season to carry New York to its eighth straight victory. The Islanders have lost only once in their last 14 games. The victory carried the Islanders into a first-place tie with the New Jersey Devils in the Patrick Division.

Blackhawks 3, North Stars 1

At Chicago, Jacques Cloutier turned aside 25 shots in his first start since Dec. 22 to lead Chicago. Steve Larmer, Dirk Graham and Steve Thomas each tallied once for the Blackhawks, who snapped a two-game losing skid. Rookie Jeremy Roenick, celebrating his 20th birthday, had two assists.

Oilers 6, Jets 3

At Edmonton, Alberta, Mark Messier scored his second hat trick of the season and 12th of his career. Messier scored twice in the second period and rapped in a loose rebound at 18:21 of the third period to run his goal output to 27 this year. Linemate Glenn Anderson assisted on all of Messier's goals and one other for a four-point night.

(JAN. 18) UPI - North Carolina, facing perhaps its biggest regular-season challenge in years, came through in a big way Wednesday night.

Rick Fox scored 19 points and the Tar Heels held No. 8 Duke scoreless for nine minutes of the first half to rout the Blue Devils 79-60 in an Atlantic Coast Conference game.

The Tar Heels, perennially a Top 20 power, are encountering their lowest period in a decade. North Carolina has been out of the ratings for three weeks, its longest stretch in more than 10 years.

But the effort against Duke was the best of the season for a team that has been up and down and rarely has put together solid back-to-back games.

North Carolina, 12-6 and 2-1 in the ACC, also got 12 points from Pete Chilcutt and 10 from Hubert Davis.

Christian Laettner scored 18 points and Alaa Abdelnaby 12 for the Blue Devils, who had their nine-game winning streak snapped and dropped to 12-3 and 3-1 in the league.

''They played great,'' Duke Coach Mike Krzyzewski said. ''They played as hard on defense as I've seen a team play against us. They deserved the win and they deserve the recognition for a great effort. Their defense killed our offense and that created offense for them.''

North Carolina's defense started at the point, where junior King Rice overwhelmed Duke freshman Bobby Hurley. Rice had 13 points and nine assists; Hurley finished with six points, one assist and 10 turnovers.

--- AROUND THE COLLEGE SCENE ---

Elsewhere Wednesday night in the Top 20, No. 2 Georgetown trounced Boston College 68-45; No. 13 Arkansas routed Southern Methodist 80-61 and No. 16 Purdue nipped Wisconsin 56-54.

Also, Kentucky upended Alabama 82-65, Tennessee pounded Florida 80-75, Maryland edged Virginia 74-72, DePaul overpowered Niagara 73-58, Mississippi beat Auburn 80-72, Memphis State held off Texas Southern 85-82 and Arizona thumped Arizona State 70-61.

At Landover, Md., Mark Tillmon scored 17 points and Dikembe Mutombo added 12 points and 13 rebounds to lead Georgetown to its 27th straight home victory. The Hoyas never trailed and took control of the game with an 11-0 run midway through the first half. The Eagles have lost five straight games.

At Dallas, Todd Day scored 17 points to lead Arkansas to its fifth

straight victory. Lenzie Howell fired in 15 points and Ron Huery added 12 for the Razorbacks. Tony Patterson and John Colborne each scored 16 points for the Mustangs while freshman Gerald Lewis added 15.

At Madison, Wis., Tony Jones scored 15 of his 23 points in the final six minutes to lead Purdue. The Boilermakers won their fifth straight game and notched their 25th consecutive victory over Wisconsin dating to February 1977. Purdue has have won the last 13 games played between the two teams in Madison.

At Lexington, Ky., Reggie Hanson scored 20 points and Kentucky led all the way in upsetting Alabama. The Wildcats had their best shooting night of the season, hitting 52 percent, and led by as many as 24 points in the second half. Melvin Cheatum led the Crimson Tide with 18 points.

At Gainesville, Fla., freshman forward Carlus Groves, taking advantage of Florida's depleted front line, scored all 15 of his points in the second half to lead Tennessee. The Volunteers outscored Florida 13-7 in the final three minutes to complete a rally a 48-40 deficit with 16 minutes remaining.

At Charlottesville, Va., Jerrod Mustaf hit a 15-foot jumper with 1:19 left to lift Maryland. Tony Massenburg scored 23 points to lead the Terrapins, passing the 1,000-point mark for his career. Virginia was led by 19 points from Kenny Turner.

At Rosemont, Ill., David Booth scored 24 points to power DePaul to its sixth victory in its last seven contests. DePaul outscored Niagara 12-2 over the first 7:10 of the second half to take control. Patrick Jones led Niagara with 22 points.

At Oxford, Miss., Mississippi used a 14-4 run in the final seven minutes to pull away from Auburn. Gerald Glass paced the Rebels with 28 points and Tim Jumper added 17. Auburn was led by Ronnie Battle with 18 points.

At Memphis, Tenn., Todd Mundt scored seven points in the last three minutes to lead Memphis State. Memphis State blew a lead that had been as many as 20 points in the first half and had to come from three points behind in the last 2 1/2 minutes for the win.

At Tempe, Ariz., Brian Williams scored 20 points to lead Arizona past its rival. Arizona led 30-28 at halftime and pulled away in the second half as Wayne Womack scored 14 of his 18 points. Alex Austin finished with 24 points to lead Arizona State.

#90018u0448 01/18/1990 ~United Press International

(JAN. 18) UPI - The acquisition of a former Detroit ''Bad Boy'' has helped make the Philadelphia 76ers too good for the world champion Pistons.

Philadelphia won a rough 112-108 victory Wednesday night at The Spectrum and remains perfect at 2-0 against Detroit. The game was filled with confrontations as former Piston enforcer Rick Mahorn made his presence felt underneath the boards.

''We're not going to be intimidated by anybody, not in this building,'' said the 76ers' Charles Barkley. ''There's nothing worse than being intimidated at home.''

Mahorn helped create the Pistons' ''bad boy'' image and was a major factor in their championship season. He was selected by Minnesota as the first pick in the expansion draft and then traded to the 76ers, who had lost eight straight games to Detroit over the past two years, and sought a physical rebounder.

Philadelphia Coach Jim Lynam said of the Pistons' hard play, ''That's why they're the defending world champions ... (these) two teams just went toe to toe.''

The winning basket came after Laimbeer blocked a shot by Mahorn. Barkley grabbed the rebound and laid it in. With five seconds to go, Isiah Thomas lost the ball out of bounds on a drive to the basket and Barkley hit a dunk with two-tenths of a second left for the final margin.

Johnny Dawkins, who was guarding Thomas, said, ''I was just trying to keep him from turning the corner. That's the only thing you can do ... I was hoping to make him pass the ball and let somebody else beat us. Luckily, it worked out OK.''

Not for Pistons Coach Chuck Daly.

Detroit, which lost for only the third time in its last 15 games, got a season-high 32 points from James Edwards, 17 from Joe Dumars and 16 from Thomas.

Hersey Hawkins scored 25 points and Mike Gminski added 20 for Philadelphia
Philadelphia was without sixth man Ron Anderson, who sprained his left knee in Saturday night's game against Washington.

--- AROUND THE NBA ---

In other NBA games, Miami downed Indiana 121-111, Boston defeated Orlando 133-111, Houston topped Cleveland 107-98, New Jersey stopped Washington 115-106, Phoenix routed Dallas 108-88, San Antonio edged New York 101-97, Utah out-played Atlanta 95-88 and the Los Angeles Lakers downed Seattle

100-90.

Heat 121, Pacers 111

At Miami, Rony Seikaly scored a career-high 31 points and rookie Sherman Douglas scored 17 of his 26 points in the fourth quarter as Indiana lost its fifth consecutive road game. The Pacers were led by Chuck Person's 32 points, Reggie Miller added 26 and Vern Fleming 25.

Celtics 133, Magic 111

In Orlando, Robert Parish scored 25 points and grabbed 16 rebounds and Kevin McHale added 21 points as the Celtics shot 58 percent from the floor and hit 25 of 26 free throws. The Magic was led by Terry Catledge with 24 points.

Rockets 107, Cavaliers 98

In Houston, Buck Johnson scored 22 points, Otis Thorpe added 21 and Akeem Olajuwon finished with 19 points and 19 rebounds as the Rockets won their seventh straight home game. Larry Nance paced Cleveland with 20 points and 11 rebounds, while Mark Price added 17 points.

Nets 115, Bullets 106

At East Rutherford, N.J., Sam Bowie scored 22 points and collected 14 rebounds as New Jersey handed Washington its third straight loss. Mookie Blaylock and Dennis Hopson each scored 18 points for the Nets, who snapped a two-game losing streak. Ledell Eackles led the Bullets with 21 points.

Suns 108, Mavericks 88

In Dallas, Tom Chambers scored 26 points and Jeff Hornacek added 22 as Phoenix won its fifth straight game and handed Dallas its fifth consecutive loss. The Suns out-rebounded the Mavericks 53-33 with Kurt Rambis gathering in 15 misses. The Mavericks were led by Rolando Blackman's 17 points.

Spurs 101, Knicks 97

In San Antonio, Willie Anderson scored 7 of his 26 points in the final minute and Terry Cummings added 21 points to pace the Spurs, the league's most improved team, who are now 24-10. New York was led by Patrick Ewing's 27 points and Johnny Newman added 18 points.

Lakers 100, Sonics 90

At Inglewood, Calif., James Worthy scored 24 points and Magic Johnson

added 22 as the Lakers won their fourth in a row and improved their NBA-best record to 27-8. Sedale Threatt led the visitors with 26 points. Seattle is without its top scorer, Dale Ellis, who is out indefinitely since breaking three ribs in an auto accident.

Jazz 95, Hawks 88

In Salt Lake City, Karl Malone scored 40 points and John Stockton totalled 20 points and 13 assists to lead Utah to its fourth straight victory. Atlanta, led by Dominique Wilkins' 27 points, has lost five straight. Malone has scored at least 40 points in four of his last five games.

-30- 4975

#90018u0465 01/18/1990 ~United Press International

MOSCOW (JAN. 18) UPI - Moscow, vowing to quell Azerbaijani-Armenian violence, authorized security forces to use deadly force in the Transcaucus region where residents blocked some of the thousands of Soviet troops attempting to halt the bloody ethnic strife.

Fierce battles between Azerbaijanis and Armenians raged for a fifth day Wednesday with no signs of abating, and the death toll rose to 76 in what military commanders described as civil war in the republics on the Soviet Union's southern rim.

The latest clashes raised to more than 270 the number of deaths since the violent dispute over Nagorno-Karabakh - an Armenian enclave in Azerbaijan - erupted nearly two years ago.

Trouble also was brewing in the third Transcaucasian republic, Georgia, where thousands of people demanded independence at rallies in Tbilisi and workers at some plants went on strike, according to news reports and sources in the Georgian capital.

Faced with increased attacks on security personnel, the Defense and Interior ministries and the KGB security agency issued a statement withdrawing orders that troops not use their weapons and authorizing the use of force, if necessary.

In another sign the violence was threatening to become a rebellion against Soviet power, residents of the Azerbaijani village of Ehegnadzor smashed a monument to Soviet state founder Vladimir Lenin, the official Tass news agency said.

Authorities evacuating Armenians from the Azerbaijani capital of Baku said more than 7,000 refugees have been ferried across the Caspian Sea to the republic of Turkmenia since Saturday, when Azerbaijanis began pogroms against Armenians. Many of the Armenians were being flown north to Moscow

and other Russian cities.

Desperate Armenians raided armories in their capital of Yerevan in a wild hunt for weapons to join the fight against the Azerbaijanis.

The Soviet Communist Party, parliament and government, in a joint message transmitted by Tass, pledged to do everything possible to prevent further violence and expressed ''heartfelt condolences to the families of the dead and profound sympathy to all those affected by the recent unrest.''

''The country's leadership shares the indignation of the Soviet people over the atrocities and the crimes,'' the message said. ''It is taking appropriate steps to end the violence, restore law and order, give material assistance to the victims and strictly punish culprits.''

The parliament's presidium, or executive arm, declared a state of emergency Monday in designated areas of Azerbaijan and Armenia. It ordered the dispatch of 11,000 soldiers in a doubling of troop strength in the two southern republics where Interior Ministry forces were already deployed to try to stop clashes.

''Soviet army and Interior Ministry servicemen, police and KGB agents are showing maximum restraint in this complex situation,'' the government's security departments said in a statement. ''By risking their lives, they have so far refrained from using arms against criminals to prevent bloodshed.

''But a sharp increase in outrageous attacks has made the situation unbearable. The leadership of the Defense Ministry, Interior Ministry and the KGB have given instructions to their personnel to use weapons in strict accordance with military rules and Soviet laws.''

In an ominous escalation of the 2-year-old conflict over the Nagorno-Karabakh enclave, the Azerbaijanis and Armenians formed self-defense brigades and used sophisticated weaponry captured or stolen from the military.

''The situation is tense in areas bordering on Nagorno-Karabakh,'' Tass said. ''The large numbers of Interior Ministry troops deployed in the Shaumyan and Khanlar regions of Azerbaijan have been unable to stop the ethnic unrest.

''Interior and army troops continue to pour into the areas where a state of emergency was imposed Jan. 15 by a Supreme Soviet decree, but their deployment has been hindered by local residents in a number of populated areas of Azerbaijan.''

Azerbaijanis and Armenians were using armored personnel carriers,

surface-to-air rockets, machine guns and even unmarked helicopters in the worst ethnic conflict of Soviet leader Mikhail Gorbachev's nearly five-year rule.

''The situation is not worsening, but it is bad enough already,'' Foreign Ministry official Yuri Grimitskikh said. ''If the situation demands it, more troops will be sent.''

Tass said 56 people, most of them Armenians, had died and 156 were wounded in the recent Baku pogroms. The Izvestia government newspaper said 20 people had been killed in Nagorno-Karabakh.

Izvestia said 13,620 Interior Ministry troops and local policemen and 3,500 members of ''volunteer workers' brigades'' were trying to maintain order in Baku, a city of 1.7 million peole where only a few thousand Armenians remained from a population of 300,000.

Interior Ministry spokesman Dmitri Tselesnov said Armenians attacked 13 points in Yerevan and elsewhere in the republic in desperate searches for weapons. The raiders seized a total of 452 firearms, including Makarov revolvers and small-arms ammunition, over two days, Tselesnov said.

#90018u0482 01/18/1990 ~United Press International

CAPE CANAVERAL, FL (JAN. 18) UPI - NASA has selected 23 new astronauts, including the first female to train as a shuttle pilot, the first hispanic woman named to the astronaut corps and the husband of Columbia flier Bonnie Dunbar.

The 1990 astronaut group, chosen from 1,945 candidates and announced Wednesday by NASA, is made up of 11 civilians and 12 military officers. Seven of the 23 are pilots and five are women. All 23 will be eligible for assignment to shuttle crews after a one-year training period.

Air Force Maj. Eileen Collins, 33, of Elmira, N.Y., is the first female named to train as a space shuttle pilot. A jet fighter pilot, Collins was the first woman ever selected to study at the U.S. Air Force Test Pilot School at Edwards Air Force Base, Calif.

Married to James Youngs, Collins holds a bachelor's degree in mathematics from Syracuse University and two master's degrees, one in operations research from Stanford University and the other in space systems management from Webster University.

Also named to the astronaut corps Wednesday was Thomas M. Sega, 37, husband of astronaut Bonnie Dunbar, currently in orbit aboard the shuttle Columbia for her second spaceflight.

Sega, born in Cleveland, Ohio, holds a bachelor's degree in physics and math from the United States Air Force Academy, a master's degree in physics from Ohio State University and a Ph.D. in electrical engineering from the University of Colorado.

Dunbar was informed of her husband's selection late Wednesday in a daily message to the crew from mission control in Houston. The couple is the third husband-wife astronaut team in NASA. The other two are William and Anna Fisher and Rhea Seddon and Robert ''Hoot'' Gibson.

And in another first for NASA, Ellen Ochoa, 31, was named to the astronaut corps Wednesday, the first Hispanic woman selected to fly on the space shuttle.

Born in Los Angeles, Ochoa holds a bachelor's degree in physics from San Diego State University, and a master's and doctorate in electrical engineering from Stanford University.

NASA said 106 of the 1,945 qualified applicants were granted interviews and medical examinations and from that group, 23 candidates were selected. The group ''will report to the Johnson Space Center, Houston, in July to begin a year of training and evaluation, after which they will receive assignments leading to selection for shuttle flight crews,'' the agency said.

The candidates are the 13th group of astronauts to be selected since NASA started picking crews with the original ''Mercury Seven'' in 1959. The last group of astronaut trainees was named in August 1987.

#90018u0489 01/18/1990 ~United Press International

CHICAGO (JAN. 18) UPI - William O'Neal, the former FBI informant who infiltrated the Black Panthers in the late 1960s, died after he apparently walked onto a busy expressway and was struck by a car, a newspaper said Thursday.

O'Neal, 40, had been living under the name William Hart since 1973 as part of the Federal Witness Protection Program. O'Neal had lived in California until 1984, when he returned to Chicago.

His death Sunday on the Eisenhower Expressway has been ruled a suicide, the Chicago Tribune reported Thursday. But Dr. Robert Kirschner, assistant Cook County medical examiner, said the investigation was continuing.

After running up a criminal record as a car thief on Chicago's West Side, O'Neal was recruited as an FBI informant in 1966 by Agent Roy Martin

Mitchell. In exchange for O'Neal's help, Mitchell agreed to forget about a stolen car incident.

After infiltrating the Black Panther Party, O'Neal served as the group's chief of security. He supplied the FBI the floor plan to party headquarters, the target of a controversial 1969 predawn raid in which Panther leaders Fred Hampton and Mark Clark were killed by law enforcement officials.

''He was a man of courage,'' Gregory Adamski, an attorney who worked with O'Neal in the 1960s, told the Tribune. ''When he said he would do something, he would do it.''

Ben Heard, O'Neal's uncle, said his nephew rarely spoke of his undercover work.

''Very seldom did he make anything of the past,'' Heard said. ''He didn't like to talk about it. He'd evade the questions.''

Heard said it was the second time his nephew had run out into the path of oncoming traffic. In September O'Neal ran onto a highway and was struck by a car but not injured.

''It was going good,'' Heard said. ''I don't know what caused him to go off like that.''

O'Neal had been working for a lawyer in Chicago until three weeks ago, Heard said.

''But he and the lawyer had a falling out about something,'' he said and added Sunday night O'Neal was at his house and kept going into the bathroom.

''He stayed in there for a long time. The last time he came out he tried to go out the window. I pulled him back but he broke loose and ran toward the expressway.''

O'Neal is survived by his wife and a 5-month-old son.

(JAN. 18) UPI - A winter storm dumped snow in the central mountains of Arizona Thursday, while thunderstorms soaked major portions of the South and unseasonably warm temperatures surprised New England, the National Weather Service said.

Arizona's first major storm of the winter dumped up to 7 inches of snow in

areas between 3,000- and 5,000-feet elevation and snow also fell in Colorado and Utah, where the weather service issued winter storm warnings.

Showers and thunderstorms hit parts of Texas, Arkansas, Louisiana and Oklahoma, while heavy fog covered much of north Texas, resulting in canceled or delayed flights at Dallas-Fort Worth International Airport.

The heavy rain prompted the NWS to issue flash flood watches for several counties in northeast Texas and northwest Louisiana Thursday morning. The weather service said rain was falling at more than 1 inch an hour in Cherokee County in northeast Texas.

A cold front brought clouds and rain to much of the South. Wind gusts of 60 mph hit the airport in Jackson, Miss., and golf ball-sized hail was reported south of Brandon, Miss. Temperatures remained mild, with Charleston, S.C. reporting 52 degrees, Atlanta 61 and Miami 71.

Unusually warm temperatures and foggy, cloudy skies hovered over New England Thursday. Burlington, Vt., reported overcast skies and temperatures as high as 52 degrees.

A Burlington police dispatcher said the warm weather was ''very, very uncommon'' for the season, adding, ''We're expecting colder weather for the weekend.''

Haze also covered much of New Hampshire, where the mercury was in the upper 40s. Boston and Rhode Island reported overcast skies and temperatures around the 50-degree mark.

The Midwest began returning to more normal weather patterns Thursday, with the frontal boundary of a cold front pushing into the Ohio River Valley, a National Weather Service forecaster said.

A day earlier, the cold front stretched from northwest Wisconsin to northwest Missouri and had brought ahead of it temperatures in the 50s, rain and fog, said forecaster Steve Kahn.

But by shortly after midnight Thursday, the cold front had moved through the Midwest and down to an area between northwest Ohio and northwest Arkansas, leaving behind temperatures in the 20s and 30s, he said.

''The area is now drying out,'' he said, adding that the early morning temperatures were ''above normal but typical for this time of year.''

With average Midwest high and low temperatures at 28 and 13 degrees, respectively, the average early morning reading was 36 degrees, which was still above normal.

''Thirty-six in January doesn't raise eyebrows like 56 does,'' Kahn said, referring to the unusually balmy temperatures that blanketed the Midwest and Great Lakes regions earlier in the week.

A few flurries were reported in Minnesota, and rain was scattered in Michigan and Tennessee.

Clouds and rain hit much of Pennsylvania, where temperatures were in the 40s and 50s. Warm temperatures also prevailed in West Virginia, Delaware, Maryland and New Jersey.

BEIJING (JAN. 18) UPI - China's national police agency announced Thursday that 573 people jailed after the crackdown on the democracy movement last year have been released after admitting crimes, but left open the fate of thousands of others still in prison.

The announcement, timed a week before the Chinese Lunar New Year holiday, was the latest step by China to portray a relaxation of repression. The government last week ended nearly eight months of martial law in Beijing.

But Chinese sources and foreign diplomats viewed the freeing of prisoners as similar to the lifting of martial law, a largely cosmetic gesture aimed at improving relations with other nations and securing a resumption of foreign lending and investment.

The sources confirmed the government has been conducting secret trials of those arrested after the crackdown last June, but had no details. The Washington Post reported this week that more than 800 people have been sentenced to prison after such trials.

In a statement, the Ministry of Public Security, the national police agency, said 573 ''lawbreakers'' jailed for taking part in the unrest ''have been released recently because during investigations they pleaded guilty and showed repentance.''

''Our policy is to educate anyone who can be educated and temper punishment with leniency,'' a ministry spokesman said in the statement, carried by the official Xinhua news agency.

The spokesman expressed hope that more people ''would understand the situation, repent immediately and plead guilty for leniency,'' but said nothing about the fate of thousands of others still in prisons and detention centers.

More than 10,000 people were arrested in a nationwide dragnet after troops

fired on pro-democracy protesters in Beijing last June 3, crushing the student-led demonstrations that had swept the country.

Most of the student leaders and liberal intellectuals arrested are being held at Qincheng Prison, a large maximum-security facility in Beijing's northern suburbs, according to people recently released from the facility.

Detainees at Qincheng have been held incommunicado and many for far longer than the three months generally allowed by law before formal charges are filed. The government, however, makes no comment about the prison.

Among those at Qincheng is Ren Wanding, a leading human rights activist jailed for four years after the 1979 ''Democracy Wall'' movement.

Chinese sources have confirmed some recent releases of detainees, including an activist who took part in a hunger strike in the final days of the student occupation of Beijing's Tiananmen Square.

Yet the sources said this did not appear to signal any wider amnesty for prisoners, as has been rumored.

Members of the U.S. Congress, who have been highly skeptical of the lifting of martial law, have cited such an amnesty as a significant gesture China could take to advance efforts to restore relations with the United States.

But China has shown on sign of bending on such demands before the Congress returns to session next week, after which it is expected to push additional punitive measures against Beijing despite the Bush administration's efforts to ease sanctions.

Western diplomats in Beijing said negotiations were continuing between U.S. and Chinese officials on another possible measure, the release of leading dissident Fang Lizhi and his wife from refuge in the U.S. Embassy. But they could not say whether accord was near.

A Chinese Foreign Ministry spokesman, asked Thursday at a news briefing about the talks, said, ''No comment.'' The reply departed from the previous official position that the couple must ''plead guilty and mend their ways'' before a solution is reached.

Fang, an astrophysicist, and his wife fled to the embassy after the shooting erupted last June. They were named a week later in arrest warrants by police for allegedly instigating the protests.

JOHANNESBURG, SOUTH AFRICA (JAN. 18) UPI - Heavily armed gunmen in the black township of Sweetwaters in strife-torn Natal province killed 11 people in a sharp escalation of factional fighting, police said Thursday.

A police unrest report said 11 blacks, ages 11 to 48, had been found shot to death in four areas of Natal township, pushing to 21 the number of deaths reported in the province in the past two days.

The fighting was again blamed on the bloody power struggle between supporters of the conservative Inkatha movement of Zulu leader Mangosuthu Buthelezi and the more radical United Democratic Front that has left an estimated 3,000 people dead in the province within the past three years.

The daily Natal Witness, quoting witnesses, said the attack in Sweetwaters - a township regarded as under control of Inkatha - was carried out by about 16 heavily armed men, including Indians and blacks. It said women and children were among the victims.

The police unrest report issued in Pretoria also said a black man and woman were killed near the town of Port Shepstone, south of Durban, by a group of blacks armed with ''sharp instruments.'' No details were provided.

#90018u0565 01/18/1990 ~United Press International

MANILA, Philippines (JAN. 18) UPI - One of President Bush's security advisers flew unannounced to Manila Thursday and met with President Corazon Aquino to express Bush's ''personal support for democracy and the constitutional process in the Philippines.''

Robert Gates, assistant to the president and deputy for national security affairs, was accompanied to the presidential palace by Ambassador Nicholas Platt shortly after his arrival for a 24-hour visit.

''President Bush asked me to come to express his personal support for democracy and the constitutional process in the Philippines,'' Gates told reporters after the meeting that lasted one hour and 40 minutes.

''He also asked me to be able to give him a personal report on developments here,'' Gates said. ''I think after a very good meeting with President Aquino, I can do this. Among other things, I will tell him that she is very confident.''

Gates is to meet with Defense Secretary Fidel Ramos and other Philippine officials before departing Friday.

White House spokesman Marlin Fitzwater said Wednesday in Washington that Gates was to review the Philippine security situation and the Aquino

government's ''accelerated economic and military programs.''

Aquino's spokesman, Adolf Azcuna, said Gates ''made the conclusion that he was satisfied with the assessment given.''

Gate's visit came amid a continuing threat of another uprising by leaders of the failed coup attempt Dec. 1-9. The rebellion that left 119 people dead was the sixth since Aquino became president nearly four years ago.

Washington, at Aquino's request, provided air cover at a crucial stage of the uprising, swinging the tide of battle in favor of loyalist forces. Some U.S. officials suggested at the time that Aquino had not done enough to attack political and economic discontent in the Philippines.

Fitzwater denied Gates's trip was intended to help head off yet another challenge from the military and said Aquino was ''very responsive'' to those problems in making a number of changes in government and economic policy.

Fitzwater said Gates was in Manila to offer help and discuss ways ''we can be constructive in terms of fostering her efforts.''

Gates said the contentious issue of the future of the giant U.S. Clark Air Base and Subic Bay Naval complex and four smaller facilities did not come up during the meeting.

Azcuna, however, said Aquino gave Platt a letter to Bush on the subject of the bases, whose lease expires in 1991. Exploratory talks on the bases are expected in March or April. An extension requires approval by the Philippine Senate, where anti-bases sentiment is strong.

''In general, it takes up this issue of perceived shortfall in the amounts received under the Shultz-Manglapus agreement,'' Azcuna said, referring to the October 1988 arrangement by Secretary of State George Shultz and Philippine Foreign Secretary Raul Manglapus.

Under the agreement, the White House pledged its best efforts to secure congressional approval of $962 million in the last two years of the 1947 bases agreement.

Aquino said in a statement to reporters Thursday the Philippines will ''press, and press very strongly, for the United States to honor its commitments.''

(JAN. 18) UPI - Around the world... around the clock... the latest news

from U-P-I.

The first execution of 1990 in the United States took place this morning at the Missouri prison in Potosi. Last year, the death sentence was carried out on 16 people across the nation. Gerald Smith received three drugs in the death chamber. The 31-year-old man was sentenced to death for fatally beating his former girlfriend and killing a fellow prison inmate. Smith's wife watched the execution.

The mayor of the Japanese city of Nagasaki was shot and wounded outside City Hall today. Mayor Hitoshi Motoshima has been rushed to the Nagasaki Municipal Hospital, where he is reported conscious with wounds in his chest and left shoulder. He stirred right-wing sentiment for declaring that Emperor Hirohito was responsible for Japan's involvement in World War Two.

The chairman of the Joint Chiefs of Staff says it looks like the United States can trim defense spending withOUT any danger. General Colin Powell made the announcement in Vienna after the second day of meetings with his counterparts from NATO and the Warsaw Pact. Powell put it this way... ''the world does seem to be moving in a new and more positive direction.''

A national sales tax is being proposed. South Carolina DemocratIC Senator Ernest Hollings says he will introduce legislation calling for a five percent sales tax. He wants it to pay for reductions in Social Security payments and capital gains taxes, plus restoration of the deduction for Individual Retirement Accounts.

Astronauts aboard the Columbia had their third middle-of-the-night alert in their mission. Ground controllers awoke the shuttle crew three hours early last night to shut down a small rocket thruster. AN INcorrect computer command apparently ignited the thruster. The ship is back to its proper flight pattern.

#90018u0594 01/18/1990 ~United Press International

MOSCOW (JAN. 18) UPI - Defense Minister Dmitri Yazov said Thursday army reserves are being called up to to help end Armenian-Azerbaijani ethnic fighting as Soviet leader Mikhail Gorbachev insisted the strife will be resolved politically under a new Soviet ''federation.''

''The events in Azerbaijan cause anxiety,'' Gorbachev told a meeting of workers, farmers and intelligentsia in the Kremlin. ''We had to resort to force by the state against extremism, vandalism and against criminals.

''But the main question of inter-ethnic relations can be solved only by developing a federation,'' he said.

Gorbachev, facing in Azerbaijan what is considered the worst nationalities crisis in his five years in power, advanced the idea of a new federation while in Lithuania last week. He said a law would give republics a mechanism to secede but that he believed most would want to remain in the new federation.

Yazov told the radio station Mayak the army reserves sent to the republics of Azerbaijan and Armenia will not engage in combat, but will guard weapons depots and stores raided by combatants.

He also said the reserves will reinforce the fence along the 120-mile border with Iran and Turkey, part of which was overrun by rampaging Azerbaijanis over New Year's. Armenians say Azerbaijanis brought arms across the open frontier.

''It is a major disaster,'' Yazov said of what army commanders call a civil war between Christian Armenians and Moslem Shi'ite Azerbaijanis on the Soviet Union's southern rim.

Yazov said the reserves will be released once the crisis is over. Soviet television said the reserves being called recently completed military service. Yazov did not say how many would be called up.

Soviet television said 11,000 fresh soldiers and Interior Ministry troops dispatched to Azerbaijan had reached the hot points of combat, often by smashing through blockades set up by the combatants to keep the troops away.

Full-scale battles between Azerbaijanis and Armenians raged for a sixth day with no signs of abating as the death toll rose to 76 in the strife.

The latest clashes raised to more than 270 the number of deaths since the violent dispute over Nagorno-Karabakh - an Armenian enclave in Azerbaijan - erupted nearly two years ago.

Trouble also was brewing in the third Transcaucasian republic, Georgia, where thousands of people demanded independence at rallies in Tbilisi and workers at some plants went on strike, according to news reports and sources in the Georgian capital.

Faced with increased attacks on security personnel, the Defense and Interior ministries and the KGB security agency issued a statement withdrawing orders that troops not use their weapons and authorizing the use of force, if necessary.

In another sign the violence was threatening to become a rebellion against Soviet power, residents of the Azerbaijani village of Ehegnadzor smashed a

monument to Soviet state founder Vladimir Lenin, the official Tass news agency said.

Authorities evacuating Armenians from the Azerbaijani capital of Baku said more than 7,000 refugees have been ferried across the Caspian Sea to the republic of Turkmenia since Saturday, when Azerbaijanis began pogroms against Armenians. Many of the Armenians were being flown north to Moscow and other Russian cities.

Desperate Armenians raided armories in their capital of Yerevan in a wild hunt for weapons to join the fight against the Azerbaijanis.

The Soviet Communist Party, parliament and government, in a joint message transmitted by Tass, pledged to do everything possible to prevent further violence and expressed ''heartfelt condolences to the families of the dead and profound sympathy to all those affected by the recent unrest.''

''The country's leadership shares the indignation of the Soviet people over the atrocities and the crimes,'' the message said. ''It is taking appropriate steps to end the violence, restore law and order, give material assistance to the victims and strictly punish culprits.''

The parliament's presidium, or executive arm, declared a state of emergency Monday in designated areas of Azerbaijan and Armenia. It ordered the dispatch of 11,000 soldiers in a doubling of troop strength in the two southern republics where Interior Ministry forces were already deployed to try to stop clashes.

#90018u0719 01/18/1990 ~United Press International
(JAN. 18) UPI - The space shuttle crew prepares to come home... a Missouri death row inmate is executed... the mayor of Nagasaki is shot and wounded.... and the Rock 'n' Roll Hall of Fame has 13 new members. Those stories and more, next from U-P-I.

The Columbia's astronauts are testing their landing systems and packing up this morning.

Commander Daniel Brandenstein and co-pilot James Wetherbee fired up one of the shuttle's hydraulic power units and test-fired a series of rocket thrusters. They are trying to make sure the shuttle will be ready to return to Earth tomorrow.

Their crewmates plan to spend the day wrapping up a series of medical and scientific experiments and stowing loose gear for re-entry.

With landing preparations going smoothly in orbit... engineers at Mission Control in Houston are investigating an overnight incident in which faulty navigation data was beamed to the shuttle's computers.

As a result, six small rocket jets fired while the astronauts were sleeping, pushing Columbia into a gentle tumble as flight computers responded to the incorrect data. Brandenstein quickly took over, stopping the rocket firings about 15 minutes after the incident began and putting the ship back in the proper orientation.

NASA says the astronauts were never in any danger.

President Bush plans to telephone the shuttle crew with his congratulations on a successful flight this morning.

The first U-S execution of the year took place this morning in Missouri.

Convicted murderer Gerald Smith was executed by lethal injection at the Potosi Correctional Center. Smith had faced execution calmly and asked his lawyer NOT to file last-minute appeals.

Smith was sentenced to death for fatally beating his former girlfriend and killing a fellow inmate during a nearly nine-year stay on death row.

Officials say Smith killed Karen Roberts, whom he beat to death with an iron bar on a St. Louis street in 1980. Smith says he killed her because she gave him a venereal disease. Smith was also convicted of murdering fellow death row inmate Robert Baker in 1985... for which he received a second death sentence.

The execution was Missouri's second since 1965 and the 121st in the United States since the Supreme Court lifted its ban on capital punishment in 1976.

#90018u0730 01/18/1990 ~United Press International

FORT MYERS BEACH, FL (JAN. 18) UPI - Former Michigan Rep. Dennis Dutko, who left office in disgrace following his conviction on drunken driving charges, was found dead less than a week after he was arrested in Tennessee on drug charges.

Dutko, 46, was found in the bedroom of his rented beachfront condominium Wednesday afternoon by his mother and sisters who went to look for him after he failed to appear for a luncheon appointment, officials said.

There was no sign of forced entry or struggle and no suicide note was found, police said.

Lee County Sheriff John McDougall said late Wednesday an empty prescription pill bottle was found near Dutko's body in the bedroom of his time-share condominium facing the Gulf of Mexico.

McDougall declined further details pending autopsy results to be released Friday.

Earlier, Jeri Martin, a spokeswoman for the Lee County Sheriff's Office, said, ''He was clothed in a pair of swim trunks. He was unresponsive when she (his mother) tried to awaken him. All we have right now is no sign of trauma to the body.''

Dr. Joe Westwood, physician for the Ingham County (Mich.) Jail where Dutko served more than seven months for drunk driving until his release Jan. 3, refused Wednesday night to comment on what medications were prescribed for Dutko while he was in jail.

Dutko died just a day after he was charged with cocaine possession at a highway rest stop near Chattanooga, Tenn.

Dutko, who was single, was found by his mother, Phyllis Dutko, and his sister Donna Golden, Martin said. ''He was supposed to have lunch with the

mother and sister, and he didn't show and that's when they become concerned and went to the place where he was staying,'' she said.

The eight-term Democrat resigned his House seat last spring following two convictions for drunken driving. He was sentenced to a year in the Ingham County Jail on charge and six months on the other.

#90018u0741 01/18/1990 ~United Press International

(JAN. 18) UPI - An attempt was made on the life of the mayor of Nagasaki, Japan, today.

Mayor Hitoshi Motoshima was shot twice outside Nagasaki's City Hall.

Motoshima was rushed to the Nagasaki Municipal Hospital, where he was reported conscious, suffering from bullet wounds in his chest and left shoulder.

NO further information about the shooting has been released.

Motoshima has used bodyguards for months. He drew the ire of Japan's fervent and pro-imperial rightists for saying Emperor Hirohito was responsible for bringing Japan into World War Two. Hirohito died a year ago at age 87.

Hirohito's war guilt had been a taboo topic in Japan, where it was generally believed that the emperor played only a superficial role in the war.

Because Motoshima defied the taboo, he was ostracized by his conservative political party. His house was shot at, and he received several death threats last year.

Nagasaki and Hiroshima were destroyed by the first two U-S atomic bombs in the closing days of the war.

In an interview with United Press International last year on the eve of the 44th anniversary of the Nagasaki bombing that killed 140-thousand people... Motoshima said Hirohito could have ended the war several months before a B-29 dropped the bomb.

The longest and costliest criminal trial in American history might end today.

A judge in Los Angeles is expected to announce 52 sealed verdicts that have been returned during the past two months by the jury deliberating in the McMartin Pre-School molestation trial.

The trial might be over nearly 33 months after it began... depending on what Superior Court Judge William Pounders decides to do about the final 13 UNdecided charges on which the jury has reached a deadlock.

31-year-old Raymond Buckey and his 62-year-old mother, Peggy McMartin Buckey, are on trial. The two former pre-school teachers have spent the last six years at the center of accusations branding them as child molesters, pornographers and even satanists. They maintain they are innocent.

If convicted, the Buckeys could be sentenced to spend the rest of their lives in prison.

#90018u0752 01/18/1990 ~United Press International

(JAN. 18) UPI - The Kremlin has given ''shoot to defend'' orders to Soviet troops sent to put down the ethnic violence in the southern republics of Armenia and Azerbaijan.

Fierce battles between Moslem Azerbaijanis and Christian Armenians continued for a fifth day yesterday with NO signs of letting up. Officials say the death toll rose to 76 in what the military describes as civil war in the republics.

In an ominous escalation of the conflict... Azerbaijanis and Armenians are forming self-defense brigades armed with sophisticated weapons captured or stolen from the Soviet military. Desperate Armenians raided armories in Yerevan in a hunt for weapons to join the fight against the Azerbaijanis.

Authorities evacuating Armenians from the Azerbaijani capital of Baku say more than seven-thousand refugees have been ferried across the Caspian Sea since Saturday, when Azerbaijanis began attacks against Armenians.

The Soviet news agency Tass issued a joint message from the Soviet Communist Party, parliament and government... pledging to do everything possible to prevent further violence. The Soviet parliament's presidium declared a state of emergency Monday in designated areas of Azerbaijan and Armenia and dispatched 11-thousand soldiers to the troubled regions.

Trouble also is brewing in the neighboring republic of Georgia... where reports say thousands of people demanded independence at rallies in Tbilisi.

The Rock 'n' Roll Hall of Fame inducted 13 new members at its fifth annual dinner last night at the Waldorf-Astoria Hotel in New York.

The folk-rock duo Simon and Garfunkel... and the British invasion groups The Who and the Kinks, as well as the Four Tops... Bobby Darin... and the Four Seasons also were inducted.

The Rock 'n' Roll Hall of Fame Foundation also selected three jazz stars as ''early influences'' on rock music- trumpeter Louis Armstrong... guitarist Charlie Christian... and blues singer Ma Rainey.

Also among those honored at the induction were rhythm-and-blues performer Hank Ballard... and the Platters, one of the original doo-wop groups.

Two songwriting teams were inducted- Gerry Goffin and Carole King, who wrote dozens of hits like ''Up on the Roof''... and the Motown team of Brian Holland, Lamont Dozier and Eddie Holland. Holland-Dozier-Holland tunes were recorded by nearly every Motown group in the 1960's.

At the ceremonies, Rolling Stone magazine publisher Jann Wenner announced that ground would be broken in Cleveland for the hall's future home by the end of the year. Fund raising still is proceeding for the 42-Million dollar facility.

#90018u0769 01/18/1990 ~United Press International

WASHINGTON (JAN. 18) UPI - Higher food costs pushed consumer prices up 0.4 percent in December and brought inflation at the retail level to 4.6 percent last year, the largest advance since 1981 the Labor Department reported Thursday.

The increase in the consumer price index, which tracks the cost of a hypothetical basket of consumer goods, continued a period of moderate inflation last month. Consumer prices rose 0.4 percent in November.

Last week, the department reported that producer prices rose 0.7 percent in December to bring inflation at the wholesale level to 4.8 percent for the year.

Economists had expected consumer prices to gain 0.4 percent in December.

The annual retail inflation rate of 4.6 percent compared with an increase of 4.4 percent the year before and was the largest annual change since an 8.9 percent rise in 1981, the department said.

Although higher food, housing and energy prices contributed to the increase in inflation last year, the department said the biggest culprit was higher petroleum-based energy products.

Excluding the often volatile food and energy figures, the consumer price

index rose 4.1 percent on the year, less than the 4.4 percent increase the year before.

The department said prices for other commodities posted their smallest gain in three years last year. Apparel prices, for example, increased by 0.7 percent last year compared with a rise of 4.8 percent the year before.

Costs for medical care services gained 8.4 percent last year, accounting for about one-third of the gain in overall prices.

Last month, prices on the grocers shelves for food and beverages rose 0.5 percent after gaining 0.7 percent the month before.

While prices for fruits and vegetables dropped 1.3 percent in December, prices for all other major gorcery groups increased during the month.

Dairy products cost 2.2 percent in December, continuing a sharp upturn in prices, which included a gain of 10.3 percent in November.

Poultry, fish and other seafood prices also cost more in December. The price of eggs rose 3.7 percent in December and 35.4 percent on the year. Beef and pork prices also gained and closed the year up 6.5 percent and 6.9 percent respectively.

Consumers could not beat the price increases by dining out in December. Restaurant prices rose 0.2 percent in December while the cost of alcoholic beverages rose 0.1 percent. For the year, restaurant meals increased in price by 4.6 percent while alcoholic beverage prices gained 4.8 percent.

Admissions to movies, plays, concerts and sporting events rose 1 percent last month and 5.9 percent on the year.

An 0.8 percent increase in the cost of new cars and trucks last month was offset by a 2 percent decline in gasoline prices, the department said.

After advancing earlier in the year, gasoline prices have dropped during six of the past seven months. As of December, prices at the gas pumps were 6.5 percent less that the year before.

A rise in home fuel costs helped push up overall housing costs by 0.5 percent in December.

Household fuel oil prices rose 3.8 percent last month and 19.5 percent during the year. Household natural gas and electricity costs increased 2.1 percent and 0.8 percent, respectively, last month.

#90018u0779 01/18/1990 ~United Press International

WASHINGTON (JAN. 18) UPI - Higher food costs pushed consumer prices up 0.4 percent in December and brought inflation at the retail level to 4.6 percent last year, the highest since 1981 the Labor Department reported Thursday.

The increase in the consumer price index, which tracks the cost of a hypothetical basket of consumer goods, extended a period of moderate inflation from the previous month. Consumer prices rose 0.4 percent in November.

Last week, the department reported that producer prices rose 0.7 percent in December to bring inflation at the wholesale level to 4.8 percent for the year.

Economists had expected consumer prices to gain 0.4 percent in December.

The annual retail inflation rate of 4.6 percent compared with 4.4 percent the year before and was the largest annual change since the 8.9 percent rise in 1981, the department said.

Although higher food, housing and energy prices contributed to the increase in inflation last year, the department said the biggest culprit was higher petroleum-based energy products.

Excluding the often volatile food and energy figures, the consumer price index rose 4.1 percent on the year, less than the 4.4 percent increase the year before.

The department said prices for other commodities posted their smallest gain in three years last year. Apparel prices, for example, increased by 0.7 percent last year compared with a rise of 4.8 percent the year before.

Costs for medical care services gained 8.4 percent last year, accounting for about one-third of the gain in overall prices.

Last month, prices on the grocers shelves for food and beverages rose 0.5 percent after gaining 0.7 percent the month before.

While prices for fruits and vegetables dropped 1.3 percent in December, prices for all other major gorcery groups increased during the month.

Dairy products cost 2.2 percent in December, continuing a sharp upturn in prices, which included a gain of 10.3 percent in November.

Poultry, fish and other seafood prices also cost more in December. The price of eggs rose 3.7 percent in December and 35.4 percent on the year. Beef and pork prices also gained and closed the year up 6.5 percent and

6.9 percent respectively.

Consumers could not beat the price increases by dining out in December. Restaurant prices rose 0.2 percent in December while the cost of alcoholic beverages rose 0.1 percent. For the year, restaurant meals increased in price by 4.6 percent while alcoholic beverage prices gained 4.8 percent.

#90018u0801 01/18/1990 ~United Press International

WASHINGTON (JAN. 18) UPI - Privately owned housing starts plummeted 8 percent in December, their second monthly back-to-back drop, with great losses in all regions except the West, and reached a seven-year low for 1989 as a whole, the Commerce Department reported Thursday.

As the economy lost momentum because of high interest rates, housing starts fell to 1.37 million in 1989 from 1.49 million in 1988, a drop of 7.7 percent, the department's Census Bureau said.

The 1989 starts figure was the lowest since 1.06 million in 1982, the year the economy started one of its longest stretches of recorded growth.

During December, a month with exceptionally cold wether that literally froze construction activity, privately owned housing starts were at a seasonally adjusted annual rate of 1.24 million units. The Census Bureau said November starts dropped to a revised 1.34 million from a revised 1.42 million in October.

The December figure was the lowest since 1.17 million in October 1982.

Last month, the Census Bureau estimated November starts at 1.36 million

and October starts at 1.43 million.

Privately-owned single-family housing starts fell 9.9 percent in December, to 904,000 units. Multi-family structures - condominium and cooperative apartments - dropped 4.8 percent during the month, to 278,000 units, the Census Bureau said.

By region, December starts plummeted 23.3 percent in the Northeast, to 138,000 units; fell 9.8 percent in the Midwest, to 268,000 units; and lost 10 percent in the South, to 439,000 units.

Only the West bucked the trend with a December housing starts growth of 5.8 percent, to 390,000 units.

Building permits, a bellwether of future activity, were at 1.34 million in December, in seasonally adjusted numbers, virtually at the same level as in November.

For 1989 as a whole, building permits fell to 1.34 million from 1.46 million in 1988, in not seasonally-adjusted numbers.

Last year's permits figure was the lowest since 1 million in 1982, the report said.

TOKYO (JAN. 18) UPI - The mayor of Nagasaki, threatened after blaming Emperor Hirohito for not saving his city from the atomic bomb, was shot and wounded Thursday outside City Hall by a suspected right-wing extremist officials said.

Mayor Mitoshi Motoshima, 67, was shot through the back as he walked to his official car outside the main entrance to the Nagasaki City Hall. Only a month earlier, Motoshima, who also blamed Hirohito for getting Japan into World War II, had dropped police protection from rightist threats triggered by his taboo-breaking declaration.

Police said the assailant, a Japanese man about 40 who fired a small-caliber gun from less than 5 feet away, escaped in a rented white van later found abandoned in another part of the city.

Motoshima, fully conscious during the ordeal, was able to get on an ambulance stretcher on his own accord and was taken to Nagasaki Municipal Hospital where he underwent surgery.

''He is in serious condition but the bullet missed vital organs. He is out of danger,'' a hospital spokesman said.

Doctors said the small caliber bullet went through his back and exited through his chest, just above the lung.

It was the first assassination attempt on a Japanese politician in recent memory.

Police said the escape vehicle had been rented to a senior member of a rightist group that is pledged to restoring the paramount power of the Japanese emperor.

Motoshima triggered a nationwide debate on Dec. 7, 1988 - the 47th anniversary of the Japanese attack on Pearl Harbor - when he publicly blamed the then-ailing Hirohito for getting Japan into the war and failing to end it before the atomic bomb attacks on Hiroshima and Nagasaki.

''I myself was forced to tell people to die in the name of the emperor,'' said Motoshima, a former officer of the old Japanese imperial army who instructed young soldiers.

''From my own experiences with army education, I think the emperor bears some responsibilty for the war,'' he said.

Motoshima's statements broke a public taboo in Japan, which had previously viewed Hirohito's role as that of a powerless figurehead manipulated by a military that effectively ruled the nation.

After his original statement, Motoshima received numerous death threats and his house was shot at, prompting police to order round-the-clock protection.

The 24-hour guard was dropped on Dec. 12 at Motoshima's request, police said.

Hirohito died on Jan. 7, 1988, at age 87 and was succeeded by his son, Emperor Akihito, 56.

Last year, on the eve of the 44th anniversary of the Nagasaki bombing that killed 140,000 people, Motoshima told United Press International that Hirohito could have ended the war several months before a U.S. B-29 dropped the bomb.

''On Feb. 14, 1945, Prime Minister (Fumimaro) Konoe went to the emperor and asked him to stop the war, but the emperor did not say yes,'' Motoshima said. ''If at this time, the emperor had stopped the war, Nagasaki would have been spared.''

Americans dropped the first atomic bombs used in war on Hiroshima Aug. 6,

1945, and on Nagasaki three days later.

Prime Minister Toshiki Kaifu expressed ''deep regret'' over the shooting of Motoshima, saying, ''Violence should never be permitted.''

Government spokeswoman Mayumi Moriyama also condemned the attack and said it would have ''an immense impact on society.'' She called for a prompt investigation.

Rightest groups, which frequently travel in convoys of sound trucks blaring patriotic songs and festooned with rising sun flags, have largely kept a low profile during the yearlong mourning for Hirohito which ended Jan. 7.

Police are gearing for stepped up activity from both rightists and leftists, who oppose the monarchy, in the lead-up to Akihito's coronation at the Imperial Palace in Tokyo in November.

#90018u0805 01/18/1990 ~United Press International

(JAN. 18) UPI - An UNprecedented gathering of generals from the East and West has made the top military official in the United States think that U-S military spending could be be cut.

General Colin Powell, Chairman of the Joint Chiefs of Staff, says it appears the United States can trim its military spending withOUT compromising its security.

In Vienna last night, Powell told a news conference it appears that the time has come when it's possible to begin to reduce defense expenditures withOUT reducing security. In Powell's words... ''There is a general feeling that ... we can cut back on our spending because the world does seem to be moving in a new and more positive direction.''

Powell has been having informal talks with delegates from NATO, the Warsaw Pact and neutral and NON-aligned European countries.

The gathering of generals is aimed at making progress on European arms reductions. The delegates are discussing each government's military policies, training and budgets and how they relate to the actual forces in the field. The meeting is NOT a formal negotiation, and specific accords are NOT expected.

#90018u0815 01/18/1990 ~United Press International

RANGOON, BURMA (JAN. 18) UPI - The military government said Thursday it banned a popular opposition leader from upcoming elections because of her links to insurgent ethnic and dissident student groups.

At the same time an alliance of Burmese dissidents and insurgents in Thailand, saying the election would be ''neither free nor fair,'' called for a nationwide boycott of the balloting because of the action against Aung San Suu Kyi, leader of the National League for Democracy, the main opposition group.

Lt. Col. Than Tun, spokesman for the ruling State Law and Order Restoration Council (SLORC) of top military officers, said the opposition leader was unqualified to run for election because of her links to the underground organizations.

He quoted reports in the Bangkok Post on Jan. 14 and 16 saying the ethnic Kachin Independence Army and a group of anti-government students pledged full support for the popular 44-year-old daughter of Burmese independence hero Gen. Aung San in her bid for a seat in Parliament in the May 27 general elections.

Waving copies of the newspaper, Than Tun said political parties will have to operate strictly within the framework of the law. Any links to insurgent organizations are forbidden under Burma's election law.

Than Tun promised the government would adhere to its pledge to hold free and fair elections.

Western diplomats in Rangoon contacted from Bangkok, however, said the ban on Aung San Suu Kyi, under house arrest since last July 20, was the latest in a series of actions that indicated the elections were unlikely to be fair.

They said hundreds of opposition political activists have been arrested in the last six months.

Former Prime Minister U Nu was banned from participating in the elections along with other senior political leaders.

In rather a belated move, Than Tun issued a warning to the U.S. Embassy because of comments on the arrest of opposition politicians last July.

He said the U.S. comments in a press release were ''calculated to foment disaffaction and anti-government movements.''

''We would like to warn the embassy concerned that it is highly improper to engage in such activities,'' he said.

In Bangkok the Democratic Alliance of Burma, a coalition of exiled political groups, dissident students and ethnic insurgents, called for a boycott of the elections.

A statement issued by the Alliance said it had appealed to the military junta to allow an interim government to hold the vote, to release political prisoners and restore political rights before the elections.

But it said the military had responded by banning more politicians from

the elections.

The statement said it was clear ''the general election that is to be staged by the SLORC will be, absolutely, neither free nor fair,'' it said.

Therefore the Alliance ''appeals to the people of Burma to refrain from voting.''

The Alliance includes groups which control large areas of Burmese territory near the borders with Thailand and China.

It was not clear whether the groups would actively try to disrupt the polling.

#90018u0828 01/18/1990 ~United Press International

NORFOLK, VA (JAN. 18) UPI - The commanding officer of the USS Iowa, which appears to be headed for mothballs, said he plans to relinquish his command of the battleship and retire later this year.

Capt. Fred Moosally was at the helm when an April 19 explosion in the Iowa's No. 2 gun turret killed 47 sailors during gunnery exercises off the coast of Puerto Rico. He was in command of the ship for two years.

''It was the best of times; it was the worst of times,'' Moosally told The Virginian-Pilot in Thursday's editions.

Moosally did not tell the newspaper exactly what led to his decision to end a 24-year military career. His announcement coincides with reports that the Iowa and battleship USS New Jersey will be retired this year.

Moosally, whose management of the Iowa was called into question in the Navy's investigation into the April tragedy, has steadfastly defended his crew.

''They're just a wonderful bunch of guys,'' said Moosally, 45. ''We really are a big family. I'm going to miss them.''

Moosally said he's considering writing a book about his experiences. He noted the explosion will never be forgotten.

''It may get to the back of my mind, but it's never going to leave my mind '' Moosally told the newspaper. ''It's going to be something I carry with me the rest of my life.''

Moosally received a ''letter of caution'' as a result of the Navy's investigation into the Iowa blast. The inquiry found deficiencies in

training, safety and various procedures aboard the ship.

None of the problems cited in the report led to the disaster, according to the Navy.

Moosally, an Ohio native who is a 1966 graduate of the U.S. Naval Academy, said he plans to remain as skipper of the Iowa until his retirement in May. Upon retirement, Moosally said he plans to return to the Washington area.

#90018u0834 01/18/1990 ~United Press International

LONDON (JAN. 18) UPI - Stock prices were broadly lower in light trading at midday Thursday on the London International stock exchange.

The Financial Times 100-stock index, which gained 24.8 points Wednesday, was down 26.1 points to 2,347.8. The narrower top 30 industrial average was down 20.1 points to 1,875.2.

Volume amounted to a light 240 million shares, compared with 230 million shares traded in the same period Wednesday.

Analysts said worries over Britain's inflation, interest rates and the bearish movements on world bond markets continued to plague the stock market. Tokyo's failure to rally also worried investors, along with poor fourth-quarter results.

Among the most widely traded stocks, Rothmans lost 23 cents to $10.40, Glaxo Holdings lost 20 cents to $12.05, Wellcome PLC lost 20 cents to $11.52 and Bass lost 21 cents to $16.88.

Among the day's other active issues, Hammerson fell 24 cents to $12.85, RTZ fell 30 cents to $8.83, Reuters PLC gained 23 cents to $16.50 and Shell added five cents to $7.40.

#90018u0843 01/18/1990 ~United Press International

WARSAW, POLAND (JAN. 18) UPI - Prime Minister Tadeusz Mazowiecki, appealing to Poles for patience, declared Thursday the government will not retreat from its economic reform policies despite growing unrest triggered by huge price increases.

Mazowiecki, in a nationally televised address to parliament, promised that prices, which have jumped as much as 900 percent for some goods, would soon stabilize as market forces begin to work.

He also announced that the date of local elections had been moved forward to mid-April and said the government has officially abolished censorship.

His speech came in the third day of a coal mine strike that has idled thousands of workers in the Silesian coal fields of southern Poland in the worst labor unrest since the Solidarity government was elected last June.

''I know that many people find it hard to make ends meet today,'' a solemn Mazowiecki said in his speech in the chamber of the Sejm, or lower house of parliament. ''I also know that there are even more people for whom economic transformations have brought apprehension and fear of losing work concerns over living standards and the future.''

He acknowledged that drastic price increases for fuel, transportation, food and medicine introduced this month have been extremely painful but urged Poles to be patient and allow the reforms to work.

''We do not intend to uphold exceptionally austere financial terms longer than it will be necessary to eliminate the immense inflation we are experiencing,'' he said. ''When that takes place we will start loosening the limitations but not before that.''

Mazowiecki said the date of elections for local governments had been moved forward from June to the second half of April.

''The most urgent task facing us now is the creation of real local self-governments, or in other words building democracy from the bottom up '' he explained.

Following the speech Mazowiecki was scheduled to meet with industry and mining officials to discuss the strikes in Silesia before sending a delegation to meet with the miners on Friday.

The walkouts have affected nine mines in Upper and Lower Silesia in the most dramatic evidence so far of dissatisfaction over the government's economic reform policies, which have triggered huge price increases for basic goods and services.

''This is a typical pay strike. We simply don't have money,'' said Waldemar Grabiszewski, spokesman for the Intrafactory Strike Committee in Upper Silesia.

He said miners were demanding a pay increase of $26 a month.

''If the demands are not met we won't start working,'' Grabiszewski said.

Solidarity's National Executive Council expressed concern over the price hikes in a statement Wednesday and Solidarity founder Lech Walesa hinted

he might withdraw his support from the government if the economic picture did not improve within three months.

''I give the government until the congress (of Solidarity in April) and after the congress if no decisive changes are taking place, it will be necessary to change everything and begin to act differently.''

Walesa did not explain what course he intended to take and stressed he remains firmly behind the government for the time being.

#90018u0850 01/18/1990 ~United Press International

LONDON (JAN. 18) UPI - The Soviet Union needs 300 million condoms a year to provide adequate contraception, the London-based International Planned Parenthood Federation said Thursday.

It also needs 20 million monthly ''cycles'' of oral contraceptives, the federation said after a fact-finding mission to the U.S.S.R.

Soviet authorities are desperate to increase the availability of basic contraception, said Lyn Thomas, acting European director of the group, adding ''There is a mammoth task ahead.''

More that half the women of the Soviet Union still rely on abortion for their family planning, Thomas said, one of the highest levels in the world.

There are more than 11 million abortions a year in the Soviet Union, a rate of 181 per thousand women, compared with only 27.4 per thousand in the United States, or 17.7 per thousand in Sweden.

The Soviet Family and Health Association joined the IPPF in November last year. In December alone it received 15 million condoms and 3,000 cycles of oral contraceptive from the federation.

This month, the federation also shipped the first condoms to Romania since deposed dictator Nicolae Ceausescu banned contraception in 1966.

As part of the Soviet Union's attempt to educate its poppulation, 30 teenagers from Sverdlovsk were in London this week to visit the IPPF's

headquarters.

The teenagers said they approved of the cartoon films on sex education they saw and said they didn't have them back home.

''We learn ethics and psychology of family health - but not much about sex '' said Oksana Chervonnaya, 16.

-30- 1791

#90018u0853 01/18/1990 ~United Press International

SAN FRANCISCO (JAN. 18) UPI - Sen. Alan Cranston, D-Calif., has taken the offensive, attacking his chief accuser in the Lincoln Savings and Loan scandal as ''a self-incriminating liar'' who himself was largely to blame for the savings and loan crisis.

''I appear before you bloodied but unbowed,'' Cranston told the first of a series of news conferences Wednesday. ''I assure you that only now have I begun to fight.''

Cranston's popularity in public opinion polls has plummeted so much that the 76-year-old senator has been urged by many not to seek re-election in 1992.

He is among five senators, of both parties, who admittedly intervened in a meeting with Edwin Gray, then chairman of the Federal Home Loan Bank Board on behalf of Charles Keating Jr., head of Lincoln Savings of Irvine. Last April Lincoln was seized by regulators, and officials said taxpayers might lose more than $2 billion in federally insured loans.

In 1987 and 1988 Keating donated $1.4 million to the campaigns and causes of the five senators, including $850,000 to two voter registration drives endorsed by Cranston.

Gray served as chairman from 1983 to 1987 when President Reagan refused to renominate him, and Cranston said Gray was diverting attention ''from his scandalous behavior and high living, his ineptitude and his flagrant failures as head of the Bank Board.''

Cranston called Gray ''a self-incriminating liar who is trying to cover up his own failure and help some right-wing Republicans replace me in the U.S. Senate.

''Gray's day of reckoning will come. You can't fool all of the people - or all of the press - all of the time.

''But I have news for Mr. Gray and his right-wing friends. I shall run for re-election in 1992 and I will win.''

Cranston said Gray lied when he accused him and the other senators of pressuring him in a meeting April 2, 1987, to go easy on Keating. But, when Gray was under oath before the House Banking Committee, Cranston said he admitted Cranston ''did not exert any pressure.''

According to Cranston, Gray accused the senators of delaying bank board action against Lincoln but, when under oath, he said the opposite.

Gray made the April 2 meeting sound ''sinister'' by informing the press it occurred after hours at 6 p.m., Cranston said, and, while calling the meeting ''a subversion of the regulatory process,'' Gray himself suggested a similar meeting a week later.

In a much-publicized David Brinkley show in November Gray said Cranston ''got $850,000 for some phony voter registration groups to help him win his election.'' Cranston said the money went for non-partisan efforts in the 1988 election and had nothing to do with this own election 2 years earlier.

Cranston said his main purpose in the meetings with Gray was to encourage him to speed a decision on an ongoing audit of Lincoln because its resolution would affect 800 employees and 200,000 depositors and investors in California.

''All I was doing throughout this time was to urge him to make a decision '' Cranston said.

-30- 3284

#90018u0855 01/18/1990 ~United Press International

MANILA, PHILIPPINES (JAN. 18) UPI - One of President Bush's security advisers met Thursday with President Corazon Aquino to express Bush's ''personal support for democracy and the constitutional process in the Philippines.''

Robert Gates, assistant to the president and deputy for national security affairs, was accompanied to the presidential palace by Ambassador Nicholas Platt shortly after his arrival for a 24-hour visit.

''President Bush asked me to come to express his personal support for democracy and the constitutional process in the Philippines,'' Gates told reporters after the meeting that lasted one hour and 40 minutes.

''He also asked me to be able to give him a personal report on developments here,'' Gates said. ''I think after a very good meeting with President Aquino, I can do this. Among other things, I will tell him that she is very confident.''

Gates is to meet with Defense Secretary Fidel Ramos and other Philippine officials before departing Friday.

White House spokesman Marlin Fitzwater said Wednesday in Washington that Gates was to review the Philippine security situation and the Aquino government's ''accelerated economic and military programs.''

Aquino's spokesman, Adolf Azcuna, said Gates ''made the conclusion that he was satisfied with the assessment given.''

Gate's visit came amid a continuing threat of another uprising by leaders of the failed coup attempt Dec. 1-9. The rebellion that left 119 people dead was the sixth since Aquino became president nearly four years ago.

Washington, at Aquino's request, provided air cover at a crucial stage of the uprising, swinging the tide of battle in favor of loyalist forces. Some U.S. officials suggested at the time that Aquino had not done enough to attack political and economic discontent in the Philippines.

Fitzwater denied Gates's trip was intended to help head off yet another challenge from the military and said Aquino was ''very responsive'' to those problems in making a number of changes in government and economic policy.

Fitzwater said Gates was in Manila to offer help and discuss ways ''we can be constructive in terms of fostering her efforts.''

Gates said the contentious issue of the future of the giant U.S. Clark Air Base and Subic Bay Naval complex and four smaller facilities did not come up during the meeting.

Azcuna, however, said Aquino gave Platt a letter to Bush on the subject of the bases, whose lease expires in 1991. Exploratory talks on the bases are expected in March or April. An extension requires approval by the Philippine Senate, where anti-bases sentiment is strong.

''In general, it takes up this issue of perceived shortfall in the amounts received under the Shultz-Manglapus agreement,'' Azcuna said, referring to the October 1988 arrangement by Secretary of State George Shultz and Philippine Foreign Secretary Raul Manglapus.

Under the agreement, the White House pledged its best efforts to secure congressional approval of $962 million in the last two years of the 1947 bases agreement.

Aquino said in a statement to reporters Thursday the Philippines will ''press, and press very strongly, for the United States to honor its

commitments.''

#90018u0890 01/18/1990 ~United Press International
AMMAN, JORDAN (JAN. 18) UPI - King Hussein warned that Israel was endangering the Middle East peace process through an apparent new policy of replacing Palestinians in its occupied territories with Jewish immigrants from Eastern bloc countries, a published report said Thursday.

In an interview with the English-language daily The Jordan Times, Hussein also accused Israel of violating a cease-fire region along the Jordanian border. He cited six incidents of Israeli army patrols shooting into Jordanian territory during the past two months.

Hussein said Israel, by refusing to allow Palestinians back into the occupied territories when they travel outside, was effectively implementing a ''scheme of transforming Jordan into a substitute homeland for the Palestinians in a bid to avert a just settlement of the Palestinian problem.''

Hussein described as ''serious and dangerous'' a recent statement by Israeli Prime Minister Yitzhak Shamir that Israel needs to retain the Occupied West Bank and Gaza Strip to settle thousands of Soviet Jewish immigrants expected to arrive in the next three years.

''I warn of this serious impending danger which all of us in the Arab world should be aware of,'' Hussein said. ''Whom will these thousands (of Jewish immigrants) replace, and what will happen to those who will be replaced?''

Hussein said he was concerned Israel eventually will resort to the forced expulsion of Palestinians from the occupied territories to make room for the immigrants.

''The daily Israeli practics against our people in the occupied territories, the expulsion of Palestinians and the Israeli intention to settle the expected immigrants all fit into the same Israeli scheme of Jordan as the solution,'' Hussein said.

Recent local news reports have said hundreds of Palestinians have been forced to leave the occupied territories for the east bank and, upon return, have been denied the right to return.

Hussein blamed Israeli intransigence for the deadlock in the Middle East peace process and said the Arab world should actively support the Palestine Liberation Organization as a key player in any efforts to settle the Arab-Israeli conflict.

Hussein said he intends to hold extensive consultations with other Arab leaders as soon as possible, and said the issue may require the convening of an Arab summit.

Hussein also said he was concerned that the recent developments in the Eastern bloc have shifted overall world attention from the Middle East.

''I think what is happening in Eastern Europe is big and defies all expectations. Who could have guessed that such dramatic changes would take place in such a short period of time? But I believe that we in the Arab region are passing through a very, very critical period which warrants intense world attention,'' Hussein said.

#90018u0895 01/18/1990 ~United Press International

KAWTHARIYET AL SEYYAD, LEBANON (JAN. 18) UPI - The pro-Syrian Shiite Amal militia took reporters to an unfinished building Thursday where they said the rival Hezbollah militia temporarily held and possibly tortured U.S. Marine Lt. Col. William Higgins before he was slain.

Amal official Melhem Kanso led reporters and cameramen into a darkened underground shelter of a two-story unfinished building on the edge of the Shiite village of Kawthariyet al Seyyad, 10 miles southeast of the port city of Sidon, and 24 miles from Beirut.

''Colonel Higgins was kept in this hideout for two or three days,'' Kanso said as showed reporters guns and ammunition scattered on the floor along with metal tools he said were used for torture.

''Higgins was here ... He was held before he was transferred to Beirut,'' Kanso said.

Higgins, 43, who commanded a U.N. peacekeeping force in southern Lebanon, was kidnapped Feb. 17, 1988, in southern Lebanon and the Organization of the Oppressed on Earth, believed to be a Hezbollah splinter group, claimed responsibility. He was hanged by the extremist group July 31 in retaliation for the Israeli abduction of a Hezbollah spiritual leader.

A helicopter-borne Israeli commando force had taken Sheikh Abdel Karim Obeid and two of his relatives a few days earlier from a Shiite village in southern Lebanon. They were flown to Israel.

Obeid, 36, is a leading Hezbollah figure and a founder of the Islamic Resistance, an extremist group that stages hit-and-run attacks on Israeli troops and Israeli-backed militiamen in southern Lebanon.

Amal has been battling with Hezbollah for the control of the south since Dec. 23.

At least 88 people have been killed and 300 others wounded in the Tufah area, east of the port city of Sidon, 24 miles south of Beirut.

The deployment of some 700 Palestinian guerrillas in certain parts of the strategic district two weeks ago checked the advance there of the fundamentalists, who gained the upper hand in the 27-day fighting.

Kanso accused Hezbollah of planning to assassinate Amal chief Nabih Berri a few days ago and to ''liquidate'' Amal leaders in south Lebanon.

''We found documents proving that Hezbollah was implicated in the assassination attempts,'' Kanso said. He added that explosives, machine guns and silencers were also discovered in nearby hideouts.

Kanso said Amal executed two Hezbollah members five days ago after they confessed that the party ordered them to assassinate Berri and other Amal leaders.

#90018u0897 01/18/1990 ~United Press International

LOS ANGELES (JAN. 18) UPI - The National Oceanic and Atmospheric Administration has announced plans to file federal suits against 15 companies it claims polluted waters and harmed marine life in Los Angeles Harbor and other Southern California coastal regions.

Damage to the marine environment caused by the discharge of the pesticide DDT and polychlorinated biphenyls, or PCBs, could run into tens of millions of dollars, John A. Knauss, U.S. Department of Commerce undersecretary, said Wednesday.

NOAA, a division of the Commerce department, is responsible for protecting the nation's marine resources. "Those who have despoiled our natural resources are being put on notice that they will be held responsible under the law for what they have done," Knauss said.

Damages collected would be used to restore natural resources including removing underwater chemical sediments creating artificial reefs or perhaps creating wetland areas, said agency officials.

The companies accused of polluting the harbor and coast areas include Westinghouse Electric Corp., Benjamin Moore & Co., ICI Americas Inc., and other chemical companies and manufacturers.

The amount of damages being sought will not be known until an assessment

of the damage to marine life is completed, which could take up to two years, said Brian Gorman, a spokesman for NOAA.

Both DDT and PCBs are persistent in the environment and accumulate in the fat of animals so that even chemicals released decades ago are a continued threat to the environment, he said. The agency estimates that the contamination began in the late 1940s.

Mammals "are really in danger because they are at the end of the food chain," he said. A preliminary study in Southern California found "birds and marine mammals with concentrations of DDTs and PCBs that are a million times more concentrated than is what is in the water or sediments," Gorman said.

Bottlenose dolphins and California sea lions living off Southern California may have the highest body fat concentrations of DDT and PCBs of any marine mammals ever studied, the agency said.

"We are hoping that the assessment costs will be born by the companies that polluted," Gorman said. If the companies do agree to pay some of the cost, it would not be the first time, he said. Exxon is paying $15 million for an assessment of the damage it caused to marine life after the oil spill in Valdez, Alaska.

#90018u0943 01/18/1990 ~United Press International

BOGOTA, COLOMBIA (JAN. 18) UPI - The administration of President Virgilio Barco reacted cautiously Thursday to a conditional surrender of a warring cocaine cartel, calling on the drug traffickers to turn themselves in to face justice.

Interior Minister Carlos Lemos also hinted extradition to the United States would continue despite the surrender message Wednesday from a hit squad linked to the powerful Medellin Cartel.

The Extraditables, the group authorities say does the violent bidding of the Medellin Cartel, announced Wednesday the government had won the cocaine war and offered to halt its terrorist campaign of assassinations, bombings and kidnappings as well as its cocaine trafficking in return for ''constitutional and legal guarantees.''

''They must complete that which they have declared,'' Lemos told reporters. ''We have to see if they suspend the shipments to the United States. We have to wait to see if they submit themselves to Colombian laws turning themselves over to the judges.''

He also said ''it is not the fault of the government'' that leading traffickers were wanted in the United States, a signal the government would continue extraditions to the United States.

The extraditions are the main point of contention with the drug cartels and led to the formation of The Extraditables.

The Bogota newspaper El Tiempo called Thursday for ''prudence and optimism but without forgetting that this could be a Trojan horse.''

The cartel surrender statement was turned over by a kidnap victim, Patricia Echavarria, who was released Wednesday with her young daughter.

The note was signed by The Extraditables, the self-named group that launched a bloody terrorist campaign last August after the government reinstated its extradition treaty with the United States.

''We turn to the legal system with the hope of obtaining from the government and society respect for our rights and the reintegration of our families into the community,'' the note said.

"We have decided to suspend the shipment of drugs and turn in our arms, explosives, laboratories, hostages, secret air strips and other elements of our activities as soon as we are given legal and constitutional guarantees " the note said.

The capitulation apparently came in response to a peace initiative this week by three former Colombian presidents who said the drug traffickers would receive more lenient treatment from the government if they ended the war.

Barco has consistently rejected other peace overtures from the drug traffickers when they have asked for amnesty and immunity from extradition in exchange for suspending their drug trafficking and terrorist activities.

But when asked about the former presidents' appeal to the drug traffickers, Barco told reporters Tuesday night, ''The government cannot be inflexible in its positions.''

Former presidents Alfonso Lopez, Julio Turbay and Misael Pastrana had proposed that Colombia's traffickers be treated more leniently if they freed kidnap victims and stopped exporting drugs.

Lemos said Wednesday the government had made no concessions to prompt the cocaine cartel to surrender.

"The government has won this war with the policy of not providing concessions," Lemos told a Bogota television station. "I do not see why we have to change the policy when our own enemies have declared the policy has won.''

He said if the traffickers halt cocaine shipments, cease their attacks and dismantle laboratories, the government ''will give them the guarantees spelled out in the constitution.''

At the White House, press secretary Marlin Fitzwater said he was not aware of the message but the administration would continue to oppose making deals with the cartel.

''We have always said no deals,'' Fitzwater told reporters. ''We don't make deals with the Medellin cartel. Period.''

Meanwhile, the government Wednesday extradited two suspected drug traffickers to the United States, bringing to 13 the number of accused traffickers sent to face U.S. courts since Barco's emergency declaration

Aug. 18. Scores have died in the war touched off by the extradition declaration.

A Justice Ministry spokesman said Roberto and Diana Caballero Rangel, brother and sister arrested in an October raid, were extradited to North Carolina.

GDANSK, POLAND (JAN. 18) UPI - Solidarity founder Lech Walesa said Thursday he has accepted an invitation to visit Moscow and said he is ''destined'' to meet with Soviet leader Mikhail Gorbachev.

The invitation was conveyed by the Soviet ambassador to Poland, Vladimir Brovikov, who met with the labor leader for 90 minutes Thursday in Gdansk, Solidarity's birthplace.

A date for the visit was not announced.

''I hope the details will be worked out soon,'' Walesa said. ''I am a man of reforms and in the Soviet Unions great reforms are taking place.''

Referring to Gorbachev, whose policies of perestroika and glasnost touched off the wave of reform sweeping Eastern Europe, Walesa said, ''We are destined to meet each other.

''I hope the visit will bring about positive results for the reform movements in Poland and the Soviet Union,'' Walesa said. ''We must build our relations on rock, not sand.''

#90018u0962 01/18/1990 ~United Press International

TOKYO (JAN. 18) UPI - Sankyo Co., Japan's second-largest pharmaceutical company, said Thursday it has agreed to acquire a 74 percent equity in West Germany's Luitpold-Werk Chemisch-Pharmazeutische Fabrik GmbH for $130 million.

The Tokyo-based company said the acquisition is aimed at strengthening its foothold in Europe before the 1992 market integration of the European Community.

The German group, based in Munich, is a medium-sized pharmaceutical company with a turnover in 1989 of about $120 million, the company said. It will be Sankyo's second manufacturing and marketing arm in West Germany next to its anti-biotic manufacturing and sales company based in Dusseldorf.

#90018u0965 01/18/1990 ~United Press International

NORWICH, CT (JAN. 18) UPI - Funeral services will be held Saturday for the Rev. Terence P. Finnegan, a former Air Force chief of chaplains who witnessed the Japanese attack on Pearl Harbor.

Finnegan, who retired 10 years ago and lived at Mount St. John's School in Deep River, died Wednesday in Windham Community Memorial Hospital. He was 85.

As a young Army chaplain, Finnegan witnessed the Japanese attack on Pearl Harbor. He also saw service on Guadalcanal and in the Solomon Islands and was awarded the Bronze Star.

Finnegan rose to the rank of brigadier general in 1953 and was appointed chief of Air Force chaplains in 1958.

After serving a number of posts in Europe and the United States, Finnegan retired from the Air Force in 1962.

A native of Norwich, he served as diocesan director of Catholic Charities until 1965.

Finnegan served as diocesan consultor pastor at St. Michael's Church in

Stonington from 1965 to 1969 and was pastor at St. Mark's Church in Westbrook until his retirement in 1979.

Finnegan was ordained at St. Joseph's Cathedral in Hartford on May 29, 1930, and served in several Connecticut parishes before he entered the military as a chaplain in 1937.

A mass of Christian burial will be celebrated at St. Mark's on Saturday.

#90018u0981 01/18/1990 ~United Press International

WEST BERLIN (JAN. 18) UPI - At least three of the four parties allied to the Communist Party in East Germany's ruling coalition will remain in the government until spring elections, party officials said Thursday.

The fourth party affliated with the Communist Party, East Germany's Christian Democratic Union, apparently has not made a decision.

Christian Democrat chairman Lothar de Maziere played down an earlier announcement that the party would pull out of the coalition before the elections scheduled for May 6.

De Maziere said the announcement by CDU Secretary-General Martin Kirchner was ''premature'' and had not been discussed by the party's executive. Admitting that many party members wanted the CDU to leave the coalition, de Maziere said the party had a duty to ensure the country remained governable.

The other three parties linked to the Communists in Prime Minister Hans Modrow's government said they would remain in the coalition until elections were held.

The parties gave the assurance in separate statements they issued Thursday at round-table talks among the government, political parties and opposition movements.

Delegates at the talks also called for an official lifting of all forms of media censorship and the establishment of a committee charged with supervising the media.

Since it was formed last December, the round table has established itself as a kind of advisory committee. Its proposals need to be ratified by parliament before they can be adopted.

Round-table delegates also demanded that former East German leader Egon Krenz be released from his official pledge of secrecy.

Krenz, who headed the country for two months until he was forced to resign on Dec. 3, cited the pledge Wednesday when he declined to answer a question about links between the ruling Communist Party and the State Security police, which is now being dismantled.

The delegates Thursday requested Krenz to appear at the round table next week to answer the questions.

Krenz, a former Politburo member and longtime favorite of his predecessor, Erich Honecker, told an official hearing Wednesday that Honecker had completely lost touch with reality toward the end of his 18-year rule.

Krenz said there was no collective leadership within the Politburo, which has been abolished last December as part of a series of dramatic reforms that also included a move away from exclusive Communist Party rule. He said the Politburo was dominated by a few leaders who did not consult other members.

The East German Communist Party has recently been weakened by demands for an increased pace of reform and popular outrage over claims of abuses of power by former officials.

#90018u0992 01/18/1990 ~United Press International

TOKYO (JAN. 18) UPI - Reflecting the booming domestic economy, Japan's major corporate bankruptcies fell to a 16-year low in 1989, a private credit research agency reported Thursday.

Tokyo Shoko Research Ltd. said the number of business failures with liabilities of more than $70,000 plunged 28.5 percent from a year ago to 7,234 cases, the lowest since 1973 when the total was 8,202. The company said debts left by corporations which went down in 1989 totaled $8.5 billion, down 38.4 percent from a year ago.

The agency said most Japanese corporations improved their financial footing significantly against the background of steady economic growth while lending by banks and financial institutions to medium- and small-sized companies helped improve their cash flow.

The number of bankruptcies caused by a lack of workers increased fourfold to 242, reflecting the tight labor market, the report said. In December, bankruptcies decreased 4.1 percent from November to 493, the lowest monthly total of the year, but debts left by them increased 26.3 percent to $708 million, the report said.

#90018u1003 01/18/1990 ~United Press International
BONN, WEST GERMANY (JAN. 18) UPI - The sweeping changes in Eastern Europe and improvement of East-West relations may help strenghthen relations between industrialized and developing nations, Commonwealth Secretary-General Shridath Ramphal said Thursday.

''I see no essential difference in the urge for freedom in Eastern Europe and the urge for economic freedom in the Third World,'' he told a news conference concluding a three-day meeting of the Brandt Commission - a body that monitors North-South relations.

Delegates to the international meeting agreed that after a decade of virtual stagnation, perspectives for a fruitful dialogue between industrialized and developing nations looked positive.

''The changed conditions in East-West relations which resulted in an overall improvement of the international climate will have a positive impact on the discussion of other global problems,'' said Willy Brandt, former West German chancellor and commission chairman.

But he warned industrialized nations against focusing exclusively on assistance to East bloc countries, saying ''it would be fatal if the economic assistance necessary in the other part of Europe were given at the expense of the Third World.''

Ramphal said developing nations ''lost a decade'' but that he is confident the reforms sweeping Eastern Europe will benefit those nations by giving a new impetus to the North-South dialogue.

He said the report of the Brandt Commission in 1980 was 10 years premature but that people are ''ready for a new vision and now we begin to see that vision more clearly, especially with the happenings in Eastern Europe.''

''It is the principle of human urging,'' he said.

Brandt announced the creation of a new working group under Ingvar Carlsson the Swedish Prime Minister, to work out proposals for a North-South summit to be held in 1991, focusing on disarmament, development and environmental issues.

#90018u1005 01/18/1990 ~United Press International
BERN, SWITZERLAND (JAN. 18) UPI - Switzerland recorded its second-highest trade deficit on record in 1989 with imports exceeding exports by $7.3 billion, the government reported Thursday.

It said the defict was 31.3 percent higher than in 1988 and second only to

the $7.5 billion posted in 1980.

Helped by continued global growth and a weaker Swiss franc, exports rose last year by 13.8 percent $56.2 billion. High domestic economic growth and near-capacity production, however, pushed imports up by 15.5 percent to $63.5 billion, the report said.

#90018u1013 01/18/1990 ~United Press International

MINNEAPOLIS (JAN. 18) UPI - A couple charged with kidnapping their daughter from what they believed was a religious cult have pleaded guilty to lesser charges.

Darrell Johnson, 58, and Mary Ann Johnson, 55, of Blooming Prairie pleaded guilty to false imprisonment in Hennepin County District Court Wednesday. They were placed on probation for up to three years and are not to communicate with their daughter, Shelley Johnson, unless she initiates contact.

''She is a 29-year-old woman who has the right to live her life the way she feels appropriate,'' Judge Kevin Burke said. ''She is not a 2-year-old any more.''

The Johnsons also are to pay Shelley, their only child, $4,000 and each must perform 60 hours of community service.

''I love my daughter,'' the mother sobbed in court. ''I just want my family back. ... We just want to talk to her. She doesn't want to talk to us.''

The daughter, who watched the proceedings from the back of the courtroom, walked away quickly with several friends afterward.

The Johnsons were armed with a stun gun when they abducted their daughter on Sept. 8 and took her to their home to ''deprogram'' her. A Steele County sheriff's deputy arrived the next day, apparently after a call from Shelley Johnson's church, the Eagan Christian Center.

The Johnsons maintained their daughter, a registered nurse, had strayed from the Lutheran church and had become involved in what they believed was a religious cult that did not want her to have a relationship with them. Church officials deny the 375-member evangelical congregation is a cult or that it alienates its members from their parents.

''I have always taught that we are to honor our parents and love them,'' Pastor Jay Zinn said. ''We don't shut anybody out of our lives.''

-30- 1997

#90018u1028 01/18/1990 ~United Press International

WASHINGTON (JAN. 18) UPI - The White House pointed to the latest economic news Thursday as proof inflation ''has remained very steady'' and suggested the Federal Reserve Board take a cue that ''lower interest rates are justified.''

''This is not a new message,'' White House press secretary Marlin Fitzwater told reporters, ''but it's important occasionally to point out that lower interest rates are normally good for the economy.''

Insisting ''we aren't telling the Fed what to do,'' Fitzwater welcomed the 4.6 percent inflation rate announced earlier by the Labor Department for 1989 as below the administration's forecast of 4.9 percent and ''market expectations.''

Although the figure for 1989 marked the largest advance since 1981, Fitzwater asserted inflation remains ''under control'' and said ''we don't see any dramatic problem in the immediate future'' about the soundness of the economy.

From time to time over the last year, the administration has sent subtle public signals that the Fed was keeping too tight a grip on credit to keep inflation low.

Expressing a desire to ''be ever vigilant to the need for continued growth '' Fitzwater said, ''We're hopeful that they will take a look at this morning's indicators and understand that these numbers are low and indicate inflation has remained very steady over the last seven or eight years and that lower interest rates are justified.''

Even for the White House, however, not all was bright on the economic horizon Thursday. Fitzwater admitted the Commerce Department's announcement of an 8 percent drop in housing starts in December was ''not good news,'' but held out hope the housing industry would rebound by a decline in interest rates.

#90018u1029 01/18/1990 ~United Press International

DETROIT (JAN. 18) UPI - Chrysler Corp. said Thursday it will indefinitely idle more than 2,250 hourly and salaried workers at three U.S. assembly plants in late March as it slows down vehicle production.

Company spokesman Doug Nicoll said 724 workers will be let go at Chrysler's Jeep plant in Toledo, Ohio, while 780 workers will be idled at its mid-sized car plant in Newark, Del. Another 750 workers will be

indefinitely idled at its full-sized car plant in Belvidere, Ill., Nicoll said.

All three plants will be closed the week of March 19. When they resume operations March 26, Chrysler will begin the process of reducing the work force at those plants, Nicoll said. The No. 3 carmaker made no formal announcement concerning the layoffs because it was in the process of notifying workers about the reductions.

Chrysler announced only late last week there would be temporary shutdowns at those plants the week of Feb. 5 to trim inventories of unsold vehicles. It also plans temporary shutdowns at plants in Fenton, Mo., and Warren and Sterling Heights, Mich., affecting a total of 18,000 workers.

The carmaker previously announced that about 1,900 workers at its St. Louis No. 1 car plant in Fenton would be indefinitely idled Feb. 12 when single shift operations begin.

But more permanent cutbacks are needed to get production in line with market conditions, Nicoll said, adding the output at the Toledo plant will be reduced by eight percent, while production at Belvidere and Newark will be cut by about 12 percent.

Chrysler's Toledo plant employs about 6,000 hourly and salaried workers. Its Belvidere plant employs 4,200 workers, while the Newark plant has 4,100 workers.

Separately, a Chrysler spokesman said Thursday the company will most likely close its Jefferson Avenue plant in Detroit as planned early next month despite a plea by the United Auto Workers union to keep it operating.

The UAW proposed this week that Chrysler produce a special edition of the subcompact Dodge Omni and Plymouth Horizon to be sold in areas where those cars still sell well.

"We basically told the union we would take a look at the proposal, but we said we are not holding out a great deal of hope," company spokesman Lee Sechler said. "We covered almost every conceivable way to keep production going past Feb. 2."

Chrysler said last November it would close the plant, idling about 1,700 workers. A new plant being built nearby is slated to build Chrysler sport utility vehicles by early 1992. Sechler said he did not know when the carmaker would give the union a final decision on the Jefferson plant.

PARIS (JAN. 18) UPI - Former Defense Minister Charles Hernu, who resigned his cabinet post in 1985 over the French sinking of a Greenpeace ship, died Wednesday after collapsing during a speech in the town of Villeurbanne, officials said.

Hernu, 66, a loyal Socialist and close friend of President Francois Mitterrand, collapsed Wednesday night while addressing members of the Armenian community in Villeurbanne, where he had served as mayor since 1977.

Hernu, the son of a policeman, joined the French Resistance movement during World War II at the age of 19. He helped organize Mitterrand's first presidential campaign in 1965 and was named Defense Minister in May 1981.

He was forced to resign in September 1985 amid allegations he had given the orders that led to the sinking of the Greenpeace ship Rainbow Warrior in Auckland, New Zealand harbor.

The Rainbow Warrior, which was to lead a flotilla to protest French undersea nuclear weapons tests in the South Pacific, was sunk on July 10, 1985, by French secret service agents, who attached two bombs to the ship's hull. A Dutch photographer was killed in the attack.

#90018u1074 01/18/1990 ~United Press International

CAPE CANAVERAL, FL (JAN. 18) UPI - The Columbia astronauts tested their landing systems Thursday, chatted with President Bush and wrapped up their experiments and before taking the afternoon off in advance of Friday's pre-dawn glide to Earth to close out a ''superb'' 10-day mission.

Engineers at mission control in Houston, meanwhile, mounted an investigation to find out how incorrect navigation commands managed to get transmitted to the shuttle late Wednesday, triggering a series of rocket firings that caused the spaceplane to somersault slowly through space while the crew slept.

The astronauts were never in any danger and were given the afternoon off Thursday to sightsee and relax after being awakened early because of a faulty smoke alarm and the unplanned jet firings.

Bush, speaking by telephone, praised the shuttle fliers for their successful rescue of the Long Duration Exposure Facility - LDEF - a giant science satellite that was falling back to Earth.

''What I'm calling to do is to congratulate you and the crew, after all those somersaults, for doing this superb job up there on this mission,''

Bush said. ''We followed the (rescue of LDEF) and the very exciting grab and I just wanted to hear first hand how it was going.''

''We've pretty much concluded most of the major objectives of this mission '' pilot Daniel Brandenstein said, ''and obviously, the retrieval of the LDEF was one of the highlights.''

Marsha Ivins told the president flying in space was ''sort of a dream come true'' and the president asked Brandenstein: ''Can you use a 65-year-old Navy pilot up there?''

With the year's first shuttle mission drawing to a close, Brandenstein, 47 co-pilot James Wetherbee, 37, Bonnie Dunbar, 40, Ivins, 38, and G. David Low, 33, spent the day wrapping up a series of medical and scientific experiments and testing the shuttle's landing systems for re-entry.

If all goes well, Columbia will glide to a night landing on concrete runway 22 at Edwards Air Force Base, Calif., at 2:55 a.m. PST Friday to close out the 33rd shuttle mission. It will be the first night landing in the post-Challenger era and only the third in the history of the shuttle program.

But flight director Lee Briscoe said the weather was questionable with rain and snow Thursday and the possibility of fog Friday morning that could cause problems. He said if bad weather blocked a Friday landing, good conditions were expected Saturday.

With landing preparations going smoothly in orbit, engineers at mission control in Houston were investigating what caused faulty navigation data to be beamed to the shuttle's computers. The data made six small ''vernier'' rocket jets fire while the astronauts were sleeping, pushing Columbia into a gentle tumble.

''The thrusters did exactly what the computers told them to do,'' said flight director Robert Castle. ''Preliminary data right now says the shuttle was given a bad navigation input. It thought it was someplace else. It was rotating at a high rate of speed trying to follow that.''

Further analysis early Thursday indicated the shuttle completed four or five very slow corkscrew somersaults that left the spaceplane in a flat spin, gently rotating about its ''yaw'' axis. Yaw refers to the motion one would see looking down on the shuttle from above with the ship rotating about an axis through its payload bay and belly. The movement triggered by the small rockets was so gentle, however, the astronauts were not awakened.

Flight controllers in Houston were slow to realize what was going on and by the time they attempted to radio the crew to take manual control and stop the rocket firings, Columbia was sailing out of radio contact over

the Indian Ocean.

After the shuttle moved back into contact, the astronauts were awakened by ground control and Brandenstein quickly took over, stopping the rocket firings about 15 minutes after the incident began and putting the ship back in the proper orientation.

Castle said the correct navigation data, called a ''state vector,'' was transmitted from mission control but that it was somehow corrupted in transit, ''just like radios fade in and out.'' The problem apparently was compounded when a flight controller failed to notice the error after an automatic check.

''The automatic system compares what was received (on the shuttle) with what was transmitted and at first indication, that system appears to have worked correctly and showed there was an error in the uplink,'' Castle said.

''It appears it was a human error that caused that error not to be corrected. We're looking into exactly why it wasn't.''

Castle said Columbia ''has been working fine ever since'' and that special procedures were put in place to make sure a similar problem does not happen later.

The astronauts were never in any danger and despite being awakened early Wednesday night by the rocket firing and an earlier smoke alarm, they hit the deck running, wrapping up their experiments and getting Columbia ready for its fiery descent to Earth Friday.

(JAN. 18) UPI - Police in Japan are searching for a gunman who shot and wounded the mayor of Nagasaki outside City Hall. Officials say Hitoshi Motoshima is expected to survive. The mayor recently made controversial statements concerning World War Two.

Officials in Florida say a Panamanian businessman who could solidify the Tampa drug case against deposed dictator Manuel Noriega has surrendered to U-S agents in Panama. Enrique ''Kiki'' Pretelt is being flown to Tampa.

The leaders of Romania's interim government met for a second day to consider scrapping a promised referendum on whether the Communist Party should be outlawed and the death penalty re-instated. Sources say the vote will be canceled.

Polish Prime Minister Mazowiecki today asked his nation for patience in

the face of labor unrest and unprecedented price hikes. Mazowiecki said in a televised address that his economic policies are the ''only chance'' for Poland.

The Anti-Defamation League of B'nai B'rith says the number of anti-Semitic incidents nationwide hit a new high in 1989. The annual report also says the attacks were more serious in nature.

Prague says the Kremlin has agreed in principle to withdraw all 80-thousand Soviet troops from Czechoslovakia. A Czech Foreign Ministry spokesman says a timetable for the pullout remains to be worked out.

China's national police today said 573 people jailed after last June's crackdown on the reform movement have been released after admitting crimes. The fate of thousands of others still in prison remains unknown.

#90018u1087 01/18/1990 ~United Press International

HOUSTON (JAN. 18) UPI - Managers at Continental Airlines have been told not to expect their usual merit raises until the fall as part of continued belt-tightening moves at the carrier.

Under normal conditions, Continental managers are evaluated every six months to determine whether their performances merit raises, Continental spokesman
Art Kent said Wednesday.

But managers were informed at a national meeting last week that any such raises would be delayed. "Merit increases are being postponed until sometime in the fall," Kent said.

The freeze affects all management personnel in the airline, he said, and is part of Continental's effort to make the carrier more efficient at a time of increasing costs.

Last week, Continental officials revealed the carrier had laid off about 150 employees, mostly middle-management workers, to help cut costs. Continental, like the nation's other carriers, was hit with skyrocketing jet fuel costs last month.

Continental led an industrywide effort to raise prices on flights by four percent to help offset those costs. Other airlines now are considering boosting prices even higher.

At the same time, the industry is facing weak winter traffic. To boost ridership, Continental instituted discount fares for flights to 11 cities in Texas, Oklahoma, and Louisiana.

#90018u1090 01/18/1990 ~United Press International

SEATTLE (JAN. 18) UPI - The Boeing Co. has recommended cockpit control improvements to more than 2,000 Boeing planes to ensure that the rudder is not inadvertently set in the wrong position.

The airplane manufacturer said Wednesday it will make available refit kits for the rudder trim controls in its new-generation 737, 747, 757 and 767 jetliners and will design the changes into new planes. The Federal Aviation Administration said it was beginning the process to make the changes mandatory.

The wrong rudder setting is being investigated by the National Transportation Safety Board as contributing to the crash of a USAir 737-400 at New York's LaGuardia Airport in September. Two passengers were killed when the jet skidded into the East River after an aborted take-off.

The NTSB, which will begin hearings on the accident in New York on Feb. 13 said the rudder on the 737 was found to be set at full left position when it should have been straight for take-off.

NTSB spokesman Ted Lopatkiewicz said the agency won't know until after the hearings why the rudder was set in the wrong position or how that contributed to the accident. In addition to the rudder system, human factors and pilot training procedures will also be probed during the hearings.

Rudder trim is an electro-mechanical system that can move the rudder on the plane's vertical tail to the left or right to compensate for an unbalanced plane, particularly in emergency situations, such as the loss of an engine.

The refit kits will include a new round switch knob with finger grips around the edge to replace the present blade-type controls on the aisle stand between the pilots' seats. The company said there have been reports of the blade-type knobs being moved accidentally, such as by someone resting a foot on the aisle stand while talking to the pilot. Boeing also will increase the height of a protective shield around the stand.

The kits will be made available this year for 737-300s and -400s, 747-400s and 757s and 767s. The company also will begin this year to incorporate the design changes into new planes being built.

Dave Duff of the Federal Aviation Administration in Seattle said the agency is expected to begin the regulatory procedure within several weeks that will make the fixes mandatory.

Boeing said it was aware of 11 instances in the past few years of the rudder trim being set inadvertently, and that it was in the process of correcting the problem when the USAir accident occurred. The company also said that it has received complaints about sticking switches and faulty indicators in the rudder trim systems, which it said it plans to correct with new motors and different testing procedures.

These problems did not occur on earlier Boeing models because the rudder trims were manually controlled with a dial that had to be turned 30 times to make the rudder move 15 degrees.

#90018u1095 01/18/1990 ~United Press International

BEIRUT, LEBANON (JAN. 18) UPI - A top U.N. official arrived Thursday for talks with Lebanese leaders concerning their request that U.N. peacekeeping forces be maintained in southern Lebanon after the UNIFIL mandate expires this month.

U.N. Undersecretary General Marrack Goulding said the government of President Elias Hrawi, as well as U.N. Secretary-General Javier Perez de Cuellar, support the continued presence of the United Nations Interim Force in Lebanon.

The current mandate of the UNIFIL troops is due to expire at the end of this month. The 5,600-strong peacekeeping force was deployed in southern Lebanon in 1978 following an Israeli invasion. The force is made up of contingents from France, Norway, Ireland, Ghana, Nepal, Fiji, Finland, Italy and Sweden.

Goulding, speaking with reporters, denied news reports that Ireland and Norway were planning to reduce the size of their presence in UNIFIL.

''We know no decision nor request by the government of Ireland or Norway to reduce its troops in the south,'' he said.

But, he said, ''This has happened before. The contingents have been reduced in size or withdrawn, but we have always managed to replace the troops which were withdrawn.''

Goulding said he will visit Syria and Israel as part of his consultations on the renewal of UNIFIL mandate.

After meeting with Hrawi and Prime Minister Selim Hoss in Beirut, Goulding said, ''We talked about the situation in the south and the necessity to implement (U.N. Security Council) Resolution 425 as well as about steps the (Lebanese) government can take to reestablish its authority in the south.''

Goulding said Hrawi supported the implementation of Resolution 425, which calls for the complete withdrawal of Israeli troops from south Lebanon and restoration of Lebanese authority over all Lebanese territory.

Hrawi is facing a power struggle within Beirut. Military strongman Gen. Michel Aoun has taken command of the presidential palace and controls some 15,000 mainly Christian soldiers in Christian east Beirut.

#90018u1097 01/18/1990 ~United Press International

WASHINGTON (JAN. 18) UPI - Rep. Les Aspin, D-Wis., proposed a defense budget strategy Thursday centered on developing but not buying high technology weapons until the threat justifies the expenditure.

The House Armed Services Committee chairman - predicting the new defense budget will be cut - outlined his suggestions in a speech prepared for delivery Friday to a national security group in Chicago.

Aspin said he offered the suggestions as a strategy for working on the fiscal 1991 defense budget - expected to total $292 billion plus Energy Department spending on nuclear weapons - because ''without a strategy, the strongest guiding force may be the aroma of pork.''

His remarks took note of expected attempts to chop the defense budget and redirecting the money toward social programs because of easing of tensions in the world. But in an apparent effort to fend off pressures for wholesale cuts, Aspin cautioned that reductions must be driven by a careful budget strategy.

Cuts must be made, he said, where the threat posed by the Soviet Union has actually diminished. And, he said, the United States should protect against a reversal of trends in Soviet military policy without continuing to buy everything as a hedge.

''To hedge against uncertainty, we could continue to develop new weapons systems but not produce them until we see whether the Soviet threat develops in a way that tells us we need them. What we might do is pursue a real research and development system, rather than a develop and buy system '' said Aspin.

Such a system, he said, would have to ''pick and choose between technologies, prototype them, demonstrate them, validate them, then put them on the shelf against the day they might be needed.''

While there would be some exceptions, Aspin said, systems should pass three tests before going into production.

First, he said, ''No weapon should be built unless the project threat honestly justifies it. Second, the technology the developers are pushing has to do the job. ... (And) third, ... developers have to prove that existing equipment has run out of growth capacity and can't be improved to handle the threat before they go on to the new one.''

As an example, Aspin cited the Advanced Tactical Fighter, currently under development by the Air Force, a project estimated last May to cost $67 billion for development and production of 750 planes.

Aspin said Congress might not want to put the ATF into production until it determines ''whether the Soviet threat develops in a way that will require it. We've got a new air-to-air missile in the works that gives our present fighters a great deal of growth potential. For the budget year 1991, the House Armed Services Committee might hold up ATF and buy the current generation of fighters, the F-15 and F-16.''

The committee chairman also suggested that if the Soviet threat disappears it could mean significant changes for the Navy, with a greater emphasis on aircraft carriers than on submarines.

#90018u1099 01/18/1990 ~United Press International

TAMPA, FL (JAN. 18) UPI - Jury selection started Thursday in the trial of six defendants, including Manuel Noriega's personal banker, charged in a $32 million international money-laundering case.

Jury selection started at 9:30 a.m. before U.S. District Judge Terrell Hodges, who cleared the courtroom to make room for the pool of 100 prospective jurors in the case stemming from a 33-count money-laundering and drug-trafficking indictment returned in 1988.

As the trial was about to start Tuesday, two divisions of the Bank of Credit and Commerce International agreed to plead guilty to money laundering charges and forfeit more than $14 million in certificates of deposit bought with illegal profits.

The government also dropped charges against another defendant, bank officer Abqal Ashraf, and on Wednesday defendant Gonzalo Mora Jr. pleaded guilty to 32 counts of money laundering and one count of conspiracy to traffic drugs.

Meanwhile, Hodges refused to suppress a statement given to U.S. Customs Service agents by Amjad Awan, another defendant and former personal banker of Noriega. The statement contains claims about Noriega that have not been publicized.

In refusing to suppress Awan's statements, Hodges said, ''Although Mr. Awan made reference to the fact that he was, quote, 'a little high,' he did not testify or in any way say that he was drunk. It is my determination that he gave his statement freely.''

Awan testified earlier that he and other defendants were arrested in October 1988 while attending a bogus bachelor party staged by federal authorities and that he was ''dazed and a little high'' from drinking.

''I would say the Noriega subject came up often,'' during his interrogation by customs agents, Awan said. ''I would say more than 75 percent of the questions were about Noriega.''

Hodges also denied a defense motion to bar prosecutors from submitting evidence uncovered in the Miami drug-trafficking case against Noriega, who was awaiting trial in a holding cell at the Miami federal courthouse.

Hodges agreed to allow Mora to withdraw his guilty plea on the most serious charge of conspiracy to traffic in drugs if prosecutors fail during the trial to obtain convictions against his co-defendants.

''The sentencing hearing would be deferred until the government has completed its case,'' Hodges told Mora. ''If the government is unable to prove the charge against you, you will be able to withdraw your plea of guilty.''

But Mora may not rescind the 32 other guilty pleas. He would face a maximum penalty of life in prison and a $4 million fine if convicted on the drug-trafficking conspiracy charge. He faces 20 years in prison and a $500,000 fine for each count of money laundering.

The remaining defendants left in the case are Awan; Syed Astab Hussain, a BCCI officer; Akbar A. Bilgrami, manager of BCCI's Tampa office; Sibte Hassan, another BCCI official; Ian Howard, also a bank officer, and Colombian businessman Rudolf Armbrecht.

The case stems from a U.S. Customs Service investigation called Operation C-Chase, which climaxed in Tampa with the arrest of the defendants.

Nationwide, eight indictments charging more than 80 people with laundering drug money were returned.

Federal investigators say the bank officers suggested ways of laundering drug money to an undercover federal agent and supported a policy to accept drug profits. Drug profits were filtered into Tampa from Houston, Chicago, Los Angeles, Miami, Detroit, New York and Philadephia, the indictment said.

The indictment said BCCI officials wired money to Panama and deposited it into accounts of dummy corporations. Smugglers received checks written from those accounts, investigators said.

When Noriega was indicted on cocaine-trafficking charges in February 1988, the operation was moved from Panama to Paris.

The indictment said the money was transferred from Tampa to New York, then to BCCI's European offices and converted to CDs.

#90018u1109 01/18/1990 ~United Press International

NEW YORK (JAN. 18) UPI - Texaco Inc., the nation's third-largest oil company, Thursday reported a $9 million drop in 1989 fourth-quarter earnings as a result of environmental expenses and a drop in petrochemical income.

The company said it earned $287 million, or 99 cents a share, in the last quarter of 1989 compared with $296 million, or $1.21 a share, in the same period of the previous year.

Texaco said petrochemical earnings for the quarter dropped to $16 million from the previous year's $111 million because of a continued softening in ethylene and propylene prices.

It said $355 million, or $1.34 a share, had been set aside for environmental programs and a reduction in value of facilities off the shore of California. Phillips Petroleum Thursday said it was reducing the value of its offshore California fields because environmental objections had delayed production.

Texaco said earnings for all of 1989 were $2.4 billion, or $9.12 a share, compared with $1.3 billion, or $5.35 a share, in 1988. The year's earnings benefited $1.5 billion, or $6.02 a share, from a restructuring of the company that included the $1.2 billion sale of Texaco Canada Inc., the company said.

#90018u1121 01/18/1990 ~United Press International

JAKARTA, INDONESIA (JAN. 18) UPI - Police broke up a demonstration by separatists in the province of East Timor minutes after the protestors presented a set of grievances to the U.S. ambassador visting the island, a U.S. Embassy spokesman said Thrusday.

The spokesman said an unspecified number of protesters were injured when authorities moved in to quell the disturbances.

The incident occurred after Ambassador John C. Monjo granted the 50 to 100 demonstrators an inpromptu grievance session Tuesday in the provincial capital of Dilion, interrupting a routine familiarization tour of East Timor.

''Efforts to control the demonstration resulted in some injuries. We sincerely regret that. The target of the protest was neither the ambassador nor the United States,'' he said.

Jakarta annexed the former Portuguese colony of 600,000 in 1976, a year after Indonesian troops intervened in a bloody civil war that erupted after Portugal withdrew from East Timor.

#90018u1126 01/18/1990 ~United Press International

CLEMSON, SC (JAN. 18) UPI - Clemson football coach Danny Ford resigned Thursday amid the second NCAA investigation into the school's football program in a decade, according to unofficial reports.

Citing extremely reliable sources, WBTV in Charlotte reported Ford's 11-year tenure with the Tigers had ended. Clemson officials declined to comment immediately but said a statement would be issued from the university president's office.

Two other reports, from WSPA-TV in Spartanburg and the South Carolina Network, said Ford discussed his plans with friends Wednesday night and submitted his resignation Thursday morning.

The reports said Ford, under an agreement with Clemson officials, will receive $190,000 annually for the next three years and will cooperate fully with the current NCAA investigation.

Ford's apparent departure came about two weeks after the NCAA ordered Clemson to respond to 14 alleged rules violations between 1984 and 1988, including a claim that a member of the football coaching staff directed cash payments to players.

Ford, under orders from his superiors, had not commented on the allegations, but high school players being recruited by Clemson said they were told by members of the coaching staff that most of the NCAA allegations could be refuted.

Clemson was placed on NCAA probation in 1982 for violations that occurred during Ford's tenure and that of his predecessor, Charley Pell.

Ford began his first full season as Clemson head coach in 1979 and led the

Tigers to seven bowl appearances, including Clemson's recent victory over West Virginia in the Gator Bowl.

His overall record at Clemson is 97-29-4, making him the second-winningest coach in school history, behind the legendary Frank Howard.

#90018u1140 01/18/1990 ~United Press International

JERUSALEM (JAN. 18) UPI - Nearly one-fourth of the Palestinians killed by the Israeli army during the 2-year-old Palestinian uprising have been children under 16, an Israeli human rights group reported.

The human rights organization B'tselem said in a report released Wednesday that the army had failed in its efforts to prevent the killing and wounding of children during confrontations with Palestinians in the occupied West Bank and Gaza Strip.

Despite army regulations that forbid soldiers from shooting at children under the age of 14, at least 136 children under the age of 16 have been killed by army soldiers during the ''intifada,'' Arabic for uprising, and 131 of those were killed by gunfire, B'tselem reported. It did not say how many of the slain children were under 14. The report said a total of 574 Arabs have been slain by army gunfire during the uprising.

''The figures show that the army has seriously failed in its policy to prevent the injury of children,'' B'tselem concluded in a special report on children and the uprising.

An army spokesman said Thursday guidelines on opening fire were designed to keep down the number of Palestinian children hurt during confrontations. He charged Palestinian leaders deliberately used children in demonstrations because they know the army cannot arrest youths under 12.

''We do everything possible not to injure children,'' the spokesman said. According to army figures, 72 Palestinian children under the age of 16 have been killed by army gunfire.

A statement from the military responding to the B'tselem charges said, ''The guidelines (on firing) require special care to be taken when shooting toward children.''

Soldiers are given copies of these guidelines and are briefed on the regulations covering shooting at children, according to the statement.

Meanwhile, in the occupied Gaza Strip, a suspected drug dealer was stabbed to death in El Karara village, Palestinian sources said Thursday. Atiya Ahmed Abdel Hadi, 30, was taken to a local hospital late Wednesday where

he was pronounced dead, the sources said.

Since the start of 25-month-old uprising more than 160 Palestinians accused of immoral behavior or collaborating with Israel have been killed by other Palestinians.

In the Gaza Strip Thursday, soldiers shot and wounded nine Arabs during clashes, including three students involved in a demonstration near their school in the Nuseirat refugee camp, Palestinian sources said.

Also Thursday, the army destroyed the Gaza home of a Palestinian accused of killing Arabs suspected of collaborating with Israeli authorities, Palestinian and army sources said.

#90018u1142 01/18/1990 ~United Press International

WASHINGTON (JAN. 18) UPI - Exceptionally cold weather caused housing starts to plummet eight percent in December after a revised 5.7 percent drop in November and new construction for all of 1989 was at its lowest level since 1982, the Commerce Department reported Thursday.

As the economy lost momentum under the high interest rate policy of the Federal Reserve, housing starts fell 7.7 percent to 1.37 million in 1989 from 1.49 million in 1988, the department's Census Bureau said.

The 1989 starts figure was the lowest since 1.06 million in the recession year of 1982, when the economy started one of its longest stretches of recorded peace-time growth.

In 1989, the Northeast was hardest hit and suffered a 24 percent reduction in new privately owned housing starts. The South lost 6.9 percent, the Midwest lost 2.9 percent, and the West lost 2.5 percent, according to the Census data.

Thomas Holloway, senior economist with the Mortgage Bankers Association, said that fixed 30-year mortgage interest rates did not change much, remaining at 10.33 percent, but adjustable-rate mortgages increased to 8.8 percent in 1989 from 7.9 percent in 1988.

Higher interest rates during the first months of 1989 "caused a delayed response in housing," he said. His association expected a "modest improvement, about 5.5 percent," in housing activity during 1990, "if interest rates drift down further," he added.

David Seiders, chief economist for the National Association of Home Builders, contended that it would be difficult to count upon lower interest rates during 1990 since the overall inflation rate is still

relatively high. The Labor Department reported Thursday that the Consumer Price Index increased 0.4 percent in December and advanced 4.6 percent in 1989.

"We are betting on a weak economy, and forecast a total of 1.38 million housing starts for 1990," Seiders said in a telephone interview from the national convention of the NAHB in Atlanta.

John Tuccillo, chief economist for the National Association of Realtors, was more upbeat and predicted that housing starts would grow in 1990 to 1.47 million units.

In December, housing starts were at a seasonally adjusted annual rate of 1.24 million units. Census revised its last month's figures and said that starts in November dropped 5.7 percent to 1.34 million from 1.42 million in October. The December starts number was the lowest since 1.17 million in October 1982.

Last month, Census estimated that November starts fell 4.7 percent to 1.36 from 1.43 million in October.

The December fall in housing starts was caused by the exceptionally cold weather, according to analysts. Holloway noted that "the reduction in starts did not reflect a change in interest rates, which were essentially unchanged from November."

He said that the regional pattern of starts was influenced by the cold snap, which hit worse the Northeast and South, in particular Florida, and the Midwest, but not the West.

Norman D. Flynn, the National Association of Realtors' president, noted that "December starts are always lower than the previous month's," a situation worsened by the freezing weather. Holloway and Flynn both predicted that housing starts would experience a recovery in January and during the rest of the first quarter.

Privately-owned single-family housing starts fell 9.9 percent in December, to 904,000 units. Multi-family structures - condominium and cooperative apartments - dropped 4.8 percent during the month, to 278,000 units, the Census Bureau said.

By region, December starts plummeted 23.3 percent in the Northeast, to 138,000 units; fell 9.8 percent in the Midwest, to 268,000 units; and lost 10 percent in the South, to 439,000 units. Only the West bucked the trend with a December housing starts growth of 5.8 percent, to 390,000 units.

Building permits, a bellwether of future activity, were at 1.34 million in December, in seasonally adjusted numbers, barely below their level in

November.

Holloway argued that the stability of permits was one more proof that the December starts numbers was a result of the bad weather. For 1989 as a whole, building permits fell to 1.34 million from 1.46 million in 1988, in not seasonally-adjusted numbers. Last year's permits figure was the lowest since 1 million in 1982, Census said.

Seiders claimed that the permits figures "are pretty good news" but could be adversely influenced in 1990 by fears about falling home prices and the reform of the thrift system, which could unload on the market the enormous stock of properties accumulated by the government as a consequence of the savings and loan crisis.

DAYTONA BEACH, FL (JAN. 18) UPI - Three people carrying $300,000 in cash with drug traces on it in the trunk of their car told deputies they stumbled across the money in a McDonald's parking lot in Georgia and picked it up.

The deputies, on the lookout for drug money, were skeptical. They seized the money after a dog sniffed drugs on it and also confiscated the suspects' car.

The men did not seem to mind, said sheriff's spokesman Bill Raines.

''They didn't even want a receipt,'' Raines said.

They told authorities they found the three bags of money in the parking lot of a McDonald's restaurant in Georgia.

They also said they were on their way to Colombia and were not interested

in asserting their right to the money or to the 1985 Nissan Maxima.

The suspects, stopped Wednesday for cutting off another driver and nearly causing an accident on Interstate 95, were not arrested.

Raines said deputies drove them to U.S. 92 and ''pointed in the direction of the bus station.''

They were identified as Luis Gonzaga Marin, 41, of North Carolina; Luz Helen Gomez, 26, of Colombia; and Oscar A. Gil, 26, of New York.

#90018u1202 01/18/1990 ~United Press International

CAPE CANAVERAL, FL (JAN. 18) UPI - The shuttle Columbia's 10-day mission is the first in a series of long-duration flights leading to 16-day missions in 1993 or 1994 that will give scientists more time in orbit for valuable research.

The National Aeronautics and Space Administration is spending $200 million to modify Columbia and the new shuttle Endeavour, Challenger's replacement to allow them to remain in orbit longer than originally planned in a program known as the ''extended duration orbiter'' - EDO - project.

''EDO is going to bridge the gap between the short-duration shuttle we have now and space station down the road,'' Columbia skipper Daniel Brandenstein said in a pre-flight interview.

''It'll be used to develop experimental concepts and hardware that ultimately will end up in the space station. From our point of view, we'd like to see the things that end up in space station to be previously tested and verified.''

Before attempting a full 16-day mission, NASA plans to launch four 10-day flights followed by two and possibly three 13-day missions. The first 16-day voyage could come as early as January 1993 with the launch of a Spacelab materials science laboratory aboard Columbia.

''The hardware is not a really big deal, to go from 10 to 16 days, it's not going to really know the difference,'' said Dwayne Weary, deputy manager of the orbiter engineering office at the Johnson Space Center in Houston.

''But for the crew, we want to approach this gradually. The reason is, we're having the crew fly the vehicle at the end of the time. If it was an Apollo-type vehicle, you wouldn't have to worry about that. But these guys ... have got to be able to function very precisely'' for landing after more than two weeks in weightlessness.

''Flying the shuttle, being that it's a glider, is not the easiest piloting task in the world, so you want to be sure that if you're looking at longer-duration flights that the crews coming back are capable ... of landing the shuttle,'' Brandenstein said.

''In my mind, I think that pilot performance is a slowly degrading curve but at some point, and we don't know where that point is, I think there's probably a pretty significant drop off. That's why you want to do a slow buildup.''

Columbia's mission this week is the first of four pre-EDO 10-day flights to gather data on both the performance of the shuttle and its crew before moving ahead with 13-day missions starting in 1992.

Throughout the flight, Brandenstein and co-pilot James Wetherbee have been exercising on a treadmill to keep in shape. Their three crewmates have been conducting other experiments to learn more about the long-term effects of weightlessness and how to counteract them.

In April 1991, Columbia is scheduled to return to Rockwell International's shuttle factory in Palmdale, Calif., for three major EDO modifications:

-Installation of a toilet to replace the sometimes tempermental unit currently aboard Columbia.

-Installation of a machine to remove carbon dioxide from the crew cabin's air, eliminating the need to carry bulky canisters of C02-absorbing lithium hydroxide, which take up space in the crew module.

-Changes to the shuttle's plumbing to allow the use of extra fuel tanks in the ship's payload bay to feed liquid hydrogen and liquid oxygen to three electricity-producing fuel cells to provide enough power for longer flights.

''We're well on our way to building the necessary hardware that goes in the orbiter,'' said Keith Hudkins, an EDO engineer at NASA headquarters in Washington.

Columbia currently has five hydrogen-oxygen tank sets mounted below its payload bay feeding three fuel cells.

The EDO fuel tank pallet, which will be mounted at the rear of the cargo bay, will boost the total number of tank sets to nine, allowing Columbia to generate 18 kilowatts of electricity, 11 kilowatts of which will be devoted to shuttle operation with the rest available for experiments.

Hudkins said Columbia's new toilet will work like the ones planned for NASA's space station, capable of handling more waste more reliably.

''The one that's on there now has a canister that, through air flow, holds the fecal material and the tissues on the wall of the canister,'' he said. ''The new system is sort of like a trash compactor.''

#90018u1238 01/18/1990 ~United Press International

SYRACUSE, NY (JAN. 18) UPI - Robert Tappan Morris, accused of unleashing a computer ''worm'' that shut down some 6,000 computers nationwide, testified Thursday the program was a ''dismal failure'' but not intended to cause any damage.

Taking the stand in his own defense, Morris said he made a miscalculation in writing the worm program over a three-week period in October 1988.

After letting the worm wriggle loose, the former Cornell University graduate student said he left the school's computer lab and ate dinner. When Morris returned three hours later, he discovered the ''worm'' had replicated out of control and was clogging computer systems.

''It was an experiment. I never heard of anything similar before,'' Morris told the U.S. District Court jury. ''My purpose was to see if I could write a program that would spread as fast as possible.''

If the experiment had worked successfully, Morris said the worm would have spread quietly and undetected over the Arpanet and Internet computer networks.

''It was a dismal failure,'' Morris said.

With the worm freezing computer systems, Morris, a Harvard graduate, said he called a former classmate and the two determined that stopping the program would be impossible. ''I messed up the first worm and I didn't think I would be able to do any better of a job,'' he said.

So Morris did what many a young man in trouble has done. ''I screwed up my courage and called my father,'' he said.

Morris' father, also named Robert, is chief scientist at the top-secret National Security Agency's Computer Security Center in Fort Meade, Md.

''He was not amused,'' Morris said, prompting laughter from his sister in the courtroom. ''My father advised me to come home and not talk to anybody.''

Morris, 24, of Arnold, Md., is the first person to be prosecuted under a portion of the 1986 Computer Fraud and Abuse Act. He was indicted last July on a charge of intentionally introducing a program into a military and research computer network without authorization. If convicted, Morris faces up to five years in prison and a $250,000 fine.

Morris has been suspended from Cornell, where an investigative committee called the worm program a ''juvenile act that ignored the clear potential consequences.''

The program is considered a worm and not technically a computer ''virus'' because it was programmed to move between computers and computer networks. A virus attaches itself to a program and is spread only when the program is shared.

Computers shut down by the program included one at a National Aeronautics and Space Administration facility at Moffett Field, Calif., and the Air Force Logistics Command system at Wright-Patterson Air Force Base in Dayton, Ohio.

#90018u1255 01/18/1990 ~United Press International

(JAN. 18) UPI - Columbia's astronauts are getting ready to come home. But flight director Lee Briscoe said today the weather could delay the shuttle's landing. Briscoe says the possibility of fog tomorrow morning could cause problems at California's Edwards Air Force Base. But he says Saturday looks pretty good.

The flight director also said this morning an investigation is under way into ground errors that briefly put the shuttle in a slow tumble during

the night. Briscoe says NASA is reviewing procedures to understand what happened and to take steps to prevent it from happening again. He says the Columbia crew was NEVER in any danger.

Soviet President Gorbachev said today force has to be used in Armenia and Azerbaijan against extremists, vandals and criminals during what he called fratricidal fighting. Defense Minister Dimitri Yazov says army reservists will be sent to the southern republics... but NOT to fight.

A nation-wide poll indicates American voters are still giving President Bush high marks. Bush received a 78 percent favorability rating from Americans polled. Senate Majority Leader George Mitchell of Maine received a 16 percent approval rating and House Speaker Tom Foley of Washington a 21 percent rating.

A report today says the American Medical Association got back nearly 418-thousand dollars from its former chief operating officer. Whalen Strobhar re-paid what he called an inappropriate re-imbursement to cover stock market losses in his personal pension fund. Strobhar resigned last fall.

VANCOUVER, WA (JAN. 18) UPI - A former newspaper distribution agent has been charged with plotting to kill the circulation manager of The Oregonian, the largest newspaper in Oregon.

Marvin Clapp, 47, Vancouver, Wash., was arrested Wednesday by Portland detectives and Clark County Sheriff's deputies.

Clapp is accused of plotting to kill circulation manager Patrick Marlton, 62, of Portland, and of firebombing his house Jan. 8.

He is charged with one count of criminal solicitation to commit murder and first degree arson. He is also charged with two counts of malicious mischief.

Detective Dave Simpson said Clap was also suspected of organizing a drive-by shooting last Aug. 20 in which someone shot out several windows

in Marlton's home. That same evening, someone fired several shots at the home of Robert Gillard, the newspaper's assistant circulation managaer.

No one was injured but Marlton's home sustained $10,000 damage in the firebombing, Simpson said.

Clapp worked for the Oregonian as an independent distributor until 1982 when the newspaper changed its method of distribution from independent contractors to agencies.

#90018u1280 01/18/1990 ~United Press International
(JAN. 18) UPI - VIDEO REVIEWS:

MOVIES

''Turner & Hooch'' - Tom Hanks plays Scott Turner, a compulsively neat police detective forced to bunk with a drooling junkyard dog named Hooch, who happens to be the only witness to a murder. Talk about your odd couple. The massive mastiff, of course, brings immediate chaos to Turner's structured life, trashing his home, his car, his office, his plans, a sort of canine terminator who eventually helps Turner catch the culprits - a clear case for cops and slobbers. Fast-paced and frequently funny, with another understated comic turn by Hanks that even Hooch cannot upstage. The deadly trail of corruption and conspiracy takes a back seat to the movie's real theme: the pleasures and perils of caring for a pet. If you can see the humongous Hooch as a pet. 1989. 99 minutes. Touchstone Home Video. PG. $89.95.

''New York Stories'' - Life in the big city, as seen in this trio of short stories, is big on fantasy, with a bow now and then in the direction of reality. ''Life Lessons,'' directed by Martin Scorsese, tells of a world-famous, love-sick painter (Nick Nolte) torn between his art and a hopeless romance with his beautiful assistant (Rosanna Arquette). ''Life Without Zoe'', directed by Francis Coppola, recounts the exploits of a poor little rich girl (Heather McComb), a very grown-up 12-year-old trying to reunite her childlike parents (Talia Shire and Giancarlo Giannini). And ''Oedipus Wrecks'', written, directed and starring Woody Allen, is all about a neurotic lawyer trying to escape the smothering influence of his mother who literally hovers over him after a magician's trick goes haywire. Pleasant, lightweight viewing. 1989. 126 minutes. Touchstone Home Video. Rated PG. $89.95.

''Karate Kid III'' - Ralph Macchio is back a third time as karate champion Daniel LaRusso, who wants to retire but is goaded into defending his title against a vicious challenger, over the objections of his dignified and wise mentor, Mr. Miyagi (Noriyuki ''Pat'' Morita). Daniel is unaware he's

actually being set up for a brutal beating in an elaborate revenge scheme by his new instructor (Thomas Ian Griffith), who backed the losers in the previous chapter. The bad guys are almost cartoonish in their fiendish glee which, of course, doesn't last long. All very predictable, a popular series that's now losing its kick. 1989. 111 minutes. RCA/Columbia Pictures Home Video. Rated PG. $89.95.

''See You In The Morning'' - This alluring, bouyant love story tells of two survivors of shattered marriages determined to make it work the second time around - despite a ''musical family'' balancing act that defies the odds. A divorced psychiatrist (Jeff Bridges in a strong performance) marries a young widow (Alice Krige), whose concert pianist husband killed himself. There are the usual problems - each has two children who find accepting a new parent neither easy nor guilt-free. Then, ex-wife Farrah Fawcett, who had opted for the glamorous jet set crowd, comes back on the scene. 1989. 119 minutes. Warner Home Video. Rated PG-13. $89.95.

''Northwest Passage'' - The grand and gritty tale of Rogers' Rangers tromping through an uncharted wilderness to open new territory in Colonial America, taking danger and hardships in stride, driven by a stern taskmaster who kept them both on course and alive. Spencer Tracy stars as the stoic leader with Robert Young and Walter Brennan as a pair of recruits in this 1940 adventure yarn making its home video debut. 126 minutes. MGM-UA Home Video. $29.95.

DOCUMENTARY

''W.C. Fields Straight Up'' covers a lot of ground in this informative and at times touching tribute to the legendary comedian. The Emmy award-winning documentary traces Fields' private and public life through clips from some of his most memorable films (''My Little Chickadee'', ''The Bank Dick'', ''The Dentist'', etc.) and newsreel footage, family photographs and interviews. From Vestron Video, 95 minutes, $59.98.

VIDBITS

Coming attractions: the Kevin Costner baseball fantasy ''Field Of Dreams'' comes to home video on March 8, from MCA ... Two intriguing science fiction movies are on tap for this spring. ''The Abyss'' (CBS/Fox), the best of the recent underwater creature epics, is due March 29 and ''Communion'' (MCEG/Virgin), about a haunting encounter with aliens, hits the market April 4.

NEW CANAAN, CT (JAN. 18) UPI - The projects director of AmeriCares Inc. and her mother, a well-known color photographer and book illustrator, were

killed in a plane crash while vacationing in Costa Rica, officials said Thursday.

Susan Dunn Hanson, 49, and Phoebe Pierson Dunn, 75, were among five Americans killed Monday when a twin-engine plane crashed into a Costa Rican mountain. Eighteen other people died in the crash.

The family was not officially notified of the deaths of the two women until Wednesday night because their passports were not found at the crash site, officials said.

Hanson, a mother of three, had been with AmeriCares, a non-profit private relief agency based in New Canaan, since 1985, beginning as a volunteer and becoming a paid staffer in 1987, said AmeriCares spokesman Dwain Schenck.

The two women were flying from Juan Santamaria Airport in San Jose, Costa Rica's capital, to the small southern town of Palmar Norte when the crash occurred in a rainstorm, officials said.

As projects director for AmeriCares, Hanson had coordinated a number of emergency airlifts for the relief agency, including trips to Jamaica, following Hurricane Gilbert, and also had organized relief efforts for Haiti, Schenck said.

She also had traveled on emergency airlifts of medical supplies and food to disaster areas in Soviet Armenia, Poland and Ecuador.

Dunn became a well-known color photographer during the 1950s with clients that included Campbell Soup Co., Gerber Foods and Hallmark Cards. The Eastman Kodak Co. featured her photographs on a giant color display in New York's Grand Central Terminal, friends said.

JOHANNESBURG, SOUTH AFRICA (JAN. 18) UPI - Seven more people died in clashes between striking and non-striking rail workers, police reported Thursday, and management and union officials agreed to independent mediation to end the increasingly violent 11-week-old pay dispute.

The casualties pushed to 35 the number of strike-related deaths since the walkout began Nov. 2.

Five men were hacked and stabbed to death and two more shot and killed since Tuesday in scattered strike related incidents in black townships east of Cape Town, an official police report on the strike said.

After talks lasting 1 1/2 hours Thursday, both parties agreed to mediation to end the strike, a South Africa Transport Services official said.

Most of the 80,000 black workers employed by SATS earn the minimum wage of $233 per month and are employed on a temporary basis, allowing them to be fired at any time, according to the South African Railway and Harbors Workers Union.

The union has demanded a minimum wage of $584 and secure contracts for its members.

SATS, which has sacked about 23,000 striking workers, used the strike as a pretext to reduce its staff prior to privatization of the company, the union said. Officials say the fate of the dismissed workers is a central issue in resolving the conflict.

BREMEN, WEST GERMANY (JAN. 18) UPI - West Germans are being given a chance to adopt the killer dogs that for years patrolled the death strip along East Germany's borders - because East Germans won't have them.

West Germany's Federation for the Prevention of Cruelty to Animals said West German organization said Thursday no East Germans could be persuaded to adopt any of the 2,500 German shepherds, rottweilers and mongrels once loosed on people trying to escape over the daunting border between the two Germanys.

After the Nov. 9 opening of the border, the dogs suddenly found themselves out of a job and will now ''emigrate'' to West Germany to find new, ''responsible owners'', the federation said.

A West German border official said earlier it might be difficult to find takers for the dogs because of their limited, though highly specialized, training.

He said, ''They have learned nothing but to kill.''

PORTSMOUTH, RI (JAN. 18) UPI - Police stumbled on an interstate ring of vending maching thieves this week when a suspect tried to pay his bail with a sack full of quarters, police said Thursday.

Gregory Rosa, 25, of Dracut, Mass., was arrested Sunday on a warrant accusing him of stealing money from vending machines in Smithfield. After

his arrest, Rosa asked for his backpack so he could pay bail.

Police searched the bag and found $400 in change and keys to vending machines, said Cpl. Manuel Vierra.

Police questioned Rosa for several hours and suspect he is part of a theft ring that has used nearly 200 keys to open vending machines in Rhode Island, Connecticut, Massachusetts and New Hampshire, Vierra said.

Some members of the ring would steal up $1,000 in change in one night, police said. Sometimes they hit the same machine twice in the same week while others ran a regular route and robbed the machines on a schedule, he said.

The thefts started when the ring managed to steal keys from a Coca-Cola bottling plant about two years ago. The thieves built up their key collection with another break-in, Vierra said.

The thieves would stop at outdoor vending machines and try each key until one fit. A certain group of keys often fit most of the machines made by a given company, Vierra said.

Rosa was arraigned Tuesday with Jason N. Perez, 20, of Providence, in Newport District Court. Both were charged with larceny, receiving stolen goods and possession of burglar's tools. They are being held on $25,000 bail at the state prison in Cranston.

#90018u1313 01/18/1990 ~United Press International

MARQUETTE, MI (JAN. 18) UPI - A judge in Marquette District Court is dealing out crewel and unusual punishment to some offenders.

Judge Patricia Micklow has ordered eight misdemeanor offenders to make amends by knitting afghans, booties, scarves, mittens and caps for the poor.

Micklow and court probation officer Mary Mantyla said the program helps the poor and allows people for whom community service is an unrealistic sentence to make restitution.

''It started when I had a woman on crutches - with a handicapped daughter at home - who was sent to me on a non-sufficient funds check charge,'' Mantyla said Wednesday.

Micklow approved the proposal and the bad-check writer was assigned to knitting duties, Mantyla said.

''The next one was a mother of three charged with welfare fraud,'' she said. ''A babysitter ... would have cost her too much to make the community service worthwhile. Knitting, though, made sense.''

Mantyla said she got the idea when a clergyman offered free yarn at his church for anyone wanting to knit clothing for the poor.

NEW YORK (JAN. 18) UPI - Pet lovers are somewhat ... uh, strange ... and a survey of 10,500 of them around the country seems to prove it, USA Weekend reported Thursday.

For example, 91 percent of those answering the poll said they talk baby talk to their pets and buy them holiday gifts.

Seventy-one percent said they carry photos of their pets and 14 percent send them postcards when they're on vacation.

Fifty-seven percent said they talked to their pets on the telephone and 88 percent said they believed their pets understood English.

Ninety-five percent said they believed their pets could read their moods and 36 percent said their pets like to watch television.

The traditional split between cat and dog lovers was right down the middle.

More men, however, leaned toward dogs, as did people over 55, the survey said.

PARIS (JAN. 18) UPI - The six-man international Transantarctica expedition arrived ahead of schedule at the Soviet base of Vostok in the coldest area of Antarctica Thursday, concluding another stage of their 4,000 mile trek across the frozen continent, an organizer said.

''They are very on form and achieved surprising daily averages over the last few days,'' said Bernard Buigues at the Paris headquarters of the explorers.

The six scientists and explorers are Will Steger of the United States, Soviet explorer Viktor Boyarsky, Briton Geoff Sommers, Qin Dahe of China, Keiko Funatsu of Japan and Jean-Louis Etienne of France.

The team and their 30 husky dogs arrived at Vostok at 3:05 p.m. Thursday,

meeting a challenge they set themselves to arrive there from the South Pole 775 miles away by Jan. 20.

During the grueling stage they began at the South Pole Dec. 11, their average travel time was 18 to 21 miles a day, only breaking their journey for two days at a point where an airplane had dropped rations.

After a 36-hour break at Vostok, the six are to set off again for the Soviet base of Mirny 1,085 miles away.

They need to arrive at Mirny by March 10 at the latest before the base is blocked by ice, preventing ships from being able to take them home.

#90018u1330 01/18/1990 ~United Press International

KATMANDU, NEPAL (JAN. 18) UPI - About 7,000 people cheered and clapped Thursday as leaders of a banned political party called for more political freedom and greater respect for human rights from Nepal's monarchy.

K.P. Bhattarai, president of the banned Nepali Congress Party, told the rally at the opening of a three-day party meeting that he would seek the political and human rights reforms sweeping Eastern Europe.

''This will form the main plank of our program until full democracy and unrestricted human rights are restored in Nepal,'' said Bhattarai, leader of the country's largest opposition group.

Political parties have been banned for 29 years in Nepal, which according to its constitution is a constitutional monarchial Hindu state.

The village and town panchayat, recognized as the basic units of democracy elect the district panchayat, which in turn elects the zonal panchayat which picks the 112 members of the national panchayat.

Prime Minister Marich Man Singh Shrestha, speaking Wednesday at a pro-government political meeting, said the partyless system would not be overthrown because ''all have equal opportunities in it.''

But Bhattarai told the rally, ''We have opposed the partyless panchayat system because of its undemocratic character and shall continue to do so until a complete change is brought about.

''In the face of historical contemporary realities of a fundamental change in the world political structure, we cannot simply wait indefinitely,'' he told the cheering audience. ''We must act and act soon.''

Representatives of five Indian political parties including the Janata Dal,

a part of the ruling National Front coalition government, and Rajiv Gandhi's Congress (I) Party attended the rally and said they extended their full support for the mass democracy movement in Nepal.

The government did not try to disrupt the meeting, but it called the participation by Indians an interference in the internal affairs of a neighboring nation.

A spokesman for the Indian Foreign Ministry said the Indian officials attending the meeting, including members of the Prime Minister V.P. Singh's National Front, were there in their private capacities and were not representing the New Delhi government.

''State power cannot suppress democracy forever,'' senior Janata Dal leader Chandra Shekar said in support of the movement. ''Throw away fears from your heart and you will win.''

Bhattarai said the three-day meeting ''will decide the modalities and date of a countrywide peaceful mass movement in cooperation with communists, other democratic groups and personalities.''

The party meeting was held in the relatively small confines of the residence of the Nepali Congress Party's most senior leader, Ganesh Man Singh.

Party sources estimated the crowd at nearly 7,000 people, who cheered and clapped while packed together along walls and on rooftops and trees.

#90018u1347 01/18/1990 ~United Press International

WASHINGTON (JAN. 18) UPI - President Bush lashed out at a Democratic plan to cut Social Security taxes as a ''charade'' Thursday and his spokesman attacked a related proposal as offering the choice between a tax hike and cutting benefits to the elderly.

Bush, speaking during an Oval Office picture-taking session, was adamant in his first public comments on a proposal form Sen. Daniel Moynihan, D-N.Y., to cut the Social Security payroll tax from 6.2 percent to 5.1 percent in 1991.

''This is an effort to get me to try to raise taxes on the American people by the charade of cutting them or cut benefits,'' Bush said, ''and I'm not going to do it for the older people of this country.''

Earlier, White House press secretary Marlin Fitzwater had pounced on a proposal by Sen. Ernest Hollings, D-S.C., to use more than $50 billion a year from a 5 percent sales tax to pay for reductions in both Social

Security and capital gains taxes, as well as a restoration of tax breaks for individual retirement account contributions.

The Hollings proposal was presented Wednesday as White House officials fought to hold the line against the Moynihan plan, that could prove politically alluring in this election year by lessening the tax burden on both wage earners and employers.

Moynihan, who presented the idea last month, said his plan to roll back the rate would cut taxes by $7 billion this year and $55 billion next year.

But Fitzwater, previewing Bush's argument, said the Hollings plan showed Moynihan's proposal to be ''a wolf in sheep's clothing.''

''First we had the tax cut, now we have the tax increase,'' the spokesman said. ''Can cuts in benefits be far behind? Look out, older Americans.''

Later he added, ''It's been clear from the beginning that if you cut the Social Security taxes, at some point you've got to raise taxes to get the money back or you've got to cut benefits.

''We don't want to be associated with either one of those outcomes. ... We think that when people have to look at the tax increase and benefit cut implications down the road ... it won't enjoy much support.''

Asked how he planned to make up for the $55 billion in lost revenue, Moynihan said through new taxes or cuts in spending but declined to be more specific.

Moynihan said the tax cut would put Social Security back on a pay-as-you-go basis and prevent the administration and Congress from using the Social Security surplus to mask the true size of the budget deficit.

Hollings said his proposed 5 percent ''value-added tax'' would raise $53 billion annually.

A value-added tax, or VAT, is an indirect sales tax on goods and services paid at each stage of production or distribution. While the tax technically is paid to the government at each step, the total cost typically is passed on to the final consumer.

Hollings said Moynihan's proposal ''is right - but only as a first step to tax adjustment,'' adding that it failed to provide additional revenues to balance the loss.

The Hollings package also would include tax credits for research and investment and additional money for education.

#90018u1388 01/18/1990 ~United Press International
PRAGUE, CZECHOSLOVAKIA (JAN. 18) UPI - Prime Minister Marian Calfa resigned from the communist party Thursday thus becoming the first non-communist head of government in Czechoslovakia in 41 years, the official CTK news agency said.

Calfa, who announced his decision at a news conference, was the third communist member of the Cabinet to quit the party in less than two weeks. Only seven communists now remain in the 21-member Cabinet.

CTK said in a one-sentence dispatch Calfa ''has ended his membership in the communist party, according to information given here today to journalists at a regular press conference at the government presidum office.''

No explanation for the move was given.

Calfa's resignation was seen as yet another blow to the prestige of the once all-powerful communist party. More than 200,000 of its 1.7 million members have quit the party since the former hard-line leadership was swept from power by massive pro-democracy demonstrations in November.

In addtition to Calfa, two other top communists have resigned from the party this month: Deputy Prime Minister Valtr Komarek, the chief economic officer in the Cabinet, and Vladimir Dlouhy, chairman of the state planning committee.

Calfa was sworn in as prime minister Dec. 11 along with a 21-member Cabinet that was dominated by non-communists for the first time in more than 41 years.

His resignation from the party makes him the first non-communist prime minister in Czechoslovakia since the communist party took power in 1948.

Czechoslovakia now joins Poland and Romania as the only East Bloc countries with a non-communist head of government. Hungary's Prime Minister Miklos Nemeth is a member of the Hungarian Socialist Party, a revamped version of the old communist party.

Czechoslovak President Vaclav Havel, the former dissident playwright who was elected Dec. 29 as the first non-communist president in 41 years, holds the mostly symbolic position of head of state.

Calfa, 43, was named deputy prime minister in a commnist-dominated Cabinet that was appointed Dec. 3 in the wake of the mass protests that swept away hard-line communist leader Milos Jakes. He was designated prime minister a

week later and asked to form a new Cabinet in response to demands by pro-democracy groups for a greater voice in the government.

(JAN. 18) UPI - President Bush made a long-distance phone call this morning to the crew of the shuttle Columbia. Bush praised their successful 10-day mission to launch a communications satellite and pluck another from orbit before it fell to Earth. Bush, a Navy pilot during World War Two... asked the shuttle commander... ''Can you use a 65-year-old Navy pilot up there?''

Labor Department figures indicate that inflation ran at four-point-six percent last year... the largest hike since 1981. Officials cite higher food costs pushing consumer prices up four-tenths of one percent in December to round out the 1989 figures. The consumer price index tracks the cost of a hypothetical basket of consumer goods.

The Commerce Department says privately owned housing starts dropped eight percent in December. Officials say all U-S regions experienced great losses except the West. The department's Census Bureau says housing starts fell to one-Million 370-thousand in 1989... down from one-Million 490-thousand in 1988. The 1989 figure is the lowest since the one-Million 60-thousand figure in 1982.

Japanese authorities say a suspected right-wing extremist shot and seriously wounded the mayor of Nagasaki today. Authorities say 67-year-old Mayor Mitoshi Motoshima was shot through the back as he walked to his official car outside Nagasaki's City Hall. Police are searching for the assailant, who may have been angered by the mayor's criticism of the late Emperor Hirohito.

#90018u1412 01/18/1990 ~United Press International

WASHINGTON (JAN. 18) UPI - A peace offer by Colombian drug traffickers indicates that country is close to ''total victory'' in its battle with the drug cartels, the Colombian ambassador told a Senate Committee Thursday.

But the ambassador, along with representatives of Bolivia and Peru, said economic assistance and cooperation by the United States and other nations is necessary to maintain the anti-drug effort.

The apparent peace offer came Wednesday from a group linked to the powerful Medellin Cartel, known as the Extraditables, who offered to halt a terrorist campaign of assassinations, bombings and kidnappings as well as cocaine trafficking.

The administration of President Virgilio Barco reacted cautiously to the conditional surrender, calling on the drug traffickers to turn themselves in to face justice.

At a hearing by the Senate Judiciary Committee, Colombian Ambassador Victor Mosquera-Chaux said his government has indicated ''that it will not negotiate with the traffickers,'' and they can expect to be prosecuted.

''Even though I don't think that the war has been won yet I think the Colombian government is very close to obtaining a total victory,'' he told the committee. ''Otherwise, this change in the attitude of the Extraditables would be very hard to explain.''

But Mosquera-Chaux stressed the need for concrete actions by the

traffickers to demonstrate they are sincere.

Sen. Joe Biden, D-Del., committee chairman, said he was ''highly skeptical'' of the offer and praised the Andean countries and their officials for their ''great efforts'' and taking ''personal risks'' in the battle against the cocaine cartels.

Biden also questioned Mosquera-Chaux about the administration's recent decision to cancel plans for deployment of U.S. warships near South America, where they were to join the drug interdiction effort. The plan was reversed after protests in Latin America.

Mosquera-Chaux said that as far as he knew ''there were no formal consultations with my government'' concerning the deployment plan.

He noted that ''prior to the supposed deployment of the vessels there were a lot of declarations regarding that action on the part of various officials from the American administration. ... The declarations were somewhat conflicting and they added confusion to the situation.''

Because of language differences, the administration's intentions may have been misunderstood by the news media in South American who ''made a big deal out of the situation,'' he said.

In their testimony to the committee, the three ambassadors praised a plan unveiled recently by Biden that calls for the canceling of some of the international debt owed by Latin American countries in exchange for their efforts to eliminate the drug trade.

Bolivian Ambassador Jorge Crespo-Velasco said the plan ''complements the position of our government, in the sense that producing countries need more economic resources'' to develop other economic activities in place of cocaine production.

Mosquera Chaux said his government's expenditures for the drug war combined with a sharp decline in coffee prices ''has generated a signficant downturn in our economy.''

Peruvian Ambassador Cesar Atala-Nazal, responding to a question from Biden said he hopes Peruvian President Garcia will agree to attend the Andean drug summit next month. Peru dropped out of the planned meeting in protest of the U.S. invasion of Panama.

Atala-Nazal told Biden, ''I certainly hope so, but I cannot assure you that this will be the case. I think it will depend mostly on what the American military authorities will decide in the coming weeks.''

#90018u1448 01/18/1990 ~United Press International
BANGKOK, THAILAND (JAN. 18) UPI - Thailand is ready to begin helping Vietnam economically as tension eases over the Cambodian conflict, a Thai foreign ministry spokesman said Thursday.

''We are ready to assist them in economic reforms. We have a wide range of technology to develop their country,'' spokesman Surapong Chaiyanam said.

Surapong said relations between Thailand and Vietnam have improved since Vietnam announced the withdrawal of its last troops from Cambodia and accepted a major role for the United Nations in settling the conflict.

''We will stop isolating them because they have shown their efforts in trying to solve the conflict,'' he said.

He said Japan and the United States also should end their embargo of Vietnam and help rebuild the Vietnamese economy.

The spokesman said Hanoi is no longer dependent on development aid from its allies in the Soviet bloc.

''East Europe has rejected communist rule while the Soviet Union is confronted with economic recession,'' he said.

''Vietnam must provide more incentive - like its efforts on the Cambodian conflict - to get the West and Japan to provide economic assistance,'' he said. ''This is the only one way for Vietnam to upgrade the standard of living of its people.''

Vietnam has been isolated by the West and Japan, as well as the six

members of the Association of Southeast Asian Nations - Thailand, Malaysia Singapore, Indonesia, the Philippines and Brunei - since its 1978 invasion of Cambodia.

Earlier a group of 90 members of the Thai Parliament met Foreign Minister Siddhi Savetsila to urge an end to Thai assistance to the Khmer Rouge, the largest and most notorious of the three resistance factions fighting the Vietnamese-installed government in Cambodia.

The politicians, including many from parties in the government, called on the government to end years of providing sanctuary to the resistance and allowing them to receive military supplies provided by China.

The politicians also plan to send a letter to Prime Minister Chatichai Choonhavan urging him to change the long-standing but routinely denied policy. Chatichai has already indicated he favors reduced assistance to the resistance, but this has been opposed by the military and the foreign ministry, government sources said.

The move was an unusual display of interest in foreign affairs by members of Parliament who generally follow the government's lead.

#90018u1456 01/18/1990 ~United Press International

(JAN. 18) UPI - TODAY'S PEOPLE:

BILLIONAIRE WALTON GETTING TREATMENT: Billionaire retailer Sam Walton is undergoing chemotherapy and radiation treatment as an out-patient in Houston for a cancerous bone disease. Walton, 71, the Bentonville, Ark., resident whose empire includes the Wal-Mart and Sam's Wholesale Club stores, confirmed the disease in a memo to company associates but Wal-Mart officials say doctors are encouraged by the early detection and treatment and are expecting a full recovery. Walton, who was declared to be the nation's richest man in 1985 and 1986, also had a bout with leukemia in 1982 and he says that's in remission.

CARLIN THROWS DICE: Comedian George Carlin, whose routine about the seven words you can't say on television made him highly controversial in the 1960s, doesn't think much of the foul-mouthed Andrew ''Dice'' Clay, the current comedic bad boy. ''His acts are hardly comedy shows,'' Carlin told The Washington Times. ''There's very little wit. They're like fascist rallies. They're celebrations for people who perceive themselves to be disenfranchised.''

RATING MEN: The February issue of Mademoiselle magazine offers women a few tips on how to tell the difference between Mr. Right and Mr. Right for Now. The keys are manners, communication skills, helping with housework,

attitude toward kids and personal appearance and the magazine offers Michael J. Fox, David Byrne, Tom Cruise (who, nonetheless, is splitting with wife Mimi Rogers), Prince Andrew, Jeff Bridges, John F. Kennedy Jr., Tom Hanks and Jeff Goldblum as examples of ''men who'll wear well.'' On the other hand, the ''men who'll wear out'' include Sean Penn, Eddie Murphy, Emilio Estevez, Judd Nelson, Jay McInerney, Bruce Willis, Ken Olin and Johnny Depp. The magazine also has a ''good men who went bad'' category for Elvis Presley, Marlon Brando, Bryant Gumbel, Jim Bakker, Jackie Mason, Dan Rather, Bill Cosby and David Letterman and a ''good men who stayed good'' class for Paul Newman, Woody Allen, Robert Redford, Gregory Peck, Walter Cronkite, George Burns, Sean Connery, Mikhail Baryshnikov.

ROLLING VIDEO: The Rolling Stones' video biography, ''25 x 5,'' features film shot on their recent ''Steel Wheels'' tour as well as footage going as far back as their appearances on ''Shindig,'' ''The Ed Sullivan Show'' and ''Hollywood Palace.'' The 40-song tape is more than two hours long and also includes interviews and footage shot in the studio, at news conference, during business meetings. The tape was put together by ''Saturday Night Live'' chief Lorne Michaels and will be released Feb. 13.

INSTRUMENTAL NAMES IN ROCK: Virtually anyone who plays the piano knows the name Steinway but they don't know Henry Steinway. Virtually every singer knows of Shure microphones, but not the founder of Shure Bros., S.N. Shure. The same goes for electronic keyboards and Harold Rhodes and Hartley Peavey on electronic amplifiers. On Wednesday, a measure was taken to rectify that situation as all four big names were immortalized with handprints in cement along Hollywood's Rock Walk.

AUSTIN'S WRECK SUIT: Tennis pro Tracy Austin has served a legal suit because of an auto accident in Short Hills, N.J., that she says has derailed her comeback attempt. She is seeking unspecified damages from the Boss Glass Co. of Victory, N.J., and Steven Reynolls, the driver of a Boss Glass van that collided with Austin's car as she left a hotel parking lot. The suit says Austin, 26, suffered a broken leg in the crash and has undergone a bone graft in an attempt to repair it. ''She suffered a broken right leg and is still recuperating and undergoing therapy in California '' said her lawyer, William O'Day. ''We don't know yet if this was a career-ending injury.''

#90018u1461 01/18/1990 ~United Press International

WASHINGTON (JAN. 18) UPI - Sixteen years after New Hampshire Yankee first applied for a permit to build Seabrook Station, permission to operate the controversial nuclear plant at full power could come by early next month, the Nuclear Regulatory Commission chairman said Thursday.

NRC Chairman Kenneth Carr said he believes the commission can make its decision, including resolving all contested issues before the commission, within two to three weeks. A green light for Seabrook would mean the commission has determined the plant can be operated effectively and safely regardless of the outcome of pending matters elsewhere, including before the U.S. Court of Appeals.

NRC staff and top officials of New Hampshire Yankee told the commissioners during a 2 1/2 hour hearing that Seabrook deserves a full-power operating license. But opponents argued that because of alleged construction defects and operational problems, a licensing decision should be postponed until all appeals are exhausted and an independent investigation has been completed.

''We are ready to safely operate Seabrook Station,'' said Edward Brown, president and chief executive officer of New Hampshire Yankee.

Thomas Murley, NRC's director of nuclear reactor regulation, echoed the utility's optimism and contended emergency evacuation plans for New Hampshire and neighboring Massachusetts communities - which are highly contested by opponents - are adequate.

''The staff concludes that the overall state of on-site and off-site emergency perparedness provides reasonable assurance that adequate protective measures can and will be taken in the event of a radiological emergency at Seabrook,'' Murley said. ''There is reasonable assurance the plant can and will be operated without endangering the health and safety of the public.''

But Diane Curran of the New England Coalition on Nuclear Pollution contended the NRC is inappropriately placing its licensing decision on the ''fast track.''

Curran, John Traficonte of the Massachusetts attorney general's office, and Robert Backus of the Seacoast Anti-Pollution League, pleaded for the commission to postpone its decision until all contested issues are resolved.

The three noted a recent Employees Legal Project study of the plant, which included allegations by former and current employees of construction and design defects, operator problems and falsification of documents.

They also told the commissioners of a transcript of conversations between control room operators and maintenance personnel at Seabrook that suggest incompetence and equipment malfunctions.

However, Murley said most of the allegations have been reviewed and ''we did not conclude there was an evasive quality asurance breakdown.''

#90018u1464 01/18/1990 ~United Press International
VATICAN CITY (JAN. 18) UPI - Pope John Paul II warned Vatican lawyers Thursday that they must not show ''mistaken compassion that falls into sentimentality'' in judging cases of Catholics who ask the church to annul their marriages.

''A valid marriage, even if marked by serious difficulties, could not be considered invalid without violating the truth and thus undermining the only solid foundation on which personal, conjugal and social life can be based,'' the pope said.

''Therefore the judge must always guard himself against the risk of a mistaken compassion that falls into sentimentality,'' he said. ''Ways that detach themselves from justice and truth end up by contributing to distancing the person from God, thus obtaining the opposite result to that which was being sought in good faith.''

The pope was addressing an annual audience for officials and lawyers of the Sacred Roman Rota, the Vatican appeals court that gives a final ruling on marriage annulment requests by Roman Catholics.

A Catholic marriage can be annulled only if the petitioner can convince the Vatican court that it was never valid.

The pope said church authorities ''on the one hand take note of the great difficulties affecting people and families involved in situations of unhappy conjugal coexistence and recognize their right to be the object of particular pastoral concern.

''But on the other hand, we must not forget the right which they also have not to be led astray by a sentence of nullity which is in contrast with the existence of a true matrimony,'' the pope said.

''Such an unjust declaration of matrimonial nullity would find no legitimate justification in the recourse to charity and mercy, which cannot neglect the demands of truth.''

He said the defense of a valid marriage ''represents the safeguarding of an irrevocable gift of God to the married couple, to their children, to the church and to civil society.''

The pope reminded the lawyers that Canon Law requires them, before accepting a nullity application, to do everything possible to bring about a reconcilation of the petitioning couple.

#90018u1473 01/18/1990 ~United Press International
JERUSALEM (JAN. 18) UPI - Prime Minister Yitzhak Shamir said Thursday he is ready to meet with the leaders of Syria and Iraq - Arab nations that pose the greatest military threat to Israel - but not with the Palestine Liberation Organization.

In a meeting with Sen. Arlen Specter, R-Pa., Shamir said such talks could influence the atmosphere of the entire Middle East.

''I am ready to meet and discuss with any one of the Arab representatives, with the president of Syria, Hafiz Assad, and the president of Iraq, Saddam Hussein, but not with Yassir Arafat,'' he said.

Shamir's comments came as Syria, which resumed diplomatic ties with Egypt last month after a decade of hostility, has begun to moderate its stance toward the peace process. An Egyptian Foreign Ministry source said Syria had drifted from the Arab mainstream and feared being isolated.

''Syria cannot stand in the way of current Middle East peace efforts because it needs to avoid becoming isolated at a time when the Arab world is moving closer together,'' the source said. ''Syria alone cannot stand in the way of the changes that are sweeping the world. They themselves have admitted this.''

Also, PLO Chairman Arafat has launched an effort to improve ties with Syrian President Hafez Assad, a long-time supporter of radical Palestinian groups opposed to Arafat.

Arafat, in remarks published in the Cairo weekly magazine Al Mussawar, said Damascus should release Palestinian prisoners, stop interfering in the PLO's internal affairs and acknowledge past PLO decisions, such as its renunciation of terrorism and its recognition of Israel's right to exist.

Assad led the Arab boycott of Egypt after Sadat signed a peace treaty with Israel in 1979. But Assad restored ties with Egypt under President Hosni Mubarak, even though Mubarak still adheres to the only peace treaty signed between an Arab country and Israel.

Despite increasing contacts between Israelis and PLO members, Shamir refuses to consider any dialogue with the group, which he considers a terrorist organization dedicated to destroying Israel. The right-wing prime minister's refusal to negotiate with anyone directly associated with the PLO is considered one of the major obstacles in advancing the Middle East peace process.

A spirited controversy erupted in Israel Thursday following publication of

remarks by Rabbi Baba Baruch, a member of the right-wing Orthodox Agudat Israel party, who said he favored talks with Arafat.

''Israeli officials frighten people away from meeting with the PLO,'' Baruch was quoted as saying. ''They represent Arafat as Satan and claim a meeting with him is dangerous and no one should even get close to him to talk about peace. This is a mistake.''

Parliament member Avraham Vertinger of Shamir's right-wing Likud Party denounced the remarks as unacceptable.

''I think it is a mistake and a mistake that it came out of his mouth. He had no right to talk that way,'' Vertinger said.

During their meeting, Shamir and Spector also discussed a proposal by Robert Dole, Senate Republican leader from Kansas, to reduce U.S. aid to Israel and other countries to free funds for Panama and Eastern Europe. Shamir said the idea was unrealistic.

''We want to be independent from an economic standpoint and to live without being dependent on foreign aid,'' he said, ''but we arrive at the fact that we now have a great wave of (Soviet) immigration and need the resources to take care of it.''

#90018u1474 01/18/1990 ~United Press International

WASHINGTON (JAN. 18) UPI - President Bush, allegedly more pragmatic in his abortion views than Ronald Reagan, has let the issue become a ''litmus test'' on much of his domestic political agenda, People for the American Way said Thursday.

''Ironically, while Ronald Reagan was considered doctrinaire and Bush pragmatic, abortion has had an even greater impact in Bush's White House than in Reagan's, driving decisions on issues only remotely related,'' the group said in a 38-page report assessing the impact of abortion on the first year of the Bush presidency.

''The president's willingness to let abortion dictate so much of his agenda has created a 'litmus-test' presidency,'' the report added.

People for the American Way's analysis came as Bush was about to end his first year in the White House and as the Republican National Committee met wrestled with and finally side-stepped the issue.

Supporters of legal abortion, energized by the Supreme Court decision in July giving states more latitude in restricting abortion, have won a series of political victories that have prompted moderates in the

Republican Party to press for a more inclusive GOP stance on the issue.

''One year into the Bush era,'' the People for the American Way analysis said, ''abortion has proved to be a pivotal issue for this administration.''

It charged that Bush has allowed the ''far right'' of the party to use abortion as a wedge into a broad range of issues, including the battle against AIDS, allowed anti-abortion activists to control appointments to a host of top administration jobs in the domestic policy area and prompted four Bush vetoes, including one in which no federal money would have been used for abortions.

''The consequences of these acts are clear and far-reaching,'' the report said. ''These incidents indicate not so much a secret 'conspiracy' by the Right to wield power disproportionate to its numbers but rather a case of the administration bending to extremist pressures for the sake of political expediency.

''By placating the right on this and other social issues, the White House has - at least for now - silenced a restive, possibly divisive faction within its party.''

It cited the fight over the nomination of Dr. Louis Sullivan to be head of the Department of Health and Human Services as the first of the abortion battles in the White House and noted the appointments of Kay James of the National Right to Life Committee, former Office of Personnel Management head Constance Horner and Dr. James Mason of the Centers for Disease Control as HHS appointments aimed at placating abortion opponents.

According to the report, the White House also allowed outside pressure groups, such as the National Right to Life Committee, to interview and pass on candidates nominated for administration posts. It cited Sullivan's choice of Robert Fulton to lead the Family support Administration and former Rep. Caldwell Butler, R-Va., to head the Legal Services Corporation. Both were abandoned by the Bush administration after failing to pass muster with the outside groups.

The report also said the anti-abortion activists at HHS undermined a crucial AIDS education effort by blocking distribution of a brochure on condom use because it did not agree with their views on monogamy, stopped a survey on sexual activity to be used in planning AIDS prevention programs and forced Sullivan to disavow recommendations in an HHS report on youth and suicide.

#90018u1498 01/18/1990 ~United Press International

BUCHAREST, ROMANIA (JAN. 18) UPI - Romania's interim government Thursday took the risk of angering a population newly freed from an oppressive dictatorship and cancelled a referendum on two key issues.

''For the time being we are not in a position to have a referendum, for the very simple reason that it requires a lot of preparation,'' said Silviu Brocan, a member of the 11-member ruling executive committee. ''We are finding it difficult already to have a general election.''

The ruling National Salvation Front's 125-member council voted 108-0, with four abstentions and 13 absentees, to cancel the Jan. 28 referendum and, instead of allowing the people to decide, ruled that the death penalty would not be reinstated and the Communist Party would not be banned.

The Front braced for an assault from citizens angered by the second time the linterim government reversed a major decision in less than a week.

The Front took power after a pro-democracy revolt, which the government said cost 10,000 lives, that ousted ruler Nicolae Ceausescu on Dec. 22. Ceausescu and his wife, Elena, were executed Christmas Day.

The provisional government is also considering delaying elections scheduled for April because of complaints from fledgling political parties that they do not have time to organize and campaign.

Spokesman Brocan said the final decision on the elections depeonds on round-table discussions with the half-dozen political parties born since Ceausescu's death.

The new government has already acknowledged erring when it bowed to pressure from a mob last week and hastily issued a decree outlawing the Communist Party. Less than 24 hours later it rescinded the order and said the matter, along with the death penalty, would be put to referendum.

''The referendum will not take place,'' Brocan said Thursday. ''It was a political mistake and abdication of the principles governing the National Salvation Front.''

Asked how Romanians could trust a government that reneged on a promise to give them a say on their future, Brocan said: ''The Romanian people deserve a democracy and we are learning to govern democratically.

''We are learning the hard way. We are learning by making mistakes. We hope we won't make too big ones,'' he said.

''Two decisions of January 12 made under pressure with regard to the death penalty and to the outlawing of the Communist Party have been cancelled,'' Brocan said.

Brocan said future decrees would be final only after consultation with the full National Salvation Front council.

He also said the execution of the Ceausescus was ''fully justified'' and guaranteed severe punishment for the former ruler's main associates and leaders of the secret police if found guilty.

Those convicted should be sent to ''labor for life,'' he said.

''The (Communist) party has excluded itself from the political life of the country,'' Brocan said. ''The Romanian Communist Party no longer exists'' because it does not represent what the people want.

He said people who held high positions with the party and state should be removed from their jobs after due consideration of their qualifications and character.

The provisional government Wednesday determined that all leaders would be restricted to two terms in office. However, Brocan did not specify the length of those terms. He also said there was a preliminary decision to create a Parliament of a senate and deputies but that details need to be worked out.

''The business of the Communist Party was business,'' Brocan said of the wealth accumlated by those in power.

The former regime collected $220 million from industrial exports annually, he said, and also had 40,000 tons of meat, 20,000 tons of milk and 40 million eggs in storage. The Ceausescus alone had 21 palaces, 31 villas and 20 hunting chalets, he said, all of which would become the property of the people and the state.

#90018u1502 01/18/1990 ~United Press International

NEW YORK (JAN. 18) UPI - American Telephone & Telegraph Co. said Thursday it wants to give a Valentine's Day cut-rate present to customers inconvenienced by Monday's long-distance snafu and is asking the Federal Communications Commission to permit it.

Monday's breakdown in AT&T lines blocked about half of 100 million long-distance calls in the system for almost nine hours.

AT&T said the foulup was pinpointed in the signaling system that triggered a traffic jam in the national network.

The company said Thursday it was asking the FCC to allow it to offer

residential, business and international customers special holiday discounts on Feb. 14.

''We are making this gesture to underscore how much we value our relationship with our customers, knowing there is no way to make up for the inconvenience they may have experienced,'' said AT&T Chairman Robert Allen.

According to the plan, the special holiday prices would be discounted an average of 33 percent from regular weekday prices. They would apply on all out-of-state direct-dialed long-distance calls made by business and home phones on AT&T's public network.

The economy rate would also apply to all direct-dialed international calls.

Officials said a 10-minute direct-dialed call across the country between 8 a.m. and 5 p.m. on Valentine's Day would cost $1.58, as compared with normal weekday prices of $2.50

On international calls, the economy rate would apply all day for calls to all 158 countries and areas that call be dialed directly through the company's network.

For example, a five-minute direct-dialed call from anywhere in the mainland United States to Japan would cost $5.40, compared with the $8.01 rate charged in the prime time of 2 p.m. to 8 p.m.

In addition, evening rates would apply to all other out-of-state directly dialed business services except those that do not have discount schedules based on the time of day, such as 900 line and some 700 line services.

AT&T said 800 line customers affected by Monday's failure would be eligible to recieve a credit on their bills up to the monthly service charge.

#90018u1513 01/18/1990 ~United Press International

EUREKA, CA (JAN. 18) UPI - The second sharp earthquake in three days cracked windows and woke some startled residents along California's rugged far north coast Thursday but there no reports of injuries or major damage.

U.S. Geological Survey seismologists at the National Earthquake Information Center in Golden, Colo., set the magnitude of the quake at 5.1 on the Richter scale. A spokeswoman said the 3:45 a.m. PST quake was centered 34 miles northeast of Eureka along one of several faults in a seismically active area.

''I could hear it shaking the house a little bit'' and some picture frames on a table began to rattle, said Karen Babcock, a California Highway Patrol dispatcher who was already awake in her Eureka home when the quake struck.

''All of a sudden, it gave a big hard jolt and woke everyone else in the house,'' she said.

Police and sheriff's offices in Humboldt and Del Norte counties said they received several calls from concerned residents who felt the quake. But they said there were no reports of damage or injuries in the sparsely populated wilderness and logging region.

Residents in northern Humboldt County reported cracked windows, fallen groceries and swinging plants, Linda Nellist of the county Office of Emergency Services said.

The USGS said seismologists had not determined whether the latest temblor was related to a 5.3 quake on the nearby San Andreas Fault that shook the same area Tuesday.

Tuesday's 12:08 p.m. quake was centered about 40 miles south-southwest of Eureka and did not cause major damage, although it tumbled groceries from shelves in Petrolia, gently swayed buildings in Eureka and caused scattered minor rock slides.

It was unrelated to the 7.1 major quake on Oct. 17 that killed 67 people, injured more than 3,000 people and caused at least $5 billion in damage, mostly in the San Francisco Bay area and Monterey County.

Hundreds of small earthquakes are recorded on the north coast each year.

#90018u1529 01/18/1990 ~United Press International

WASHINGTON (JAN. 18) UPI - Defense Secretary Dick Cheney will not issue a timetable for the withdrawal of U.S. forces from Panama as earlier promised because he ''doesn't see a great deal of wisdom'' in doing so, a spokesman said Thursday.

Nearly one month after the Dec. 20 invasion of Panama, U.S. forces totalling 18,900 remain in the country for ''internal security and nation-building'' purposes, Pentagon spokesman Pete Williams said.

Up to 13,000 of those American troops are permanently stationed in Panama, but Williams said he did not know when the others would be brought home. At the height of the action, some 27,000 U.S. troops were in Panama.

Cheney promised in television interviews following the Jan. 3 surrender of Panamanian Gen. Manuel Noriega that he would issue a timetable ''in a few days'' for the withdrawal of the invasion forces ''within a few weeks.''

Asked at a Pentagon briefing about Cheney's failure to produce a timetable Williams said, ''What he promised is to have a timeline. He has since thought differently about that subject and doesn't see a great deal of wisdom in giving a timeline.

''I have not seen any indication that there's some sort of problem (in Panama) that we didn't anticipate or anything like that. Obviously we want to get the forces out as soon as we can.''

On Wednesday, President Bush said he hoped to draw down the U.S. force ''as soon as possible,'' but gave no details.

Peru's President Alan Garcia has said he will not attend an anti-drug strategy summit on Feb. 15 in Colombia with Bush and the leaders of Colombia and Bolivia as long as U.S. invasion forces remain in Panama.

While Bush told reporters he could not say when U.S. troops would come home, he said their withdrawal is ''not driven'' by the planned summit in Cartagena.

Williams said Cheney had discussed the issue of a withdrawal timetable with Army Gen. Colin Powell, chairman of the Joint Chiefs of Staff.

''Both he and General Powell agree that, first of all, we don't discuss future operations in that kind of detail, we just never do. And secondly, it's just not the kind of thing you do is to set out, (that) on this day you do such and such a thing,'' Williams said.

''You don't want to commit yourself ahead before you know precisely what it's going to be like before you get to that date,'' Williams said.

#90018u1545 01/18/1990 ~United Press International

LOS ANGELES (JAN. 18) UPI - The following is a chronology of key events in the McMartin Pre-School child molestation trial, the longest, costliest criminal trial in U.S. history:

-Aug. 12, 1983: The case begins as a woman with a history of mental illness reports to Manhattan Beach police that she believes her 2 1/2-year-old son has been molested at the Virginia McMartin Pre-School.

-Aug. 17, 1983: Manhattan Beach police launch what becomes massive investigation into molestation allegations at pre-school.

-Sept. 7, 1983: Pre-school teacher Raymond Buckey is arrested on suspicion of child molestation. No formal charges are filed against him at this time and he is released two days later.

-Sept. 8, 1983: Manhattan Beach police send controversial letters to parents of children attending the pre-school, informing them they are looking into allegations that their children may have been molested.

-Oct. 17, 1983: The Los Angeles County District Attorney's Office, under the direction of District Attorney Robert Philibosian, asks the Children's Institute International in Los Angeles to interview children who attended the pre-school about the molestation allegations. A total of 250 youngsters are eventually interviewed.

-January, 1984: Amid molestation allegations, the State Department of Social Services suspends the pre-school's license and the nursery closes.

-March 22, 1984: Seven teachers at the school are indicted by the Los Angeles County grand jury on charges they molested dozens of their pupils. All seven, including Raymond Buckey, his mother, Peggy McMartin Buckey, his sister, Peggy Ann Buckey and his grandmother, Virginia McMartin, are arrested in what is the largest molestation case in U.S. history.

-March 28, 1984: Prosecutors accuse the defendants of taking millions of sexually explicit photos of naked children playing games such as ''Naked Movie Star.'' Not one such photo is ever found.

-Aug. 17, 1984: A preliminary hearing begins for all seven defendants. Fourteen children eventually testify that they were molested and forced to participate in bizarre satanic rituals and sex games.

-Jan. 9, 1986: The 18-month $4 million hearing concludes with judge determining there is sufficient evidence to order all seven defendants to stand trial in Superior Court.

-Jan. 17, 1986: Philibosian's successor as district attorney, Ira Reiner, dismisses charges against five of the defendants, saying the evidence against them is ''incredibly weak.'' The only defendants remaining to stand trial are Raymond Buckey and his mother.

-Nov. 2, 1986: Raymond Buckey, in his first public interview since being indicted, tells ''60 Minutes'' that his life has been ruined by authorities who filed false charges against him.

-December 1986: The woman who sparked the case by claiming her son was molested by Raymond Buckey is found dead in her Manhatten Beach residence of a liver disease common to alcoholics.

-April 20, 1987: After numerous delays, the Buckeys' trial on 99 counts of child molestation and one count of conspiracy begins with jury selection.

-Aug. 3, 1987: First child witness testifies that Raymond Buckey and his mother molested her at the pre-school. Eight other children eventually testify that they too were molested at the pre-school.

-Sept. 28, 1987: Jailhouse informant George Freeman, an admitted perjurer, testifies that Raymond Buckey, while in jail, admitted to him molesting children.

-Oct. 12, 1988: Prosecutors drop an additional 27 molestation charges against Buckey and eight against his mother.

-Oct. 18, 1988: Prosecutors rest their case.

-Feb. 15, 1989: After spending nearly five years in county jail, Raymond Buckey is released on a $3 million property bond.

-April 23, 1989: McMartin trial, three days into its third year, becomes longest and costliest criminal trial in U.S. history.

-May 16, 1989: Peggy McMartin Buckey testifies she never molested any children.

-July 25, 1989: Raymond Buckey testifies that he never molested any children.

-Aug. 23, 1989: The defense rests its case.

-Oct. 4, 1989: Prosecutors rest their rebuttal case. In all, both sides have presented 124 witnesses, 74 for the prosecution and 50 for the defense.

-Oct. 12, 1989: Lengthy closing arguments begin.

-Nov. 2, 1989: Jury deliberations begin.

-Jan. 18, 1990: The Buckeys are acquitted of 52 counts. A mistrial is declared on 13 other counts, including a conspiracy charge, because of a deadlocked jury.

#90018u1599 01/18/1990 ~United Press International

LOS ANGELES (JAN. 18) UPI - The jury hearing the nation's longest criminal trial, the McMartin Pre-School child molestation case, declared in a stunning verdict Thursday that the two defendants were innocent of all 52 charges remaining against them.

Raymond Buckey, 31, and his mother, Peggy McMartin Buckey, 63, were found innocent of the charges by a Superior Court jury of eight men and four women that deliberated 36 days after sitting through the nearly three-year trial.

Ray Buckey was additionally charged with one count of conspiracy and 51 other counts of child molestation. His mother was also charged with one count of conspiracy and 11 counts of child molestation.

An audible gasp arose in the courtroom when the verdict was read. Raymond Buckey wept openly and was led out of the courtroom through a back door. Peggy McMartin Buckey listened stoically.

In the hallway outside, where parents of children who had attended the school had gathered, there were more tears as disbelieving mothers and fathers clutched at each other for support.

''I'm very distraught,'' said parent Alan Lagunoff. ''I think we'll see that all of us are distraught. I don't know what this is going to do to my son (who was 2 years old when he attended the school). ... It's going to be very detrimental.''

''I think the jury's wrong,'' Lagunoff said, blaming the prosecution. ''So many mistakes were made in this case.''

Two of the children the Buckeys were alleged to have molested were those of John Cioffi, who also blamed the prosecution for the verdicts.

''The system doesn't allow us to protect kids,'' he said outside court. ''I have no doubt these children were abused.''

''(It's) just a tremendous disappoinment ...''

Cioffi said the ''bottom line'' was that the court system discounts the testimony of children.

''We have seen it over and over again where there have been children that have been abused and there's not been successful prosecution,'' he said.

''There ares so many things that I am upset about the way this case was handled on the prosecution's side it would take me an hour to discuss it '' Cioffi said.

Jurors Wednesday told Superior Court Judge William Pounders they were deadlocked on 13 of the counts, including the conspiracy count.

Pounder Thursday declared a mistrail on those counts.

The verdicts capped a 33-month trial, the longest criminal trial in U.S. history and perhaps the world.

The case was also the most expensive criminal case in U.S. history, having cost Los Angeles County taxpayers more than $15 million since the grand jury handed down its indictments in March 1984.

At that time, the case was also the largest molestation case in U.S. history.

Former McMartin student Chris Collins, who was not part of the case because he was too old when the investigation began and the statute of limitations had become operative, said:

''I was molested, physically, and I'm not going to go into the detail.... Five-hundred kids don't come up with the same story and just make it up. They're going to pay for it, whether they get it here in court or they get it out in the streets in society.....

''If I could just come in physical contact once with any of them (the defendants), it'd make my year, make my life. I have a little brother that went to the school and that's where I'm more worried about.''

Initially charged with molesting 42 youngsters at the then-prestigious pre-school were the Buckeys, plus five other defendants. Those included Ray Buckey's grandmother, Virginia McMartin, who founded the pre-school, his sister and three other teachers.

Since then, however, the five other defendants and scores of charges have been dismissed because of insufficient evidence.

Only Ray Buckey and his mother went to trial, where nine of the children testified they were molested by the defendants. Two other children were

too scared to testify.

The prosecution contended that the youngsters were raped, sodomized and forced to participate in oral copulation.

Prosecutors also contended that the children were forced to play sex games in the nude such as ''Naked Movie Star,'' and engage in pornographic photo sessions and horrific satanic rituals involving animal mutilations.

Defense attorneys Danny Davis and Dean Gits steadfastly maintained their clients' innocence.

The defense argued that the case was triggered by the paranoid delusions of an emotionally disturbed woman who claimed that Ray Buckey had molested her son. When Manhattan Beach police launched a massive molestation investigation, a climate of hysteria swept the beach community, the defense contends.

The children were then referred by authorities to the Children's Institute International in Los Angeles, where therapists who conducted video-taped interviews with the youngsters manipulated them into believing they had been molested, the defense argued.

WASHINGTON (JAN. 18) UPI - The GOP, still perplexed over how to deal with abortion, sidestepped the sensitive issue Thursday at a Republican National Committee meeting, avoiding what could have been a potentially bitter debate.

At the start of a three-day session of the committee, Randy Ayre, chairman of the Idaho Republican Party, tried to push a resolution he said would ''reaffirm the party's long-standing position on abortion, but say it should not be a litmus test'' for candidates.

However, Ayre backed away from offering the proposal at a Rules Committee session when he ran into opposition from members who questioned its timeliness and whether it could properly be presented.

Thus, the party, which has struggled to find a way to cope with the issue, avoided what could have been a divisive fight at the normally well-orchestrated session.

Abortion has been a sensitive issue for the party since last summer's Supreme Court ruling giving states more power to regulate the practice.

The national GOP is on record as strongly opposing abortion, even though a

number of Republican candidates believe in abortion rights.

Since the court ruling, polls have shown a vast majority of Americans favor giving women some form of choice regarding abortion and in the few major election campaigns in 1989, the Republican candidates portrayed as being opposed to abortion lost.

Going into this year's 1990 midterm contests, the GOP has tried to find a way to reconcile its staunch anti-abortion platform position with the Republican candidates who favor some abortion rights. Also, it has fought to make sure that Democrats do not portray Republicans as extremist on the issue.

Both President Bush and GOP National Chairman Lee Atwater have stressed there is room in the party for all points of view, but Democrats have contended that argument does not hold water given the harsh language in the GOP platform and the president's tough anti-abortion views.

While the shelving of the abortion resolution Thursday may have allowed the national committee to dodge a potentially bitter public debate on the subject, it was clear the issue was a prime topic in closed door sessions at the GOP gathering.

''I think all you've done is to delay it,'' Steve Roberts, a national committee member from Iowa, noted after the resolution was put aside. ''It's a topic. Nobody's head is in the sand. It'll be talked about this week - if not publicly, then privately.''

#90018u1603 01/18/1990 ~United Press International

CHICAGO (JAN. 18) UPI - Soybeans were supported by export rumors but grain futures were mostly lower Thursday despite hopes of near-term export business.

Soybeans were moderately higher at the close on the Chicago Board of Trade amid indications the Soviet Union had bought 150,000 tons of soybeans. Commission houses dominated the buying in soybeans with some of the demand attributed to short-covering.

The weakness in the rest of the soy complex limited the gains in soybeans. Soybean oil was slightly higher and meal slightly lower at the final bell.

Weather conditions pressured wheat prices to their lowest levels in about three months. Forecasters called for rain or snow over much of the Wheat Belt, although precipitation amounts were expected to be light.

The Soviets were in the mrket for 500,000 tons of wheat, but traders said

it already was factored into the pricing structure.

Corn was a little higher in light trading activity.

Country movement was light.

At the close, corn was up 1/2 to 1 3/4, soybeans up 1 3/4 to 3 1/2, wheat off 1 3/4 to 3 1/4 and oats down 1/2 to 1 1/2 cent.

#90018u1620 01/18/1990 ~United Press International

SOFIA, BULGARIA (JAN. 18) UPI - Prosecutors put ousted hard-line leader Todor Zhivkov under house arrest Thursday to face charges of ''gross malfeasance'' and inciting ethnic hatred during his 23-year rule, state-run radio said.

The state prosecutor general's office issued an arrest warrant for the disgraced former Communist Party chief based on evidence gathered in a monthlong investigation by a legislative panel, the official BTA news agency said.

Zhivkov, who was ousted in November and replaced by a new Communist leadership that favors reforms, joins East Germany's Erich Honecker and Czechoslovakia's Milos Jakes as former Eastern European Communist leaders now under investigation for official misconduct.

''He (Zhivkov) is charged with incitement of ethnic hostility and hatred, with unwarranted receiving of excessive amounts of public property and with gross malfeasance,'' BTA said is a brief dispatch.

It said a warrant was issued by the state prosecutor general to ''remand in custody'' the ousted dictator, and said a team of prosecutors had been assigned to the case.

State-run radio said late Thursday Zhivkov was under house arrest.

The prosecutor general's office also was bringing charges against some of Zhivkov's top aides, government officials said, but it was not clear if any had been taken into custody.

The new Bulgarian leadership announced last month a legislative panel had begun investigating alleged corruption and abuse of office by Zhivkov and his inner circle of advisers. Monday, the government announced a separate committee was looking into reports Zhivkov had secreted large amounts of ill-gotten wealth in Swiss bank accounts.

Newspapers in Sofia have carried stories about the rumored wealth and

allegedly extravagant lifestyles of Zhivkov, his family and close aides.

The charge of inciting ethnic hostility and hatred apparently stems from Zhivkov's program of forced assimilation for Bulgaria's ethnic Turkish population, which was forbidden from using Moslem names.

The announcement of the charges against Zhivkov came amid news of the postponement of round-table talks between Communist Party and opposition groups, scheduled to begin Thursday.

Pro-democracy groups led by the Union of Democratic Forces pulled out of the negotiations saying the government had failed to satisfy several demands that they considered pre-conditions for the talks.

UDF President Zhelyn Zhelev said the demands included office space, a daily newspaper and access to state-run radio and television.

''Our demands are still not satisfied,'' Zhelev said.

Andrei Lukanov, a Politiburo member, said the government had already taken steps toward providing newsprint for the UDF, and said the Sofia city government was responsible for finding a headquarters for the group.

No new date for the talks was announced.

#90018u1621 01/18/1990 ~United Press International

(JAN. 18) UPI - Bad news for the Bush administration and American consumers. The Labor Department reports consumer prices rose four-tenths of one percent last month. The increase brought inflation for last year to its highest point in nine years- four-point-six percent. The 1989 inflation rate was fueled largely by petroleum price increases and outpaced 1988's four-point-six-percent inflation.

Statistics released today by the Commerce Department indicate privately owned housing starts plummeted eight percent last month. Overall, 1989 proved a poor year for the private-dwelling construction industry... with housing starts at one-point the lowest level since 1982. The region hardest hit by the fall off was the Northeast, where December starts declined by 23-point-three percent.

The astronauts orbiting the Earth got a phone call from President Bush today, praising the shuttle Columbia crew for the successful rescue of a giant science relay station. At one point Bush asked shuttle commander Daniel Brandenstein- ''Can you use a 65-year-old Navy pilot up there?'' Brandenstein says retrieving the Long Duration Exposure Facility was one of the mission's highlights. Columbia is scheduled to land tomorrow at

Edwards Air Force Base, California.

#90018u1644 01/18/1990 ~United Press International
(JAN. 18) UPI - Bulgaria's official news agency says the reforming East Bloc country has issued arrest warrants for former President Todor Zhivkov and his inner circle of aides on charges of corruption and abuse of office. Bulgaria's new government began investigating Zhihkov's affairs shortly after assuming power last month. The hard-line communist faces charges of inciting ethnic hatred and- quote- ''the illegal receipt of excess amounts of public property.''

Government leaders are meeting in Romania to consider scrapping a January 28th referendum on whether the Communist party should be banned and the death penalty re-instated. A government spokesman says ''it's very difficult to prepare a referendum in just 10 days.'' He says an 11-member committee of the ruling National Salvation Front may compromise, in a deal that would ban the tactics of the Communist Party... but NOT outlaw the party altogether.

China's national police say hundreds of people jailed during last summer's crackdown on pro-democracy protesters have been freed. Police say 573 people jailed in the UNrest were released after admitting their crimes, but authorities would NOT discuss the fate of thousands of others still in prison. Foreign diplomats view the freeing of prisoners as similar to China's lifting of martial law... a largely cosmetic gesture aimed at improving relations with other countries.

#90018u1669 01/18/1990 ~United Press International

WASHINGTON (JAN. 18) UPI - A group advocating greater access to marijuana for medical use called Thursday for the resignation of John Lawn, head of the Drug Enforcment Administration, because of the agency's alleged footdragging in making marijuana available to an AIDS patient.

Robert Randall, head of the Action for Cannabis Therapeutics, charged Lawn had ''blocked the delivery of Food and Drug Administration-approved supplies of medical marijuana to a desperately ill Texas AIDS patient named Steve in a misguided attempt to sustain DEA's discredited

prohibition against marijuana's use in medicine.''

The FDA had approved the Texas patient's use of legal marijuana in mid-December and the National Institute on Drug Abuse, which produces the government's medical marijuana, said it was ready to ship the drug to the AIDS patient's doctor.

But the DEA blocked approval and not until early this week, after news stories about the issue appeared, did the agency act to allow the shipments to begin.

Randall said the DEA action appeared to be linked to Lawn's decision to reject a recommendation by the agency's chief administrative law judge to reschedule marijuana's classification to allow its use for medical therapies.

''Such a funndamental abuse of power by a high public official cannot be tolerated,'' Randall told Lawn in a letter hand delivered to the agency. ''You have made a mockery of the Bush administration's quest for a kinder, gentler America. You have brought shame and scorn on the agency you head.

''In your blind zeal to fight the war on drugs, you have forgotten one very important fact; some people are not combatants,'' Randall said.

Randall, who suffers from glaucoma, was the first American to win the right to legally use marijuana for medical reasons. Marijuana has been shown to relieve pressure in the eye and to retard the development of glaucoma.

Other medical tests have suggested marijuana may be useful in treating the side effects of cancer chemotherapy treatments and other diseases.

Currently, the drug is classified as a Schedule One drug, meaning it has no acceptable medical uses. Randall and ACTS have been fighting to have its classification changed to recognize its possible medical uses - a change DEA has opposed.

In September 1988, DEA admistrative law judge Francis Young, after two years of hearings, concluded marijuana should be reclassified and sent his recommendation to Lawn. The DEA head, however, rejected that recommendation Dec. 31, 1989.

Randall accused Lawn and the agency of blocking the shipment to the Texas patient to avoid a ''politically embarrassing situation'' of having a patient rerceive marijuana in the same week DEA was denying its medical value.

Such an act, he said, ''deprived another human being of needed medical care.''

''Your arrogant disregard for this patient's welfare is an affront to our most basic human instinct to aid those in need and to provide for the compassionate care of those who are ill,'' Randall said. ''The only recourse I have is to such outrageous conduct is to publicly call for your resignation.''

#90018u1693 01/18/1990 ~United Press International

SEATTLE (JAN. 18) UPI - Despite its bursting order book, the Boeing Co. said Thursday the completion of startup work on its new 747-400 jumbo jet and a shrinking federal budget will lead to the reduction of about 5,000 jobs in its Puget Sound work force this year.

Boeing said about half the reduction will be through attrition and the other half through layoffs, with at least 1,700 layoffs involving hourly workers. At least 1,400 of the 1,700 lost hourly jobs will be at Boeing's

plant in Everett, Wash., the production site for the 747-400.

The 5,000 lost jobs would reduce Boeing's Washington state work force by about 4.6 percent. At the end of 1989 Boeing employed a total of 164,600 people, an increase of eight percent over 1988, with approximately 106,700 in Washington, up 10.3 percent from the previous year's work force.

Boeing said it had tried to reduce the worker buildup as much as possible by using extensive overtime and temporarily hiring about 600 workers from Lockheed last year.

Production workers - most members of the International Association of Machinists and Aerospace Workers union - earn an average of $31,700 a year so the layoffs of the first 1,700 employees could mean a loss of $53 million or more to the local economy.

However, the Puget Sound economy is very strong and its unemployment rates low, so most workers are expected to find other jobs quickly at companies having trouble finding skilled labor. Both Boeing and the machinists union said they would help employees find other work. About 1,900 warning notices for employees who may be affected by the first round of cuts will be issued Friday, with the layoffs beginning March 20.

Spokesman Paul Binder said layoffs will occur throughout the year. He said the company is not sure at this time how many layoffs will involve hourly workers and how many will be salaried employees.

"We'll be reviewing and revising as we go along, looking at our requirements," Binder said. "It is not something you can look at in January and say it is going to be 'X' number in September.

"At this point we don't have any projections on white collar layoffs. What we see on the horizon through April is the 1,700 (hourly workers). There are just so many uncertainties about the defense budget and the 777 program," he said, referring to the possible introduction of a new model jet.

Boeing has been one of many aerospace companies affected by cuts in federal defense spending. One example was the loss by Boeing in December of a $25 million-a-year contract to do work on the space shuttle for the National Aeronautics and Space Administration.

Binder also said the completion of the startup phase for the 747-400 will mean lost jobs, even though Boeing has a backlog of orders for more than 1,700 of all models of its commercial airplanes worth an estimated $85 billion. "When you start up a new production line such as the 747-400, there is work that has to be done that is peculiar to the startup," he said.

He said jobs such as certifications, flight testing and other work on a new model plane are often done out of the normal sequence, and sometimes it may take five people to do a job that eventually will be done by one once the production line matures.

"As the line matures, those jobs go away," he said. "There are things that no longer need to be done. It's always like that - the lines fluctuate throughout their lifecycle."

In another development, Boeing has recommended cockpit control improvements to more than 2,000 of its planes to ensure the rudder is not inadvertently set in the wrong position.

Boeing said it will make available refit kits for the rudder trim controls in its new-generation 737, 747, 757 and 767 jetliners and will design the changes into new planes.

The wrong rudder setting is being investigated by the National Transportation Safety Board as contributing to the crash of a USAir 737-400 at New York's LaGuardia Airport in September. Two passengers were killed when the jet skidded into the East River after an aborted take-off.

The NTSB, which will begin hearings on the accident in New York on Feb. 13 said the rudder on the 737 was found to be set at full left position when it should have been straight for take-off.

NTSB spokesman Ted Lopatkiewicz said the agency won't know until after the hearings why the rudder was set in the wrong position or how that contributed to the accident. In addition to the rudder system, human factors and pilot training procedures will also be probed during the hearings.

#90018u1698 01/18/1990 ~United Press International

WASHINGTON (JAN. 18) UPI - Israeli Defense Minister Yitzhak Rabin, after a series of meetings at the White House, Pentagon and State Department, said Thursday he was given reason to believe there will be no reduction in U.S. financial assistance to Israel this fiscal year.

Rabin's visit to Washington coincided with a trial balloon floated by the administration through Senate Republican leader Robert Dole of Kansas, who suggested the United States cut by 5 percent aid levels to major recipients, such as Israel, in order to pump some of that money to the needy economies of Eastern Europe and Latin America.

After a meeting at the State Department with Secretary of State James

Baker, dealing mainly with the prospect of Israeli-Palestinian negotiations, Rabin told reporters that he was told that there would be no reduction in Israeli aid this fiscal year.

In fiscal 1991, Rabin said, ''I have reason to believe there will be no reduction in U.S. support for Israel.'' Asked if that applied to both economic and military aid, Rabin replied, ''Yes.''

Israel currently receives $1.8 billion in military assistance and $1.2 in economic assistance, all in the form of non-repayable grants. In addition, Israel receives about $660 million in various other forms, including support for Israeli defense research and development projects.

The other four top recipents of U.S. economic aid are: Turkey, Pakistan, Egypt and the Philippines. A 5 percent cut for Israel and the other four countries would produce about $300 million in surplus funds, Dole.

State Department spokeswoman Margaret Tutwiler said the issue of aid did come up in the Baker meeting, and the secretary of state stressed U.S. support for Israel's needs, but no specific commitments were made.

Rabin's meetings also included sessions with National Security adviser Brent Scowcroft, Vice President Dan Quayle and Defense Secretary Richard Cheney.

Rabin said Israel's need for U.S. support continues because, as he said, ''Glasnost has not spread to the Middle East.''

He said the Soviets continue to sell high levels of advanced weaponry to Israel's Arab neighbors, including Syria, which recently received MiG-29 and Sukhoi-24 attack bombers.

In addition, he said, the increasing levels of Jewish immigrants from Eastern Europe are straining Israel's economy. He said Israel received 3,600 Eastern European Jews as immigrants last month, and had to support the new arrivals with some $600 million taken from other Israeli resources.

The resettlement of some of those immigrants in the Israeli-occupied territories has created a new issue of public contention between Israel and the United States.

Israeli Prime Minister Yitzhak Shamir, and other members of the Likud faction, have urged that the new migrants be resettled in the occupied territories, as a means of enhancing the Israeli hold on the West Bank and Gaza Strip.

A State Department spokeswoman described Shamir's statements as ''frankly not helfpul'' and said that no U.S. aid money can be used to enlarge or

build Israeli settlements in the occupied territories.

In Amman, Jordan, King Hussein warned that Israel was endangering the Middle East peace process through an apparent new policy of replacing Palestinians in its occupied territories with Jewish immigrants from Eastern bloc countries, a published report said Thursday.

#90018u1701 01/18/1990 ~United Press International
ATHENS, GREECE (JAN. 18) UPI - A group of 20 sick and disabled Iranian prisoners of war released by Iraq arrived in Tehran Thursday in an exchange that also saw the release of 50 Iraqi POWs from Iran, Tehran radio said.

On Wednesday, Iran said it released 50 Iraqi POWs, of whom three sought political asylum in Tehran and the rest flew to Baghdad. The stated-owned Iraqi News Agency later confirmed their arrival home.

Tehran radio, monitored in Athens, broadcast the names of Thursday's returnees, saying they were welcomed by their families at Mehrabad airport but it gave no further details.

In Geneva, the International Committee of the Red Cross confirmed the prisoner exchange Thursday.

''Although pleased that 70 prisoners of war have at last been reunited with their families, the ICRC wishes to remind the international community that over 100,000 Iranian and Iraqi prisoners of war are still being held in both countries,'' it said.

The ICRC said that, under the Geneva War Conventions, recognized by both sides, all POWs should have been repatriated 17 months ago when a cease-fire in the Gulf War took effect.

Last year, an agreement between the two sides to exchange all sick and wounded POWs broke down when Baghdad accused the Iranians of cheating.

The charge arose from an Iranian decision to hold back several of the POWs who were to be exchanged, after claiming they had either asked for political asylum in Iran or were found by doctors to have been cured and therefore not eligible to return home.

The latest prisoner exchange follows an offer by Soviet Foreign Minister Eduard Shevardnadze to hold talks in Moscow with the foreign ministers of both sides toward achieving a lasting peace in the region. Both Iran and Iraq have accepted the offer, and last week Iranian Foreign Minister Ali Akbar Velayati said a high-ranking Soviet official would visit Iran shortly to begin mediation.

SEOUL, SOUTH KOREA (JAN. 18) UPI - Opposition leader Kim Dae Jung said Thursday he hopes to send some members of his Party for Peace and Democracy to North Korea by the end of June if the government approves the plan.

''Visits to North Korea by representatives of political parties can be realized easily, depending on the attitude of the government,'' Kim said at a news conference. ''If the government approves, our party plans to send its representatives to North Korea during the first half of this year.''

Kim said the proposed North Korean visit could serve national interests by presenting the true picture of the political situation in the South to North Korean government and political leaders and urging them to pursue a reasonable policy course toward the South.

Kim said he will cautiously study the possibility of a trip to North Korea himself after carefully analyzing the result of the trip by his party members, provided the government, under the ruling Democratic Justice Party, supports his plan.

ROANOKE, VA (JAN. 18) UPI - A woman is trying to force the father of her ailing son to submit to tests to see if some of his bone marrow could save the boy's life, but a medical ethics expert said Thursday it would take ''a major leap of logic'' for the lawsuit to succeed.

Sue H. Argabright claimed in a suit filed in Roanoke City Circuit Court that Sanford Andrew Moore is the natural father of 4-month-old Spence Andrew Moore, and that as the father he ''owes a duty and obligation'' to the infant.

The baby is suffering from osteopetrosis, a rare disease that prevents his body from breaking down and reforming bone. As a result, the bones thicken and become brittle, breaking easily.

Argabright said in the suit doctors have told her Andy will die within six to 12 months and that his only chance for survival would come from a bone marrow transplant.

Because a parent's bone marrow is more likely to be compatible than that of a stranger, the western Virginia woman has repeatedly asked Moore to submit to tests, she said in the suit. Moore ''remains uncooperative and unjustifiably unwilling to determine his eligibility,'' the suit said.

Argabright wants the Roanoke court to order Moore to undergo tests, and if

his marrow is compatible, to force him to donate.

Neither Moore nor Argabright could be reached for comment.

Ann Massie, a Washington and Lee University law professor who teaches bio-medical ethics and constitutional law, said she thought it would take ''a major leap of logic'' for a court to conclude that a parent's obligation to his child includes submitting unwillingly to medical procedures.

On the other hand, Massie said, Argabright could have a chance if she shows the operation has a reasonable chance of success, that it is relatively safe for the donor, and if she could convince the court the state has a compelling interest in preserving the life of its citizens in this type of case.

''What kinds of obligations are we willing to impose on parents?'' Massie asked. ''I have a lot of doubts about its potential success. I would say she has an uphill battle.''

Argabright, who is not married to Moore but said in an affidavit he is the only possible father of her son, said she already has been eliminated by doctors as a potential donor.

Earlier this week, Argabright issued a public plea for donations to pay for the bone marrow transplant, which could cost as much as $180,000. Physicians at the University of Virginia are trying to arrange for the surgery at the University of Nebraska, which has experience treating children with osteopetrosis.

#90018u1735 01/18/1990 ~United Press International

WASHINGTON (JAN. 18) UPI - The Navy said Thursday it spent nearly $130 million to fix the troubled Trident 2 nuclear missile and declared the redesigned weapon a success and ''on track'' to be deployed aboard a submarine in March.

Rear Adm. Kenneth Malley, the Trident's program manager, disclosed that the Navy's most powerful weapon is so accurate that ''at 4,000 nautical miles, we have an accuracy that's better than the length of a submarine'' - 560 feet.

At $26.5 million each, the Trident 2 is intended to be the equal of the land-based 10-warhead MX missile. But the missile self-destructed in spectacular explosions in two of its first three test launchings from a submerged submarine last year.

A Navy investigation found that design error was subjecting the first-stage motor nozzles to too much water pressure as the 130,000-pound missile shot to the surface.

The Navy successfully launched the redesigned missile from the submerged USS Tennessee off the coast of Cape Canaveral, Fla., in two separate firings on Monday and Tuesday.

''With the two shots we had Monday and Tuesday my confidence is fully restored that we have solved the problem beyond a shadow of a doubt,'' Malley told reporters at the Pentagon.

''The Trident 2 program is now on track,'' he said, adding that the first load of 24 missiles will be operationally deployed aboard the USS Tennessee in late March as earlier planned.

Under an agreement with the Soviets, the United States will maintain a maximum of only eight nuclear warheads on each of the 24 missiles put aboard the Tennessee, he said.

''As far as performance, we have met or exceeded all of our performance goals,'' Malley said. ''The accuracy of the system even exceeds the highest expectations I held at the beginning of the program.''

''In my viewpoint, we've absolutely solved the problem and we're really on track,'' he said.

Malley said engineers corrected or developed five mechanical parts that prevented the water pressure from affecting the nozzles, which help guide the missile after it breaks out of the water.

''We came up with five separate fixes, all of which worked together to help improve the fault,'' he said. Now, Malley added, ''It's almost like you're launching from a flight pad.

''The cost to correct this ran to approximately $125 million to $130 million,'' Malley said. But, he added, the program was running under projected costs by about $75 million so money for the work already was available.

The new parts will add about $25,000 to the cost of each missile, he said.

The USS Tennessee will conduct one more Trident 2 test in February before going operational in late March. Then, further testing of the Trident 2 will be conducted by the submarine USS Pennsylvania.

NEW YORK (JAN. 18) UPI - A task force of FBI agents and police Thursday gunned down two suspected bank robbers trying to flee in a getaway car, killing one and mortally wounding the other on a Brooklyn street, authorities said.

The gunfire erupted about 11:15 a.m. after members of the city Joint Bank Robbery Task Force spotted two armed men leaving the Hamilton Federal Savings & Loan in Dyker Heights, said Capt. Stephen Davis, a police spokesman.

The two suspected robbers jumped into a getaway car and were trying to flee when they were cut off by FBI agents and police, who leapt from their own cars and opened fire on the pair, Davis said.

One of the men was killed at the scene, said Gail Christianson, a spokeswoman for the city's Emergency Medical Services.

The other, a 25 year old, was mortally wounded in the shooting. He was taken to Maimonides Hospital, where he was pronounced dead on arrival, a doctor said.

A doctor at the hospital said the man was shot in the neck, chest and abdomen ''at least six times and probably more.''

Authorities said it was not immediately known if the suspected robbers returned the gunfire, but there were no reports of injuries among the dozens of FBI agents and police at the scene.

Christianson said the FBI agents were armed with machine guns, but that information could not be immediately confirmed by other authorities.

''They were shot with a machine gun by the FBI,'' she said.

Joe Valiquette, a spokesman for the FBI, said his agency would not discuss the shooting until everyone involved had been interviewed.

A neighborhood entrepreneur said the gunfire sounded like firecrackers, a description corroborated by other witnesses.

''There was a bank robbery and I think the guys coming out had guns,'' said Antoniette Tulimiero, who works at a travel agency across the street from the bank.

''I ran in the back. I was afraid of the shots going through the window. My co-worker got scared. We just ducked and then we heard the machine gun '' Tulimiero said.

ORLANDO, FL (JAN. 18) UPI - Anheuser-Busch Cos. Inc., which closed its Boardwalk and Baseball park in central Florida this week, said Thursday that unused tickets for the park will be honored at the company's Sea World, Cypress Gardens and Busch Gardens parks in Florida.

People with pre-paid tickets also may obtain refunds by writing to Boardwalk and Baseball in care of Ticket Refunds, P.O. Box 800, Orlando, Fla. 32802, the company said.

Platinum Passes, which previously were honored at Sea World, Cypress Gardens and Boardwalk and Baseball, will now be honored at Busch Gardens as well. Holders of Boardwalk and Baseball annual passes can obtain refunds for the unused portion of their passes by mailing the passes to the company. Boardwalk and Baseball provided no estimate of the number of annual passes or unused tickets.

Anheuser Busch shut down the park Wednesday, saying it was hopelessly unprofitable. The nation's largest brewer bought Boardwalk and Baseball late last year from Harcourt Brace Jovanovich Inc. as part of a larger, $1.1 billion deal that included four Sea World parks and Cypress Gardens.

Boardwalk and Baseball employs 626 full-time and 250 part-time employees. All were asked to stay on with full pay and benefits for 60 days to help the company close the park, company spokeswomen said.

The company has said it plans to keep the park's two baseball stadiums and four practice fields open. The Kansas City Royals have held spring training at the facility for two years. The Class A Baseball City Royals also play at the park.

#90018u1753 01/18/1990 ~United Press International

COLOMBO, SRI LANKA (JAN. 18) UPI - Foreign Minister Ranjan Wijeratne accused Amnesty International Thursday of aiding leftist Sinhalese rebels, calling the human rights organization a ''wolf in sheep's clothing'' and ''terrorist organization'' intent on toppling the government.

The minister's outburst came during a news conference when a reporter asked about Prins Gunasekhara, an activist of the Nobel Peace Prize-winning organization who fled the island two months ago following threats by pro-government vigilantes.

Wijeratne, who is also Sri Lanka's defense minister, said Gunasekhara had discredited Sri Lanka abroad through his work for Amnesty International, which has issued numerous reports critical of Colombo's human rights record.

''We are waiting for him to come to Sri Lanka and will question him,'' Wijeratne said.

Gunasekhara and Amnesty International officials could not immediately be reached for comment.

Gunasekhara is a lawyer who specialized in filing habeus corpus writs on behalf of people detained indefinitely without trial on suspicion of belonging to the Janatha Vimukti Peramuna (JVP), or People's Liberation Front.

The JVP, composed of youths of the island's Sinhalese majority, has been fighting to topple the government and install a Marxist-style regime.

Thousands of people have died in JVP-related violence, many of them victims of pro-government vigilante squads believed comprised of police,

soldiers and supporters of President Ranasinghe Premadasa's United National Party.

Among the death squad victims have been at least 20 lawyers involved in human rights activities.

Amnesty International reports on the insurrection have noted numerous ''disappearances'' of JVP suspects and evidence of summary executions of prisoners by security forces.

Wijeratne charged that activists of the London-based organization collaborated with JVP members in preparing its reports and in other areas.

''They are a wolf in sheep's clothing who come to the country to do things to destablize the government,'' Wijeratne asserted. ''The government has information that funds from the Amnesty International were used for JVP propaganda and other activities.''

The minister described Amnesty International as ''another terrorist organization. They are terrorist sympathizers.''

The JVP has pursued a campaign of terror, killing public officials, security personnel and other members and supporters of the government. It has staged numerous sabotage attacks, strikes and protests that have disrupted normal life across much of Sri Lanka and derailed the economy.

But the government late last year scored major successes against the group with the arrests and executions of most of its top leaders, including its founder Rohana Wijeweera.

#90018u1816 01/18/1990 ~United Press International

WASHINGTON (JAN. 18) UPI - Milk production made a rare decline last year, a year in which farm milk prices climbed to record levels and consumers saw a 5.7 percent rise in dairy prices, the government estimated Thursday. Prices were expected to ease this spring. Production has been forecast to rise by one percent to three percent this year.

In a monthly report, the Agriculture Department estimated milk production last year totaled 145.34 billion pounds, or 185 million pounds less than the 145.53 billion pounds produced in 1988. Final figures were expected May 8. It was only the third time in a decade that milk production dipped below the year-earlier total. Declines also were reported in 1987 and 1984.

"Milk production unexpectedly collapsed at mid-year," the department said in a recent analysis, listing how prices were forced up because of the downturn in production, strong cheese sales and large exports of nonfat dry milk. Output dropped because of poor-quality forage caused by the 1988 drought.

The farm price for milk reached record levels in the fall. The average price for milk sold to dairy plants last month was a record $15.90 per 100 pounds, $2.40 higher than one year earlier.

For consumers, dairy prices usually are one of the most stable components among food prices. In 1989, prices for dairy products zoomed 5.7 percent - twice the normal rate - and matched the overall increase in food prices.

In a separate report, the Labor Department said retail dairy prices showed a 2.2 percent increase during December, following a 10.3 percent increase

in November.

The Agriculture Department said milk production in the 21 major states totaled 10.2 billion pounds last month, matching the December 1988 total and ending six months of production declines.

For the year, the department estimated production in the 21 leading states at 123.4 billion pounds, a 420 million-pound decrease from 1988. The estimated U.S. total, 145.3 billion pounds, was less than one percent under 1988's total. For the last half of 1989, production ran behind 1988's pace. The number of U.S. dairy cows, at 10.1 million, was down 1.1 percent during 1989 but production per cow rose one percent to 14,213 pounds.

Wisconsin, the No. 1 dairy state, reported production in December of 1.99 billion pounds, a two percent drop. California, the No. 2 state, had the largest increase, six percent, for a total of 1.63 billion pounds. Pennsylvania had the largest decrease in the major states, seven percent, for a total of 805 million pounds.

With wholesale prices at high levels, the department lowered the milk support price, which guarantees a minimum price to farmers, to $10.10 per 100 pounds Jan. 1. The support had been $10.60.

The department is allowed to cut the price if it buys more than five billion pounds of milk in a year in order to prop up prices. Purchases last year totaled about eight billion pounds.

NEW ORLEANS (JAN. 18) UPI - WCBS-TV in New York won the Iris award for Best of Show at the National Association of Television Program Executives Wednesday for a program on how city and country youths perceive each other.

The program ''Upstate/Downstate'' carried often funny and sometimes poignant dialogue among youths from New York City and upstate New York, who were brought together to demonstrate how much they had in common and how inaccurate many of the opinions they had about each other could be.

''Upstate/Downstate'' also was the winner in the Public Affairs category for stations in the major TV markets.

The Iris awards presented annually at the NATPE convention recognize excellence in local programming and production. The convention brings together television executives and the producers and syndicators of programs.

NATPE presented its Person of the Year award to ''Golden Girls'' star Betty White. Film critic Roger Ebert, who with ''At the Movies'' co-host Gene Siskel, handled the presentations, accepted the award for White who was unable to attend because she was ill.

''I don't deserve this award, and if I were NATPE I wouldn't give it to somebody who conked out at the last minute with the flu,'' White said in a note read by Ebert.

Other large station (market size 1-20) winners were:

Program Segments - KARE-TV, Minneapolis, Minn., ''Greetings from the North Shore.''

Sports - KTSP-TV, Phoenix, Ariz., ''Champions.''

Children's and Young Adults - KPIX-TV, San Francisco, ''Mac and Mutley.''

Entertainment - KRON-TV, San Francisco, ''In Concert Against AIDS,'' and KING-TV, Seattle, Wash., ''Almost Live.''

Information - KYW-TV, Philadelphia, ''Your Kids and Drugs: The Warning Signs,'' and WBZ-TV, Boston, ''People Are Talking.''

Special Events - KQED-TV, San Francisco - ''Opera in the Park 1989.''

All Other - WCVB-TV, Boston, ''Use Your Smarts: Dropping In.''

The medium station (market size 21-75) winners were:

Public Affairs - WVIA-TV, Wilkes-Barre, Pa., ''AIDS in Rural America.''

Program Segments - WWL-TV, New Orleans, ''The Edward Post Trial.''

Sports - WLOS-TV, Asheville, N.C. ''Bob Waters: A Lesson in Courage,'' and KUTV, Salt Lake City, ''Behind the Bench.''

Children's and Young Adults - KATU-TV, Portland, Or., ''Popcorn.''

Entertainment - KOIN-TV, Portland, Or., ''We're Makin' Movies.''

Information - KMTV, Omaha, Neb., ''Town Hall: A Generation at Risk.''

Special Events - KUTV, Salt Lake City - ''Remember My Name.''

All Other - WBAL-TV, Baltimore, Md., ''New Immigrants in Old Neighborhoods.''

The small station (market size 76-216) winners were:

Public Affairs - WBRZ-TV, Baton Rouge, La., ''The Best Insurance Commissioner Money Can Buy.''

Program Segments - KBAK-TV, Bakersfield, Calif., ''After the Onion Field - A Segment of 29 Prime.''

Sports - WLUC-TV, Marquette, Mich., ''P.O.R. (Press on Regardless Road Rally).''

Children's and Young Adults - WCSH-TV, Portland, Me., ''An Evening with Rick Charette.''

Entertainment - KPLC-TV, Lake Charles, La., ''Tumey Travels - to Prairie Cajun Country.''

Information - KEYT-TV, Santa Barbara, Calif., ''Thoughts on Three - Teens and AIDS.''

Special Events - KYTV, Springfield, Mo., - ''Firefall - The Concert in the Sky.''

All Other - KXLY-TV, Spokane, Wa., ''In the Land of Tall Prayers: Life Along the Lewis and Clark Trail.''

Station TVB in Kowloon, Hong Kong, won the International Iris award for its coverage of the massacre of pro-Democracy Chinese students in Beijing's Tiananmen Square on June 4, 1989.

NORTH MIAMI, FL (JAN. 18) UPI - Industry Publishers of North Miami has sold four trade magazines to Sterling Publishing Group of London for an undisclosed sum, a representative for the privately-held Florida publisher said Thursday.

Rich Serrano of Henry Ansbacher Inc., which represented Industry Publishers in the deal, said Sterling intends to form a new subsidiary known as Sterling Southeast Inc. to publish the four magazines.

The titles acquired by Sterling are Tennis Industry, Golf Industry, the Gourmet Retailer and the quarterly Multi-Sport Facility News. Multi-Sport has a controlled circulation of 55,000. Circulation figures for the other magazines range from about 16,000 to 21,000.

"Sterling's intention is to grow the operation through additional

acquisitions," Serrano said. The magazines employ about 30 people, and no layoffs are anticipated, he said.

Industry Publishers also publishes Medical Business, a bi-weekly tabloid for medical professionals formerly known as Florida Medical Business. The magazine has a circulation of 18,000, Serrano said.

WASHINGTON (JAN. 18) UPI - President Bush and Turkish President Turgut Ozal discussed a wide-range of global issues at the White House Thursday, ranging from democratic reforms in Europe to the Middle East.

White House press secretary Marlin Fitzwater said the two ''agreed to continue their pattern of close consultations and stressed the importance of U.S.-Turkish security cooperation at this time of rapid change.''

Fitzwater said Bush and Ozal met for about 30 minutes in the Oval Office, and then had a working lunch.

They discussed changes in the Soviet Union, the negotiations at Vienna on conventional force reductions and NATO's role in a fast-changing Europe, the press secretary said.

He said, ''They engaged in detailed discussions of the situation in the Middle East and the sweeping changes in Eastern Europe, with special reference to the Balkans.''

Fitzwater said Bush and Ozal also discussed Cyprus and reaffirmed their support for negotiations between Greek and Turkish Cypriots sponsored by the United Nations.

#90018u1840 01/18/1990 ~United Press International
KNOXVILLE, TN (JAN. 18) UPI - As many as 200 students learned a secret password into a University of Tennessee computer system, then rearranged their class schedules as they pleased until they were caught after more than a year, officials said Thursday.

Vice Chancellor Phil Scheurer said charges will be placed against the students this week for breaking the university code of conduct, and penalties could range from written reprimands to suspensions.

''They gained access by using a password ... which allowed them to drop courses and add courses at will,'' Scheurer said.

Scheurer said he does not know how the password was leaked, but said that ''one person told the other and before you know it 200 people knew.''

The students first cracked the computer system in the fall of 1988 and finally were caught by a university employee who monitors the computer system, officials said. They declined to say what the password was.

University officials said do not believe any other computer systems were involved in the tampering.

''No other university systems are compromised at this point, and no grades were compromised,'' Scheurer said.

Once in the computer, the students could arrange to get into any class they wanted, even if it already was full. Students normally register for classes on a first-come, first-served basis.

Students can no longer get into the computer with the password, officials said.

''The password has been changed, and it will change quite frequently,'' Scheurer said.

#90018u1853 01/18/1990 ~United Press International
WASHINGTON (JAN. 18) UPI - Health and Human Services Secretary Louis Sullivan called on the R.J. Reynolds Tobacco Co. Thursday to cancel plans to sell a new brand of cigarettes aimed at blacks, saying the ''trade-off between profits and good health must stop.''

In remarks prepared for delivery at the University of Pennsylvania School of Medicine in Philadelphia, Sullivan said he hoped his criticism of

Reynolds' ''slick and sinister'' strategy would lead to a nationwide campaign against companies that market harmful products to minorities and the poor.

Reynolds announced last month that it would begin a six-month test marketing of the new menthol brand, called Uptown, on Feb. 5 in Philadelphia, prompting criticism by the American Cancer Society and the formation of a coalition in Philadelphia to protest against the cigarette.

Sullivan said he wrote a letter to Reynolds urging it to cancel the marketing campaign. The letter said cigarettes cause an estimated 39,000 deaths each year and higher smoking rates among blacks ''are a major reason why blacks experience higher rates of lung cancer, other cancers, heart disease and stroke compared with whites.''

''At a time when our people desperately need the message of health promotion, Uptown's message is more disease, more suffering and more death for a group already bearing more than its share of smoking-related illness and mortality,'' Sullivan said in his prepared remarks.

''At a time when we must cultivate greater personal responsibility among our citizens, Uptown's slick and sinister advertising proposes, instead, a greater degree of personal irresponsibility. Just when our citizens require a new 'culture of character,' the makers of Uptown are promoting a culture of cancer.

''As the chief health officer of this land, I must condemn this,'' he said.

Sullivan, describing himself as ''alarmed and angered,'' urged groups across the nation to join with him and the Philadelphia coalition in an ''expression of anger and resolve'' against the Uptown and similar products.

''Let this be just the beginning of an all-out effort, for there are other companies who are doing the very same thing. We must resist the unworthy efforts of the tobacco merchants to earn profits at the expense of the health and well-being of our poor and minority citizens,'' he said.

''This trade-off between profits and good health must stop. And it will stop if, around our country, our citizens rise up and say, 'Enough - no more!

''Working together, we can give Uptown the thumbs down,'' he said.

An HHS spokesman said he believed Sullivan's call marked the first time a department secretary had singled out a particular cigarette for criticism.

Maura Payne, a spokeswoman for R.J. Reynolds in Winston-Salem, N.C., said

the Uptown was aimed at blacks because most black smokers prefer menthols and that it was ''paternalistic'' to think blacks were not capable of making their own decisions about smoking.

''I don't think it's right to say we are going to protect this group or that group from a product they say they already want,'' she said.

R.J. Reynolds, which makes Winstons and Salem menthols, has suffered a recent decline in its share of the total cigarette market and the menthol market.

Development of the Uptown began in 1988 as Salem began losing ground among black smokers, who industry surveys showed were turning to cigarettes with a less-pronounced menthol taste.

#90018u1855 01/18/1990 ~United Press International

WASHINGTON (JAN. 18) UPI - First lady Barbara Bush will join in a community service recognition program in Miami Friday before joining the president at a fund-raising dinner for Florida Gov. Robert Martinez, aides said Thursday.

Anna Perez, the first lady's press secretary, said that Bush will fly to Miami separately from the president, who will be making a stop in Atlanta on his way to Florida.

While in Miami, Mrs. Bush will be the keynote speaker at the annual ''Sand in My Shoes'' award luncheon, which honors individuals for community and civic service.

In addition, Mrs. Bush will help launch a billboard campaign to raise public awareness about literacy programs, sponsored by the Outdoor Advertising Association of America, Friday afternoon.

ATLANTA (JAN. 18) UPI - Cases of an often lethal bacterial form of blood poisoning have more than doubled in nine years, an increase that may be due in part to the AIDS epidemic and to medical technology that keeps very ill people living longer, researchers reported Thursday.

Septicemia, which was the 15th leading cause of death in the United States in 1980, is now listed as the 13th cause, researchers at the national Centers for Disease Control reported.

''It is ironic, in that, as medical technology and treatment gets better, sicker people are living longer and we are having more infections because people are surviving longer,'' said Dr. Sam Shekar of the CDC's National Center for Health Statistics.

Very ill elderly people and those whose immune systems have been weakened, including individuals with AIDS, are likely targets for septicemia, Shekar said.

Septicemia is a highly fatal bacterial blood infection which, in a recent study killed one in four of its victims, Shekar said in an article published in the CDC's Morbidity and Mortality Weekly Report.

''When it occurs, it often follows a very serious pneumonia or urinary tract infection,'' Shekar said. ''When these infections occur in someone who has low immunity, bacteria get in the bloodstream and septicemia can result. It is very fatal.''

The CDC, using data from the National Hospital Discharge Survey, reported that, from 1979 through 1987, septicemia discharges totaled 2.57 million. The septicemia rate increased 139 percent, from 73.6 per 100,000 people to 175.9 per 100,000. The increase was noted in all geographic regions.

Although the septicemia rate increased for all age groups, the increase was greatest, 162 percent, for people over 65. But the study also recorded a 91 percent increase in the 15-44 age group, with much larger increases in the West and Northeast.

''The high septicemia rates in male 15-44 year olds residing in the West and Northeast may reflect, in part, the emergence of the acquired immunodeficiency syndrome epidemic in the United States since 1981,'' the CDC said.

The CDC said two other reasons, in addition to the AIDS epidemic and the aging population, may account for the jump in septicemia cases. It noted

that the increased use of invasive devices, such as catheters, inside and outside the hospital may place patients at greater risk of septicemia. There also has been an increase in the physician's ability to diagnose the disease, Shekar said.

The CDC also reported that, from 1987 to 1988, years of potential life lost before age 65 caused by the AIDS virus increased by 30 percent, making AIDS the sixth leading cause of years of life lost before age 65.

(JAN. 18) UPI - The Soviet Union has called up the army reserves to help end ethnic fighting between Armenians and Azerbaijanis. The Soviet defense minister told a radio station that reserves sent to the republics of Azerbaijan and Armenia will NOT engage in combat, but will guard weapons... and re-inforce the fence along the 120-mile border with Iran and Turkey.

Jordan's King Hussein says that recent Israeli actions endanger the Middle East peace process. In a published interview Hussein says part of the problem stems from reports that Israel refuses to allow Palestinians back into the occupied territories when they travel outside.

Polish Solidarity founder Lech Walesa says he has accepted an invitation to visit Moscow. Walesa met with the Soviet ambassador to Poland for 90 minutes today in Gdansk. He says he's ''destined'' to meet with Soviet leader Gorbachev .

Poland's leader is asking Poles to be patient as the government works on economic reform. Prime Minister Tadeusz Mazowiecki says that prices- up as much as 900 percent- will stabilize as market forces begin to work. His speech comes amid the worst labor UNrest in Poland since the Solidarity-led government took power.

The pro-Syrian Shiite Amal militia took reporters to an unfinished building near the port of Sidon today. The Amal say that's where the rival Hezbollah temporarily held and possibly tortured U-S Marine Lieutenant Colonel William Higgins before he was killed. Higgins was hanged in retaliation for an Israeli military action two years ago.

WASHINGTON (JAN. 18) UPI - The federal government Thursday charged a city firm with ''willful and serious'' violations of job safety standards in a downtown Washington parking garage demolition that killed a Guatemalan construction worker.

The Labor Department's Occupational Safety and Health Administration charged that LEB Inc. in ''willful'' violation of federal law failed to have a proper demolition plan and did not have a ''competent'' person in charge of the operation when the building collapsed New Year's Eve.

Basilio Barrios, 36, an immigrant from Guatemala who was working in the United States to support a wife and five children in his country, was crushed to death when the 12-story structure collapsed.

The building was being prepared for demolition when it fell down.

OSHA also cited LEB Inc. for one case of a ''serious'' safety violation for not having audible warning devices on earth-moving equipment.

Larry Liberatore, area director of the Baltimore OSHA office who conducted the investigation, said LEB Inc. did not have a written engineering survey of the building, a requirement that would have showed the load-bearing sections of the garage.

He also alleged the demolition was not properly supervised by a ''competent person,'' as OSHA requires.

''A competent person is somebody that has extensive knowledge, training or experience in the demolition industry; that they've demonstrated their ability to solve or resolve problems relating to a demolition operation,'' Liberatore said.

LEB Inc. faces fines of $20,600 if the penalties are upheld.

SCHERERVILLE, IN (JAN. 18) UPI - A Lake County sheriff's deputy and his wife, killed and incinerated in her car last weekend, were buried Thursday as federal officials took custody of two suspects.

One of the suspects, sheriff's Sgt. Michael Mokol, is the target of a federal corruption probe, authorities said. They said one of the victims, Gary Rosser, 41, was scheduled to testify against Mokol later this month.

The bodies of Rosser and his wife, Teresa, 30, were found Sunday in her burning car in an alley in Gary. The bodies, charred beyond recognition, were identified through dental records during an autopsy.

The autopsy found Rosser had been shot in the head and his wife strangled before they were set afire.

The first suspect, George F. Swetkey, was arrested Monday. Police said he told them he lured Rosser to his house to complete a real estate deal, shot him, then picked up his wife and strangled her.

Swetkey confessed he then put the bodies in the wife's car, drove it to Gary and set it ablaze, police said. Photographs of the bodies were found in Swetkey's house, the Hammond Times reported.

Late Wednesday, federal officials arrested Mokol and charged him with interfering with a federal witness. They also asked revocation of the $30,000 bond under which he was free in the corruption case. He is charged with racketeering, racketeering and conspiracy, and aiding and abetting an illegal gambling business.

Swetkey also was taken into federal custody and hustled off by U.S. marshals to an undisclosed federal detention facility.

As officials consolidated their hold on the supects, about 1,500 people,

many of them uniformed police officers, jammed a Schererville funeral home for services for the Rossers.

''We can't even walk through the lobby ourselves, it's so crowded,'' said funeral director Terry Burns. ''We've got police from all over the place here.''

Police closed 101st Street for a half mile to make room for police to park their cars.

#90018u1984 01/18/1990 ~United States will officially retire the

WASHINGTON (JAN. 18) UPI - The United States will officially retire the SR-71 Blackbird spy plane, the fastest and highest flying jet in the world at a Jan. 26 ceremony in California, the Pentagon announced Thursday.

The retirement ceremony at Beale Air Force Base will include a flyover and a short aerial program by the SR-71, which can fly at three times the speed of sound and to altitudes in excess of 15 miles.

The SR-71 was first delivered to the Strategic Air Command in January 1966. With its on-board, high-performance reconnaissance systems, the SR-71 is capable of surveying 100,000 square miles of Earth's surface in

one hour.

The Air Force asked Congress to shut down the SR-71 fleet in the 1990 budget, arguing that it costs too much to operate the aircraft and that satellites can do a better job of aerial reconnaissance.

Some members of Congress balked, however, arguing the United States might occasionally need the spy planes in case its satellites develop trouble.

The Pentagon said the retirement ceremony will not mark the final flight of the SR-71.

''The final flight will be scheduled when the Air Force determines the final disposition of all the aircraft,'' the Pentagon said. ''That announcement is expected later this month. The final flight is expected sometime in late February.''

#90018u1992 01/18/1990 ~United Press International

TUGUEGARAO, PHILIPPINES (JAN. 18) UPI - Some 6,000 supporters of a rebellious governor massed Thursday at the provincial capital, preventing President Corazon Aquino's aide from serving the governor a 60-day suspension order for his involvement in last month's coup attempt.

Local Governments Secretary Luis Santos flew back to Manila after Cagayan province Gov. Rodolfo Aguinaldo refused to accept the suspension order.

Aguinaldo's supporters also prevented Vice Gov. Melvin Vargas, whom Aquino had appointed as acting governor, from taking over the capital building in

Tuguegarao, 220 miles north of Manila.

A former Constabulary colonel and provincial commander of Cagayan province Aguinaldo called a Manila radio station on the first day of the Dec. 1-9 uprising and said he was bringing armor and artillery in support of the mutineers.

Officials said Aguinaldo, who has a private army of 400 former communist guerrillas and hill tribesmen he had trained while still in the military, allegedly led a convoy to Manila but was stopped along the route by loyalist forces.

Later, Aguinaldo was charged with rebellion and Aquino gave orders for his suspension for 60 days pending resolution of the accusations against him before state prosecutors in Manila, where he was ordered to appear next week.

Aguinaldo denied the charges and secured a restraining order from a local judge in Tuguegarao to prevent his suspension, but the Supreme Court on Tuesday revoked the order.

Santos flew to Tuguegarao Thursday morning but was prevented by Aguinaldo's supporters from proceeding to the capital building. Santos spent the day negotiating with Aguinaldo at the regional military headquarters and later flew back to Manila.

Aguinaldo told reporters he would agree to step aside if Santos agrees to his proposal that he and Vargas submit to a snap election. Santos said he would return to Tuguegarao Friday to try and persuade Aguinaldo to comply with the suspension order.

Critics have asked Aquino to act decisively in disciplining Aguinaldo, fearing the governor's defiance was eroding her credibility and fueling charges she was not in control.

Last month's coup attempt, which left 119 people dead and nearly toppled Aquino, was mounted by soldiers accusing Aquino of inefficiency and corruption.

#90018u2025 01/18/1990 ~United Press International
BEIRUT, LEBANON (JAN. 18) UPI - Gen. Michel Aoun said Thursday he is waging a campaign to free the press and ordered another newspaper in Christian east Beirut closed for refusing to refer to him as Lebanon's president.

Aoun, who has refused to recognize the new Syrian-backed Lebanese leadership, also proclaimed illegal two press organizations and called for elections of new board members ''so that the press becomes a free press representing Lebanon and not the occupation.''

''We are leading a battle to liberate the press,'' Aoun told a crowd of his supporters at the presidential palace of Baabda, 5 miles southeast of Beirut, which he has refused to give up.

Aoun, who was named acting prime minister in 1988 by outgoing President Amin Gemayel, ordered all news media Tuesday to stop publishing stories referring to Elias Hrawi as president and Selim Hoss as prime minister.

Hrawi countered Aoun's move by ordering news media to ignore Aoun ''because he has no legal standing.''

The orders were the latest moves in a power struggle between Aoun and Hrawi, who was chosen president by Parliament as part of a new power-sharing agreement hammered out in Saudi Arabia in an effort to put an end to the 15-year-old civil war.

Aoun rejected the new power-sharing arrangement and said no agreement could be reached until Syria withdrew its forces from Lebanon.

Hrawi, whose Syrian-backed government has gained international recognition has fired Aoun but has been unable to uproot him from the presidential palace.

Aoun told his supporters that all newspapers publishing in Lebanon ''should represent the Lebanese will, not the will of the occupiers'' in an apparent reference to Syria.

Although Aoun has no legal position since the election of a new president, he is considered the dominant force in the Christian enclave and a cause for fear by newspapers based in Christian east Beirut.

The east Beirut-based newspaper, Al Bairak, which abided Wednesday by Aoun's order, defied it Thursday and published as usual calling Hrawi

president and Hoss prime minister. The paper did not explain the change in its position.

Aoun ordered the paper closed for seven days as a punishment for its refusal to submit to his orders.

Al Bairak was the second east Beirut-based newspaper to be shut in two days. The moderate Ad Diyar that published as usual Wednesday, was ordered closed for seven days for refusing to accept the general's directive banning coverage of the president.

The leading An Nahar newspaper refused to publish for the second straight day. A senior editor at the paper said if the paper was to abide by the new orders ''it will lose the objectivity it has been struggling to preserve throughout the civil war.''

An Nahar's head office is in Moslem west Beirut. But unlike other papers based in the same part of the capital, it also has offices in the Christian east and has reporters who commute daily between the two parts of the devided city.

Two major radio stations and a TV station in the Christian enclave refrained for the second day from broadcasting news bulletins in protest of Aoun's order.

Voice of Lebanon, run by the hardliners in the Christian Phalange Party, Voice of Free Lebanon and the Lebanese Broadcasting Corporation TV station run by the Lebanese Forces militia, have been giving extensive reports on Hrawi's activities.

#90018u2082 01/18/1990 ~United Press International

NEW YORK (JAN. 18) UPI - The dollar moved up sharply in New York trading Thursday on a published report saying two key Federal Reserve governors

aren't inclined to ease U.S. interest rates any more for the moment, against a backdrop of market jitters about Soviet inter-ethnic bloodletting.

The Wall Street Journal quoted Fed Vice Chairman Manuel Johnson as saying in an interview that economic indicators look better and bond markets are nervous about inflation. The newspaper concluded from the tenor of his remarks that "he won't support moves to ease short-term rates."

The shift by Johnson, hitherto an an advocate of Fed easing to stimulate a flagging economy, and similar comments by Fed Governor Wayne Angell, signaled a pause in Fed policy. This immediately bolstered the dollar, which had been weakened by declining U.S. interest rates.

The Fed governors' comments came just as confidence in the mark was shaken by the near-civil war raging between Azerbaijanis and Armenians on the southern marches of the Soviet Union. The fighting is seen as a threat to Soviet leader Mikhail Gorbachev, a catalyst of East Bloc reform.

Late in the New York session the dollar was quoted at 1.7140 West German marks, up more than two pfennigs from 1.6912 Wednesday. The dollar also gained on the Japanese unit, at 146.40 yen against 145.30.

The news caught many foreign exchange players off balance, said chief foreign exchange dealer Clement Cypra of Creditanstalt Bankverein in New York. "I think we're going to have a shakeout in the market." He said the news confirmed a change in dealer sentiment.

"The dollar was like a big ship in the ocean, it was slowly making a turn " Cypra said, citing its recent firmness against the mark. "It's come down a heck of a long way since the beginning of the year and I just personally see no reason to sell the dollar."

But economist David Jones of the Aubrey G. Lanston & Co. securities house was not so sure, seeing "only a temporary strengthening of the dollar and setback for the mark." A Fed pause and East Bloc setbacks wouldn't negate higher West German interest rates and economic strength, he said.

In New York trading the British pound eased to $1.6440 from $1.6490. Other dollar rates: 1.5210 Swiss francs, up from 1.5075; 5.8175 French francs, up from 5.7490; and 1,274 Italian lire, up from 1,259.

On European exchanges the dollar also closed higher on the Journal report. The dollar was higher in Frankfurt at 1.7060 German marks against 1.6885 and also went up in Zurich to 1.5155 Swiss francs against 1.5030.

In Paris the U.S. currency closed at 5.7800 French francs, up from 5.7625, in Brussels at 35.52 Belgian francs, also ahead from 35.29, and in Milan

at 1,266.60 Italian lire, up from 1,262.75. In London the pound declined to $1.6460 against $1.6495 Wednesday.

Republic National Bank in New York closed cash gold at $410.25 an ounce, off from $412.25 Wednesday. The New York Commodity Exchange settled gold at $410.20 an ounce, down from $412.50. In Zurich gold rose to $413.50 an ounce from $410.50. London gold moved up to $413 an ounce from $410.25.

Republic closed cash silver at $5.22 an ounce, off from $5.265. Comex spot silver moved down to $5.19 an ounce from $5.265. Zurich silver up to $5.30 an ounce from $5.25, and London silver also rose to $5.26 from $5.23.

LUSAKA, ZAMBIA (JAN. 18) UPI - A leader of the African National Congress conceded Thursday the organization did not have the capacity to escalate an armed struggle against the South African government, despite his call earlier this month for its intensification.

''Looking at the situation realistically, we must admit that we do not have the capacity within our country ... to intensify the armed struggle in any meaningful way,'' ANC Secretary-General Alfred Nzo said.

Speaking at the official opening of a three-day meeting of the National Executive Committee, the ANC's senior policy making body, Nzo said, ''It may therefore be that the main military task that we should pay attention to is precisely the building up of that capacity within the country.''

The ANC's armed wing, Umkhonto we Sizwe (Spear of the Nation), should ''both be able to fight effectively should the need arise, and to have sizeable forces at the moment when a new South African army is formed,'' Nzo said.

At celebrations in Lusaka on Jan. 8 to mark the 78th anniversary of the ANC, black Africa's oldest liberation movement, Nzo had said Umkhonto we Sizwe would remain ''committed to the intensification of our armed offensive against the violent apartheid system.''

Nzo said the NEC meeting would discuss the organization's approach to negotiations with the South African government once key conditions had

been met.

The ANC, outlawed in South Africa since 1960, and anti-apartheid organizations within the country have demanded the release of all political prisoners, the lifting of bans on anti-apartheid organizations, the ending of a 3-year-old state of emergency and a halt to all political trials and executions, before negotiations can begin.

''We shall have to escalate the struggle in a changed situation,'' Nzo said. ''Once these conditions are met, the Pretoria regime will also work to engage us in negotiations.''

Nzo said, however, that the organization was not fully prepared for such discussions.

''We have to bear in mind that (South African President Frederik) de Klerk will seek to move with some speed to catch us unprepared and off-balance, so that the initiative remains in his hands,'' he said.

De Klerk has made initial moves toward reform by releasing political prisoners, effectively easing the state of emergency, without officially lifting it, and calling for negotiations to resolve the country's racial conflict.

Attending the NEC meeting are eight veteran ANC members, seven of whom were released last year from life imprisonment.

The eight have recently met jailed-for-life ANC leader Nelson Mandela, and will present his views on possible negotiations.

De Klerk has pledged to free Mandela, without specifying a date for his release.

#90018u2121 01/18/1990 ~United Press International

NEW YORK (JAN. 18) UPI - Stocks closed mixed Thursday as the blue chips mustered a late technical rebound after Wednesday's sharp drop but the broad market remained under the thumb of gloomy earnings reports.

The Dow Jones industrial average, which sank 33.49 Wednesday, rose 7.25 to close at 2666.38 after having been down 25 points before noon.

Among broader market gauges, the New York Stock Exchange composite index closed up 0.21 to 187.07 and Standard & Poor's 500-stock index rose 0.79 to 338.19. The price of an average NYSE share gained 4 cents.

Declines led advances 879-589 among the 1,970 issues crossing the NYSE

tape, but the margin had narrowed from about three to one in early trading. Big Board volume totaled 178,590,000 shares, compared with 170,470,000 shares traded Wednesday.

Analysts said fading hopes for an interest rate cut and disappointing earnings at Digital Equipment continued to pressure prices, despite the slight bounce in the blue chips.

Digital early Thursday reported earnings of $1.25 a share for the December quarter, below analysts' expectations. The stock closed with a loss of almost $6 a share. Analysts said the news, coming on the heels of lackluster reports Wednesday from International Business Machines Corp. and Alcoa, sparked selling.

"When anything negative happens, this market uses it as an excuse to go down," said Tom Gallagher, managing director in charge of capital commitment at Oppenheimer and Co. "People say, 'If their earnings are bad, why not everybody else's?' Anything could get people to sell stocks in an environment like this," he said.

In addition, analysts said investors' hopes for lower interest rates received a blow from a report in Thursday's Wall Street Journal saying that two Federal Reserve governors have indicated they probably will not favor cutting rates right now. The market had hoped for such a move to offset weak earnings reports, they said.

"What you got today is a battle between the negative fundamentals of poor earnings and a weak bond market (depressed by the unfavorable rate outlook) and a stock market that is terribly oversold on a technical basis " said Newton Zinder, market analyst at Shearson Lehman Hutton Inc. "This was a technical rally."

On the trading floor, Harcourt Brace Jovanovich was the most active NYSE issue, off 1/8 to 2 7/8.

Citicorp followed, up 1/8 to 26 1/2. Harcourt Brace preferred was third, down 1/4 to 2 3/4. Reports said the company expects 1990 operating profits to be significantly above 1989 levels.

Among the blue chips, AT&T lost 1/8 to 42 3/8, Alcoa fell 3/8 to 66 1/2 after tumbling Wednesday on its earnings report, IBM rose 5/8 to 99 1/2, Woolworth lost 1/2 to 61 1/8 and Coca-Cola fell 3/8 to 72 1/8.

The technology sector generally headed lower after Digital's report. Digital plunged 5 7/8 to 82, Compaq fell 1 1/4 to 81 3/8, Hewlett-Packard was down 3/8 to 45 3/8 but Tandem Computer, which reported quarterly earnings at the low end of expectations, was up 1/8 to 25 3/8.

Elsewhere, USAir sank two to 28 3/4 after reports saying it expects a loss for 1989 and Intertan tumbled 2 1/8 to 51 1/2 after reporting sharply lower quarterly earnings.

Bank of New England plunged 1 5/8 to 4 1/4 after reports said an agreement to sell some of its operations to Fleet/Norstar had fallen through.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 210,008,750 shares, compared with 202,032,740 shares traded in the previous session.

Prices closed lower in moderately active trading on the American Stock Exchange. The Amex Market Value index lost 1.89 to close at 366.17. The price of an average share lost seven cents. Declines led advances 346-216 among the 801 issues traded. Composite volume totaled 15,058,300 shares, compared with 18,554,800 traded Wednesday.

Kingdom of Denmark "put" warrants on the Nikkei index, which effectively function as bets that the Tokyo stock market will fall, led the Amex issues, off 1/4 to 5 3/8.

The National Association of Securities Dealers composite index closed down 1.16 at 437.52.

#90018u2143 01/18/1990 ~United Press International

DETROIT (JAN. 18) UPI - More than 30 raids were conducted in 15 states Thursday as the result of a federal investigation, aided by the Big Three carmakers, of automotive parts counterfeiting.

Hal Helterhoff, special agent in charge of the FBI operations in Michigan, said the raids were based on information developed by an undercover sting operation which has purchased replacement counterfeit parts in the Detroit area for the past 2 1/2 years.

U.S. Attorney Stephen Markman said no arrests were made Thursday, but information will be compiled for likely presentation to a federal grand jury in the next two or three months.

Ken Myers of Ford Motor Co. said the federal actions will send a message that counterfeiting parts is a "high-risk business." But Chrysler Corp.'s Leon Hardiman admitted the operations raided Thursday represent only the "tip of the iceberg" of an underground industry which has sales estimated at $3 billion annually.

Raids were conducted in California, Florida, Georgia, Illinois, Indiana, Maryland, Michigan, Minnesota, New Jersey, New York, Ohio, Tennessee,

Texas, Virginia, and Washington.

Markman said the investigation, dubbed "Operation Partsman," was "one of the highest priorities of the FBI and U.S. Attorney's Office. "Trademark registration fraud is simply one form of theft" and a "problem of growing dimensions."

He said the trade in imitation parts falsely labeled as those of the major U.S. automakers costs as many as 200,000 jobs in legitimate industries. The parts made by these underground operators, authorities said, are almost always shoddy or even unsafe.

Markman said the counterfeit parts business does "enormous damage to the economy of our state and country (and) almost certainly jeopardizes the safety of those who travel our roads and highways."

Items seized in the raids included wheels, wheel accessories, trim, grills and radios, officials said. At one Michigan location, they said, five tractor trailer loads of truck grills and other items were found.

#90018u2152 01/18/1990 ~United Press International

MOSCOW (JAN. 18) UPI - Azerbaijani nationalists called Thursday for an insurrection against Soviet power, and Moscow deployed hundreds of army reservists and trainees to assist troops struggling to quell fighting between Armenians and Azerbajanis in the two southern republics.

President Mikhail Gorbachev, in his first public comment on the worst nationalities conflict during his five years in office, said the clashes ''cause anxiety'' but vowed that the fratricidal fighting will not deter him from building a new Soviet federation.

The death toll from the clashes in the neighoring republics of Armenia and Azerbaijan was reported at 76 and raised to more than 270 the number of those killed since the violent dispute over Nagorno-Karabakh - an Armenian enclave in Azerbaijan - erupted nearly two years ago.

Full-scale battles raged or a sixth day across much of the Transcaucasian region with no signs of abating despite the presence of a 24,000 soldiers, reservists and trainees and the state of emergency imposed by Moscow.

The official news agency Tass said both Armenian and Azerbaijani fighters were taking civilian and military hostages, and riots broke out on the Soviet-Iranian border.

Azerbaijanis used dump trucks to spill rocks and metal rods on roads in persistent efforts to block the deployment of Soviet troops who often

could not respond to distress calls from settlements throughout the embattled republic.

''It is a major disaster,'' Defense Minister Dmitri Yazov said of the virtual civil war between Christian Armenians and Moslem Azerbaijanis on the Soviet Union's southern rim.

Thousands of Azerbaijanis rallied in their capital of Baku, Tass said.

The demonstrators in Baku and at similar protests elsewhere in Azerbaijan ''demanded the resignation of the republic's government and the liquidation of Soviet power in Azerbaijan,'' Radio Moscow's Interfax news service said.

Yevgeni Primakov, alternate member of the Soviet Communist Party's Central Committee and head of one of the two parliament chambers, addressed the Baku rally and implored the city's residents to stop the disorders. The Azerbaijani parliament also appealed for ''wisdom and self-restraint,'' Tass said.

Roving bands in Baku, where pogroms erupted last weekend, continued raids on the homes of Armenians. News reports said 56 of the people dead, most of them Armenians, had been killed in the Baku pogroms.

Most plants and transportation in the city were shut down by strikes.

The exodus of Armenians from Baku quickened as overloaded ferries carried them across the Caspian Sea to the republic of Turkmenia and total number of refugees reached 10,500, according to news reports.

''In the past 24 hours, extremists and hooligans have provoked the population and tried to whip up tension, resorting to violence, looting apartments and thwarting efforts to stabilize the situation,'' Tass said.

A crowd of Azerbaijanis, including women and children, surrounded a military barracks in Baku and demanded the release of Armenians who had taken refuge there, the official government newspaper Izvestia said.

''I regret that our efforts are not sufficient to stabilize the situation '' First Lt. Vladimir Zalutsky, on patrol in Baku, told Izvestia.

#90018u2183 01/18/1990 ~United Press International

(JAN. 18) UPI - It's just another day in orbit for the shuttle Columbia crew... testing the landing systems, finishing experiments, and chatting with President Bush. NASA mission controllers gave the astronauts the afternoon off to sight-see and relax after crew members were awakened

early by a faulty smoke alarm and an UNplanned jet firing. Bush called to congratulate the shuttle fliers on a successful mission. Columbia is due back on Earth tomorrow.

A government report shows inflation last year reached the highest level since 1981... but White House spokesman Marlin Fitzwater says inflation is ''under control.'' Fitzwater welcomed 1989's four-point-six percent inflation rate announced early today by the Labor Department. He says the Bush administration sees NO ''dramatic problem in the immediate future'' about the soundness of the economy.

Colombia is hinting that extraditions to the United States will continue despite a surrender message from a Medillin drug cartel hit squad known as The Extraditables. The group yesterday offered to end its terrorist campaign against the Bogota government in return for promises members will NOT be extradited. Interior Minister Carlos Lemos told reporters today Colombia wants to see whether the drug traffickers will turn themselves in to face justice.

The Chairman of the House Armed Services Committee has come up with a plan that he thinks will cut fat from future defense budgets. Wisconsin Democrat Les Aspin says he's all for the development of new weaponry. But his strategy would stall any new systems at the drawing board until a verifiable threat makes building the weapon necessary. Aspin will expand on his idea in a speech in Chicago tomorrow.

(JAN. 18) UPI - Federal prosecutors in Tampa, Florida, believe they have

strengthened their marijuana smuggling case against Manuel Noriega . Their confidence stems from yesterday's surrender in Panama of Noriega's sole co-defendant in the three-count case. U-S agents expect Enrique Pretelt to testify against the deposed dictator of the Latin American country. Noriega will most likely be tried first in Miami on cocaine racketeering charges.

Also in Tampa, U-S District Judge Terrell Hodges cleared his courtroom this morning to make room for the pool of 100 prospective jurors in a 32-Million dollar international money-laundering case. Among the six defendants in the case is the personal banker of General Noriega . The case stems from a U-S Customs Service investigation called operation C-Chase.

Researchers say coffee is likely will perk up the sexual activity of older people who drink at least one cup a day. A study published in the Archives of Internal Medicine involved 800 people aged 60 and over, including some in their 80s. It found 62 percent of coffee drinkers were sexually active compared with 37 percent of those who do NOT drink coffee.

This one's for all the pet owners out there. Do you talk baby talk to your domesticated pal? How about holiday gifts- do you make a point of getting your furry friend a present? If you answered yes, you're in good company. A poll released today says 91 percent of 10-thousand-500 pet owners surveyed nationwide do the same thing. A common belief among 95 percent of pet owners is that pets can read their moods.

ST. LOUIS (JAN. 19) UPI - Ralston Purina Co. said Thursday first-quarter earnings were $130.3 million, or $2.03 a share, down 35.7 percent from $202.7 million, or $2.99 a share, in the first quarter of 1989.

However, revenues for the period rose to $1.88 billion from $1.68 billion a year ago.

First-quarter results included a one-time gain from discontinued seafood operations, company officials said.

The operating profit for the Human and Pet Foods Division decreased over the same period last year, with pet foods declining on higher advertising and promotion spending behind new products, and flat volume, company officials said.

In the Cereal Division, operating profit was up on higher volume and margins, with volume growth coming particularly from the timing of introductions of new children's cereals.

Operating profit for Ralston's Continental Baking subsidiary increased primarily on higher margins, partially offset by lower volume.

NEW YORK (JAN. 18) UPI - The narrow definition of the nation's basic money supply known as M1 fell $11.7 billion in the latest reporting week, while the broader aggregates M2 and M3 also fell, the Federal Reserve Board said Thursday.

M2 declined $7.3 billion and M3 fell $4.1 billion.

M1, which is made up of cash, checking accounts and NOW accounts - money that is available for immediate spending - rose to a seasonally adjusted average of $793.5 billion in the week ended Jan. 8 from a revised $805.2 billion the week before.

For the latest 13 weeks, M1 averaged $792.4 billion, a 6.7 percent rate of increase from the previous 13 weeks, the Fed reported.

The broader measure of money, M2, averaged an estimated $3,214.8 billion in the latest week, up from a revised $3,222.1 billion. M2 includes M1, plus passbook savings, small time deposits, including money market deposit accounts, consumer money market mutual funds and certain other short-term assets.

M3, which includes M2 plus large time deposits, repurchase agreements longer than one day at banks and thrifts, and institutional money market funds, averaged $4,042.2 billion in the latest week, up from a revised $4,046.3 billion, the Fed said.

#90018u2341 01/18/1990 ~United Press International

NEW YORK (JAN. 18) UPI - Assets of the nation's 488 money market mutual funds increased $5.29 billion to $381.11 billion for the week ended Wednesday, the Washington-based Investment Company Institute reported Thursday.

The institute said broker-dealer fund assets increased $1.41 billion to $161.81 billion, assets of general purpose funds increased $1.85 billion to $126.66 billion and institutional fund assets increased $2.03 billion to $92.65 billion.

''For the second week in a row, increases in assets of money market funds were boosted by seasonal inflows typical for the beginning of the year,'' said Dr. Jacob Dreyer, vice president and chief economist at the institute.

''Interest rate changes were too small to exert a meaningful effect on asset flows,'' he said. ''But falling stock and bond markets might have prompted some investors to shift some of their assets out of long-term into money market funds.''

The Investment Company Institute, a national association of the American investment company industry, reports the assets of money market funds to the Federal Reserve Board each week.

The Donoghue Organization of Holliston, Mass., said Wednesday average seven-day simple yields on money market funds fell to 7.74 percent from 7.80, while 30-day simple yields dropped to 7.88 percent from 7.92.

The average maturity of fund portfolios was unchanged at 38 days.

The Bank Rate Monitor of North Palm Beach, Fla., reported that rates at competing banks and savings and loan institutions mostly declined in the latest week.

The Monitor's index of average rates: money market deposit accounts 6.14 percent, unchanged; Super-Now accounts 5.01 percent, down from 5.02; six month certificates of deposit, 7.66 percent, down from 7.69; one-year CDs, 7.68 percent, down from 7.70; 2 1/2-year CDs 7.65 percent, unchanged; and five-year CDs 7.66 percent, down from 7.67.

The average rate for a one-year adjustable rate mortgage rose to 8.40 percent from 8.38 percent last week.

The average rate on a 15-year fixed-rate mortgage increased to 9.45 percent from 9.42 percent and the average rate on a 30-year fixed-rate mortgage was up to 9.69 percent from 9.66 percent.

The average rate for a four-year automobile loan fell to 12.09 percent from 12.12 percent.

#90018u2380 01/18/1990 ~United Press International

BOSTON (JAN. 18) UPI - The Bank of New England's board of directors met Thursday after federal regulators reportedly overruled a planned sale of more than 40 percent of the assets of the bank's troubled parent to Fleet/Norstar Financial Group Inc.

Meanwhile, Bank of New England Corp. stock continued the plunge it began Wednesday when word first circulated on Wall Street that an impending deal was off. Bank of New England stock lost $1.625 to $4.25 a share Thursday on the New York Stock Exchange Thursday.

The Boston Globe, quoting unnamed sources, reported the proposed purchase would have included some $13.3 billion worth of assets in three major subsidiaries, Connecticut Bank and Trust Co. of Hartford, Bank of New England West in Springfield, Mass. and Maine National Bank in Portland.

Fleet, based in Providence, R.I., would have paid $200 million in cash.

Fleet would have gotten a 24.9 percent stake in the corporation and an option to buy its flagship operation in Boston later, the Globe said.

However, both the Massachusetts acquisitions would be impossible under current law, which limits out-of-state ownership of Bay State banks to New England banking companies. Fleet does not qualify because it owns five banks in New York state.

Neither Bank of New England Corp. nor Fleet would comment on the report. But the Globe said federal regulators oppose such a sale until they receive a better picture of the economic, business and real estate environment in the region.

A Bank of New England spokeswoman, who had no comment on the report of a scuttled sale, said Thursday's directors meeting was a regularly scheduled one and she had nothing to report about it.

Bank of New England Corp. previously disclosed efforts to sell off part of its retail banking network in Massachusetts. Later, after reporting mounting losses in the region's troubled real estate market, the bank sold a leasing operation and appointed a special committee to explore

''potential mergers and sales of assets.''

#90018u2395 01/18/1990 ~United Press International

(JAN. 18) UPI - The White House is trying to make political mincemeat of a Democratic plan for a national sales tax tied to a cut in Social Security taxes. White House spokesman Marlin Fitzwater pounced on the idea by Senator Ernest Hollings. The South Carolina Democrat wants to use 50-BILLION dollars a year from a five percent sales tax to pay for cuts in Social Security and capital gains taxes. But Fitzwater says the Hollings proposal sends the message- ''Look out, older Americans.''

The Bush administration may lift trade restrictions imposed on Czechoslavakia in an effort to help Prague shift to a free market economy. White House spokesman Marlin Fitzwater says a change in Czechoslovakia's trade status with the United States is under consideration, but NO final decision has been made. Czechoslovakia underwent a revolution two months ago that ousted communism and set free elections for later this year.

The good news for the Democratic Party is that its two leaders on Capitol Hill have single-digit UNfavorable ratings. The bad news is that their approval marks areN'T much higher. A published poll of one-thousand-six registered voters gave Senate Majority leader George Mitchell a 16 percent positive rating, while House Speaker Tom Foley garnered a 21 percent plus-mark.

Arizona got its first major winter snowstorm of the year while most of New England basked in UNseasonably warm temperatures. Parts of the South were hit by thunderstorms. About 12 inches of snow fell in Williams, Arizona, west of Flagstaff. Phoenix had about a-half inch of rain. Showers and thunderstorms hit parts of Texas, Louisiana, Arkansas and Oklahoma. But UNusually warm weather prevailed over New England.

#90018u2562 01/18/1990 ~United Press International

OAKLAND, Calif. (JAN. 19) UPI - Clorox Co. Thursday said net income in the second quarter rose 11 percent to $27 million, or 49 cents a share, from $24.4 million, or 44 cents a share, in the same quarter of 1988.

Sales grew to $295.6 million from $272.1 million in the year-earlier quarter.

The maker of bleach and other household products said sales were strong for many of its products, including Liquid Plumber, Match Lite charcoal, Hidden Valley salad dressing and K.C. Masterpiece barbeque sauce.

Earnings were affected by heavy investments in new products, including Clorox detergent and Control cat box litter, which are being marketed in about half of the country.

For the first half of its fiscal year, Clorox said net income rose 9 percent to $72.9 million, or $1.32 a share, from $66.9 million, or $1.25 a share, in the same period of 1988.

Sales increased to $662.5 million from $602.5 million in the year-earlier period.

#90018u2678 01/18/1990 ~United Press International

(JAN. 18) UPI - The Soviet defense minister says the role of army reserves in the troubled Armenian and Azerbaijani republics is to preserve the peace, NOT engage in combat. His announcement follows the authorization by the K-G-B for troops to use force- when necessary- in bitter fighting between Christian Armenians and Moslem Azerbaijanis.

The steady flight to the West of East Germans has made one Bonn official angry. A senior aide to West German Chancellor Helmut Kohl says the emigration of 25-thousand East Germans to the West is largely due to the East German Communist Party stalling reform in an attempt to cling to its fading power.

President Bush is marking his first anniversary in office. Bush checked off a list of his administration's achievements before a pep rally today at the White House, saying the nation is- in his words- ''a kinder and gentler place.'' Bush made NO mention of his much criticized overtures to China.

The medical examiner in Lee County, Florida, says an autopsy on former Michigan state Representative Dennis Dutko was inclusive. The examiner says further tests will be done. The 46-year-old Dutko was found dead in his beachfront condominium yesterday... with an empty bottle of prescription pills by his side.

Police in Gainesville, Florida, say a burglar is behind bars because he lingered at a house he was robbing to play the owner's Nintendo game. The owner of the house came home during her lunch break and found the robber playing with the video game. Neighbors chased down the suspect and held him until police arrived.

-30- 1759
#90018u2995 01/18/1990 ~United Press International
(JAN. 18) UPI - A verdict in the McMartin Pre-School child molestation case... President Bush blasts a Democratic plan to cut Social Security taxes... The Columbia crew wraps up its space mission... And A-T-and-T wants to make up for Monday's long distance snafu... U-P-I has these top stories and more, next.

The longest and most expensive criminal trial in American history ended today when a Los Angeles jury declared the two defendants in the McMartin Pre-School child molestation case innocent of all 52 charges remaining against them.

The verdicts capped a 33-month trial and were met by an audible gasp in the courtroom.

After hearing the verdict, 31-year-old Raymond Buckey broke down and cried. As he was led from the courtroom, his 63-year-old mother, Peggy McMartin Buckey, listened silently as the other verdicts were read.

The Buckey's were among seven original defendants initially charged with molesting 42 youngsters at the then-prestigious pre-school in Manhattan Beach, California. However, only Raymond and his mother went to trial to face prosecution charges that they raped and sodomized 11 children.

In the corridor outside the courtroom, parents of children who attended the school clutched at each other in disbelief.

One father commented- quote- ''The system doesN'T allow us to protect kids. I have NO doubt these children were abused.

His words were echoed by another parent who said he felt the jury had made a mistake.

Defense attorneys argued the children were coerced to believe they were abused and said the original charge of abuse was made by a paranoid woman who claimed Raymond Buckey had molested her two and a-half year-old son.

-30- 1868
#90018u3022 01/18/1990 ~United Press International
(JAN. 18) UPI - President Bush today criticized a Democratic plan to reduce Social Security taxes from six-point-two percent to five-point-one percent in 1991.

New York Senator Daniel Moynihan called for the Social Security break last month in order to stop the Bush administration and Congress from tapping

surplus from the entitlement fund to mask the true size of the federal deficit.

When asked how he intended to make up the 55-BILLION-dollar loss in revenue, Moynihan was vague... but said perhaps through spending cuts or a tax increase.

A similar proposal put on the table by South Carolina Senator Ernest Hollings would raise 50-BILLION dollars through a five percent sales tax to offset reductions in Social Security.

The apparent give-and-take has the White House turning red. Presidential spokesman Marlin Fitzwater says Holling's proposal shows Moynihan's plan to be- quote- ''a wolf in sheep's clothing.''

President Bush is celebrating his first year in office riding a wave of popularity. A poll shows Bush with a 79 percent approval rating among Americans questioned.

Bush marked the anniversay by congratulating his political team for helping- in his words- ''build a better America.'' He also reminded some one-thousand administration appointees in Washington that their ''agenda is UNfinished.''

Bush blames Congress for that UNfinished business, telling lawmakers ''to get moving'' on his anti-crime and capital-gains tax cut proposals.

While Bush was giving his adminstration some pats on the back, a more critical look was issued by People for the American Way.

The liberal group says Bush has let the abortion issue become a ''litmus test'' on much of his domestic politcal agenda.

The group says in its analysis that the president has allowed the ''far right'' of his party to use abortion as a wedge into a broad range of issues.

-30- 2070

#90018u3063 01/18/1990 ~United Press International

(JAN. 18) UPI - NASA often has trouble getting shuttles into orbit as scheduled, but the space agency is now concerned about tomorrow's Columbia landing.

It's possible the 10-day mission will last longer than planned, with the threat of thick fog tomorrow at Edwards Air Force Base in California.

But the shuttle crew is hoping for the best, packing up today and testing

the ship's steering rockets and hydraulic system to set the stage for re-entry.

NASA says if Columbia is NOT able to land tomorrow morning ship does have enough fuel, food, air and water for two extra days in orbit, if necessary.

The primary goal of the 33rd shuttle mission was accomplished last week with the successful launch of a Navy communications satellite. Columbia also will be bringing home a rescued science satellite mounted in its cargo bay.

American Telephone and Telegraph Company is hoping to win over the hearts of disgruntled customers with a Valentine's Day gift.

But A-T-and-T first will have to win the approval of the Federal Communications Commission.

A-T-and-T says it's asking the F-C-C to allow it to offer residential, business and international customers holiday discounts on February 14th-Valentine's Day. According to the plan, the special holiday prices would be discounted an average of 33 percent from regular weekday prices.

The move is to make up for Monday's breakdown in A-T-and-T computers that blocked about 50-Million long-distance calls for nearly nine hours. A-T-and-T says a signaling system foulup caused a traffic jam in the national network.

-30- 1758
#90018u3100 01/18/1990 ~United Press International
(JAN. 18) UPI - Soviet President Gorbachev says the only way to resolve ethnic rivalries between Armenians and Azerbaijanis is through his plan to make the Soviet Union a federation.

His comments come as the pitched battles between Christian Armenians and Moslem Azerbaijanis entered Day Six.

At least 76 people have died in the strife which Soviet political commentators compare to Lebanon.

Soviet media says 11-thousand soldiers and Interior Ministry troops have reached the hot points of combat. Although security personnel initially were ordered NOT to use their weapons, the K-G-B has given the troops the O-K to defend themselves.

A contingent of army reserves have been sent to the troubled southern republics as a peace-keeping force. Moscow says the reservists will mainly act to restore the fence along the 120-mile border with Iran and Turkey as

well as to guard weapons depots.

Romania's ruling National Salvation Front has canceled a referendum on two important issues it promised to put to a popular vote after recentdemonstrations.

A spokeswoman for the 11-member executive committee says the scheduled January 28th vote on the death penalty and the fate of the Communist Party has been shelved due to the difficulty of preparing for the referendum.

Asked how the people could trust an interim government that broke its word a spokeswoman said- quote- ''The Romanian people deserve a democracy and we are learning to govern democratically... We are learning by making mistakes.''

There's also a possibility of a delay in general elections set for April. Romania's fledgling political parties have complained that they do NOT have enough time to prepare for the election.

#90018u3548 01/18/1990 ~United Press International

(JAN. 18) UPI - A Los Angeles jury today found Raymond Buckey and his mother, Peggy McMartin Buckey, innocent of child molestation and conspiracy charges, ending the longest criminal trial in the nation's history. The nearly three-year trial involved the alleged sexual abuse of youngsters at the McMartin Pre-School. The Buckey's were found NOT guilty of the 52 counts remaining against them. The jury deadlocked on 13 other charges. One angry parent reacted to the verdict by saying the court system discounts the testimony of children.

The G-O-P is looking for a way to deflect criticism that it's out of the mainstream when it comes to abortion. But at a Republican National Committee meeting in Washington today, the controversial issue was dropped after being raised briefly. Republicans who favor abortion rights are trying to reconcile themselves to the party's staunch anti-abortion position.

The Navy says the Trident-2 nuclear missile is ''on track'' to be deployed aboard a submarine in March. Since two of its first three test launchings self-destructed last year, the rocket has been redesigned and successfully test-fired twice this week. The Trident program manager says the missile

is accurate within 560 feet when fired four-thousand nautical miles.

The Navy today identified the body of a man suspected in three deaths as that of an enlisted men. The body of Shyam Drispaul was found yesterday in a motel room in Washington State. Drispaul is suspected of killing two fellow sailors as well as a pawn shop clerk earlier this week.

A Virginia mother is trying to force the father of her ailing son to submit to tests to see whether his bone marrow could save the boy's life. But one medical ethics expert says she doubts a court would conclude that a parent's obligation to his child includes submitting UNwillingly to medical procedures.

-30- 2039

#90018u3817 01/18/1990 ~United Press International

(JAN. 18) UPI - The nation's longest criminal trial ended in an innocent verdict today in Los Angeles. The jury in the McMartin Pre-School child molestation case declared Raymond Buckey and his mother, Peggy McMartin Buckey, innocent of 52 charges. A judge declared a mistrial on 13 other counts after the jury declared itself deadlocked on the charges. Some jurors say they believe some of the children were abused, but that the prosecution failed to prove its case.

People for the American Way is finding some irony in the Bush Administration. The liberal group says while President Bush is seen as being more pragmatic on the abortion than his predecessor, the issue is having a greater impact on his administration than it did during Ronald Reagan's. The organization says Bush lets abortion dictate- quoting here- ''much of his agenda.''

A co-defendant of Manuel Noriega pleaded innocent in Tampa, Florida, today to charges of drug smuggling. Enrique ''Kiki'' Pretelt is the ousted Panamanian dictator's sole co-defendant in the Tampa case. Pretelt and Noriega are accused of taking bribes from Tampa smugglers to help ferry marijuana to the United States. His attorney denied reports that Pretelt will make a deal to testify against Noriega.

Scientists said today asbestos found in schools and other public buildings poses little risk for lung disease. A published report states ''asbestos panic'' may be leading to costly and unnecessary removal efforts. The medical experts concluded that asbestos poses a health risk only when unsafely removed. The researchers said they got NO funding from the asbestos industry.

#90018u3828 01/18/1990 ~United Press International

(JAN. 18) UPI - F-B-I agents and police shot and killed two suspected bank robbers trying to flee in a getaway car in New York today. Agents of a bank robbery task force spotted the men as they left a savings and loan in Brooklyn. A spokeswoman for the city's Emergency Medical Services said the F-B-I used a machine gun. A doctor reported one suspect was shot at least six times. Police said the men were armed, but it was NOT immediately known if the suspects returned fire.

An industry group estimates clean air legislation will cost 54-BILLION dollars each year for the next two decades. The Business Roundtable describes the 54-BILLION figure as ''a middle ground of possible requirement'' under various bills moving through Congress. But it says cleanup costs could rise as high as 104-BILLION under a bill now pending in the Senate.

Yitzhak Shamir says he's willing to meet with the leaders of Syria and Iraq- the Arab nations that pose the greatest military threat to Israel. But the Israeli prime minister is sticking with his stance that he won't talk to the Palestine Liberation Organization. Shamir's comments came in a meeting today in Jerusalem with Republican Senator Arlen Specter of Pennsylvania.

Health and Human Services Secretary Sullivan today called on the R-J Reynolds Tobacco Company to cancel a marketing campaign aimed at blacks. Sullivan called Reynolds' strategy ''slick and sinister'' and said the ''trade-off between profits and good health must stop.'' He urged a campaign against marketing harmful products to minorities and the poor. Reynolds plans to introduce a new menthol brand for blacks in Philadelphia next month.

-30- 1842

#90018u4068 01/18/1990 ~United Press International

(JAN. 18) UPI - A Los Angeles jury today acquitted Raymond Buckey and his mother of charges that they molested 11 students at the once-prestigious pre-school where they both taught. The jury deadlocked on 13 of the 65 charges, and the judge declared a mistrial on those counts. Prosecutors apparently are considering re-trying Raymond Buckey on the deadlocked charges. Said one juror- ''everyone in this case was a victim.''

The virtual civil war being waged on the Soviet Union's southern rim continues with NO signs of letting up. Battles continued for a sixth day in the republics of Armenia and Azerbaijan... despite the presence of 24-thousand soldiers, reservists and trainees. In Moscow, President Gorbachev says the fighting will NOT stop him from building a new Soviet federation.

Colombia's Interior Minister says he wants to see verification of a

promise by drug traffickers to lay down their arms in exchange for protection under the law. That promise came yesterday from a group claiming to be the Extraditables, who allegedly do the dirty work for the Medellin drug cartel. But many officials scoff at the apparent request for amnesty. One newspaper says the offer ''could be a Trojan horse.''

The crew of the Columbia is getting ready for the first shuttle landing in darkness since the Challenger disaster. But a morning fog might complicate the pre-dawn landing tomorrow at Edwards Air Force Base in California. The shuttle can last two extra days in space, if need be. In a telephone call today, President Bush congratulated the astronauts on a ''superb'' mission.

#90018u4120 01/18/1990 ~United Press International

(JAN. 18) UPI - Lech Walesa says by the end of the year, there should NOT be any Soviet troops in Poland. The Solidarity founder told the Soviet ambassador today in Warsaw- quote- ''we don't want to throw your soldiers out of Poland. You should have withdrawn them a long time ago.'' The Soviet ambassador says the troop issue will be discussed by the Moscow and Warsaw governments.

Romania's interim government is braced for criticism from angry citizens now that it has reversed a second major decision in less than one week. The government today cancelled a referendum on two key issues, saying it's hard enough to get ready for the country's upcoming general election. Instead of allowing the people to decide on the referendum issues, the government ruled that the death penalty will NOT be re-instated and the Communist Party will NOT be banned.

Two studies show the survival rate is improving for people with the most common AIDS-related pneumonia. The research focused on a type of pneumonia known as P-C-P. One study found the survival rate grew from 39 percent in 1984 to 48 percent in 1987. Researchers did NOT explain the reasons for the improvement. But the increases came after the introduction of the drugs A-Z-T and aerosol pentamidine.

#90018u4354 01/18/1990 ~United Press International

(JAN. 18) UPI - A stunning verdict in the longest, costliest criminal trial in American history... that story and other top news of the day from the wires of United Press Internatioanl.

Jurors who decided the McMartin Pre-School molestation today in Los Angeles say the prosecution failed to prove its case.

In fact, seven of the jurors questioned said they believe some of the

children who attended the school were, in fact, molested. But, in the words of one juror- ''that doesn't mean they were necessarily molested at the McMartin Pre-School.''

Juror Julie Peters says the nearly three-year trial did NOT convince her one way or the other. As she puts it- ''I did NOT see enough evidence.'' But Peters adds the acquittals should NOT be viewed as a victory for the defense. Quoting again- ''I don't think anyone came out of this case a winner.''

While the jury acquitted Raymond Buckey and his mother, Peggy McMartin Buckey, of 52 counts of child molestation, the case may NOT be over.

The jury deadlocked on one count of conspiracy against both Buckeys and 12 other counts of molestation against Raymond Buckey. Prosecutors are undecided on whether they'll re-try Raymond Buckey on the deadlocked counts. His mother will NOT be re-tried.

The nation's longest and most expensive criminal case stemmed from the alleged sexual molestation of 11 of the Buckey's pupils from 1978 until '83.

#90018u4391 01/18/1990 ~United Press International

(JAN. 18) UPI - Polish Solidarity leader Lech Walesa today declared all Soviet soldiers should be out of Poland by the end of the year.

Walesa called for the withdrawal in a public meeting in Gdansk with the Soviet ambassador to Poland. The ambassador agreed the troops are what he called a ''relic of the past.''

Walesa also accepted an invitation to visit Moscow... and he urged an end to current coalminers' strikes, saying they will only cause ''anarchy.''

Czechoslovakia says Prime Minister Marian Calfa resigned from the communist party today. That makes him the first NON-communist head of that country in 41 years.

In Bulgaria, prosecutors put ousted hard-line leader Todor Zhivkov under house arrest today. State-run radio says Zhivkov faces charges of ''gross malfeasance'' and inciting ethnic hatred during his 23-year rule.

And in Bucharest, Romania's new government took the risk of angering the populace by canceling a key referendum this month. The referendum asked whether to outlaw the Communist Party and reinstate the death penalty.

A high government official said there was simply NOT enough time to set up

the referendum.

-30- 1322
#90018u4412 01/18/1990 ~United Press International
(JAN. 18) UPI - Government officials in Colombia seemed to send mixed signals today in response to an apparent offer by drug smugglers to end the drug war.

Colombia's Interior Minister Carlos Lemos said the country is anxious to see if the drug traffickers will live up to a promise to lay down their arms and stop smuggling.

That offer came yesterday from a group claiming to be The Extraditables- those wanted for extradition to the United States for drug crimes.

The message asked for ''legal guarantees,'' seemingly a request for amnesty.

But the message was NOT signed by the alleged leaders of the Medellin drug cartel.

Most government officials greeted the proposal with words of caution and skepticism.

The commander of the Colombian armed forces said the law cannot be negotiated, and he will continue to wage the war on drugs.

A former Cornell University graduate student says a program that shut down about six-thousand computers nationwide was a ''dismal failure.''

Robert Morris told a court in Syracuse, New York, today that he miscalculated while writing the so-called ''worm program'' in October 1988.

Morris testified that he was trying to write a program that would- quoting here- ''spread as fast as possible.'' He says he discovered after a dinner break that the worm had replicated out of control and was clogging computer systems.

24-year-old Morris is the first person to face prosecution under the 1986 Computer Fraud and Abuse Act. He faces up to five years in prison and a 250-thousand-dollar fine if convicted of intentionally introducing a program into a military and research computer network without authorization.

#90018u4446 01/18/1990 ~United Press International

(JAN. 18) UPI - A team of scientists is challenging the government's cleanup of asbestos in the nation's schools. They say the Environmental Protection Agency is spending time and money containing asbestos that does NOT threaten anyone's health.

The study published in the journal Science says the type of fiber found predominantly in U-S schools and buildings is NOT the type that winds up killing people. They say if anything, the cleanup poses unnecessary risks to young workers who may develop asbestos-related cancers later.

University of Vermont Doctor B-T Mossman says the assessment is based on the latest research on asbestos. He noted the study was NOT funded by the industry.

The E-P-A, however, disagreed with the study's conclusions, saying NO research has shown any type of asbestos to be harmless. But an E-P-A official says the agency does agree the public should NOT panic if asbestos is found.

Ivory trade was banned the world over today- except by Hong Kong and at least five nations.

The ban on the trade of tusks is aimed at protecting the scarce African elephant.

Conservationists in London plan an international protest against Britain for allowing Hong Kong to cling to its role as the world ivory trading center for six more months. The extra time is meant to give traders time to sell a reserve of more than 660 tons of ivory.

Conservationists estimate 80-thousand elephants are illegally slaughtered in East Africa every year, and that number will increase dramatically now.

In Washington, World Wildlife Fund officials say China, South Africa, Zimbabwe, Zambia and Malawi have filed for exeptions to the ban.

#90018u4517 01/18/1990 ~United Press International

(JAN. 18) UPI - Witnesses say police and F-B-I agents tried to stop two suspected bank robbers before opening fire in New York with shotguns and automatic weapons. One of the suspects died in the hail of bullets and the other was fatally wounded.

An Israeli human rights group says the Israeli army has failed in its efforts to prevent the killing of children in its confrontations with Arabs. It says nearly one-fourth of the Palestinians killed by the army during the past two years have been children under 16.

Arizona Governor Rose Mofford says she won't run in this fall's election and says she's retiring after 50 years in government. Mofford became governor in April 1988 when former Governor Evan Mecham was impeached and removed from office.

President Bush met with his counterpart from Turkey- Turgut Ozal at the White House today. A White House spokesman says the two leaders discussed a variety of topics, ranging from the Middle East to democratic reforms in

Eastern Europe.

The Pentagon says the United States will officially retire the S-R-71 Blackbird spy plane at a ceremony one week from tomorrow in California. The plane is the fastest and highest-flying jet in the world, but the Air Force says it costs too much to operate.

-30- 1424

#90018u4657 01/18/1990 ~United Press International

(JAN. 18) UPI - NO injuries were reported aboard an Eastern Airlines jetliner that collided with a small plane on the runway at Atlanta's Hartsfield International Airport tonight. But officials say one person was killed and another injured in the crash, which occurred after the twin-engine Beechcraft King Air 100 had landed with engine problems. An Eastern spokesman says the smaller plane suffered ''extensive damage,'' but there was little damage to the Eastern jetliner.

Today's acquittal of two former teachers on molestation charges was a bitter pill for parents of former students at the now closed McMartin Pre-school. One parent whose two children attended the McMartin pre-school in suburban Los Angeles says justice has- in his words- ''got nothing to do with the truth.'' Another parent blamed prosecutors, saying- quote- ''so many mistakes were made in this case.''

Panama's new president is calling for help in the form of a generous supply of American aid to help his nation get back on its feet. Guillermo Endara says high unemployment, a shrinking economy, a nearly bankrupt treasury and other problems all require significant outside help. Endara says his government has formally asked for aid from President Bush.

President Bush is looking back today on one year in office. And Bush basically likes what he sees, citing what he termed the- ''tremendous success'' in Panama and a continuation of- quote- ''the longest peacetime boom in our nation's history.'' But Bush told about one-thousand administration appointees today in Washington that their work and his administration's agenda is NOT yet finished.

-30- 1810

#90018u4662 01/18/1990 ~United Press International

(JAN. 18) UPI - NASA is paying more attention to the weather than usual. The space agency plans to end the 10-day shuttle Columbia mission with a pre-dawn landing tomorrow at Edwards Air Force Base in California. But the landing may be postponed if a forecast of possibly heavy fog proves a reality. The shuttle does have enough supplies on board for two more days in orbit.

The second earthquake in three days shook the coast of northern California this morning, but NO injuries or major damage were reported. In Eureka, California, the quake cracked windows and woke up some folks with a jolt. Geologists pegged the quake at five-point-one on the Richter scale. A quake on Tuesday had similar effects. Officials say it was unrelated to the major earthquake in the San Francisco Bay area in October.

Police officers jammed a funeral home today in Schererville, Indiana, to honor a sheriff's deputy and his wife. The bodies of Gary and Teresa Rosser were found Sunday in a burning car in Gary. Investigators say a suspect arrested Monday admitted to killing the two. Rosser was to testify in a corruption trial against his superior, who was charged last night with interfering with a witness.

#90019b0009 01/19/1990 ~Business Wire

PORTLAND, OR (JAN. 19) BUSINESS WIRE - Central Point Software Inc. Friday announced revenues of $8.2 million for the third quarter of fiscal year 1990, which ended Dec. 31, 1989.

This represents a 143 percent increase over the $3.4 million in revenues for the corresponding quarter last year. Revenues for the first three quarters of fiscal year 1990 totaled $20.3 million. In calendar year 1989 the company shipped 1.1 million units of its utilities programs, PC Tools Deluxe and PC Tools Deluxe for the Macintosh, and its line of Copy II products, worldwide.

Mike Brown, CEO of Central Point Software, attributed the strong third-quarter performance to continued growth of the utility market, international expansion and robust Christmas sales. The company also saw a significant increase in sales from corporate volume-purchase agreements made late in the second quarter.

In addition, the company was awarded a five-year government-sales contract with Unisys for 201,000 units of PC Tools Deluxe. The Unisys contract is part of the U.S. Air Force Desktop III Companion Contract. Central Point is pursuing similar opportunities and expects to continue strong sales in this area. Utilities are only beginning to penetrate the corporate and government markets, making them extremely attractive areas for growth, according to Brown.

''During the quarter we continued to focus on strengthening our management team and building our sales force and international operations,'' Brown said. ''We added a number of key managers to provide the structure for aggressive yet steady growth.'' To oversee the company's expanded operations, Corey Smith was promoted to president and COO. Smith was previously vice president of marketing. The company recently received $5

million from the investment firms of Hummer Winblad Venture Partners of San Francisco; Sequoia Capital of Menlo Park, Calif.; and Hughes Investment Management Co. of Los Angeles. The capital will go toward expanding the company's U.S. and international sales and marketing activities and enlarging its customer base in the corporate/financial market. The funds also give the company the flexibility to take advantage of unexpected market opportunities and to acquire strategic technologies.

Central Point Software Inc., headquartered in Beaverton, Ore., is the unit-volume leader in developing and marketing integrated utility software including data recovery, disk and file management, hard disk backup, and desktop organizers. Founded in 1981, the company has an installed base of over 1,000,000 registered users of PC Tools and PC Tools Deluxe. Its products are translated into several languages, including French and German, and are available in more than 25 countries.

#90019b0010 01/19/1990 ~Business Wire

COSTA MESA, CA (JAN. 19) BUSINESS WIRE - Emulex Corp. (OTC:EMLX), a leading supplier of system and network enhancement products for the computer industry, announced results for its second quarter for fiscal year 1990 ended Dec. 31, 1989.

The company reported net earnings of $32,000, or no cents per share, which compared with $3,816,000, or 33 cents per share, in the second quarter of fiscal 1989. Net sales were $28,691,000, compared with $37,687,000, in the previous year's second quarter.

Chairman and president, Fred B. Cox, said the sharply lower net earnings were the result primarily of lower sales and higher costs and expenses which were offset partially by settlements for insurance claims.

''We have continued to experience slower sales for both storage and connectivity products, which we attribute to competitive factors, particularly in the DEC market and a generally soft business climate. Our earnings were also affected by lower gross margins, related primarily to manufacturing variances resulting from the lower volume of business.''

''Our expenses are running at a higher rate than last year because we have built the development and sales organizations in areas that we believe will give us future growth.''

For the six-month period of fiscal year 1990, net earnings were $208,000, or 2 cents per share, based on revenues of $57,450,000. This compared with earnings of $7,305,000, or 63 cents per share, on revenues of $73,848,000, in the first six months of fiscal 1989, which was a record year.

Discussing the outlook for the remainder of fiscal 1990, Cox said: ''We have made rather significant changes in our sales organization which we expect to provide the focus needed to rebuild revenues in our key market areas. We believe we will have a modest sequential increase in revenues for the coming quarters based on volume shipments of newly introduced products and improved booking activity in our microchip and custom product businesses.''

''However, we are not optimistic about improved earnings in the second-half. Although we are carefully evaluating all expenditures, we are committed to managing for the long-term and continue to make investments in our business to make us competitive and profitable in the 1990s.''

Emulex designs, manufactures and markets high-performance computer enhancement products in the areas of system/user connectivity and storage control.

#90019b0011 01/19/1990 ~Business Wire

ISSAQUAH, WA (JAN. 19) BUSINESS WIRE - Egghead Discount Software (NASDAQ:EGGS) announced Friday that Egghead president and chief executive officer, Stuart M. Sloan, was elected chairman by Egghead's board of directors at the company's regularly scheduled board meeting Wednesday.

Sloan succeeds company founder Victor D. Alhadeff.

An early Egghead investor and director, Sloan joined Egghead as president and chief excecutive officer in February 1989. He is also chairman of Quality Food Centers Inc. (NASDAQ:QFCI), the largest independent supermarket chain in the Seattle area; a director of Security Pacific Bank of Washington; and a principal in Sloan Capital Cos., a private investment firm.

Egghead announced on Jan. 11 that Alhadeff planned to resign as the company's chairman after he submitted a bid to purchase and operate the company's Egghead University subsidiary as a separate company. His resignation was accepted at Wednesday's board meeting.

Egghead Discount Software is the largest volume personal computer software merchant in North America, serving consumers and businesses through its company-operated chain of approximately 205 retail stores, and its approximately 150-person direct sales force.

ARCADIA, CA (JAN. 19) BUSINESS WIRE - Santa Anita Operating Co. has reached a conditional agreement to sell its entire interest in Canterbury Downs, a race track located near Minneapolis, to John Aglialoro, a private investor, president and chief executive officer Robert P. Strub announced today.

The sale is conditioned primarily upon the buyer's ability to arrange financing and to reach a satisfactory agreement with a consortium of banks holding mortgages on the Canterbury Downs property.

Strub said the terms of the agreement call for Santa Anita Operating Co. and its wholly owned subsidiary, Los Angeles Turf Club Incorporated (LATC) to sell for an undisclosed price the company's entire interest in the shares of Minnesota Racetrack Inc., the parent of Canterbury Downs, as well as LATC's consulting contract for the management of racing operations at the track and a promissory note issued by Minnesota Racetrack Inc.

In connection with the transaction, Santa Anita will enter into a 10-year agreement to simulcast its racing events to Canterbury Downs when live racing is not being conducted at the Minnesota facility.

The Santa Anita Companies comprise Santa Anita Operating Co. and Santa Anita Realty Enterprises Inc. Santa Anita Operating Company conducts thoroughbred horse racing at Santa Anita Park through its subsidiary, the Los Angeles Turf Club Inc.

Santa Anita Realty Enterprises, one of the nation's leading real estate investment trusts, owns the Santa Anita racetrack property, a 50 percent

interest in the operation of Santa Anita Fashion Park and a 32.5 percent interest in Towsontown Centre (major regional shopping centers), an interest in an industrial park, three apartment projects, four office buildings and a number of neighborhood shopping centers. The shares of the two Santa Anita companies trade on a ''paired'' basis on the New York Stock Exchange under the symbol ''SAR.''

CYPRESS, CA (JAN. 19) BUSINESS WIRE - PacifiCare Health Systems Friday announced that attorney Gary L. Leary has been appointed to its board of directors.

Leary, who has a private law practice in North Hollywood, also serves as corporate counsel for UniHealth America, the principle shareholder of PacifiCare Health Systems.

According to Samuel Tibbitts, PacifiCare's chairman of the board, Leary ''brings well-rounded expertise to our board. Not only is he an accomplished attorney, but he has had extensive experience in the area of healthcare law.''

Regarding his PacifiCare appointment, Leary noted he is ''looking forward to being affiliated with one of the nation's leading HMOs. PacifiCare is among the most innovative and best-managed companies in its field,'' Leary added.

A graduate of the University of California, Los Angeles, law school, Leary is a member of the American Academy of Hospital Attorneys, National Health Lawyers Association and the California Society for Healthcare Attorneys.

Additionally, Leary served as past chairman of the board for the East Valley YMCA, and as past president of the North Hollywood Chamber of Commerce.

PacifiCare Health Systems Inc. owns and operates health maintenance organizations in California, Oregon, Oklahoma and Texas. The comany has an insurance subsidiary with licenses in 33 states, and an independent utilization review subsidiary.

CYPRESS, CA (JAN. 19) BUSINESS WIRE - PacifiCare Health Systems Friday announced that David R. Carpenter, chairman and chief executive officer of Transamerica Occidental Life Insurance Co., has been appointed to PacifiCare's board of directors.

According to Samuel Tibbitts, PacifiCare's chairman of the board, Carpenter is a ''welcomed addition to our board. Not only does he possess extensive experience in the area of healthcare financing, but he has proven that he knows how to position an organization for continued growth and sustained success.''

On learning of his appointment, Carpenter said he was ''pleased to be part of PacifiCare. This company is one of the nation's best-managed health maintenance organizations and I think it will be setting standards that the entire HMO industry will follow.''

Carpenter was named chairman of Transamerica Occidental Life in 1985 after holding several other positions in the company including chief executive officer, president and chief operating officer.

In addition to heading Transamerica Occidental Life, which is one of North America's ten largest life insurance companies, Carpenter is a trustee of the Museum of Contemporary Art, and is a director of the Greater Los Angeles Partnership for the Homeless, the Independent Colleges of Southern California and the California Medical Center Foundation.

Carpenter has also served on several prestigious mayoral committees including the Los Angeles 2000 Project, the Mayor's Finance Task Force and the Mayor's Blue Ribbon Committee on Affordable Housing.

On a national level, Carpenter is founding chairman of the Washington, D.C.-based Alliance for Aging Research, and was also founding co-chairman of the National Leadership Coalition on AIDS.

PacifiCare Health Systems Inc. owns and operates health maintenance organizations in California, Oregon, Oklahoma and Texas. The comany has an insurance subsidiary with licenses in 33 states, and an independent utilization review subsidiary.

#90019b0042 01/19/1990 ~Business Wire

PORTLAND, OR (JAN. 19) BUSINESS WIRE - Willamette Industries' unaudited results show 1989 earnings of $191,056,000, or $7.52 per share, up 19 percent from the $6.34 per share profit reported in 1988.

Fourth quarter earnings were $51,307,000, or $2.02 per share, up 30 percent over the same quarter in 1988.

Sales for the year were $1,891,824,000, a 10 percent increase from the previous year. These results represent the fourth consecutive year of record earnings and sales.

A strong performance by Willamette's Building Materials Group helped offset the result of softening paper prices during the fourth quarter, according to Bill Swindells, president and chief executive officer.

Particleboard and medium-density fiberboard prices remained strong while exceptionally strong plywood prices, helped in part by a surge in demand resulting from Hurrican Hugo, more than offset weakening lumber prices. The contribution to operating earnings of $33,726,000 was a record for the Building Materials Group.

During the fourth quarter of 1989 and continuing through the start of 1990 some erosion has occurred in the price of linerboard, along with resulting competitive pricing for corrugated containers. Bleached pulp prices have dropped substantially, with some indication that the decline will continue. Fine paper prices, which declined during the third and fourth quarters, show signs of upward strength. Lumber and plywood prices are at normal seasonal lows with some spring demand already apparent. Willamette's particleboard and medium-density fiberboard plants are maintaining strong order files.

Willamette Industries (OTC:WMTT) is an integrated forest products company with 70 manufacturing facilities in 17 states and over 1 million acres of timberland.

PORTLAND, OR. (JAN. 19) BUSINESS WIRE - U.S. Bancorp Leasing & Financial, a subsidiary of U.S. Bank of Oregon, which in turn is a subsidiary of U.S. Bancorp (NASDAQ: USBC) of Portland, Friday announced the completion of the purchase of Machine Tool Finance Corp., a subisidiary of Summit Bancorporation (NASDAQ: SUBN) of Summit, N.J.

The agreement provides for a cash purchase.

Machine Tool Finance Corp., with assets of $250 million, specializes in the financing and leasing of high-quality machine tools throughout the United States from its 14 offices. The company is headquartered in Bridgewater, N.J., with western headquarters in Santa Ana, Calif. The company will operate as a separate subsidiary of U.S. Bancorp Leasing & Financial.

''This purchase confirms U.S. Bancorp's commitment to establishing a national presence in profitable, expanding businesses,'' said C.C. Langer, president of U.S. Bancorp Leasing & Financial. ''With this purchase we now have a network of offices nationwide to provide equipment financing products to the marketplace.

''This acquisition should place U.S. Bancorp Leasing & Financial among the top 20 bank related leasing companies in the nation,'' stated Langer. ''We are extremely excited about the acquisition of Machine Tool Finance Corp. They are an excellent company with top-notch people. Their expertise will allow us to participate in a market niche we are currently not serving.''

Fred Hochman, chairman and co-founder of Machine Tool Finance Corp., expressed his enthusiasm about the acquisition in the following manner, ''U.S. Bancorp's financial strength and reputation combined with our expertise and knowledge of the machine tool industry, should make us a dominant player in this marketplace.''

Gary Shapiro, Machine Tool president and co-founder, stated that: ''Our personnel are very excited about our new strength and versatility. We will have a variety of new products and programs available to the marketplace in a very short period of time.''

With the acquisition, U.S. Bancorp Leasing & Financial will have assets of over $750 million.

U.S. Bancorp is a superregional financial services company headquartered in Portland. Total assets, as of Dec. 31, 1989, are appoximately $17 billion. Subsidiaries include Oregon's largest bank, United States National Bank of Oregon, and U.S. Bank of Washington, National Association Washington's third largest bank, and U.S. Bank of California.

DUARTE, CA (JAN. 19) BUSINESS WIRE - Barry's Jewelers Inc. (NASDAQ:BARY) Friday announced a loss of $7,851,000, or $1.57 per share, for the second quarter ended Nov. 30, 1989, due to a one-time charge to pretax earnings of $13 million ($7,935,000 net of income tax credit) resulting from increased bad debts principally in stores acquired in recent years that are located in Texas and other Southwestern states.

The results compare to earnings of $916,000, or 18 cents per share, in the second quarter of last year. Sales for the quarter increased four percent to $39,533,000 from $38,036,000 in the year-ago quarter. Continuing the recent trend for the company, gross profit margins improved for the quarter over last year.

For the six months ended Nov. 30, 1989, the company recorded a loss of $7,699,000, or $1.54 per share, compared with earnings of $1,061,000, or 21 cents per share, in the first half of 1988. Sales for the six months rose four percent to $71,959,000 from $69,174,000.

According to Terry Burman, president of Barry's, the loss for the most recent period is principally due to the increased bad debt charge, the majority of which occurred in stores acquired in recent years in Texas and other Southwestern states. In addition, recent new financing opportunities will be facilitated by stronger receivable reserves. He further noted a beneficial effect will be improved tax cash flow.

Other events of the second quarter included the acquisition of two stores and the opening of six new locations.

Barry's Jewelers Inc. presently operates 230 stores nationwide under various tradenames, including Barry's, Gold Art Creations, Hatfield Jewelers, A. Hirsh & Son Jewelers, Keidan's Jewelers, Milens Jewelers, Mission Jewelers, The Ringmaker, Samuels Jewelers and Schubach Jewelers.

PHOENIX (JAN. 19) BUSINESS WIRE - Arizona Commerce Bank (ASE:AZB) Friday announced it will consolidate its three Tucson banking offices into one Tucson location.

At the end of February 1990, Arizona Commerce Bank will close its offices at 7355 N. Oracle and at 4400 E. Broadway, concentrating all Tucson banking and administrative activities at its downtown headquarters, 110 S. Church Ave.

''Our central corporate objective - serving the real estate and small-business markets - can be achieved in one Tucson location,'' said F. Lee Jacquette, chairman and chief executive officer of the bank. He added ''Arizona Commerce Bank will focus its statewide activities in a total of three banking offices - one in each of the three major cities in the state Tucson, Phoenix and Mesa.

The Tucson consolidation is expected to enhance operating efficiency and curtail operating expenses,'' Jacquette added.

''Arizona Commerce Bank has moved assertively to streamline its operations to cope with the difficulties affecting many financial institutions in Arizona.''

Arizona Commerce Bank will reduce its Tucson staff by eight positions. Th bank is working with the affected employees to help them find other employment.

Employees were notified of the consolidation plan Thursday, Jan. 18.

Customers who bank at the two locations to be closed soon will receive a letter from the bank describing the consolidation plan. The letter will tell customers how they can meet their banking needs at Arizona Commerce Bank's downtown headquarters.

''We're taking every measure to make this transition as smoothly as possible,'' Jacquette said.

''Arizona Commerce Bank is committed to service,'' Jacquette added. ''We will maintain that commitment as we concentrate our operatons into one Tucson location.''

Arizona Commerce Bank has deposits of $85 million and loans of $56 million.

FREMONT, CA (JAN. 19) BUSINESS WIRE - Alantec has appointed networking industry veteran J. Edward Snyder III, 44, as its president and chief executive officer.

Snyder founded and served for over three years as general manager for the TRW Information Networks Division, which manufactures and markets networking management and interconnection products.

Snyder assumes the post previously held by Michael Kalashian, a founder of the company. Kalashian remains as chairman of the board and executive vice president.

Snyder holds a Ph.D. in engineering from Massachusetts Institute of Technology and an M.S. in electrical/mechanical engineering from Catholic University in Washington D.C.

Prior to his 14 years in engineering and management positions at TRW, he was an engineering duty officer with the U.S. Navy.

Alantec, which specializes in internetworking products for local area networks, markets its products through value-added resellers to managers of large networks within Fortune 1000 companies, government agencies and large universities.

The company, located in Fremont, is privately held. Major investors are TA Associates, Accel Partners, and Dougery, Wilder & Howard.

MILPITAS, CA (JAN. 19) BUSINESS WIRE - LSI Logic Corp. (NYSE:LSI) Friday announced an operating profit of $431,000 in the fourth quarter of 1989 compared with an operating loss of $6.8 million before a restructuring charge in the prior quarter.

The company achieved the profit turnaround by cutting operating expenses and increasing revenues.

The payment of net interest expense caused the firm to report a net loss of $1.7 million, or 4 cents per share, in the fourth quarter. The net loss compared with net income of $5.3 million, or 13 cents per share, in the fourth quarter a year ago. Revenues in the fourth quarter were $138.4 million, up 16 percent from revenues of $119.4 million in the like period the prior year.

For the full year of 1989, revenues set a record at $547 million, up 44 percent from revenues of $379 million in 1988. The company had a net loss of $25 million, or 60 cents a share in 1989, compared with a net profit of $25 milion, or 60 cents a share, in 1988. The loss in 1989 stemmed from a one-time pretax charge of $43 milion, or 79 cents a share, associated with restructuring manufacturing operations in the third quarter.

LSI Logic's book-to-bill ratio in the fourth quarter exceeded 1-to-1, fueled by demand for advanced ASIC's and chip sets from manufacturers of personal computers and workstations. Booking exceeded billings in each geographic market, including the United States, Europe, Japan and Canada.

At Headland Technology, customer orders were strong, especially for 386SX and 286 chip sets used in IBM-compatible personal computers.

LSI Logic Corp., which employs approximately 3,700 people worldwide, is a leading supplier of high-performance semiconductors and subsystems.

The company is the leading designer and manufacturer of ASICs. In addition, the company is the largest supplier of 32-bit RISC microprocessors, including SPARC and MIPS, and a leading supplier of chip sets and graphics products used in IBM-compatible personal computers.

PALO ALTO, CA. (JAN. 20) BUSINESS WIRE - TAB Products Co., of Palo Alto, (ASE:TBP) and Cygnet Systems Inc., of San Jose, Friday announced that they have formed a strategic alliance.

Under this alliance, Cygnet will provide TAB with its high-performance jukeboxes for 5-1/4-inch and 12-inch optical disks. TAB will integrate the Model 5250 and the Model 1800, both of which exchange disks faster than any other jukebox on the market today, with the company's Laser-Optic Filing Systems (LOFS) for PC-based workstations and servers.

''No jukeboxes are faster than Cygnet's,'' said David Turnbull, TAB's director of sales and marketing for the LOFS division. ''By using these jukeboxes, our systems will operate at an even higher level of performance speed and reliability.''

Laser-Optic Filing Systems use laser technology to scan and store documents onto optical disks, providing immediate document retrieval, simultaneous access to document images, an audit trail, security measures and disaster-recovery features.

According to a recent study by Imaging Technology Report, TAB is the probable leader in PC-based standalone systems. TAB's system provides users with a migration path as their applications expand.

Cygnet's Model 5250 has the capacity to hold 25 cartridges and one or two WORM or erasable optical disks, and has a worst-case cartridge exchange time of less than four seconds.

The Model 1800 12-inch expandable jukebox that TAB will use is a high-performance robotic optical disk library with a maximum storage capacity per unit of over 190 billion bytes.

Cygnet Systems Inc., with headquarters in San Jose, is a peripheral products company that designs and manufactures robotic mass-storage devices. The products consist of a family of optical-disk jukeboxes targeted at the high-performance market, with a clear migration path and commmon user interfaces.

TAB Products Co., which has headquarters in Palo Alto, manufactures and markets filing systems, funitures, media storage and computer-support products that are sold worldwide. The company's shares are traded on the American Stock Exchange.

HOUSTON (NOV. 19) BUSINESS WIRE - Powell Industries Inc. (NASDAQ:POWL) announced Friday, following a regularly scheduled board meeting, that Eugene L. Butler was elected to the board of directors.

Butler is a director and the president and chief executive officer of Weatherford International, a Houston based oilfield service company serving the worldwide energy market. A certified public accountant, Butler previously served as chief financial officer of Weatherford.

Thomas W. Powell, chairman of the board of Powell stated: ''I am extremely pleased that Gene Butler will serve on our board. He brings to us much valuable experience in international operations, energy markets in which Powell has a great deal of dependence,and hands on knowledge of corporate finance. I am confident Powell Industries will significantly benefit from his participation.''

The board also elected J.F. Ahart, vice president and chief financial officer of Powell, to its board of directors. Regarding Ahart's election, Powell stated: ''Although Jan Ahart has been with Powell less than one year, he has amply demonstrated his competence.

He has earned the full confidence of the board of directors and is also a valuable addition to the board.'' Powell Industries designs, manufactures and packages electrical generation and distribution equipment.

PHOENIX (JAN. 20) BUSINESS WIRE - The Circle K Corp. (NYSE:CKP) Friday announced that its board of directors has taken two actions in furtherance of its previously announced financial restructuring plan.

The board has elected Robert A. Dearth, 45, as Circle K's president and chief operating officer and as a member of its board of directors.

Dearth, with more than 21 years of experience in finance, management and planning, was most recently vice president and chief administrative officer of United Brands Co. He was chief financial officer of United Brand's John Morrell & Co. subsidiary from 1983 to 1987 and, prior to joining United Brands, Dearth's service includes two years with Getty Oil Co. and seven years with Ford Motor Co.

Robert M. Reade who was Circle K's president resigned that position and from the company's board of directors. Reade will continue to assist the company on a transitional basis in its restructuring effort.

The board of directors also selected Merrill Lynch Capital Markets to serve as the company's financial adviser to assist the board and senior management in Circle K's restructuring.

PHOENIX, AZ (JAN. 20) BIZWIRE - Phoenix-based America West Airlines (NASDAQ:AWAL, PSE:AWA) has adjusted its schedule at Washington National and New York LaGuardia airports.

Beginning Jan. 22, the carrier will offer one daily round trip at LaGuardia Airport. Also, America West will operate two daily round trips at Washington National Airport, beginning Feb. 1.

Peter Otradovec, vice president of planning, said, ''We have been forced to reduce our schedule at these two airports due to the slot problem, but we will continue our efforts to obtain additional slots so we can offer better access to and from the east coast.''

Otradovec concluded, ''It is unfortunate that Wichita and Kansas City are losing some economically vital air transportation because of this slot problem, but with the assistance and cooperation of the Federal Aviation Administration, we have been able to work out a plan where America West is able to maintain at a reduced presence at these airports while the slot problems are resolved on a long term basis.''

#90019b0177 01/19/1990 ~Business Wire

LOS ANGELES (JAN. 20) BUSINESS WIRE - Zero Corp. (NYSE/PSE:ZRO) Friday announced net sales of $48.1 million and net income of $3.5 million, or 22 cents per share, for the third quarter ended Dec. 31, 1989, as compared with net sales of $41 million and net income of $3.5 million, or 22 cents per share, for the third quarter ended Dec. 31, 1988.

The 17 percent increase in net sales was primarily attributable to the inclusion of Air Cargo sales for the full quarter compared to one month in the prior comparable quarter. The increase in cost of sales as a percent of sales was also attributable primarily to the operations of Air Cargo.

According to Wilford D. Godbold Jr., president and chief executive officer of Zero: ''The military market continues flat and the data processing market continues to slow. Many of our larger customers in the data processing market have recently announced significant reductions of workforce and some have stretched out current contracts with Zero.

''In response to these market conditions, Zero has commenced a plan to consolidate its Florida plant into its Massachusetts plant by March 31, 1990, and is focusing on other cost-reduction opportunities. Although we expect to have record sales, we are uncertain that we will achieve record earnings for the current fiscal year.

''Our balance sheet remains very strong with cash and marketable securities of $7.5 million, a current ratio of 3.8-to-1, long-term debt of $3.8 million and shareholders' equity of $112.6 million.''

Godbold continued: ''As a result of market conditions, we expect to see attractive acquisition opportunities that will fit with Zero's growth strategy. Our strong financial position will allow us to take advantage of these acquisition opportunities.''

Zero Corp. is a leading engineer and manufacturer of enclosures, cooling equipment and accessories for the electronics industry as well as baggage/cargo enclosures and accessories for the airline industry.

The company also manufactures the Zero Halliburton and Anvil lines of consumer, industrial and commercial cases.

#90019b0186 01/19/1990 ~Business Wire

EL PASO, TX (JAN. 20) BUSINESS WIRE - El Paso Electric Co. Friday announced that it completed the divestiture of its non-utility operations on Jan. 17, 1990, through the sale of its subsidiaries, Franklin Land & Resources Inc. and PasoTex Corp.

The subsidiaries were sold to an unrelated third party, whose managers have substantial experience in the ownership and operations of diverse business enterprises. The nominal consideration for the sale was based on the combined values of the Franklin and PasoTex investments and was

supported by a fairness opinion from the company's financial adviser, Smith Barney, Harris Upham & Co.

No cash consideration resulted to the company.

The principal investments of Franklin and PasoTex include a specialty steel products manufacturer, an oil country tubular goods end finisher and marketer, a furniture manufacturer and two office buildings and a hotel in El Paso. Franklin, under the new ownership, is expected to continue its efforts to complete the pending negotiations for the sale of the hotel in the first half of 1990.

PasoTex at year-end 1989 disposed of its investments in Commercial Federal Savings and Loan, Omaha, Neb. and a lamp manufacturing subsidiary. The $60 million preferred stock investment in Commercial Federal was sold to an independent third party for nominal cash, a non-recourse contingent promissory note and warrants.

PasoTex' 50 percent interest in the lamp manufacturer, which had been written off in the second quarter of 1989, was surrendered by PasoTex back to the lamp manufacturer without consideration.

The company will record additional losses in the fourth quarter of 1989 of approximately $32 million, net of tax, which includes provisions related to the Franklin and PasoTex stock sale and a $15 million, net of tax, write-off of the balance of PasoTex' preferred stock investment in Commercial Federal.

The company considered a number of factors in deciding to sell Franklin and PasoTex, including the valuations of the investments of Franklin and PasoTex, the future performance prospects for and cash requirements of the investments, and financing requirements of the company's utility operations.

The inability to complete PasoTex' September 1989 agreement in principle with Commercial Federal to sell the preferred stock investment back to Commercial Federal for $32 million in cash, due to the refusal of federal regulators to approve the transaction, significantly affected planning for the cash requirements of the subsidiary operations.

El Paso Electric is an electric utility serving approximately 239,000 customers in El Paso, Texas, and the Rio Grande Valley in Texas and New Mexico. The company has a 15.8 percent interest in each of the three 1,270-megawatt nuclear generating units at the Palo Verde Nuclear Generating Station located near Phoenix.

CUPERTINO, CA. (JAN. 20) BUSINESS WIRE - Cupertino National Bancorp, (NASDAQ/NMS:CUNB) parent company of Cupertino National Bank, Friday announced that Glen McLaughlin has assumed the chairmanship of the company following the expected resignation of James E. Jackson on Jan. 18, 1990.

McLaughlin has been vice chairman for the past four-and-a-half years, since the bank's inception in 1984.

McLaughlin stated: ''Jim Jackson has done a splendid job in founding the bank and guiding it to $100 million of asset growth in just four-and-a-half years. We, as board members, want to retain our freshness and have decided to rotate our Board Committee assignment for our next phase of growth.

''I am flattered to be asked to chair the board and look forward to continuing to work with the goal-oriented management team. In a current football metaphor, Jim Jackson has been the Coach Bill Walsh of the bank. I hope to be the Coach George Seifert and continue our winning ways.''

Jackson, attorney and former Cupertino mayor, said: ''I decided long ago that when we reached $100 million, I would like to step down and take a little breather. We have now completed our most successful year and have topped the $100 million mark. We have an outstanding board of directors, our staff headed by Don Allen is superlative, and Glen McLaughlin is eminently qualified to take over as chairman.''

President Allen expressed his regret at Jackson's resignation, praising his leadership in bringing the bank to its present position. ''Glen McLaughlin will continue to bring strong leadership,'' he noted.

Jackson will remain on the board where he has agreed to continue serving on the Executive Committee and the Trust Committee and will head up the bank's Marketing Committee.

BOULDER, CO. (JAN. 20) BUSINESS WIRE - Netwise Inc. and AT&T's UNIX Software Operation Friday announced they will work together to ensure the interoperability of the Netwise RPC TOOL and AT&T's C++ Language System.

The goal is to define a new series of standard object classes for both products that will make it easier for C++ programmers to develop object-oriented applications for multivendor networks.

Under the agreement, the companies will make sure AT&T's C++ Language System can generate remote procedure call (RPC) specification language source code. The RPC TOOL will accept this input and generate communications code that helps application programmers manage remote object-oriented programming operations across multivendor environments.

The companies also agreed to welcome input on the new object classes from members of the Object Management Group Inc., the world's leading industry consortium focused on the standardization of object-oriented environments. Both AT&T and Netwise are members of the group.

Christopher Stone, president of the OMG, said, ''Distributed computing and object-oriented programming are the two most important trends for the 90s. This kind of cooperation by leading vendors promotes early adoption and faster growth in both areas.

''It advances OMG's goal to help realize the benefits of object-oriented programming across diverse architectures, operating systems and networks.''

David Andrus, CEO of Netwise, said, ''Even with the advanced functionality of the C++ Language System and available Netwise RPC products, there has been no effective way to apply both technologies at the same time to

achieve real interoperability of object-oriented applications.

''This is a significant step toward making that happen faster; and that's good news for software developers who want to begin taking advantage of object-oriented programming and applying it to the client/server model.''

Donald A. Ursem, division manager for AT&T's UNIX Software Operation, said: ''The UNIX Software Operation is firmly committed to fostering creativity in object-oriented environments. We want to assure that virtually any developer is able to access and use this technology as easily as possible.

''Client/server computing and object-oriented products are here. The job now is to develop programming tools that reduce the effort it takes to build distributed applications. OMG plays a valuable role as a catalyst for progress toward this goal, which can only be achieved through cooperation among vendors.''

AT&T's C++ Language System, Release 2.0, is an object-oriented language based on extensions to the popular and portable C programming language. It is marketed in source code form by AT&T's UNIX Software Operation of Morristown, N.J. AT&T's USO is a leading supplier of open systems software, including UNIX System V, to the worldwide computer industry.

The RPC TOOL implements remote procedure call technology to help programmers develop distributed processing software for a variety of hardware, operating systems and networks.

Based in Boulder, Netwise is the leading independent software company producing advanced products that simplify development of client/server applications.

The Object Management Group is the world's leading industry consortium focused on standardization of object-oriented environments. OMG is located in Westboro, Mass., and has over 50 members, including Hewlett-Packard, Sun, Prime, Canon, Groupe Bull and Nixdorf.

SANTA BARBARA, CA. (JAN. 20) BUSINESS WIRE - Digital Sound Corp. Friday

announced it has filed with the Securities and Exchange Commission a registration statement relating to the proposed initial public offering of 3.7 million shares of common stock.

The shares will be offered through an underwriting group managed by Goldman, Sachs & Co. and Montgomery Securities. The common stock is being offered by both Digital Sound and certain selling shareholders. The offering is scheduled for late February at an expected price range of $6.50 to $8.00 per share.

The proceeds from the sale of the shares offered by the company will be used to repay short-term bank debt and for working capital and general corporate purposes.

Digital Sound Corp., founded in 1977, designs, manufactures and markets general-purpose platforms that can operate multiple voice processing applications simultaneously. These voice processing applications currently include not only fully integrated voice messaging but also interactive voice response, text-to-speech sythesis and speaker-dependent speech recognition.

For further information, contact Eugene Hovanec, vice president and chief financial officer, Digital Sound Corp., 2030 Alameda Padre Serra, Santa Barbara, CA 93103, 805/569-0700.

SAN JOSE, CA. (JAN. 20) BUSINESS WIRE - ARIX Corp. (NASDAQ:ARIX) Friday announced a reduction of its workforce by 41 people (approximately 8 percent) as a result of restructuring and consolidations in certain departments.

In conjunction with the reduction of regular positions, ARIX is significantly reducing the number of contract employees and consultants performing work at the company along with elimination or deferment of expenses that will not generate short-term revenue.

The restructuring follows an announcement on Dec. 22, 1989, of a forecast reduction in new orders from Unisys, the company's largest customer.

Gene Manno, ARIX chairman and chief executive officer, said: ''While the decrease in Unisys orders was anticipated, it happened at a much more accelerated rate than expected. It is therefore necessary for us to take these immediate actions aimed at expense reduction in order to bring

expenses in line with anticipated short-term revenue.''

Manno concluded: ''While the next several months may be difficult, many positive actions are underway to improve results. We have just announced the System90/X5 Series which will put us in a very competitive position in the market and yield improved profit margins.

''In addition, we are prioritizing our engineering activities to support a more focused sales effort aimed at addressing short term revenue opportunities. At the same time, we are continuing to invest in programs that will ensure our long term growth and profitability.''

ARIX said it is providing a severance package, counseling and outplacement assistance to affected employees. Employees have been notified of the action.

ARIX Corp. designs, manufactures and markets high-performance UNIX-based symmetrical multiprocessor computer systems that can accommodate more than 500 users in certain configurations. ARIX distributes its systems almost exclusively through domestic and international reseller channels, including original equipment manufacturers, value-added resellers and system integrators.

#90019b0266 01/19/1990 ~Business Wire

SAUSALITO, CA. (JAN. 20) BUSINESS WIRE - Autodesk (NASDAQ:ACAD) announced Friday that it has commenced shipping a version of AutoCAD Release 10 for OS/2-Presentation Manager.

AutoCAD for OS/2 features a full implementation of the leading CAD software, including 3-D wireframe modeling, surface modeling, and a multiple viewport facility supporting up to 16 different views.

This new edition of AutoCAD allows design professionals to take advantage of the full set of OS/2 - Presentation Manager features, including true multi-tasking, the PM graphical user interface, the PM clipboard and Dynamic Data Exchange -- which creates a dynamic link to other software applications.

''The key issue here is OS/2's true multi-tasking environment -- that's what will have an immediate effect on increasing the productivity of most

CAD users,'' said John Forbes, AutoCAD product manager for Autodesk Inc. ''PM's graphical user interface makes AutoCAD easier-to-use, but the ability to run concurrent sessions of AutoCAD, or run AutoCAD and other productivity applications simultaneously, is big news for PC-based CAD users.

''And since AutoCAD Release 10 files are totally portable, any information developed with the OS/2-Presentation Manager version can be shared with any other platform running AutoCAD Release 10 -- without file conversion '' Forbes said.

Expressing his support for the new version, Steve Balmer, senior vice president of MicroSoft stated: ''OS/2 AutoCAD is an example of an engineering application that fully exploits the advanced features of the OS/2 operating system. These features include robust multi-tasking, application integration, integrated networking, and open hardware interfaces.

''We have been specially impressed by OS/2 AutoCAD's ability to directly interface to other OS/2 applications such as MicroSoft Excel. This capability will allow the engineer to accomplish tasks that were never before possible,'' Balmer added.

The OS/2 version is the first release of AutoCAD to support Autodesk's new AutoCAD Development System. ADS is a library of C language subroutines that can be used to create programs that link with AutoCAD or that link AutoCAD to other software applications.

ADS makes it possible to seamlessly integrate AutoCAD with complimentary programs like spreadsheet and database applications, as well as solution-specific programs for such tasks as design optimization, finite element analysis and computer-aided manufacturing.

AutoCAD for OS/2-Presentation Manager is available through Authorized Autodesk Resellers at a suggested list price of $3,000. Existing registered owners of AutoCAD Release 10 will be able to make a platform exchange to this version of AutoCAD for a suggested list price of $250. AutoCAD OS/2 is compatible with either the extended or standard edition of OS/2 and requires version 1.1 or higher of OS/2-Presentation Manager, at least 4 megabytes of RAM and a 80287 or 80387 numeric processor.

Autodesk develops, markets and supports a family of computer-aided design, engineering and animation software products for desktop computers and workstations. For more information, please call 415/331-0356 or GO ADESK on CompuServe.

#90019b0614 01/19/1990 ~Business Wire

HUNTINGTON BEACH, CA (JAN. 19) BUSINESS WIRE - Mercury Savings and Loan Association (NYSE/PSE:MSL), an Orange County, Calif.-based financial institution, Friday announced that the Office of Thrift Supervision, acting under the Financial Institutions Reform Recovery and Enforcement Act of 1989 (FIRREA), has imposed significant operating restrictions on the Association.

These restrictions prevent the Association from undertaking any lending or investment activities except pursuant to legally binding commitments and loans in process existing as of Jan. 18, 1990.

They also restrict the Association from accepting deposits in excess of the insurance limits for FDIC insurance of accounts from paying any dividend and also require the Association to utilize cash flows to reduce the Association's liabilities.

There were also growth restrictions imposed, but the Association had previously moved to ''shrink in size'' as business policy adopted by the board of directors.

Leonard Shane, chairman and chief executive officer of Mercury, said that the Association will move immediately to appeal some of these restrictions in view of the Association's strong cash and liquidity position. The Associaiton will attempt to obtain approval to continue to originate single-family loans up to $500,000 which may be sold in the secondary markets.

The Office of Thrift Supervision letter noted that the Association has substantially insufficient capital and that the Association was designated as an association ''subject to greater restrictions'' under Regulatory Bulletin 3a-1, which implements the general policy of the Office of Thrift Supervision to insure that asset and liability growth of savings associations is prudent, adequately capitalized and conducted in a manner that is consistent with safety and soundness in the interest of the insurance fund.

RB 3a-1 permits the district director of the Office of Thrift Supervision to allow, on a case-by-case basis, associations to make new loans or investments when it is reasonable in the context of the association's operations and does not significantly increase the risk profile for the Association.

EMERYVILLE, CA (JAN. 19) BUSINESS WIRE - Chiron Corp. (NASDAQ:CHIR) and Ortho Diagnostic Systems Inc., a division of Johnson & Johnson, announced Friday that they have received approval to market in West Germany the first test to detect the presence of antibodies against hepatitis C virus (formerly non-A, non-B hepatitis) for screening blood.

The test, the Ortho HCV Antibody ELISA Test System, is an immunoenzyme assay manufactured by Ortho which uses a recombinant viral antigen manufactured by Ortho which uses a recombinant viral antigen manufactured at Chiron.

Ortho has begun selling the test through its West German subsidiary. Ortho is selling the test in other European countries and received approval in December 1989 to market the test in Japan. The two companies filed manufacturing and marketing applications with the United States Food and Drug Administration in August 1989.

''Approval of this test in West Germany marks another milestone in making the world's blood supply safer by reducing the risk of acquiring hepatitis C through transfusion,'' said Gregory B. Lawless, president and chief operating officer of Chiron. ''West Germany is a large and important blood screening market.''

Chiron and Ortho together are developing and marketing a series of tests to screen blood for AIDS and hepatitis viruses. On Jan. 2, they announced an agreement to acquire the AIDS and hepatitis blood screening business of E.I. du Pont du Nemours & Co. The newly combined business will be a major supplier of these tests worldwide.

NEW YOR (JAN. 19) BUSINESS WIRE - S.E. Nichols (ASE:NCL) announced Friday that its Board of Directors has approved management's plan to modify the direction of its discount department store business by placing greater emphasis on certain hardgoods departments and the establishment of a pricing policy based on everyday deep discount pricing rather than promotional pricing.

This new merchandising strategy will significantly focus on pharmacy, health and beauty aids, cosmetics, stationery, video rentals, housewares,

pet supplies, greeting cards, food, snacks and beverages. In addition, the stores will continuously feature ''special buys'' at exceptional prices to the customer.

These opportunistic buys will be an ongoing and important part of the overall retail concept. The company will commence the implementation of this program immediately with the first store to be reopened under this merchandising concept by April 1990 and a majority of its operating stores to be converted by October 1990.

Kenneth A. Davis, president and newly appointed chief executive officer, succeeding Manfred Brecker who remains chairman, stated that these stores will offer our customers an exciting shopping experience with exceptional value at everyday deep discount prices.

Davis explained that the change in merchandising emphasis has resulted from an in-depth evaluation of the company's position in the discount department store business and capitalizes on the company's 50 years experience as a hardgoods merchandiser.

Davis also noted that programs are underway to reduce corporate overheads and that the new merchandising emphasis and pricing policy will enable the company to effect these cost reductions during the transition period. The company will be required to establish significant reserves for the current fiscal year ending Feb. 3, 1990 relating to anticipated costs and expenses associated with this program.

#90019b0636 01/19/1990 ~Business Wire

MONTREAL (JAN. 19) BUSINESS WIRE - McKesson Corp. of San Francisco (NYSE/PSE:MCK) and Provigo Inc. of Montreal announced Friday the conclusion of an agreement whereby Provigo will sell its subsidiary, Medis Health and Pharmaceutical Services Inc., at book value to a new corporation jointly owned by Provigo and McKesson.

The transaction is subject to the approval of appropriate regulatory agencies and is scheduled to close in mid-February.

Provigo will receive at closing approximately C$95 million (U.S. $81 million) in cash, representing 85 percent of Medis' book value, and make a 50 percent equity investment in the new company, representing the balance

of the book value.

McKesson will contribute C$16.5 million (U.S. $14.2 million) for its 50 percent equity interest in the new corporation and arrange financing of the transaction. McKesson can acquire Provigo's shares in the new corporation at any time after the closing and Provigo has the right to require McKesson to purchase its interest three years following the closing date of the transaction at a price related to book value.

Commenting on the transaction, Bertin Nadeau, chairman and chief executive officer of Provigo Inc., said: ''The sale of Medis is consistent with the refocusing of Provigo's business activities on the food and convenience sections announced last October. The agreement with McKesson accomplishes the two objectives we had set for ourselves.

''First, the transaction maximizes value to Provigo's shareholders. Second the fact that the acquiror, McKesson, is a recognized leader in its field ensures a secure future and excellent prospects for Medis and its personnel. Furthermore, the interim arrangement will allow for a smooth transition for Medis' clients and employees.''

Rex R. Malson, president and chief operating officer of McKesson, and Alan Seelenfreund, the company's chairman and chief executive officer, said, ''McKesson has been a major factor in pharmaceutical distribution in the United States since its founding in 1833 and we are excited by this opportunity to invest in the future of Canada's distribution industry.''

Medis, the largest and only nationwide drug distributor in Canada, has annual sales of about C$1.1 billion (U.S. $950 million) while McKesson's drug distribution operation exceeds $6 billion annually, with corporate revenues totaling more than $7.5 billion.

#90019b0640 01/19/1990 ~Business Wire

HUNTSVILLE, AL (JAN. 19) BUSINESS WIRE - Intergraph Corp. (NASDAQ:INGR) Friday announced its new generation of UNIX-based workstations the 6000 Series.

Along with a broad range of configurations, the 6000 Series sets a new standard of price/performance at 10 and 14 MIPS performance levels.

Additionally these systems introduce Intergraph's Extensible Display Geometry Engine (EDGE), a high performance graphics processor.

''EDGE represents a major performance advance in graphics processing and positions Intergraph not only as a competitor, but as a leader in graphics technology,'' according to Loyd Tarver, executive director of Systems Product Marketing.

The 6000 Series incorporates Looking Glass, an icon-based, menu-driven user interface from Visix Inc. ''By offering Looking Glass on its 6000 Series workstations, Intergraph is the first company to offer the power of UNIX with the ease-of-use previously associated only with microcomputer technology.

''This makes the features of UNIX and Intergraph solutions available to both casual and serious users,'' said Maurice Romine, executive vice president, Corporate Marketing. Looking Glass is delivered by Intergraph with all 6000 Series Workstations.

Open Systems Environment

''These new full-function workstations provide major increases in performance at price levels 30 to 40 percent below previous models, placing Intergraph in a leadership position in price/performance,'' said Tarver. ''On top of this open platform is the strongest suite of application software in the industry. And because all Intergraph workstations are binary compatible, the 6000 Series products can be put to work in customer offices immediately,'' he added.

All Intergraph workstations and servers run under the CLIX operating system, Intergraph's implementation of AT&T's UNIX System V, Release 3.1, with Berkeley extensions.

Graphics Performance

The 6000 Series workstations offer two levels of EDGE graphics performance. The first level -- Edge I -- supports eight planes, plus one highlight plane, of double-buffered graphics, achieving the display of 256 colors, plus one highlight color, from a palette of 16.7 million. Graphics primitives are executed by a digital signal processor operating at a peak performance of 30 megaflops. EDGE II provides 24-bit true color supports drawing rates of 400,000 2D vectors/second and 350,000 3D vectors/second, and allows the display of 16.7 million colors from a palette of 16.7 million.

EDGE II also enables realistic rendering with Gouraud shading at 25,000 100-pixel shaded triangles per second.

Configurations to Meet Customers' Requirements

''By offering a modular design that allows for the configuration of a wide range of capabilities and performance levels, Intergraph's 6000 Series can fulfill many diverse user requirements,'' said Tarver. More than 100 configurations are available in the single- and dual-screen InterPro workstations, single- and dual-screen InterAct workstations, and InterServe servers.

The InterPro 6040 workstation includes a 10 MIPS RISC microprocessor, EDGE I graphics, 16 megabytes (MB) main memory, a 355MB disk drive priced at $29,900 (U.S. list), and is available now. The InterPro 6040 can be expanded to offer up to 80 MB of main memory and 2.7 gigabytes of disk storage.

The InterPro 6280 offers 14 MIPS of performance and EDGE II graphics, comes with 16 MB of main memory, a 670 MB disk drive, is priced at $45,900 (U.S. list), and will be available second quarter 1990.

Other InterPro models include: 10 or 14 MIPS of CPU performance, EDGE I or EDGE II graphics, a choice of 19-inch or 27-inch single- and dual-screen displays, and a wide array of peripheral choices, including 180 MB, 355 MB or 670 MB disk drives.

Economics -- a key to productivity

Several user-adjustable furniture options were announced with the 6000 Series including: single or dual workstations, large reference tables, expansion worksurfaces, and accessories such as an adjustable operator chair and a mobile cart for the 6000 Series workstations. These choices offer adjustable keyboard and monitor worksurfaces to meet exacting work requirements.

Ergonomics has always been a key to Intergraph's ability to increase user comfort through customized workstation layouts for specific workflow needs.

The 6000 Series of workstations and servers are on display at Uniforum '90 in Washington, D.C., January 23 through 25.

Founded in 1969, Intergraph Corp. offers a product line ranging from microprocessor modules to workstations and complete application-specific systems for engineering, design, manufacturing and publishing.

A Fortune 500 company, Intergraph is the world's largest company dedicated to developing and manufacturing interactive computer graphics systems, having revenues of $800 million in 1988.

#90019b0643 01/19/1990 ~Business Wire
NEW YORK (JAN. 19) BUSINESS WIRE - Temporary Time Capital Corp. (OTC), a New York City-based corporation providing temporary and permanent placement employment services, announced Friday that its review of financial data for the first six months ending Sept. 30, 1989 is nearing completion and that it expects to report significant losses for the period.

As announced on Nov. 22, 1989, TTCC filed a Current Report on Form 8-K with the Securities and Exchange Commission shortly after filing the company's quarterly report on Form 10-Q for its second fiscal quarter, recognizing that the financial statements contained therein might be inaccurate.

TTCC's Chief Financial Officer, Richard L. Vessa, reported today that the company now anticipates filing an amended 10-Q within the next 10 days. Vessa joined TTCC in early November and was appointed CFO by the Board of Directors, effective Nov. 27, 1989.

#90019b0644 01/19/1990 ~Business Wire
HUNTSVILLE, AL (JAN. 19) BUSINESS WIRE - Intergraph Corp. (NASDAQ:INGR) Friday announced a new generation of servers, the 6000 series.

Included are:

-- InterServe 6000, a low-end server -- InterServe 6105, a mid-range, low-cost, multipurpose server -- InterServe 6505, a high performance, multipurpose server -- InterServe 5200, a top-of-the line, fully configured compute/file server.

According to Bill Whisenant, executive manager, Systems Product Marketing, the ''6000 Series positions Intergraph as the price/performance leader in servers that meet the computing needs of a wide range of user environments from a very small work group to a large department with multiple users.''

Entry Level Server/InterServe 6000

The low-end InterServe 6000, designed for small departments or dedicated plotting needs, includes a 10 MIPS RISC (reduced instruction set computer) microprocessor. Additionally, unlike any other low-end server in the

industry, the InterServe 6000 offers significant expansion capabilities -- up to 80MB of main memory and over three gigabytes (GB) of mass storage. Pricing starts at $19,000, (U.S. list) and is available now.

Mid Range Server/InterServe 6105

Intergraph's mid-range InterServe 6105, for larger departmental computing needs, is offered in a 12-slot configuration for easy expansion and includes a 14 MIPS RISC microprocessor, 16MB of error correcting code (ECC) memory and a 670 MB (formatted) disk drive.

Also, an 8mm, 2.3 GB cartridge tape and a CD-ROM drive are standard with every InterServe 6105. A 5-slot VME card cage option is available. Its entry-level price is $35,900 (U.S. List) and will be available in April 1990.

High Performance/InterServe 6505

Intergraph's high-performance InterServe 6505, is designed for multipurpose, departmental computing. The InterServe 6505 offers a processing power of 20 MIPS. An entry-level configuration includes 64MB of ECC memory and 670MB disk drive.

An 8mm, 2.3 GB cartridge tape and a CD-ROM drive are standard with the InterServe 6505. The 5-slot VME card cage option is also available for this model. It is priced at $79,900 (U.S. List) and will be available for delivery second quarter, 1990.

Top of the Line/InterServe 5200

Intergraph's top-of-the-line InterServe 5200 is a general purpose, high-performance computer system with a balance of CPU, I/O and networking performance. Packaged in a dual-bay (16-slot) configuration, the InterServe 5200 includes a 14 MIPS processor, 80 MB of ECC memory, 3.3GB of disk storage, a CD-ROM drive, a 1600/6250 reel-to-reel tape drive and an 8mm 2.3 GB cartridge tape drive.

The InterServe 5200 provides nine expansion slots for additional memory and communications cards. Main memory and disk storage can be expanded up to 240MB and over 10GB, respectively. The InterServe 5200 is priced at $140,000 and is available now.

#90019b0656 01/19/1990 ~Business Wire

AGOURA HILLS, CA (JAN. 19) BUSINESS WIRE - TRADITIONAL INDUSTRIES, INC. (NASDAQ/NMS Symbol: TRADE) Friday announced results of operations for the fiscal year ended June 30, 1989.

For the fiscal year ended June 30, 1989, revenues increased 32 percent to $62,315,000 as compared to $47,143,000 in fiscal 1988. The Company reported a net loss for fiscal 1989 of $2,724,000, or $0.74 per share, as compared to net income of $4,914,000, or $1.51 per share, primary, $1.21 per share, fully diluted, for the year ended June 30, 1988.

The net loss for fiscal 1989 includes an income tax credit of $1,600,000, or $0.43 per share, resulting from the Company's adoption of the Statement of Financial Accounting Standards 96 (FASB 96).

Commenting on the results, Mr. Arland D. Dunn, Chairman of the Board and Chief Executive Officer, of TRADITIONAL INDUSTRIES, INC., said, ''The Company's loss for the year was effected by a one-time non-recurring expense of $2,700,000 during the fourth quarter, resulting from the Company's settlement with the Federal Trade Commission.

''In addition, Management's time associated with the settlement, as well as obtaining additional financing, delayed implementation of improved collection procedures during fiscal 1989. This was responsible for an additional non-recurring increase in the provision for doubtful receivables. The new collection procedures, which are now being implemented, will enhance our cash position.''

Mr. Dunn further stated, ''Now that the various adjustments and non-recurring expenses which generated the loss are behind us, we anticipate a return to profitability for fiscal 1990.''

Mr. Alan Kane, President of TRADITIONAL INDUSTRIES, INC., added, ''We have implemented a new corporate strategy that will contribute to TRADITIONAL INDUSTRIES' overall strengthened financial condition. To this end, the Company is directing its sales force to improve the quality of its trade contracts receivable by being more selective in its sales effort. We have increased the monthly payment on all our packages to reduce the length of the contract and have discontinued our higher direct cost product lines.''

TRADITIONAL INDUSTRIES, INC. is the nation's leading specialty marketer of photographic and video products and services.

#90019b0660 01/19/1990 ~Business Wire

HONOLULU (JAN. 19) BUSINESS WIRE - Bancorp Hawaii Inc. Friday reported record earnings of nearly $80 million for 1989, the 13th consecutive year of increased earnings.

The company also exceeded $8.3 billion in assets at year-end, up $1.7 billion over 12 months. Bancorp is the first Hawaii-based financial institution to exceed $8 billion in assets.

Net income of $79.9 million was up 6.6 percent over 1988, which included the sale of Bankoh's Waikiki Buliding. Fully diluted earnings per share were $5.33, up 2.7 percent. Excluding the net effects of the gain on the building sale, 1989 earnings were up 28.4 percent and fully diluted earnings per share were up 23.7 percent.

Bancorp Hawaii's assets were up 25.4 percent to $8.3 billion, representing an increase of $1.7 billion during 1989. Loans increased to $4.80 billion up 19.7 percent from last year. Deposits surpassed the $7 billion threshold--another record for a Hawaii-based institution--closing 1989 at $7.02 billion, up 24.1 percent from a year ago.

H. Howard Stephenson, chairman and chief executive officer of Bankorp Hawaii Inc. and Bank of Hawaii, credited this year's record results to the stable interest rate environment and the excellent economic conditions in Hawaii, the Western Pacific region and the Asian markets.

''Results for 1989 were also aided by the strong performance of our subsidiaries. We continue to benefit from the synergies between Bank of Hawaii and Hawaiian Trust in providing a greater range of services to our customers. Bancorp Finance and Bancorp Leasing also reported strong growth in assets and earnings, in both Hawaii and Guam,'' Stephenson said.

Bancorp Hawaii is the largest financial organization in Hawaii, with nearly 80 offices throughout the state, Asia and the Pacific. Its principal subsidiaries are Bank of Hawaii, First National Bank of Arizona, Bancorp Finance of Hawaii and Bancorp Finance of Hawaii-Guam. Hawaiian Trust Co. Ltd. and Bancorp Leasing of Hawaii are the principal subsidiaries of Bank of Hawaii.

#90019b0663 01/19/1990 ~Business Wire

PAWTUCKET, RI (JAN. 19) BUSINESS WIRE - Hasbro Inc. (ASE:HAS) announced Friday that it will redeem on March 1, 1990 all of its outstanding 11.63 percent subordinated fixed rate notes due 1994, which have an aggregate principal amount of $68,720,000.

The notes are redeemable at 100 percent of their principal amount and will cease to accrue interest on and after March 1, 1990. Accrued interest from Dec. 1, 1989 to March 1, 1990 will be paid in the usual manner.

Noteholders are requested to forward their note certificates on and after March 1, 1990 to National Westminster Bank USA, Trustee and Paying Agent for the notes, in order to receive payment of the redemption price.

Hasbro Inc. had 1988 revenues of $1.358 billion. Hasbro's extensive product portfolio includes such well known names as Milton Bradley games and puzzles, Playskool and Playskool Baby products, G.I. Joe, My Little Pony, Transformers action toys, and Cabbage Patch Kids dolls and accessories.

The company has operations in more than a dozen countries and markets its products worldwide.

WILMINGTON, CA (JAN. 19) BUSINESS WIRE - The California Department of Corporations has approved a secondary trading exemption for the common stock of Vector Aeromotive Corp. (NASDAQ:VCAR).

This permits aftermarket trading of Vector Aeromotive common stock in the state of California.

Vector Aeromotive Corp. designs, markets and manufactures the VECTOR, a production supercar that lists at a base price of $250,000. The U.S. street-legal car generates well in excess of 600 hp, according to independent dynamometer tests. Based on these tests, the VECTOR is capable of sustained speeds of more than 200 mph.

Vector Aeromotive is the only American company producing automobiles for the supercar market, which includes Ferrari, Lamborghini and Porsche. To date, 10 VECTOR have been purchased. The first production model rolled off the line this month and was formally displayed at the Los Angeles Auto Show during Jan. 6-14.

LOS ANGELES (JAN. 19) BUSINESS WIRE - Dr. Armand Hammer, chairman and chief executive officer of Occidental Petroleum Corp. (NYSE:OXY), announced that Occidental filed today with the Securities and Exchange Commission a registration statement for the underwritten public offering of 20 million shares of Occidental common stock.

It is expected that the offering will be completed in February. The net proceeds from the offering will be used by Occidental to repay outstanding long-term debt.

Salomon Brothers Inc will serve as lead manager of the offering. Co-managers are: Donaldson, Lufkin & Jenrette Securities Corp.; Merrill Lynch Capital Markets; Morgan Stanley & Co. Inc.; PaineWebber Incorporated; and Dean Witter Reynolds Inc.

Occidental is engaged in oil and gas exploration and development, natural gas transmission, chemicals, agribusiness and coal.

A registration statement relating to these securities has been filed with the Securities and Exchange Commission but has not yet become effective. These securities may not be sold, nor may offers to buy be accepted, prior to the time the registration statement becomes effective.

This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

HOUSTON (JAN. 19) BUSINESS WIRE - CECOS International Inc., the hazardous waste disposal subsidiary of Browning-Ferris Industries Inc. (NYSE:BFI), was notified Friday that the U.S. EPA has denied CECOS' application for a federal RCRA permit for the company's Aber Road treatment and disposal facility in Clermont County, Ohio.

The company said it was disappointed by the action in that the order did not take into account the substantial improvements made at the site and additional documentation submitted to the EPA subsequent to the hearing in June 1988.

CECOS will ask the EPA to reconsider its permit denial order and, failing that, will seek judicial review of the denial. If CECOS is required to take steps to close the facility, as BFI has previously disclosed, the overall cost associated with this event could have a significant negative impact on its results of operations.

Browning-Ferris Industries Inc. is one of the largest publicly-held companies whose subsidiaries and affiliates collect, transport, treat, recycle and dispose of commercial, residential and municipal solid waste and industrial hazardous wastes.

The company is also involved in resource recovery facilities, medical waste services, municipal and commercial sweeping operations, portable restroom services, asbestos abatement and recycling, as well as providing waste services in several foreign countries.

CHICAGO (JAN. 19) BUSINESS WIRE - Bally Manufacturing Corp. (NYSE:BLY) and Mecca Leisure Group announced Friday that they have reached an agreement for Bally to acquire The Clermont Club in London from Mecca.

The purchase price to be paid by Bally will be approximately $50 million.

Bally and Mecca expect to complete the transaction upon the receipt of all gaming approvals from the Gaming Board for Great Britain and U.S. gaming authorities.

Robert E. Mullane, chairman and chief executive officer of Bally, said ''The acquisition of The Clermont Club, considered to be the most prestigious casino in the world, is an important step for the company. The acquisition reinforces our long stated goal to expand Bally operations to all parts of the gaming world.''

Added Mullane, ''Our prior international experience stands us in good stead at this time of increasing internationalism in all of our businesses.''

Bally Manufacturing Corp. is the world's largest casino and gaming equipment company.

DALLAS, TX (JAN. 19) BUSINESS WIRE - Northern Telecom (NYSE:NT) Friday announced a formal program to support used Meridian SL-1 private branch exchange (PBX) systems and equipment.

The Secondary Market Support Program (SMSP) combines elements of existing Meridian SL-1 support procedures with two new requirements.

Under the program, participating Northern Telecom Meridian SL-1 authorized distributors will affix bar-code identifiers to used components. To ensure consistently high quality support to participating end users, authorized SMSP distributors will provide hardware and software maintenance for these systems.

To qualify as an SMSP distributor, a current Northern Telecom Meridian SL-1 authorized distributor will be required to meet a number of requirements specified by Northern Telecom. Among the requirements is a certification process under which the distributors verify the condition of hardware and software to be maintained and supported.

Upon certification, the equipment will be covered by an SMSP distributor maintenance agreement, and the system will be registered by Northern Telecom. This provides the user access to the wide variety of support services available from Northern Telecom and its authorized distributors.

''Our desire is to provide support for all customers with used SL-1 equipment, and we believe a formal support program, based on existing procedures, is the best way to provide this,'' said Pete Ianace, vice president, Marketing, Meridian Business Systems, Northern Telecom Inc.

''As a result of our customers' requests, we want to ensure the support procedures enhance our ability to respond to customer requirements in a multi-vendor environment. The SMSP provides the necessary structure to do this.''

Northern Telecom is the leading global supplier of fully digital telecommunications systems. The company provides products and services to the telecommunications industry, businesses, universities, governments and other institutions worldwide. Northern Telecom Inc., with its headquarters in Nashville, Tenn., employs more than 22,000 people across the country.

NYON, SWITZERLAND (JAN. 19) BUSINESS WIRE - Executive TeleCard Ltd. (PHLX:XTL)(NASDAQ:EXTL) announced Friday the formation of a new subsidiary World Direct Ltd.

Robert Roach, president of Executive TeleCard Ltd. said that: ''World Direct Ltd. was formed to issue a ''World Dirct'' telephone calling card to compete with products such as AT&T's USA Direct and MCI's Call USA.''

The user of the World Direct card will be able to charge telephone calls to his existing major credit card such as Visa, Mastercard, American Express, Diners Club, Carte Blanche, Air Travel Card, JCB, Access, Eurocard, and en Route.

The outrageous sucharges encountered when calling from most hotels and the confusion caused by carrying pockets full of strange coins for pay phones has created a need in the travel industry for new innovative telephone calling products.

The World Direct card is scheduled for release in March 1990 and is expected to be distributed by a select group of companies in the

international travel industry.

Details of the World Direct card will be made public on the introduction date.

Executive TeleCard Ltd. aldo issues at present two other telephone products, the Executive TeleCard International charge card, which is sold by ETL for an annual fee of $50 per year, and the Executive TeleCard International system which is a transparent enhancement to existing credit and charge card such as JCB, First Card AB Swededn, Air Travel Card and selected Visa and Mastercards. The World Direct card will have features that will be different than the other products and directed at a different audience.

RICHMOND, VA (JAN. 19) BUSINESS WIRE - James River Corp. (NYSE: JR) announced in Richmond Friday the formation of a new operating unit, the Fiber Group, to unify the company's interests in the production, procurement and sale of pulp, recycled fiber and woodlands.

Robert C. Martin, formerly vice president, manufacturing and services in the company's Communications Papers Northwest Group in Vancouver, Washington, will head the new organization as vice president and general manager and will be located at the company headquarters in Richmond.

Martin has been with James River and its predecessor companies since 1959. He is a graduate of Montana State University with a B.S. degree in chemical engineering, and holds offices in the Northwest Pulp & Paper Association and the Pacific Coast Association of Pulp & Paper Manufacturers.

James River cited the growing use of fiber as a large, complicated, dynamic segment of its business. The market value of these materials exceeds $2 billion annually and the company wants to focus a unified effort on this aspect of its business.

The new Fiber Group will bring together James River's virgin and secondary fiber production and sales, as well as its present and future pulp mill investments. Included in the group will be the company's deinking facilities, its cogeneration energy facilities, and recently acquired woodlands holdings in Alabama and Maine.

James River Corp. is an integrated producer of pulp, paper, and converted

paper and plastic products, with net sales in its last fiscal year of $5.9 billion.

NEW YORK (JAN. 19) BUSINESS WIRE - Jean Philippe Fragrances Inc. (NASDAQ:JEAN), a distributor of French-made alternative prestige fragrances and the new Regine's upscale department store perfume, announced Friday that it has acquired the assets of the Jordache Cosmetics and Fragrances subsidiary of Jordache Enterprises.

Under the terms of the agreements, Jean Philippe Fragrances acquired a 16-year, exclusive license for Jordache fragrances and cosmetics in the United States and a license to sell worldwide, plus the subsidiary's existing inventory of original, moderate-priced fragrances from women and men, and cosmetics.

The transaction is valued at approximately $6 million payable over the term of the license. In making the announcement, Jean Madar, president of Jean Philippe, said, ''The acquisition of Jordache Cosmetics and Fragrances, which had revenues of about $7 million in 1989, is a logical extension of our existing business in terms of product lines and distribution, and will result in a doubling of our revenues beginning in 1990.

''In addition,'' Madar explained. ''This acquisition leads us into the cosmetics business and opens world markets to Jean Philippe, as well as Jordache's 9,000 customer roster in the United States, many of which are not presently carrying the Jean Philippe lines. And, of course, we expect to introduce Jordache products to our own existing customer base.

''Also, the Jordache fragrance lines enable us to add a mid-priced original fragrance to our present alternative fragrance products for the mass markets and our top-of-the-line Regine's original perfume for the upscale department store customer,'' Madar noted.

''Of special importance to our company,'' Madar added, ''are the world markets we will now be opening for the Jordache line. We are targeting 15 countries in Europe, as well as the Far East, where the Jordache name is especially strong.''

Madar also reported that a new Jordache fragrance for women will be introduced in the second quarter of 1990.

Jean Philippe Fragrances Inc. (NASDAQ:JEAN), based in New York, was founded in 1985 and became publicly-owned in 1988. The company markets an extensive line of French-made alternative prestige fragrances in the United States and Canada and holds the exclusive license for the United States and Canada for the new Regine's original perfume for the upscale department store market.

NEW BEDFORD, MA (JAN. 19) BUSINESS WIRE - NBB Bancorp Inc. (NYSE:NBB), parent company of New Bedford Institution for Savings (NBIS), announced Friday that the directors have approved a payment of a quarterly dividend of $.23 per share payable on Feb. 9, 1990 to all stockholders of record as of Jan. 30, 1990.

Also announced were the financial results for the fourth quarter and for fiscal year 1989.

Robert McCarter, chairman of the bank and the holding company, announced that the bank's provision for possible loan losses in the quarter totaled $3.5 million. The bank also took a write-down of $847,000 against a condominium project that had been developed by Taunton Savings Bank.

NBIS acquired the project when it purchased Taunton Savings Bank in 1988. As a result, net income for the quarter amounted to $315,000 or $.03 per share as compared to $3.9 million or $.42 per share for the fourth quarter of 1988.

For fiscal 1989, net income totaled $11.7 million or $1.24 per share as

compared to $14.1 million or $1.50 per share for 1988.

The provision for possible loan losses of $3.5 million was the result of an extensive review of the loan portfolio. ''A number of the loans being reserved against are current and performing, and management expects they will continue to be so. The total provision for 1989 of $4.4 million, as compared to $530,000 for 1988, represents a prudent approach to any problems resulting from weakness in the Massachusetts real estate market '' said McCarter.

The allowance for possible loan losses as of year end totaled $6.3 million which represents .7 percent of total loans and 71.4 percent of total nonperforming loans.

Nonperforming loans amounted to $8.8 million or .94 percent of total loans as of Dec. 31, 1989 as compared to $5.8 million or .63 percent of total loans at the end of the previous quarter.

Other than the condominium write-down referred to above, total loan charge-offs for 1989 amounted to $265,000, virtually all of which were non-real estate related. At year end, the bank held as other real estate owned, three single-family residential properties with book value totaling $1.0 million acquired through foreclosure.

Stockholders' equity amounted to $214.1 million as of Dec. 31, 1989 with book value per share of $22.69 as compared to $209.4 million with book value per share of $22.26 on the same date last year.

CHICAGO, IL, (JAN. 19) 1990 (JAN. 19) BUSINESS WIRE - Aon Corporation announced today the purchase from Washington National Insurance Company of that company's special markets division for $30 million.

This division issued policies to the members of AAA motor clubs and other affinity groups. Aon also announced at the same time that the team of specialists at Washington National which had been marketing this business has joined the Aon organization.

Patrick G. Ryan, President and Chief Executive Officer of Aon commented, ''Direct response insurance and insurance sold through affinity groups are very important parts of our business. We are a recognized leader in these fields with state of the art computer facilities. Bob Allison, Jim Ferguson, John Allison, Tom Helms and Preston Northcutt, as a team, have been doing a superb job with the AAA motor clubs and other affinity groups. Many of the relationships with the clubs and groups have been growing and expanding for over 60 years and we are confident that, in working with these talented individuals who have now joined us, we can continue to provide excellent services to the insured members and enhance the range of products available to them.''

Mr. Robert Allison added, ''I have great respect for the Aon organization and all of us are confident that the motor clubs and other affinity groups will benefit by having an even wider range of insurance services available to their members than in the past.''

Aon Corporation is an insurance holding company listed on the New York, London and Midwest Stock Exchanges with assets in excess of $8.75 billion. Its subsidiaries have operations throughout the United States and Canada, as well as in Europe and the Pacific.

The principal subsidiaries of Aon Corporation are Combined Insurance Company of America, The Life Insurance Company of Virginia, Rollins Burdick Hunter Group, Inc., Ryan Insurance Group, Inc. and Union Fidelity Life Insurance Company.

TAMPA, FL (JAN. 19) BUSINESS WIRE - Eastern Environmental Services Inc. (NASDAQ: EESI) Friday announced that it has entered into a three year agreement which could provide the company with revenues of more than $2.8 million and at least $1.44 million in asbestos disposal fees at EESI's landfill.

The signing of this agreement comes just four months after EESI's landfill subsidiary obtained a similar agreement which provides it with guaranteed minimum asbestos disposal fees of $1.8 million and as much as $2.8 million over the next three years. Company principals emphasized that these agreements may be terminated under certain conditions.

William C. Skuba, EESI's chairman stated that the company intends to acquire additional landfills and asbestos waste hauling firms during fiscal 1990 to accelerate the growth of its landfill and waste hauling subsidiaries.

EESI is one of the nation's oldest and largest asbestos abatement firms. The compnay has recently purchased a landfill and an asbestos waste hauling firm as part of its ongoing diversification strategy and is a fully integrated asbestos environmental firm providing asbestos removal, surveys, testing, training, transportation and disposal in the Northeast, Mid-Atlantic and Midwest United States.

#90019b0735 01/19/1990 ~Business Wire

DARIEN, CT (JAN. 19) BUSINESS WIRE - Hometown Bancorporation Inc., the parent company of the Bank of Darien, reported pre-tax income before provision for loan losses of $1,012,000 or 55 cents per share for the year ended Dec. 31, 1989 as compared to $668,000 or 36 cents per share for the year ended Dec. 31, 1988.

The company provided $1,243,000 to loan loss reserves in 1989 as compared to $200,000 in 1988 reflecting concerns over the Connecticut real estate market. This resulted in a net loss for 1989 of $261,000 or 14 cents per share. Hometown Bancorporation Inc. earned $371,000 or 20 cents per share during 1988.

During 1989, the company charged off loans of $587,000 against the loan loss reserve. This compared to $16,000 in 1988.

For the three months ended Dec. 31, 1989, the company provided $708,000 to its loan loss reserve, reflecting a $450,000 or 24 cents per share loss during the fourth quarter of 1989. The company earned $191,000 or 10

cents per share during the fourth quarter of 1988.

James E. Banks, president of Hometown Bancorporation Inc. stated, ''The company continued to experience the impact in the fourth quarter of the troubled Connecticut real estate market and management concluded it was both prudent and conservative to provide additional reserves.''

Banks pointed out, however, ''That in relation to total assets of the company, Hometown's capital ratio continues to be one of the strongest in the state at close to 17 percent; allowing the company to successfully work through this difficult economic period.'' During 1989, regulatory capital guidelines required a bank to have a total capital to total assets ratio of 6 percent.

At Dec. 31, 1989, Hometown Bancorporation Inc. had total loans of $56.1 million and total reserves against such loans of $1,013,000 or 1.81 percent of total loans.

Total assets of the company grew $10.2 million or 12 percent to $93.1 million at Dec. 31, 1989. Total deposits grew $10.5 million or 16 percent to $76.4 million.

''The company successfully opened its first branch in Westport, Connecticut in December of 1989. I have been very pleased with the deposit growth to date with total deposits in excess of $4 million at the Westport location,'' Banks said.

WINDLESHAM, ENGLAND (JAN. 19) BUSINESS WIRE - January 18, 1990 -- In The BOC Group's 1989 Report and Accounts it was announced that there would be a number of accounting changes for 1990.

For the guidance of users of our Accounts we attach unaudited schedules which show past published information restated onto the new basis. Annual information is given for four years - 1986 to 1989, and quarterly information is given for 1989. Changes made are:

- TRANSLATION OF THE PROFIT AND LOSS ACCOUNT USING UNWEIGHTED AVERAGE EXCHANGE RATES (IN PLACE OF PERIOD END RATES).

Note: this will simplify the reporting process by reducing the number of differences between the information published under US GAAP and that issued under UK GAAP. It should also remove some of the volatility in

quarterly and annual figures.

- CONSOLIDATION OF OSAKA SANSO, OUR JAPANESE ASSOCIATE, AS A SUBSIDIARY COMPANY FOLLOWING CHANGES IN DEFINITION IN THE COMPANIES ACT 1989.

Note: although the Group does not own a majority of the shares, it exercises a dominant influence. - SIMPLIFICATION OF THE PRODUCT ANALYSIS.

Note: the largest segment, Gases and Related Products, now includes some smaller businesses, such as medical gases, which are aligned to Gases manufacturing although serving a different customer base. The Health Care segment now comprises our four major health care businesses only, Anaquest Ohmeda, Viggo-Spectramed and Glasrock Home Health Care. The third segment has been renamed from ''Special Products and Services'' to ''Vacuum Technology and Distribution Services'' and consists of our two vacuum technology businesses, Edwards High Vacuum and Airco Coating Technology; together with BOC Distribution Services (which includes Transhield, Storeshield and G L Baker).

The BOC Group - based in Windlesham, England and Murray Hill, N.J. - is an international corporation with operations in more than 50 countries around the world. Its principal businesses are industrial gases, health care products and services, and high vacuum technology. BOC's business and trade names include Airco, Ohmeda, Anaquest, Glasrock Home Health Care Edwards High Vacuum, CIG, and Viggo-Spectramed.

#90019b0748 01/19/1990 ~Business Wire
NEW YORK (JAN. 19) BUSINESS WIRE - Fitch Investors Service, Inc. announces the following rating action for Friday, January 19, 1990.

BANK OF NEW ENGLAND RATINGS LOWERED

The rating on senior debentures of the Bank of New England Corporation has been lowered to ''CCC'' from ''BB+'' while the rating on the convertible capital notes of the company's Boston based subsidiary, Bank of New England, N.A. has been lowered to "B+" from ''BBB-''.

In our rating reduction in early December, we cited severe asset deterioration which would require substantial additions to loan loss reserves. This would in-turn result in sizable losses for 1989 as well as sharply lower equity capital ratios.

Since that time, the corporation's subsidiary bank in Hartford has undergone a regulatory examination, focusing primarily on commercial real estate asset quality. The result of this review by Federal banking agencies has been to increase aggregate nonperforming assets to $2.25 billion from the $1.6 billion estimated by the company in December. This rise in problem credits will produce a loss of $1.2 billion for the final quarter of 1989 and a loss of $1.05 billion for the year. These losses follow from the $1.5 billion provision for loan losses to be recorded for 1989's fourth quarter.

Fitch anticipates that heavy loan losses will continue into 1990 which may result in less than all of Bank of New England being acquired, perhaps with regulatory assistance. In light of recent bankruptcies by bank holding companies, a bankruptcy petition by Bank of New England Corporation cannot be ruled out. In the meantime, the bank's strategy is to improve its severely eroded capital position through the sale of up to $6 billion in assets.

Reflecting Bank of New England's massive loss, weak equity capital ratios will further decline to an extremely low 1.6% of assets for December 31, 1989. Even with the prospective sale of assets, the proforma equity capital ratio will only increase slightly to 2% which is well below regulatory capital guidelines. Additionally, prospects for a near term affiliation or business combination with another banking company are presently clouded.

Of immediate concern is Bank of New England's funding and liquidity position. The company lost all funding access to the national markets during the fourth quarter of 1989 and with the most recent events, funding constraints are being felt in local markets. Despite the latter situation, it still appears that the company has been able to augment its liquidity from the inter-bank market and from Federal Reserve borrowings.

The rating reductions reflect the magnitude of the asset quality problems and associated losses, severe reduction in capital ratios, and the company's tenuous funding position.

HARTFORD, CT. (JAN. 19) BUSINESS WIRE - United Technologies Corp. (UTC) Chairman and Chief Executive Officer Robert F. Daniell Friday announced that UTC has adopted a new, more comprehensive code of ethics governing the business conduct of the corporation and all of its approximately 185,000 employees worldwide.

Daniell also announced formation of a new business practices unit to be headed by Frank W. McAbee, who has been elected vice president, business practices.

UTC's executive management heard the announcement today from Daniell at a conference at United Technologies Research Center that was simultaneously telecast to 13 other locations around the country. He then fielded questions from each of the 14 sites.

''We needed a clear, comprehensive code, applicable across the country and around the world, that spells out what we'll do and what we won't do,'' Daniell told employees.

''Over the past few years, a great deal of public attention has been focused on ethics in all aspects of public life, particularly on business '' he said. ''UTC top management and its board of directors decided that public expectations should be addressed by issuing a code of ethics which clearly states the corporation's principles and establishes standards of conduct.

McAbee had major responsibility for drafting the new code of ethics. Former Senator Howard Baker and his law firm in Washington, D.C., worked with the corporation in developing the code. ''Senior management believed

it was important to have someone from outside the company take part in the project to provide objectivity and a fresh perspective,'' Daniell said, ''and Senator Baker has earned bipartisan respect and a reputation for integrity, ability, knowhow, and ethical dealings.''

Every UTC employee will receive a copy of the ethics code and a companion ''Questions and Answers'' brochure. Citing UTC's expanding global business base -- it operates facilities in more than 60 countries -- Daniell said the ethics material has been written in nine languages.

''We can and should take great pride in our reputation, and we must commit ourselves to its continuation as the basis for our future success,'' he said.

''The integrity, reputation, and profitability of United Technologies ultimately depend upon the individual actions of our employees, representatives, agents and consultants all over the world,'' Daniell added.

The establishment of a Business Practices Office as an oversight function, he said, will ensure that the new, comprehensive ethics code is properly administered. The office will consist of a network of business practices officers at each operating unit worldwide. These officers will provide a point of contact for employees to obtain information, guidance and interpretation relative to UTC's standards of conduct, and provide a mechanism for assuring compliance.

McAbee's new position of vice president, business practices, is an expansion of his former duties as vice president-government contracts and compliance. As part of an integrated business practices function, his new responsibilities also encompass the corporation's Ombudsman office and its Dialog program. McAbee is responsible to Daniell for the implementation and administration of the new code of ethics.

A 35-year veteran of UTC, McAbee has served in several executive-level positions, including president of Pratt & Whitney's Government Products Division and president and chief operating officer of UTC's Building Systems Company.

United Technologies provides a broad range of high-technology products and support services to the aerospace, building systems and automotive industries.

SHREWSBURY, MA (JAN. 19) BUSINESS WIRE - The Casual Male Corp., Shrewsbury, Mass., (CMLE), Friday announced that it has reached an agreement in principle with Shawmut National Bank for a new six-month credit facility of up to $14,500,000 secured by inventory and equipment.

On Dec. 13, 1989, the company announced that at its fiscal year end Jan. 28, 1990, it would be in default of its existing loan agreement with Shawmut; the new credit facility replaces the existing loan arrangements. The company has also previously announced that it has engaged Alex Brown & Sons and Financo Inc. as co-investment bankers to seek a buyer for the company's business and additional capital financing.

LOUISVILLE, KY (JAN. 19) BUSINESS WIRE - Leonard V. Hardin, president and chief executive officer of First National Bank of Louisville, has been named to the board of directors of First Kentucky National Corp.

Hardin, 54, joined the corporation in 1953. In 1969, he became a vice president and in 1973, a senior vice president. In 1976, Hardin was made an executive vice president of First National Bank and was responsible for the Corporate Banking Group.

In 1985, Hardin assumed responsibility for the combined Corporate/Commercial Banking Group. He also became a director of First National Bank of Louisville and First Kentucky Trust Co.

With the merger of National City Corp. of Cleveland and First Kentucky National Corp. in 1988, Hardin succeeded A. Stevens Miles as chief executive officer of First National Bank of Louisville.

Active in the Louisville community, Hardin served as chairman of the 1989 Metro United Way campaign, raising a record $17 million. He is a director and chairman of the board of Baptist Hospitals and a director of the Administrative Board of Louisville Baptist Hospitals.

He is a board member of the Regional Airport Authority of Louisville and Jefferson County, the Rotary Club of Louisville, the Louisville Chamber of Commerce, the University of Louisville Alumni Association and Commonwealth Venture Capital.

Hardin is a past president and chairman of the board of the Kentucky Bankers Association and an executive board member of the Old Kentucky Home Council-Boy Scouts of America.

First Kentucky National Corp., a $5.2 billion bank holding company, serves eight communities in Kentucky and southern Indiana through its affiliate bank network.

First Kentucky National is a subsidiary of National City Corp., a $22 billion bank holding company. With First Kentucky National, National City offers a wide range of financial services including credit card and retail payment processing, leasing, merchant and mortgage banking, venture capital, and small business investment, as well as trust and investment management.

National City Corp. stock is traded on the New York Stock Exchange under the symbol ''NCC.''

NEW YORK (JAN. 19) BUSINESS WIRE - Philip Morris U.S.A. recently appointed

six executives to senior management positions.

Vincent J. Buccellato is appointed senior vice president, sales. Buccellato had served as vice president, sales since 1983. Based at the company's corporate headquarters in New York City, he is responsible for overseeing the direction of trade and sales development and field sales for Philip Morris U.S.A. Buccellato will continue to report to Ehud Houminer, president and chief executive officer.

David E.R. Dangoor is appointed senior vice president, marketing. Dangoor had served as vice president, marketing since 1987. Based in New York City, he is responsible for overseeing all strategic brand management and marketing for Philip Morris U.S.A. cigarette brands, including advertising marketing research, planning, promotions and events. Dangoor will continue to report to Houminer.

Harry G. Steele is appointed senior vice president, finance and administration. Steele previously served as vice president, finance and administration.

Barry J. Case is appointed vice president, employee relations. Case previously served as director, employee relations. Based in Richmond, Va. he is responsible for directing employee relations activities for Philip Morris U.S.A. employees and management at the company's facilities in Richmond; Louisville, Ky.; Cabarrus, N.C.; and the national sales force, insuring that the organizational needs of all groups are met. Case will continue to report to Fred J. Laux, senior vice president, human resources.

James L. Charles is appointed vice president, research. Charles previously served as director, research. Based in Richmond, he is responsible for analytical, biochemical, chemical and physical research activities for all Philip Morris U.S.A. cigarette products. Charles will continue to report to Kenneth S. Houghton, vice president, research and development.

William P. Taylor is appointed vice president, engineering. Taylor had served as director, engineering since 1987. Based in Richmond, he is responsible for overseeing the direction of engineering activities to support Philip Morris U.S.A. cigarette manufacturing operations. Taylor will continue to report to Mark A. Serrano, executive vice president, operations.

CHICAGO (JAN. 19) BUSINESS WIRE - The Illinois Insurance Department hearing on the proposed takeover of B.A.T Industries p.l.c by Sir James Goldsmith's Hoylake Investments and the subsequent sale of Farmers Group, Inc. to his investment partner, Axa-Midi Assurances of France, will resume at 9:45 a.m. on Monday, January 22, at the Peat Marwick Conference Facility at 205 N. Michigan Ave. in Chicago, after a four-week break.

Illinois is one of nine states in which a member of the Farmers Group of Companies is headquartered and which must determine whether the acquisition of B.A.T Industries by Goldsmith, and the subsequent sale of Farmers to Axa-Midi, would be in the interest of policyholders.

Illinois is one of five states including Idaho, California, Oregon and Washington which have scheduled hearings on this matter. Four states, Kansas, Ohio, Arizona and Texas, have not yet scheduled a timetable.

Hearings in Illinois in November and December focused on whether Goldsmith's takeover vehicle, Hoylake Investments, could be a suitable owner of one of the nation's leading insurers in the event that its plan to sell Farmers to Axa-Midi failed. The examination of Hoylake is expected to conclude next week, and then the hearings will focus on whether Axa-Midi would be a suitable owner of Farmers.

''One only has to look as far as this morning's newspaper accounts of the Campeau crisis to understand the potential for disaster in Axa's intention to finance a $4.5 billion all-debt takeover of Farmers, a company of relatively the same size, while at the same time selling off $1 billion of its affiliate's assets to take a position as one of the largest investors in Goldsmith's takeover vehicle,'' said Jeffrey C. Beyer, vice president of Farmers Group.

''Further, Axa-Midi's plan to take 75 percent of Farmers' earnings as

dividends to meet Axa's heavy debt obligations -- more than twice the average for U.S. insurance companies and over double that paid by Farmers under current arrangements -- would deprive Farmers of funds targeted to reinvestment and building the company's long-term financial strength.''

''While Axa-Midi is likely to assert that it has broad experience in the U.S., its track record here is questionable,'' continued Beyer. ''It owns only a very small reinsurance company and has no U.S. experience in Farmers' main lines of property/casualty insurance. Axa-Midi recently sold its other operation in the U.S. -- a life insurance company that under Axa's management, was stripped of its Best's rating and lost millions of dollars before it was divested.''

NEW YORK (JAN. 19) BUSINESS WIRE - A subsidiary of Oppenheimer & Co. Inc., the investment banking and securities brockerage firm, has agreed to acquire the interest in two health care venture capital investment funds from a subsidiary of Integrated Resources Inc., the diversified financial services company.

The funds, which were established in July 1987 and have total assets in excess of $50 million, have made approximately twenty-five investments in

health care products and service companies.

As a result of the acquisition, three senior fund managers will move to Oppenheimer. They are John Balkoski, Phillippe Sommer and Howard Wachtler.

According to Stephen McGrath, executive vice president in charge of investment banking at Oppenheimer, ''These funds offer a strong strategic fit with Oppenheimer's existing health care investment banking business headed by Tom Weinberger. They will allow us to provide the health care industry with start-up and later stage mezzanine financing to complement our traditional expertise in initial public offerings and mergers and acquisitions.''

RACINE, WI (JAN. 19) BUSINESS WIRE - Twin Disc, Incorporated reported decreased sales and earnings for the second fiscal quarter and six months ended December 31, 1989, primarily as a result of a slowing in the pleasure craft marine market as well as higher manufacturing costs, Michael E. Batten, chairman and president-chief executive officer, announced Friday.

Consolidated net earnings for the quarter totaled $460,000, or $.16 per share, compared with $2,653,000, or $.89 per share, a year ago. Net sales for the quarter were $37,473,000 compared with $46,761,000. For the six month period just ended, net earnings were $608,000, or $.21 per share, compared with $4,613,000, or $1.55 per share, in the same period last year. Sales for the latest six months were $75,390,000 compared with $85,396,000 last year.

Commenting on the results, Mr. Batten said, ''Domestic sales for the quarter were 24 percent below the same period last year and also were down from the seasonally low first quarter. With few exceptions, domestic demand continues to be weak, primarily in the light construction equipment and marine markets. Sales from our manufacturing operation in Belgium were 32 percent behind those recorded a year ago and overseas operations in total were off 22 percent for the quarter.

''The conditions present in the first quarter have persisted, with profitability being adversely affected by a combination of reduced

manufacturing efficiency and lower production volume which has resulted in unabsorbed overhead costs. Also during the quarter, productivity was adversely affected by an unsuccessful union effort to organize our hourly employees in Racine.''

The backlog of orders to be shipped in the next six months stands at $61 million, even with the level reported at the end of the last quarter but down 35 percent from the figure reported a year ago.

New order rates remain slow and the outlook for fiscal year 1990 is for continued lower sales and reduced profitability.

LOS ANGELES (JAN. 19) BUSINESS WIRE - RCM TECHNOLOGIES, INC. (NASDAQ Symbol: RCMT)(BSE Symbols: RMT, RMTU) Friday announced operating results for the fourth quarter and year ended October 31, 1989.

For the fourth quarter ended October 31, 1989, revenues increased 25 percent to $6,347,333 from $5,086,863 reported for the fourth quarter ended October 31, 1988. Net loss for the quarter ended October 31, 1989

was $199,425, or $0.02 per share, compared to a net loss of $2,317, or $0.00 per share, reported in the same period a year ago.

Revenues for the year ended October 31, 1989 increased 24 percent to $22,682,238 from $18,314,090 for the year ended October 31, 1988. Net loss for the year ended October 31, 1989 was $774,166, or $0.06 per share, compared to a consolidated loss of $637,974, or $0.05 per share, for the year ended October 31, 1988.

Intertec Design, Inc., the Company's engineering, technical and personnel service, reported a net profit of $311,815 which represents a 27 percent increase for the year ended October 31, 1989. IDI Temps, an operating division of Intertec Design, Inc., continues to be the subsidiary's fastest growing division with sales growing by 112 percent during the year ended October 31, 1989. During fiscal 1989, the Company opened six new IDI offices and management anticipates further expansion in 1990.

Intertec Design, Inc. continues to provide RCM TECHNOLOGIES, INC. with ample operating cash flow to sustain other Company activities. RCM TECHNOLOGIES, INC. reported a loss for Marine and Mechanical Services Corp. and RCM Industries Corp. Research and development, marketing and patent costs related to the RCM ''System 99'' represent a majority of the losses.

For the fiscal years ended October 31, 1989 and 1988 the weighted average number of shares outstanding were 14,181,315 and 13,069,056, respectively. The increase of 1,112,259 shares reflects the issuance of stock from the successful exercise of Company warrants and the sale of stock to a fund in a private placement.

RCM TECHNOLOGIES, INC. is involved in the development and marketing of its patented ''System 99'' which is designed to control hazardous emissions from smoke stacks, a major cause of acid rain. RCM also provides professional engineering and technical services for major corporations in aerospace, chemical and industrial manufacturing.

#90019b0820 01/19/1990 ~Business Wire

BURLINGTON, MA. (JAN. 20) BUSINESS WIRE - This afternoon, Rule Industries announced operating results for the three months ended Nov. 30, 1989:

Rule Industries Financial Highlights

	Quarter Ended Nov. 30, 1989	1988
Revenues	$11,398,000	$9,014,000
Operating income	905,000	744,000
Net income	63,000	92,000
Earnings per share	3 cents	4 cents
Average shares	2,311,207	2,332,488

In this particularly weak quarter for marine product revenues, consolidated revenues rose over 26 percent as a result of the Silver Metal Products acquisition and a 12 percent internal growth of hardware product revenues. However, this revenue shift to certain lower margin products negatively impacted this weak quarter's earnings.

In December, the company disclosed that it had acquired a 13.1 percent investment interest in Datamarine International Inc. and indicated that additional shares may be purchased in the future. Rule further indicated that it would accept board representation, if offered by Datamarine.

Rule Industries is a diversified manufacturer of products for marine and hardware markets. Through Phillips Screw Co., a wholly owned subsidiary, Rule licenses patents and trademarks on threaded fastening devices throughout the world.

NEW ORLEANS (JAN. 20) BUSINESS WIRE - Tidewater Inc. (NYSE:TDW) announced

Friday that the board of directors of the company has declared a cash dividend of $8.2625 per share on its outstanding shares of Convertible Adjustable Preferred Stock (CAPS), Series 494.

The dividend represents the five cumulated quarterly dividends on the CAPS and covers the dividend payment periods beginning Aug. 1, 1988, and ending Oct. 31, 1989, for which dividends were in arrears.

All holders of record at the close of business on Jan. 31, 1990, will be entitled to receive a cash dividend of $8.2625 per share of CAPS. The dividend is payable on Feb. 15, 1990.

This dividend is in addition to the previously announced current quarterly dividend of $1.50 per share which is payable on Feb. 1, 1990, to the holders of record on Dec. 31, 1989. After payment of the dividends, the company will be current on all dividends on the CAPS.

The declaration of the arrearage dividend was facilitated by the company entering into an agreement with Torray & Co. Inc., the holder of 74,700 (88.5 percent) of the outstanding 84,400 shares of CAPS, providing for Torray & Co. to convert, as of Jan. 31, 1990, all of its shares of CAPS into Tidewater common stock.

In addition, Torray & Co. agreed to waive the cash arrearage dividend of $8.2625 per share in exchange for receiving additional shares of Tidewater's common stock (with a market value of $8.2625 multiplied by the number of CAPS shares held by Torray & Co.) contemporaneously with the conversion of its CAPS shares.

John P. Laborde, chairman of the board, president and chief executive officer of Tidewarter, stated: ''Tidewater is pleased to be in a position to pay the dividend arrearage. The payment enhances the company's opportunities to raise capital, including new equity, which were previously hindered by the existence of the arrearage.''

Tidewater Inc. owns and operates one of the largest fleets of vessels supporting the international offshore oil and gas industry and one of the largest fleets of gas and air compressors in the United States. The company also has modest interests in domestic oil and gas operations, real estate and insurance.

#90019c0097 01/19/1990 ~Comtex
WASHINGTON (JAN. 19) COMTEX - The 8-K report filed at the SEC shows on Jan. 16, 1990, U.S. Energy Corp. and its subsidiary Crested Corp. entered into a letter of intent with Kennecott Corporation of Salt Lake City. The joint venture calls for the further exploration, development and

production of their uranium properties in South-Central Wyoming.

U.S. Energy Corp.'s Jackpot deposits in Wyoming are currently estimated to possess in excess of 50 million pounds of uranium oxide, and an application with the state of Wyoming to mine these deposits is being processed presently. Mining properties of Kennecott and Crested in the vicinity of the Jackpot deposits also contain substantial uranium deposits.

Within the 8-K filing, John L. Larsen, president of U.S. Energy and chairman of Crested, stated "If the mineralization encountered in previous widespaced drilling proves to be continuous [...] these deposits could develop into one of the largest known resources of uranium in the United States."

Kennicott gained a sixty-day option to conduct a due diligence investigation for a price of $1.00 million. During this time, the three parties will negotiate, according to the letter of intent, a definitive agreement. At closing, Kennicott will pay an additional $24.00 million, plus $20.00 million in four equal payments beginning one year after the agreement and $25.00 million out of its joint venture earnings all for 50% of the properties covered by the joint venture.

Outside experts will be assessing the value of the Crested and U.S. Energy properties involved.

Kennecott will control the management commmittee and U.S. energy will be the initial operator for the venture. Mr. Larson speculates that the venture could become the largest uranium producer in the U.S.

#90019c0098 01/19/1990 ~Comtex

WASHINGTON (JAN. 19) COMTEX - The 8-K report filed at the SEC shows as of Jan 18, 1990, Cray Computer Corp. has begun negotiations with GigaBit Logic Inc. of Newbury Park, California. The talks are toward a definitive agreement by Cray to acquire certain assets of GigaBit in exchange for 1.65 million Cray shares plus surrender for cancelation of 200,000 of Class A prefered stock of GigaBit. The equipment in question consists of production facilities and rights for manufacture of gallium arsenide logic circuits for Cray's use in development of its Cray 3 supercomputers.

A definitive agreement is expected to be reached no later than Feb. of 1990. The use of Cray's common stock in the transaction is contingent upon an awaited ruling from the IRS. Without a beneficial ruling, Cray may elect not to continue with negotiations or to make its payments in cash.

TOKYO (JAN. 19) - Toyota Motor Corp. president Shoichiro Toyoda said Friday that the market for motor vehicles in East Asian countries was likely to triple in the next 10 years, out-performing all other regions.

Mr. Toyoda also told reporters that Toyota production facilities in the Asian region were expected to start exchanging parts and components in the coming decade, some of which would be imported into Japan.

"At present, we have production facilities in Thailand, Malaysia, Indonesia and the Philippines," he said. "We expect to be moving into exchanging components between various companies, especially in those areas in which they excel. We also hope to import some of these components into Japan."

Mr. Toyoda said that demand for cars in East Asia was likely to "triple by the end of the century" provided that frictions which dominated the global car industry in the past decade were replaced by cooperation.

"The future is not necessarily clear," he warned, adding that the coming decade promised to be "especially complex and challenging" given the increased potential for protectionism and regionalism.

"Governments will have to get together on goals and policies."

#90019d3040 01/19/1990 ~French/German News Agency

MADRID (JAN. 19) - Emilio Ybarra has been elected executive president of

Banco Bilbao Vizcaya (BBV) after the Bank of Spain intervened to end an acrimonious battle for the top post at Spain's leading private bank, banking sources said Friday.

The battle broke out following the death on December 12 of Pedro Toledo, one of the bank's two co-presidents.

The bank had been headed by two presidents since its formation in 1988 by the merger of Banco de Bilbao and Banco de Vizcaya, with one coming from each side.

Following the death of Mr. Toledo, Banco de Vizcaya leaders said they would replace him with another Vizcaya exectuve, Alfredo Saenz, in line with the terms of the merger agreement.

But the Bilbao side rejected this, saying that the bank should now have a single president, Sanchez Asiain, who had been Mr. Toledo's co-president.

The dispute became so bitter that some observers feared the merger could be dissolved, and BBV finally asked Bank of Spain governor Mariano Rubio to intervene.

This resulted in the selection overnight of Mr. Ybarra, 53, who has been with Banco de Bilbao since 1964.

#90019d5840 01/19/1990 ~French/German News Agency
PARIS (JAN. 19) - Rhone-Poulenc has agreed in principle to take over the pharmaceutical group Rorer of the United States for 3.2 billion dollars, but the deal could come to grief over an insider trading probe.

The deal, announced by Rhone-Poulenc in Fort Washington late Thursday, would make Rhone-Poulenc one of the world's 10 biggest pharmaceutical groups, as well as giving it a foot hold in the the United States - the world's biggest market for medicines.

Under the agreement, Rhone-Poulenc would hold a stake of about 68 per cent in a new company taking over all Rorer Group's operations and almost all the international pharmaceutical business of the French group except for veterinary products.

Rorer's current shareholders would hold the remaining 32 percent.

But the powerful Securities and Exchange Commission (SEC) said Thursday it had filed an insider trading complaint in connection with the investigation, although it absolved both Rorer and Rhone Poulenc of responsibiity.

The SEC said confidential information about the proposed deal had been leaked before the agreement was made public, It said three companies were suspected of involvement, one based in Monaco, another in Greece and a third in Lebanon, as well as a Geneva investor Robert Rossi.

In Paris on Friday, Rhone-Poulenc executives said they were not worried. "All the group's negotiators signed secrecy pledges and we're ready to answer any questions," the executives said.

Under the proposed deal, Rhone-Poulenc will hold a majority of the seats on the new company's board, which will however be chaired by Rorer's current chairman Robert Cawthorn.

#90019k0103 01/19/1990 ~Japanese News Agency

TOKYO (JAN. 19) KYODO - ALL SIX MAJOR JAPANESE AUTOMAKERS FORECAST FRIDAY THAT 1990 WOULD BE ANOTHER GOOD YEAR FOR DOMESTIC SALES.

THE THREE AUTOMAKERS VYING FOR THIRD PLACE IN THE LINEUP, HONDA MOTOR CO., MAZDA MOTOR CORP. AND MITSUBISHI MOTORS CORP., MADE A BULLISH FORECAST ON DOMESTIC SALES, PREDICTING A 9 TO 12 PERCENT GROWTH IN THEIR DOMESTIC SALES IN THE COMING YEAR.

HOWEVER, MOST MAKERS PROJECTED THEIR EXPORTS IN 1990 WOULD REMAIN ABOUT ON A PAR WITH THE PREVIOUS YEAR'S LEVEL BECAUSE OF AN ACCELERATED GROWTH IN THEIR OVERSEAS PRODUCTION.

TOYOTA MOTOR CORP. FORECAST ITS DOMESTIC SALES IN THE COMING YEAR AT 2.48 MILLION VEHICLES, UP 8 PERCENT FROM THE PREVIOUS YEAR. THE TOP JAPANESE AUTOMAKER PROJECTED JAPAN'S TOTAL DOMESTIC DEMAND IN 1990 AT 5.8 MILLION VEHICLES, NOT INCLUDING MINIVEHICLES WITH ENGINES OF UP TO 660 CC, AND HOPES TO BRING ITS MARKET SHARE BACK TO THE 1988 LEVEL OF 42.8 PERCENT OR 2.48 MILLION UNITS.

NISSAN MOTOR CO., NO. 2 IN JAPAN, PREDICTED THAT ITS DOMESTIC SALES WOULD TOTAL 1,374,000 VEHICLES, UP 4 PERCENT. THE COMPANY ESTIMATED THE DOMESTIC DEMAND AT 5.67 MILLION VEHICLES.

HONDA AND MITSUBISHI PREDICTED A 12 PERCENT RISE IN THEIR DOMESTIC SALES, AND MAZDA FORECAST A 9 PERCENT GROWTH.

HONDA BASED ITS ESTIMATE OF HIGH SALES GROWTH MAINLY ON THE LIKELIHOOD THAT THE NEW ACCORD CAR MODEL, MARKETED LAST SEPTEMBER, WILL CONTINUE TO MAKE A CONTRIBUTION TO ITS SALES GROWTH.

MAZDA SAID THE TWO SALES NETWORKS WHICH IT ESTABLISHED LAST YEAR WOULD TO INTO FULL OPERATION IN THE COMING YEAR.

MITSUBISHI IS PINNING MUCH HOPE ON EXPECTED GOOD SALES OF TWO NEW STANDARD-SIZE CAR MODELS TO BE MARKETED SOON.

ON THE OTHER HAND, HALF OF THE SIX AUTOMAKERS, TOYOTA, NISSAN AND MAZDA, FORECAST THEIR FINISHED CAR EXPORTS IN 1990 AT ABOUT THE SAME LEVEL AS IN THE PREVIOUS YEAR.

THEY POINTED OUT THAT THEIR U.S. PLANT PRODUCTION IS INCREASING AT AN ACCELERATED PACE. JAPANESE FINISHED CAR EXPORTS TO THE UNITED STATES IN FISCAL 1990 STARTING NEXT APRIL 1 ARE FORECAST AT ABOUT 2 MILLION VEHICLES AGAINST A CEILING OF 2.3 MILLION UNDER A VOLUNTARY EXPORT CONTROL AGREEMENT ON JAPANESE CAR SHIPMENTS TO THE U.S. MARKET.

FUJI HEAVY INDUSTRIES, LTD., THE SOLE MAJOR AUTOMAKER NOT FARING WELL AMID THE PRESENT CAR SALES BOOM, IS NOW WORKING TO BUILD UP THE SALES OF ITS MAIN CAR MODEL, THE LEGACY, OVERSEAS. THE COMPANY IS AIMING TO BOOST ITS EXPORTS BY 15 PERCENT. ITS DOMESTIC SALES ARE PUT AT 90,000 VEHICLES, UP 2 PERCENT.

#90019p0026 01/19/1990 ~PR Newswire

PALO ALTO, CA (JAN. 19) PR NEWSWIRE - Southwall Technologies Inc. (NASDAQ: SWTX) has introduced a technically advanced and performance-oriented new window product, the Superglass(TM) system with Heat Mirror(TM) film.

Incorporating the company's Heat Mirror(TM) technology into a proprietary new design, the Superglass system provides both insulation and clear solar shading, reduces outside noise transmission, minimizes condensation and protects against ultraviolet fading damage to furnishings.

"This is a breakthrough product," said Bruce J. Alexander, president and chief executive officer of Southwall. "It not only dramatically improves the insulating properties pioneered by Southwall's Heat Mirror technology, it also solves other problems associated with windows. The performance standards are so high that Superglass is practically a clear wall. It gives architects and designers much more freedom in how they use glass."

The Superglass system is comprised of double-paned glass between which are suspended two clear coated Heat Mirror films. (Southwall's proprietary

films selectively block portions of the electromagnetic spectrum, allow visible light to pass through while reflecting heat back to its source and provide protection from ultraviolet radiation). The interior space is filled with inert gas and the whole unit is contained in patented housing that mitigates noise and condensation build-up.

"These windows offer total performance," Alexander said. "Superglass has an insulation value of R-8 -- 92 percent of the performance of a solid wall and double that of the nearest competing window product.

"Outside sound is reduced to 1/20 of its original volume. And since it incorporates our recently introduced XUV(TM) fading protection, Superglass blocks more than 99.5 percent of the ultraviolet solar radiation that causes fading damage to furniture, carpets and draperies.

Alexander said that Superglass will initially be offered in windows manufactured by Hurd Millwork Co. of Medford, Wis. and soon will be available in a wide range of residential products from licensed manufacturers in the United States and abroad.

Southwall Technologies Inc. designs and produces thin film coatings that selectively absorb, reflect or conduct certain types of electromagnetic radiation. Southwall products are sold into the architectural, automotive electronics and aerospace markets.

MORRIS TOWNSHIP, NJ (JAN. 19) PR NEWSWIRE - Allied-Signal's Genesolv/Baron-Blakeslee group announced today that its Genesolv(R) 2010 cleaning solution has been found to equal the cleaning capacity of CFC 113 blends on circuit boards by a panel of industry and government experts. The panel has recommended that U.S. Department of Defense Specifications be revised to allow Genesolv 2010 to replace CFC 113 blends once the product has been approved for commercialization by the EPA.

Genesolv 2010 is an azeotropic blend of HCFCs 14lb and 123, alcohol and stabilizers. Allied-Signal has filed for patents on the new solvent. Allied-Signal is developing an entire line of products to replace CFCs, which have been implicated in the depletion of the earth's ozone layer and are regulated internationally by the Montreal Protocol. Although HCFCs also have some potential to deplete the earth's ozone layer, the substitution of HCFCs for CFCs greatly reduces this threat.

Under the leadership of Stephen O. Anderson of the EPA's office for Atmospheric and Indoor Air, the joint public/private committee was established to test and evaluate alternative solvents to those currently

required by the Department of Defense's military specifications. Currently those specifications require that circuit boards and electronic components be cleaned by solvents containing CFC 113.

In order to conduct tests of alternatives, the committee evaluated the cleaning effectiveness of a solvent containing CFC 113 on an approved circuit board. This cleaning level became the benchmark against which the alternatives would be measured. Much of this work was conducted at the Electronic Manufacturing and Production Facility (EMPF), at China Lake, Calif. and the Naval Avionics Center, at Indianapolis, Ind. The test was coordinated by the Institute of Interconnecting and Packaging Electronics Circuits.

The committee followed the same cleaning procedure with a board identical to the one used to determine the benchmark standard and substituted Genesolv 2010 for CFC 113 blends. The result was that Genesolv 2010 performed as well as the CFC 113 based product.

In addition to developing the Genesolv 2000 series of HCFC solvents, Allied-Signal offers low emissions (LE) equipment. LE equipment is capable of using today's solvents and will be able to use the new 2000 series on a drop-in basis. The new low emissions equipment has been proven to reduce emissions by over 50 percent. This total solution approach to defluxing operations also offers significant performance and cost efficiency benefits to the user.

LOS ANGELES (JAN. 19) PR NEWSWIRE - Price Stern Sloan Inc. (NASDAQ: PSSP) today announced that it has sold substantially all of the business of its United Kingdom subsidiary to Serif Cowells PLC.

Under the terms of the transaction, Serif made a cash payment of approximately $850,000 (U.S.), assumed certain liabilities aggregating approximately $2,500,000 and acquired certain assets of Price Stern Sloan's U.K. subsidiary. In addition, Serif was granted an exclusive license under a royalty arrangement to print, manufacture and distribute Price Stern Sloan's line of "Questron" products in the EEC countries, in addition to Scandinavia, Switzerland, Austria and Ireland.

PSS previously wrote off its investment in the U.K. subsidiary in the third quarter of 1989. The proceeds from the Serif transaction and the anticipated sale of remaining U.K. assets not included in the transaction should reduce this writeoff by approximately $1 million after expenses.

"This sale is an important step for the company, since the U.K. operation has been a drain over the past two years. We can now re-focus management time and efforts on getting back to our basic business," stated L. Lawrence Sloan, chairman and chief executive officer of Price Stern Sloan.

"The well established Questron product is an excellent fit with Serif's existing Leisure Division product lines and will widen our product range to cover pre-school early learnings levels," stated John Pryke, Serif's chief executive. Serif currently distributes a wide range of products, including "Trivial Pursuit," "Pictionary," and "Nintendo," among other games in the United Kingdom and Europe.

Price Stern Sloan will continue to market on its own Questron products in the United States and all the other territories throughout the world not granted to Serif. In addition, the company publishes and distributes children's books and related audio and video cassettes, cookbooks, humor and self-helf books, calendars, puzzles and poster art.

#90019p0042 01/19/1990 ~PR Newswire

ASHLAND, KY (JAN. 19) PR NEWSWIRE - Ashland Oil, Inc. (NYSE: ASH) said today it had net income of $22 million, or 40 cents a share, for its fiscal 1990 first quarter, ended Dec. 31, 1989. These results compare to net income of $96 million, or $1.72 a share, for the corresponding quarter a year ago.

Sales and operating revenues were $2.2 billion, compared to $2.1 billion a year ago.

Weak refinery margins resulting from less-than-expected demand, ample product inventories and relatively high crude oil prices led to essentially break-even results from Ashland Petroleum Company, compared to last year's record first quarter, when refinery margins were extremely favorable.

Supported by strong volumes and margins for both gasoline and merchandise, operating income of $19 million from SuperAmerica, Ashland's retail gasoline marketing subsidiary, just missed surpassing last year's record December quarter.

Ashland Exploration's operating income more than doubled to $11 million.

Valvoline's operating income climbed to $9 million, a 50 percent increase, due in part to higher branded motor oil volumes and margins. Marked improvement by Valvoline Instant Oil Change and increased automotive chemical sales volumes also were major factors.

Equity income of $9 million from Ashland's ownership positions in Arch Mineral Corporation and Ashland Coal, Inc. was virtually even with the prior year's quarter.

Excluding non-operating items from the quarter last year, operating income from Ashland Chemical declined, as some chemical markets experienced a slowdown in demand.

Unseasonably wet and record-breaking cold weather in December in several major marketing areas adversely affected an otherwise strong quarter for the APAC group of construction companies. Operating income declined to $13 million, compared to $19 million in the quarter last year.

PITTSBURGH (JAN. 19) PR NEWSWIRE - Under the company's dividend policy, the board of directors of Alcoa (NYSE: AA) today declared a common stock

dividend (No. 202) of $1.80 per share.

The policy calls for a base quarterly dividend of 40 cents and an additional dividend which is 30 percent of the company's annual earnings above $6.00 per share. Based on 1989's earnings of $10.67 per share announced Wednesday, the additional profit-sharing dividend is $1.40 per share. The $1.80 dividend is payable Feb. 25, 1990, to shareholders of record at the close of business on Feb. 2, 1990.

The directors also voted a regular dividend (No. 173) of 93-3/4 cents per share on Alcoa's $3.75 cumulative preferred stock, payable April 1, 1990, to shareholders of record on March 6, 1990.

#90019p0050 01/19/1990 ~PR Newswire

NEW LONDON, CT (JAN. 19) PR NEWSWIRE - NESB Corp. (NASDAQ: NESB) today announced that as a result of a special increase of $12 million in the provision for loan losses, the company had a loss for the fourth quarter of $14.7 million, or $1.90 per share, and a loss for the year ended Dec. 31, 1989, of $48.1 million, or $6.23 per share. For the same period the year before, the company reported a loss for the quarter of $403,000, or 5 cents per share, and net income for the year of $7.8 million, or $1.01 per share. As previously reported, the loss for 1989 includes $23.5 million as a non-recurring charge in connection with the non-cash write-off of intangible goodwill. The goodwill resulted from the 1988 acquisition of OmniBank of Connecticut, Inc. Excluding the effect of the non-recurring charge, the loss for the year was $24.6 million, or $3.18 per share. The write-off of the goodwill removes the need in the future to take an ongoing charge for goodwill, which had amounted to about $980,000, or 13 cents per share annually.

The company also announced that in the fourth quarter it charged off $20.8 million in repossessed real estate and problem loans. For the full year, charge-offs amounted to $26.7 million. For the same periods the year before, charge-offs were $2.8 million and $2.8 million, respectively.

In commenting on the results for the fourth quarter and the year, President and Chief Executive Officer Robin Honiss said, "The Connecticut real estate market continued to be weak in the last quarter. We have been addressing it with a vigorous loan workout division, and by shoring up our reserves. Our earnings results reflect these measures. Our banking subsidiaries have received regulatory primary capital of 10.3 percent of assets. This is a real strength. We will continue our aggressive management actions in this difficult market. We think that the steps we have been taking will place us in as strong a financial position as

conditions and our efforts allow."

NESB Corp. is a state chartered bank holding company with assets of $1.43 billion and equity capital of $86.3 million. Through its principal merged subsidiary, New England Savings Bank, it will have 24 branch offices in eastern and southeastern shoreline Connecticut.

#90019p0052 01/19/1990 ~PR Newswire

CALHOUN, GA (JAN. 19) PR NEWSWIRE - Carriage Industries Inc. (NYSE: CGE), a leading manufacturer of tufted carpet for specialized markets, today reported record net sales of $24.6 million for the second quarter ended Dec. 31, 1989, up from $23.7 million last year.

Earnings for the quarter were appoximately breakeven compared with $487,000 or 10 cents per share in the prior year.

First half sales were $52.5 million, up from $47.4 million a year ago. Earnings for the six months were $58,000, or 1 cent per share, compared to $1,492,000, or 30 cents per share, for the same period last year.

"We achieved sales growth in the hospitality/commerical and recreational vehicle markets but these gains were offset by declines in our other carpet markets," said Clarence E. Harris, chairman and chief executive officer. "Our growth in sales reflects Carriage's ownership of Medart Inc., our metal fabricating subsidiary, for the entire quarter this year versus only the month of December last fiscal year.

"Increased manufacturing costs at Carriage and expenses related to the rebuilding of Medart contributed to our earnings decline," added Harris.

Commenting on the future, Harris said: "We expect continued weakness in many of our niche markets, offset somewhat by slowly improving results at Medart and careful cost controls throughout Carriage. With recent acquisition of Bretlin Inc., and investments being made in our current operations, we continue to position ourselves for long-term profitable growth."

Carriage is a vertically integrated manufacturer of carpet supplying specialized markets. The company is a leader in the manufactured housing

recreational vehicle, marine and exposition/trade show industries. Carriage also produces carpet for the contract/residential and hospitality/commercial markets and operates a metal fabricating company.

Corporate offices are in Calhoun, Ga. Sales offices and distribution centers are strategically located across the United States. The company's transportation subsidiary, Carriage Transport Inc., operates one the of the largest trucking fleets in the carpet industry.

#90019p0053 01/19/1990 ~PR Newswire

WILMINGTON, DE (JAN. 19) PR NEWSWIRE - Matlack Systems Inc. (AMEX: MLK) today reported the results for its first fiscal quarter ended Dec. 31, 1989.

Revenues for the quarter decreased by 5 percent to $52,282,000 from the $55,070,000 reported in the first quarter last year. The number of loads carried was 15 percent lower than a year ego reflecting the slowdown in the industrial sector. As noted in the 1989 annual report, the poor economic conditions that persisted during the second half of 1989 are continuing in early 1990.

The lower revenues together with higher fuel and other operating costs caused a loss for the quarter of $896,000 or $.16 per share compared with earnings of $430,000 or $.08 per share last year.

The company has taken several steps to reduce its breakeven point and still be able to operate the business in a safe and environmentally sound manner. Among the more significant are the institution of a fuel surcharge effective Jan. 2, 1990; a reduction in the workforce; the closing of certain unprofitable terminals and various other cost cutting programss to reduce operating and administrative overhead. In addition, a substantial portion of the company's capital expenditure program for the 1990 fiscal year was completed in the first quarter. The company expects current economic conditions to continue at least until mid-year.

Matlack Systems Inc.'s major operations consist of Matlack Inc., one of the largest carriers of bulk commodities by truck in North America. Matlack operates approximately 1,400 tractors and 2,900 trailers out of 86 terminals located in 35 states and three terminals in Canada.

CAMPBELLTOWN, PA (JAN. 19) PR NEWSWIRE - Nuclear Support Services Inc. (NASDAQ: NSSI) reported today net income of $266,965, or 12 cents per share for 1990's first fiscal quarter ended Dec. 31, 1989, compared with last year's similar period of $651,234, or 30 cents per share.

Consolidated Statement of Income
(Unaudited)

Three months ended Dec. 31	1989	1988	Pct. change
Revenues	$19,223,076	$17,873,638	8
Income from operations	641,959	1,301,620	(51)
Other income (expense)	(196,994)	(193,386)	2
Income before taxes	444,965	1,108,234	(60)
Provision for taxes	178,000	457,000	(61)
Net income	266,965	651,234	(60)
Earnings per share	$.12	$.30	(59)
Weighted average shares outstanding	2,209,345	2,173,190	

Revenues for the first fiscal quarter were up 8 percent at $19,223,076 compared to the $17,873,638 reported during the same fiscal quarter last year.

Laurence M. Strassner, president and chief executive officer, said, "While our net income was below last year's comparable period we are particularly pleased to note that we not only returned to profitability after last year's fourth quarter loss but also exceeded original expectations for this period."

He continued by noting that "Both the parent and the recently formed subsidiary, HENZE-MOVATS, showed higher sales for the quarter. Also, our recent acquisition of Valve Service Center made a better than expected contribution for the quarter."

Nuclear Support Services Inc. and its subsidiary, HENZE-MOVATS Inc., are leaders in providing support and maintenance to the nuclear power, fossil fuel and processing industries.

JASPER, IN (JAN. 19) PR NEWSWIRE - Kimball International (NASDAQ: KBALB) reported that sales and net income in the quarter ended December 31 were the highest for any quarter in the company's history.

Douglas A. Habig, president, said net income in the fiscal second quarter was $11,357,000, or 54 cents per share of Class B Common Stock. That was 31 percent higher than the year-earlier $8,661,000, or 41 cents per Class B share, and exceeded the company's previous high of $10,371,000 in the first quarter of fiscal 1988.

Second-quarter sales were $159,541,000 an increase of 7 percent over the prior year's $149,541,000.

For the first six months of the fiscal year, sales were $313,835,000, a gain of 10 percent over $285,417,000 in the same period last year. Net income was $21,504,000, or $1.02 per Class B share, an advance of 36 percent over $15,795,000, or 75 cents per Class B share, the year before. Sales and net income for the year to date are company records for a six-month period.

Habig said the outlook for the third quarter isn't as bright because order rates have slowed in some of the company's divisions, generally resulting from downturns in the industries in which the divisions operate.

The Office Furniture Division posted strong increases in sales and income in the second quarter, Habig said. Much of the gain came from increased sales of Cetra office furniture systems produced by Artec.

Sales and income of the Electronics Division were higher, while sales of the Cabinet & Furniture Division were flat and income was up slightly.

Contributing to the company's gain in income were an increase in investment income arising from improved cash flow and a related increase in cash investments.

POUGHKEEPSIE, NY (JAN. 19) PR NEWSWIRE - Sono-Tek Corporation (NASDAQ: SOTK) announced today that for the nine months ended Nov. 30, 1989, revenues increased by $468,135 or 28 percent to $2,127,742 from $1,659,607 for the nine months ended Nov. 30, 1988. For the three months ended Nov. 30, 1989, revenues increased $107,366 or 18 percent to $712,734 compared to $605,368 for the three months ended Nov. 30, 1988.

For the nine months ended Nov. 30, 1989, the company earned $390,065 or 10 cents per share as compared to earnings of $376,317 or 10 cents per share for the nine months ended Nov. 30, 1988. No per share increase was realized because for the nine months ended Nov. 30, 1989, the earnings per share computation included outstanding options and warrants as a result of the market price for the stock exceeding the exercise price, whereas for the same period in 1988, it did not. For the three months ended Nov. 30, 1989, the company earned $119,681 or three cents per share as compared with earnings of $133,540 or 4 cents per share for the three months ended Nov. 30, 1988. The decrease in earnings for the three months resulted from increased professional fees and corporate expenses.

#90019p0068 01/19/1990 ~PR Newswire

PATERSON, NJ (JAN. 19) PR NEWSWIRE - Broadway Financial Corporation (NASDAQ: BFCP) today reported net income of $12,000 or $.01 per share for the fourth quarter of 1989 versus $950,000 or $.56 per share for the comparable quarter of 1988. Results for the full year amounted to $2,689,000 or $1.65 per share in 1989, compared with $3,262,000 or $1.94 per share the prior year.

Book value increased 11 percent to $13.96 at the end of 1989 from $12.56 a year earlier.

Fourth quarter profitability was restrained by the effects of net loan write-offs. The Bank had a $2,731,000 provision for possible loan losses in the fourth quarter of 1989, which brought the loan loss provision for the full year to $5,426,000 as opposed to $1,551,000 in 1988.

"We took the action to increase the loan loss provision in order to maintain a prudent banking posture," said Peter M. Kolben, president. "Our forecast for 1990 anticipates that the economy has weaknesses in various market segments and that caution should be the cornerstone of any future plans." Kolben added that "we are starting the new decade with a strong financial position. Our capital ratios substantially exceed regulatory

requirements, we have sufficient reserves to stabilize profits, and our assets are at the highest level in the Bank's 65-year history."

Core banking operations continued strong in 1989, Kolben said. Broadway Financial Investment Services Corp., the securities firm subsidiary of the Bank, made important contributions to overall results, he said, and Leslie Investments, Broadway's real estate division, remained profitable in all four quarters.

Total assets of Broadway Financial amounted to $418 million at the end of 1989, compared with $373 million a year earlier. Loan levels rose to $320 million from $287 million. Deposits totaled $368 million versus $325 million a year ago.

Broadway Financial is the holding company for Broadway Bank & Trust Company, a regional bank serving Northern New Jersey. The Bank operates ten offices in Bergen, Essex, Morris and Passaic Counties. Offices are in Fairfield, Kinnelon, Little Falls, Midland Park, Montvale, Paterson, Park Ridge, Teaneck and Wayne. The Bank's securities firm, Broadway Financial Investment Services Corp., is based in Clifton.

NEW YORK (JAN. 19) PR NEWSWIRE - Leonard Michaels has been named vice president of Security (North America) for American Express Travel Related Services Co. Inc., it was announced today by Lawrence T. Kurlander, senior vice president.

Michaels comes to American Express from the U.S. Department of Justice for which he recently served as the chief of the Organized Crime Task Force in Brooklyn. Prior to that appointment, he served as a special attorney since 1983.

A graduate of New York University Law School, Michaels holds a bachelor of arts from the University of Pennsylvania.

In his new position with American Express TRS, Michaels will be responsible for all internal and external security matters in the United States and Canada. He will report to Richard Lefler, vice president of Worldwide Security.

"Leonard brings a wealth of experience to American Express," Lefler said. "His long career in the office of district attorney in Kings County and his positions with the Department of Justice will provide the company with significant expertise on security matters."

His appointment is effective Feb. 12.

American Express Travel Related Services Co. Inc., a wholly owned subsidiary of American Express Co. (NYSE: AXP), is a family of travel, financial, insurance and communications businesses.

#90019p0070 01/19/1990 ~PR Newswire

RUTHERFORD, N.J. (JAN. 19) PR NEWSWIRE - National Community Bank (NASDAQ: NCBR) today announced that 1989 earnings increased 7 percent to a record $45 million or $4.32 per share as compared with $42 million or $4.05 per share for 1988. Earnings for the fourth quarter of 1989 were $9.1 million or $.87 per share versus $11.3 million or $1.09 per share for the fourth quarter of 1988.

Robert M. Kossick, president and chief executive officer, stated that "fourth quarter earnings were effected on a one-time basis by management's decision to set aside additional reserves in light of the recent downturn in overall economic conditions." "Furthermore," Kossick stated, "the conservative steps taken at year-end will serve to better position NCB for consistent long-term earnings growth over the years ahead."

Kossick added "Given 1989's modest economic conditions, we were pleased with our Return-On-Assets of 1.20 percent, Return-On-Equity of 21.48 percent, strong 11 percent growth in total assets, and healthy 15 percent growth in deposits. Also, we remain satisfied with the performance of our loan portfolio in that net-charge offs for the full year 1989 were a

modest $3.7 million or 13 percent of total loans as compared with $2.8 million or .10 percent for 1988. Thus, our losses remain low by industry standards.

With the opening of five new offices throughout the state in 1989, the bank's branch network grew to 111 offices. Kossick stated that "given our long term faith in New Jersey and it economy, we will continue our strong expansion program in 1990 by opening additional new offices in Ramsey, Bergen County; Montgomery Township, Somerset County; Union, Union County; Bayonne, Hudson County; and Newark in the Legal and Communications Center, Essex County.

HOUSTON (JAN. 19) PR NEWSWIRE - CECOS International, Inc., the hazardous waste disposal subsidiary of Browning-Ferris Industries, Inc. (NYSE: BFI), was notified today that the U.S. EPA has denied CECOS' application for a federal RCRA permit for the company's Aber Road treatment and disposal facility in Clermont County, Ohio.

The company said it was disappointed by the action in that the order did not take into account the substantial improvements made at the site, and additional documentation submitted to the EPA subsequent to the hearing in June 1988.

CECOS will ask the EPA to reconsider its permit denial order and, failing that, will seek judicial review of the denial. If CECOS is required to take steps to close the facility, as BFI has previously disclosed, the overall cost associated with this event could have a significant negative impact on its results of operations.

Browning-Ferris Industries, Inc. is one of the largest publicly - held companies whose subsidiaries and affiliates collect, transport, treat, recycle and dispose of commercial, residential and municipal solid waste and industrial hazardous wastes. The company is also involved in resource recovery facilities, medical waste services, municipal and commercial sweeping operations, portable restroom services, asbestos abatement and recycling, as well as providing waste services in several foreign countries.

COLUMBUS, IN (JAN. 19) PR NEWSWIRE - Arvin Industries, Inc. (NYSE: ARV) announced today that Calspan Corporation's Service Contracts Division (SCD) in Tullahoma, TN, has secured business potentially worth about $19 million over the next five years as a subcontractor to Ford Aerospace Corporation. Ford was selected by NASA for final negotiations leading to award of a contract valued roughly at $150 million for assuring the safety and quality of equipment used in manned space flight. Calspan Corporation, an Arvin subsidiary, has headquarters in Buffalo, NY, and is one of the nation's largest independent research and development organizations.

The selection follows a six-month competition among several firms to provide safety, reliability, maintainability and quality assurance support services at NASA's Johnson Space Center, Houston, TX.

Calspan's role, according to Dr. H. Robert Leland, Calspan's president, "will be to provide technical services in safety engineering task areas under the overall Ford Aerospace contract to assist NASA in reviewing equipment designs and testing actual hardware before it is flown in space." The work will involve equipment for the Space Shuttle as well as Space Station Freedom programs.

In addition, Calspan will define, review, assess and document system safety engineering requirements; support problem-reporting and corrective-action analyses; and participate in safety surveys.

The anticipated period of performance for the proposed cost-plus-award-fee contract is five years, which includes a two-year basic period and one three-year option. The first contract year will begin about Feb. 1, 1990.

Arvin Industries, Inc., an Indiana corporation, is a global company whose products are sold in more than 100 countries in North and South America, the European Common Market, the Pacific Rim and the Third World.

#90019p0078 01/19/1990 ~PR Newswire

CHICAGO (JAN. 19) PR NEWSWIRE - Baker, Fentress & Co. (NYSE: BKF), a closed-end investment company, today reported results for the year ended

Dec. 31, 1989.

Net investment income for 1989 totaled $11,448,921 vs. $11,313,817 reported for 1988.

Net assets were $456,191,264 at Dec. 31, 1989, after year-end capital gain distributions, which totaled $45,859,964, compared to 1988 year-end total net assets of $406,253,981.

Net asset value per share on Dec. 31, 1989, was $25.18, based on 18,119,050 shares outstanding, while at 1988 year-end he net asset value per share was $24.08, based on 16,873,885 shares outstanding. The 7.4 percent increase in shares outstanding during 1989 reflects additional stock issued to shareholders who reinvested their 1989 long-term capital gain distribution.

The $2.70 per share long-term capital gain distribution paid on Dec. 27, 1989, represents all long-term gain realized during 1989. The distribution was made in conjunction with the company's policy to pay shareholders ordinary income dividend and capital gain distributions which, when added together, equal at least 8 percent of average net assets for the 12 months ended Oct. 31.

Per-share ordinary income dividends paid in 1989 were $0.74, resulting in total 1989 calendar year distributions of $3.44 per share. This represented 12.8 percent of average net asset value for the 12- month period ended Oct. 31, 1989, well in excess of the 8 percent minimum distribution policy. Based on average market value of Baker Fentress stock for the same period, the total payout percentage was 15.8 percent.

The increase in net assets during 1989, measured in terms of total return assuming reinvestment of ordinary income dividend and capital gain distributions, was 21.8 percent. The total return, in terms of market value of the stock for the shareholder who reinvested dividend and capital gain distributions, was 26 percent for 1989.

BRANFORD, CT (JAN. 19) PR NEWSWIRE - Branford Saving Bank (NASDAQ: BSBC) reported today that it made a special addition to its loan loss reserve, as indicated in an earlier release dated Dec. 22, 1989, in the amount of $3.7 million in the fourth quarter. The addition resulted in an after-tax loss of $588,000 (or $.38 per share) for the year ended Dec. 31, 1989, and a fourth-quarter, after-tax loss of $1.95 million (or $1.25 per share).

Total assets of the bank exceed $302 million up from $283 million one year ago. Deposits expanded by 12 percent to $230 million. Loans increased moderately by 6 percent to $269 million from the 1988 year end level of $253 million. Shareholders equity as of Dec. 31, 1989, is $25.4 million which equates to a book value per share of $16.28.

Branford Savings Bank also announced that its board of directors declared a regular dividend of 15 cents per share to stockholders of record on Feb. 7, 1990, payable Feb. 20, 1990.

Branford Savings Bank is an FDIC-insured, state-chartered savings bank founded in 1889. Five offices are located in Branford, North Branford and East Haven.

DALLAS (JAN. 19) PR NEWSWIRE - Trinity Industries Inc. (NYSE: TRN) today reported operating results for the third quarter and nine-month period of its 1990 fiscal year.

In the three months ended Dec. 31, 1989, revenues totalled $348.6 million. Net income of $7.6 million, or $0.42 primary earnings per share and $0.41 fully diluted earnings per share, was recorded.

In the nine-month period, revenues were $974.6 million, and the company recorded net income of $32.7 million, or $1.78 primary earnings per share and $1.62 fully diluted earnings per share. In the prior year's comparable quarter, net income of $8.9 million, or $0.49 per share, was

recorded on revenues of $274.7 million. For the first nine months of the prior fiscal year, net income of $19.1 million, or $1.05 per share, was recorded on net sales of $685.4 million.

Trinity President W. Ray Wallace stated that while revenues continue to increase, operating results were lower than anticipated in the railcar and marine segments where rapid expansion has emphasized production inefficiencies. Certain raw material quality problems, weather delays and seasonal holidays caused the company to have less favorable margins than would have been experienced under more stable production levels.

Wallace said, "Trinity's revenues and net income are up 42.2 percent and 71.2 percent, respectively, when compared with the comparable nine- month period of the previous fiscal year. We are confident that, in the coming quarters, Trinity and its employees shall reach new and higher levels."

Trinity Industries, based in Dallas, manufactures and markets a wide variety of metal products, principally in six business segments: railcars, containers, structural products, marine products, metal components, and leasing.

ATLANTA (JAN. 19) PR NEWSWIRE - Delta Air Lines (NYSE: DAL) today announced its schedule for new transcontinental service between Newark International Airport and Los Angeles International Airport.

The new service is set to begin on June 1.

Initially, Delta will offer three daily roundtrip flights in the market using the wide-body, 204 seat, B-767-200 aircraft.

Westbound, Delta will operate:

FLIGHT	DEPARTS NEWARK	ARRIVES LOS ANGELES
235	8:10 a.m.	10:50 a.m.
237	5:10 p.m.	7:55 p.m.
241	8:35 p.m.	11:20 p.m.

Eastbound, Delta will operate:

FLIGHT	DEPARTS LOS ANGELES	ARRIVES NEWARK
284	7:45 a.m.	3:55 p.m.
288	12:30 p.m.	8:40 p.m.
292	9:55 p.m.	6:10 a.m.

Whit Hawkins, Delta's senior vice president - marketing, said Delta's new transcontinental service will fill in one of the few remaining major voids in the Atlanta-based carrier's domestic route system.

"Delta has long had a major presence in the Newark/New York area," he said "and with the merger with Western Airlines in 1987, Delta has become one of the top two carriers at Los Angeles. The time has now come for Delta to become a major factor in the transcon market."

Hawkins said the new service would mesh well with Delta's Hawaii service out of Los Angeles and is timed to provide convenient connections with Singapore Airlines' flights to and from the Orient.

In addition to Delta's own special brand of customer service, Hawkins said Delta would offer a wide range of fares on the new flights including the popular deeply discounted fares available on other Delta routes.

CHICAGO (JAN. 19) PR NEWSWIRE - United Airlines announced today it will reintroduce its popular "FlightPac" program offering discounts to senior citizens effective immediately for travel on or after Feb. 1, 1990.

The program is designed for travelers age 62 and above who have the flexibility for a one-way or extended stay travel itinerary. FlightPac booklets are available for purchase in four or eight coupons which are redeemable for a one-way coach ticket on United of up to 2,000 miles. One-way trips more than 2,000 miles require two coupons.

The booklets are attractively priced at $384 for four coupons and $640 for eight coupons. The booklets are available for purchase through travel agents, United ticket offices, airport ticket counters or by calling 1-800-633-6563.

The coupons are good for travel throughout the United States including Alaska and Hawaii on both United and United Express.

Purchasers of FlightPac will receive a complimentary one-year trial membership in Silver Wings Plus, United's exclusive discount travel club for those over 60. Silver Wings Plus entitles members to savings on worldwide flights, rental cars, hotels and special tours.

FlightPac travel must occur on Tuesday, Wednesday, Thursday or Saturday. Certain blackout periods may apply.

Reservations must be made at least 14 days in advance of travel, and passengers must purchase tickets within 30 days of making a reservation.

FlightPac coupons are issued in one name only and are not transferable. They may not be combined with other special fares, Mileage Plus awards, discounts or other promotional offers.

Totally unused FlightPac booklets are refundable. Individual FlightPac vouchers or tickets are not refundable and have no cash value.

#90019p0105 01/19/1990 ~PR Newswire

NYON, SWITZERLAND (JAN. 19) PR NEWSWIRE - Executive TeleCard, Ltd. (NASDAQ: EXTL; Phila: XTL), announced today the formation of a new subsidiary, World Direct, Ltd.

Robert Roach, president of Executive TeleCard, Ltd., said: "World Direct, Ltd., was formed to issue a 'World Direct' telephone calling card to compete with products such as AT&T's USA Direct and MCI's Call USA."

The user of the World Direct card will be able to charge telephone calls

to his existing major credit card such as Visa, Mastercard, American Express, Diners Club, Carte Blanche, Air Travel Card, JCB, Access, Eurocard, and en Route.

The outrageous surcharges encountered when calling from most hotels and the confusion caused by carrying pockets full of strange coins for pay phones has created a need in the travel industry for new innovative telephone calling products.

The World Direct card is scheduled for release in March 1990 and is expected to be distributed by a select group of companies in the international travel industry.

Details of the World Direct card will be made public on the introduction date.

Executive TeleCard, Ltd., also issues at present two other telephone products, the Executive TeleCard International charge card, which is sold by ETL for an annual fee of $50.00 per year, and the Executive TeleCard International system which is a transparent enhancement to existing credit and charge cards such as JCB, First Card AB Sweden, Air Travel Card and selected Visa and Mastercards. The World Direct card will have features that will be different than the other products and directed at a different audience.

PITTSBURGH (JAN. 19) PR NEWSWIRE - At its regular meeting, the board of directors of Mellon Bank Corp. (NYSE: MEL) today declared a quarterly dividend of $0.35 per share on the corporation's common stock.

This represents no change from the previous quarterly amount. The board also declared a quarterly dividend on Mellon Series A preferred stock (NYSE: MEL Pr A) at the rate of $2.80 per share per annum and a quarterly dividend on Mellon Series B preferred stock (NYSE: MEL Pr B) at the rate of $1.6875 per share per annum.

The board declared quarterly dividends on Mellon Series C-2 preferred stock at the rate of $8.75 per share per annum. The board declared a quarterly dividend on Mellon Series D junior preferred stock of $.4025 per share. The board also declared a quarterly dividend on Mellon Series G preferred stock at the rate of $9.50 per share per annum.

The board of directors also approved the dividend of $1.061 per share paid by the corporation Jan. 3, 1990, on the Mellon Series C-1 preferred stock. Pursuant to its terms, commencing in November 1989, the Series C-1 preferred stock began paying dividends on a 49-day cycle at rates set through Dutch auctions held at the beginning of each cycle.

Dividends on Mellon common stock, Series A preferred stock, Series B preferred stock, Series D junior preferred stock and Series G preferred stock are payable on Feb. 15, 1990, to shareholders of record at the close of business on Jan. 29, 1990.

Dividends for Mellon Series C-2 preferred stock are payable on Feb. 15, 1990, to shareholders of record at the close of business on Feb. 1, 1990.

With assets of $31.5 billion at Dec. 31, 1989, Mellon Bank Corp. is one of the nation's largest bank holding companies. Through its subsidiaries, the Pittsburgh-based bank holding company provides wholesale, middle market and retail banking, as well as numerous service products including trust and investment, data processing and cash management.

PITTSBURGH (JAN. 19) PR NEWSWIRE - Mellon Bank Corp. (NYSE: MEL) announced today that Carroll J. Cavanagh has been elected to the board of directors of Mellon Bank Corp. and of Mellon Bank, N.A.

His appointment, which is effective today, increases the number of directors to 23.

Cavanagh, 46, has served as principal assistant to Paul Mellon since 1985 and as a member of the Trustees' Council of the National Gallery of Art since 1984. He was secretary-general counsel to the National Gallery of Art from 1979 to 1985 and was an attorney for Sullivan & Cromwell in New York City from 1970 to 1979.

"We are pleased to welcome Carroll to the boards of Mellon Bank Corp. and Mellon Bank, N.A.," said Frank V. Cahouet, chairman and chief executive officer. "His unique perspective will add an important dimension to our boards."

Cavanagh received a bachelor of arts degree from Yale University in 1964 and earned certificates in both public and private international law at the Academy at the World Court, The Hague, in 1969. He received his juris

doctor degree cum laude from the University of Pennsylvania in 1970 and served in the U.S. Naval Reserve until 1971, retiring as a lieutenant.

Cavanagh is president of the Inisfad Foundation Inc. and a director of the Irish Georgian Society Inc. He is a fellow of the Frick Collection and a member of both the executive committee of the Friends of American Arts and the steering committee of the Friends of British Art at Yale.

With assets of $31.5 billion at Dec. 31, 1989, Mellon Bank Corp. is one of the nation's 20 largest bank holding companies. Through its subsidiaries, it provides wholesale, middle market and retail banking, as well as numerous service products including trust and investment, data processing and cash management.

#90019p0113 01/19/1990 ~PR Newswire

BOSTON (JAN. 19) PR NEWSWIRE - Bank of New England Corporation announced today that it expects to report a loss of approximately $1.2 billion for the fourth quarter, and a $1.05 billion loss for the full year 1989. The company expects to make an estimated $1.5 billion provision for credit losses which, after net charge-offs of approximately $200 million in the fourth quarter of 1989, will result in year-end reserves for credit losses of $1.65 billion. Bank of New England said it has determined these results following management's intensive examination of the loan portfolio and after consultation with federal bank examiners.

Of the total reserves of approximately $1.65 billion, the reserve for possible loan losses will be about $1.55 billion, or 83 percent of the estimated $1.87 billion in nonaccrual loans and leases. The reserve for possible writedowns on Other Real Estate Owned (OREO) will be approximately $100 million, or 25 percent of the nearly $400 million in OREO. Total nonperforming assets, primarily real estate loans, are expected to be $2.25 billion, including over $500 million of loans on which the interest is currently being paid.

The key elements in the company's strategy in the following months are to increase equity capital, to improve capital ratios, to strengthen the financial resources of its subsidiary banks, and to preserve value for shareholders. The strategy includes mergers and sales of subsidiary banks, dispositon of assets, the conversion of nonperforming loans to earning assets, and the continuation of expense reduction programs.

The company has received, and assisted by Lazard Freres & Co., is actively pursuing written indications of interest concerning possible mergers and sales of various banking subsidiaries.

Bank of New England Corporation is a regional bank holding company with banking affiliates in four New England states and assets of $29 billion. The company's common stock is listed on the New York Stock Exchange and traded under the symbol NEB.

#90019p0117 01/19/1990 ~PR Newswire

NEW YORK (JAN. 19) PR NEWSWIRE - Citicorp today announced the formation of an Office of the Chairman at its Quotron subsidiary and has named Leland H. Amaya as chairman and chief executive officer and Paul F. Glaser as president and chief operating officer.

Citicorp said the changes are being made in response to the departure of J. David Hann, presently chairman and CEO of Quotron, who wishes to return to his private consulting practice.

Citicorp noted that the new management team is uniquely qualified to provide leadership in the development of a broad array of products and services to meet the needs of Quotron's customers in a changing and volatile marketplace.

Amaya, who has been a member of Quotron's board since 1984, comes to Citicorp with significant experience in the securities industry and the systems needed to support it, including serving as vice chairman of Paine Webber Jackson & Curtis Inc. and head of its operations.

He was also chairman and CEO of the Securities Industry Automation Corporation (SIAC), where he was instrumental in developing and operating the electronic systems that now support the trading, surveillance and market data reporting for both the New York Stock Exchange and the American Stock Exchange.

Earlier in his career he was responsible for computer services at Lockheed Missles & Space Company, including the direction of all information processing. While at Lockheed Amaya directed the computer facilities and communications that supported the tracking and recovery of the first satellite from earth orbit.

He subsequently joined Pan Am with responsibility for planning, development and systems operations for the parent company and its subsidiaries. Most recently Amaya, who is a registered NASD operations and financial principal, has conducted an active consultancy business specializing in technical management and the securities industry.

Citicorp noted that the appointment of Glaser, long-recognized as the company's chief technologist, will ensure a continued focus on innovative technology that keeps pace with the demands of Quotron's customers.

Glaser has been chairman of Citicorp's Corporate Technology Committee since 1982. In that role he was responsible for setting technology policy standards and for overseeing the development and integration of new

technology for Citicorp. Prior to that he was chairman of Transaction Technology, Inc., the Citicorp subsidiary which designs the corporation's advanced electronic delivery systems. Glaser was instrumental in the design, development and implementation of Citibank's automatic banking network, which began in New York, expanded to Citibank's other U.S. retail operations and is now being installed in its retail operations around the world. He joined Citicorp in 1973 after 15 years at TRW Inc. as vice president and general manager. He also founded and was president of TRW Colorado Electronics.

Citicorp said that Quotron will continue to develop new services for a changing marketplace such as the new Quotron F/X Trader product; to expand its services outside the U.S.; and to generally streamline its operations.

WASHINGTON (JAN. 19) PR NEWSWIRE - The Washington Post Company (AMEX: WPO.B) today announced that it has applied for listing of its Class B common stock on the New York Stock Exchange and expects to be listed by the end of January.

The company has outstanding 10,596,244 Class B shares, which are currently traded on the American Stock Exchange. The company's 1,852,378 Class A shares are owned by Katherine Graham and her family and are not publicly traded.

In a statement, the company said: "When The Washington Post Company went public in 1971, the New York Stock Exchange did not list companies with dual classes of stock. Since that restriction now has been removed, the company determined its interests and those of its shareholders would best be served by moving to the Big Board." The company added that the American Stock Exchange had served it well over the past 19 years.

MINNEAPOLIS (JAN. 18) PR NEWSWIRE - Minntech Corp. (NASDAQ: MNTX) reported today net earnings of $473,000 or 17 cents per share for the third quarter ended Dec. 31, 1989, compared to net earnings of $24,000 or 1 cent per common share for the third quarter of last year. Revenues for the third quarter were $6,123,000, up 39 percent from revenues of $4,409,000 for the same period last year.

For the nine months ended Dec. 31, 1989, the company reported net earnings of $1,232,000 or 46 cents per common share compared to net earnings of $227,000 or 10 cents per common share for the first nine months one year ago. Revenues for the nine-month period were $17,317,000, a 38-percent increase from revenues of $12,498,000 for the first nine months last year.

Dr. Louis C. Cosentino, president, reported, "We continue to remain on plan for the fiscal year and are on track for an excellent fourth quarter and an exceptional year. Net earnings were 7.7 percent of revenues for third quarter and 7.1 percent year to date. We expect continued improvement in revenues and earnings in the fourth quarter."

Minntech Corp. is a leader in developing, manufacturing and marketing medical devices, sterilants and water filtration products. The company is expanding into new businesses based on its internally developed technologies in hollow fiber membrane devices, chemical sterilants, dialysis solutions and electronic products. Minntech Corp.'s common stock is traded on the national over-the-counter market under the NASDAQ symbol: MNTX.

DALLAS (JAN. 19) PR NEWSWIRE - BancTec Inc. (NASDAQ: BTEC) reported revenues for the third fiscal quarter ended Dec. 31, 1989, of $50.1 million, up 103 percent from $24.6 million for the same period last year.

The revenue increase in the quarter was primarily due to the inclusion of the results of Computer Entry Systems Corp. (CES), acquired in the fourth quarter of the prior fiscal year. Net income for the third quarter of fiscal 1990 was $2.6 million, up 30 percent from $2 million reported for last year's comparable quarter, resulting in earnings per share of $.39 vs. last year's $.32.

For the nine months ended Dec. 31, 1989, revenues totaled $135.7 million, up 79 percent from $75.8 million for the same period last year. Net income for the first nine months of fiscal 1990 was $6.6 million, or $1 per share vs. $5.3 million, or $.85 per share, for last year's nine- month period.

Grahame N. Clark Jr., chairman and chief executive officer commented, "BancTec had a number of successes in the third fiscal quarter. We were pleased to report record quarterly revenues and profit. The operating margin rose substantially to 8.9 percent for the first nine months compared to 6.7 percent in last year's comparable period. This is indicative of the cost reductions realized following the combination of BancTec and CES. Inventories which had been rising all year finally peaked and were reduced during the quarter. The order rate in our end-user business more than doubled compared to the rate experienced in the first two fiscal quarters. Two IMPAC II systems were shipped and customer testing is proceeding satisfactorily. Revenue recording on these initial IMPAC II shipments will be delayed pending final customer acceptance. Lastly, a major IMPAC II order was received from an Australian bank."

BancTec provides computerized systems for processing financial transactions, including checks, remittance advices, sales drafts and giro documents. BancTec designs, manufactures, markets and services products that employ optical character recognition, magnetic ink character recognition and image processing technologies to read, digitize, encode,

sort and process financial documents.

#90019p0127 01/19/1990 ~PR Newswire

ROY, UT (JAN. 19) PR NEWSWIRE - IOMEGA Corp. (NASDAQ: IOMG) announced today the results for its fourth quarter and total year ended Dec. 31, 1989.

The company reported sales of $30.4 million and net income of $4.9 million or 29 cents per share for the quarter. For the corresponding quarter of 1988, the company reported sales of $26.5 million and a net income of $1 million or 6 cents per share.

For the total year 1989, sales were $109 million and net income was $11.2 million or 67 cents per share, compared to $111.5 million of sales and a net income of $8.6 million or 50 cents per share in 1988. Virtually all income in both 1988 and 1989 was sheltered from income taxes because of net operating loss carryforwards.

The increase in net income in 1989 resulted from higher gross margins due to improved manufacturing performance and product cost reductions, as well as increased interest income from higher cash balances during the year. Offsetting these increases were additional expenses incurred primarily in the marketing and sales areas as the company expands its marketing efforts.

While the company continues to be optimistic about the future, during 1990 it expects its effective tax rate to increase and to further increase investments in marketing and development expenses; therefore, it cautions that the fourth quarter earnings may not be indicative of near term future quarters.

IOMEGA's balance sheet continues to be sound. Cash and temporary investments at Dec. 31, 1989, were $24.2 million compared to $16.8 million at Dec. 31, 1988.

The liquidity improvement enabled the company: to pay off the Eastman Kodak note and redeem the Series B preferred stock ($3.1); to purchase the Salt Lake City building and discharge the associated long-term lease obligation ($5.8); and to purchase leased capital equipment and discharge the associated lease obligation ($2.2). The total of these fourth quarter cash payments was $11.1 million.

IOMEGA, Roy, Utah, develops, manufactures and sells high-performance removable mass storage products for desktop computers. IOMEGA's patented

Bernoulli Technology provides unlimited data storage capability by combining the removability of floppy drives with the high capacity and performance of rigid drives. IOMEGA's stock is listed on the NASDAQ National Market System under the symbol IOMG.

#90019p0128 01/19/1990 ~PR Newswire

DETROIT (JAN. 19) PR NEWSWIRE - The UAW and Chrysler Corporation are launching an innovative program to connect the UAW-Chrysler Training Center to regional training centers nationwide through the use of a special videoconferencing satellite network. The Distance Learning network will feature full, unlimited use of a satellite transponder combined with a unique earth-based, multidirectional audio link to allow an unrestricted flow of dialogue between the network parties.

Unlike conventional videoconferencing, the Distance Learning system will permit people on both ends of the transmission to see each other on monitors.

"With this innovative network, the UAW-Chrysler National Training Center can more effectively reach larger numbers of UAW-Chrysler workers and UAW Independent Parts Supplier workers with timely job-skill and personal-enhancement training programs," said UAW Vice President Stan Marshall. Marshall is director of the UAW National Chrysler Department.

Programs will be presented through the network in areas such as career development, health and safety, tech prep, drug awareness, financial management, business skills and stress management. The use of satellite communications will allow the National Training Center to contact many outlying Chrysler locations, effectively reaching both small and large numbers of workers and their families in a timely, less costly basis than conventional, on-site instruction.

"This new technology will enable the UAW-Chrysler Training Center and its outlying training locations to disseminate a wide variety of education programs, interact more frequently with remote sites for problem solving, reduce travel time and costs, and gain greater flexibility in selecting new training sites," Marshall continued.

"During this period of rapid industrial change, it is important that we strengthen the Training Center's ability to provide increased training opportunities for UAW Chrysler workers, their spouses and children," Marshall concluded.

The new satellite network is expected to be operational in April 1990.

SALT LAKE CITY (JAN. 19) PR NEWSWIRE - GCI Industries, Inc. (NASDAQ: GCI) announced today net income of $46,907 or $.005 per share for the quarter ended December 31, 1989, and net income of $590,020 or $.135 per share for the year then ended as compared to a net loss of $(8,968) or $(.01) per share and net income of $378,876 or $.10 per share for the same quarter and year ended in 1988, a 55 percent increase in net income over the prior year. Revenues increased from $1,002,226 to $1,100,048 for the fourth quarter 1989 over 1988, and from $4,522,647 to $4,971,269, or 10 percent for the year then ended.

The company had previously announced that it had entered into a definitive merger agreement with PG Acquisition Inc., an entity affiliated with CF Capital Corporation, a privately held investment banking firm in Stamford, Connecticut, whereby each shareholder of the company will receive a cash payment of $2.243 per common share, subject to the completion of financing arrangements, due diligence and other contingencies. While the scheduled closing date of the merger is May 31, 1990, the company cautioned that there can be no assurance that the proposed merger will be consummated, as the contingencies which must be met are substantial.

The company's Golf Card subsidiary provides its membership, for an annual fee, the opportunity to play two 18 hole rounds of golf, without payment of green fees, at each of over 1,660 golf courses in the United States and abroad and to stay at over 360 country club golf resorts throughout the

United States at special rates discounted from the resort's regular golf packages.

CHICAGO (JAN. 19) PR NEWSWIRE - Oce-van der Grinten N.V. (NASDAQ: OCENY), the Dutch copying equipment group, stated that Oce Executive Director Harry Pennings yesterday opened an Oce showroom plus copyshop in Moscow. Oce supplies the world design engineering and office systems copying markets. The group's North American headquarters are in Chicago, the parent company being located in the Netherlands.

For the set-up and operation of its first base in the Soviet Union, Oce is cooperating with Spetsavtomatika, a Soviet production combine. Apart from serving as a showroom for Oce product sales, the Oce Moscow facility will also provide copyshop facilities for third parties.

Oce and Spetsavtomatika see the opening of this showroom/copyshop as an initial step toward possibly more intensive cooperation in the field of Oce product sales and services in the Soviet Union.

Oce-van der Grinten N. V. is the Dutch parent company of the Oce Group which is active in some 90 countries and has its own operating companies in more than 20 countries. The Group has over 11,000 employees and annual revenues of some $1 billion.

Oce is known worldwide for its advanced systems, products and services for the presentation of information on paper. Its extensive product range comprises:

-- Copiers and copying supplies for office systems and design engineering;
-- Systems for printing and publishing;
-- Plotter systems for design engineering;
-- Photosensitive materials and graphic films.

The greater part of the group's products and systems are developed, produced and marketed by Oce itself.

For further information concerning the Oce Group, please contact Freek Meijer, treasurer, Oce-van der Grinten N.V., in the Netherlands, by dialing 011-31-77-592240 or Ian Ogilvie, Ogilvie Taylor & Associates, Inc. in Manhattan at 212-945-0590.

ARLINGTON, VA (JAN. 19) PR NEWSWIRE - CACI International Inc. (NASDAQ: CACIA) announces first half fiscal 1990 results. The first half FY90 revenues were $70,396,524, compared to $73,903,367 for the first half of fiscal 1989. Net income for the first six months of FY90 was $1,712,462, compared to $2,249,600 for the first six months of FY89. Earnings per share were $.15 compared to $.19 a year ago.

Revenue for the second quarter was $35,779,146 versus $38,380,627 for the second quarter of last year. Net income for the period was $875,312 compared to $1,142,086 last year. CACI's earnings per share were $.08 compared to $.10 during the second quarter of last year.

Dr. J.P. London, president and CEO stated, "We are disappointed that our revenue and net earnings have not grown during the second quarter of FY90. Both revenue and net earnings continue to be affected by U.S. government program stretchouts and delays in award decisions. We also experienced unusually high legal expenses in the second quarter. We are confident that we have developed, and possess, the technological strength to defend our core business and increase our market share and we are vigorously pursuing programs to do that."

CACI, in its 28th year, is an international high-technology and professional service corporation. CACI is a leader in advanced information systems, engineering, logistics, proprietary software and market analysis. CACI provides worldwide services in support of national defense agencies, civil government and commercial enterprises.

CACI offices are located in major cities in North America and Western Europe. Corporate headquarters are in the metropolitan Washington area.

NEW YORK (JAN. 19) PR NEWSWIRE - The board of directors of The Prospect Group, Inc. (NASDAQ: PROSZ) today authorized a program intended to maximize value for Prospect's shareholders, principally through the distribution of substantially all of Prospect's assets to shareholders. The program is intended to substantially reduce the difference between the market value of Prospect's stock and Prospect's underlying asset values.

The distribution of assets is expected to take place in an orderly and timely manner, and details of the program are expected to be announced no later than Prospect's annual meeting in early May.

Earlier this month Prospect distributed to its shareholders substantially all of its holdings of the common stock of Illinois Central Corporation and announced a planned distribution in April of the common stock of Sylvan Foods, Inc.

The board of directors also announced a realignment of executives appropriate to the downsizing program. Gilbert H. Lamphere, president, was elected chairman and chief executive officer with responsibility to develop and execute the distribution plan. He succeeds, W. Wallace McDowell, Jr., who will continue as chairman of the board of Illinois Central and Sylvan Foods and will concentrate on building these independent companies. He will also remain a consultant to Prospect to assist in the downsizing activity.

Louis Marx, Jr., the founder and an officer and director of Prospect, also resigned to devote the bulk of his time to Noel Group, Inc., a venture capital and energy company which he founded and which recently completed a $17 million private equity placement. Prospect holds a substantial interest in Noel. In addition, Marx has been elected chairman of the executive committee and a director of one of Prospect's majority-owned companies, The Forschner Group, Inc., which he founded in its present form.

The distribution program will result in the curtailment of Prospect's acquisition activity but is not expected to interfere with any existing commitments, including the contemplated purchase of a $15 million convertible senior subordinated note of Recognition Equipment Incorporated.

RESEARCH TRIANGLE PARK, NC (JAN. 19) PR NEWSWIRE - Whitby Pharmaceuticals Incorporated, a subsidiary of Ethyl Corporation (NYSE: EY), and Glaxo Inc. the U.S. subsidiary of Glaxo Holdings p.l.c. (NYSE: GLX), an international pharmaceutical firm based in Great Britain, announced today that the purchase of 11 Glaxo products by Whitby has been completed.

The two companies had announced an agreement on the purchase in late December. The purchase price was not disclosed.

The products include TRINSICON(R) Hematinic Concentrate with Intrinsic Factor and TRINSICON(R) M Hematinic Modified (without folic acid), and vitamin formulations VICON-C(R) CAPSULES, VICON FORTE(R) CAPSULES, VICON(R) PLUS CAPSULES and VI-ZAC(R) CAPSULES.

Also included is CORTICAINE(R) CREAM, a leading hemorrhoid remedy, AMESEC(TM), for treatment of asthma, ETHATAB(R) TABLETS, used in treating vascular disorders, ATHROCHOLIN(TM) TABLETS, a laxative, and HISTABID(R) DURACAP(R), an antihistamine/decongestant.

Russ Pharmaceuticals, Inc., a subsidiary of Whitby Pharmaceuticals Incorporated, based in Birmingham, Alabama, will market the new products. Russ markets and sells under the Lortab(R) name and trademark a series of hydrocondone-based prescription analgesics used for relief of moderate to severe pain.

Commenting on the sale Glaxo Inc. president Tom D'Alonzo said, "This product line is strong, with a solid history behind it. I'm sure these products will bring opportunity and success to Whitby Pharmaceuticals Incorporated as they have Glaxo. We wish them all the best."

"We're delighted to be able to offer this high-quality line to current customers of Russ Pharmaceuticals," said Dr. William M. Gottwald, president of Whitby, "and we're confident that the acquisition of these well-known products from a leader in the field will give Russ and opportunity to expand our sales efforts to other prospective cutomers."

Glaxo Inc. researches, develops, manufactures and markets prescription medicines, including those for the treatment of gastrointestinal disorders respiratory ailments, cardio-vascular diseases, infectious diseases and diseases of the skin.

Whitby Pharmaceuticals develops new drug molecules for sale or license to major pharmaceutical companies through its Whitby Research, Inc., subsidiary.

#90019p0151 01/19/1990 ~PR Newswire

FLINT, MI (JAN. 19) PR NEWSWIRE - Citizens Banking Corporation (OTC: CBCF) reports 1989 full-year earnings.

Citizens Banking Corporation earned a record net income of $19,145,000 for the year ended Dec. 31, 1989 compared with $18,002,000 earned in 1988, an increase of 6.3 percent. On a per-share basis, earnings were $2.86 for the full year 1989, compared with $2.68 for 1988, an increase of 6.7 percent.

Charles R. Weeks, president and chief executive officer, stated that the increase in net income resulted primarily from an increase in net interest income and slightly higher non-interest income. The increase in net interest income reflects a higher level of earning assets and an improvement in net interest margin. A significant increase in the provision for loan losses, and higher operating expenses and income taxes were partial offsets to the improvements.

Net income for the fourth quarter of 1989 increased 14.1 percent to $5,263,000 or $.79 per share compared with $4,611,000 or $.69 per share for the same period a year ago. The fourth quarter's performance reflected a significant decrease in the provision for loan losses offset partially by higher operating expenses and income taxes. The provision for loan losses was $1,804,000 in the fourth quarter of 1989, a decrease of $1,140,000 when compared with the same period of 1988.

At yearend, total assets were $2,392,553,000, up 1.6 percent over yearend 1988. Total loans increased $60,214,000 to $1,498,646,000 compared with $1,438,432,000 a year ago. At Dec. 31, 1989, shareholders' equity was $196,586,000, or $29.36 per share, compared with $185,067,000, or $27.61 per share at yearend 1988.

In other action, the board of directors of Citizens Banking Corporation today declared a regular quarterly cash dividend of 30 cents per share of common stock to shareholders of record on Jan. 29, 1990, with a payment date of Feb. 14, 1990.

Citizens Banking Corporation is the eighth-largest bank holding company headquartered in Michigan and is the parent of Citizens Commercial & Savings Bank of Flint, Second National Bank of Saginaw, Second National Bank of Bay City, State Bank of Standish, Grayling State Bank, Century Life Insurance Company of Michigan, a credit life reinsurance company, Citizens Commercial Leasing Corporation, Grand Rapids, Mich., and Commercial National Bank of Berwyn, Berwyn, Ill. The corporation's common stock is traded in the over-the-counter market (NASDAQ trading symbol:

CBCF.)

LOS ANGELES (JAN. 19) PR NEWSWIRE - Responding to the needs of today's mature traveler, Hilton Hotels Corporation announced exciting new enhancements to its Senior HHonors discount travel program, including the addition of more than 70 international hotels. Designed for travelers age 60-plus, the new Senior HHonors program offers members room rate discounts of up to 50 percent for either single or double occupancy and includes a series of special member benefits.

In addition, Hilton gained further insight regarding the needs of mature travelers by conducting extensive research among current and prospective Senior HHonors members.

In 32 countries, more than 65 Hilton International hotels and all five Conrad Hotels, the international subsidiary of Hilton Hotels Corporation, are now participating in the program. With the addition of new domestic properties as well, Senior HHonors members can choose from a selection of more than 310 hotels worldwide.

Senior HHonors also features a series of program guarantees including: a full refund of membership fees for new members who decide against using the program within 30-days of enrollment; hotel rates guaranteed to be

lower than the rate a hotel might make available to AARP members; and rates guaranteed to be Hilton's lowest published rates for that hotel.

Memebership fees range from just $25 per year for stays at domestic hotels $50 annually for a worldwide membership at over 310 hotels, and $150 for a worldwide, lifetime membership.

Senior HHonors members are automatically enrolled in HHonors, Hiltons' frequent guest program, and will receive 500 Hilton HHonors points per stay at the discounted Senior HHonors rate at U.S. hotels, redeemable for future travel awards and prizes. Additionally, Senior HHonors offers a wide range of member benefits including: reservations up to 12 months in advance; a special members-only toll-free reservations number; and an extra room at the Senior HHonors rate.

Other privileges at U.S. hotels extended to Senior HHonors members include preregistration; HHonors check-in and late check-out on request; free daily newspaper; and free health club usage (where available).

Hilton Hotels Corporation is a publicly owned international lodging company with 265 properties in the United States. In all, more than 95,000 rooms are operated under the Hilton name. Conrad Hotels operates properties in Queensland, Australia; St. Martin in the Caribbean; Dublin; London; and Monte Carlo. Hilton International now operates more than 46,000 rooms in over 140 hotels in 47 countries.

DAVIS, CA (JAN. 19) PR NEWSWIRE - Calgene Inc. (NASDAQ: CGNE) announced today that it has an agreement in principle to acquire privately held Bioseeds International Inc., of Minneapolis, and affiliated corn seed companies including NobleBear Inc., of Gibson City and Decatur, Ill. The consideration for the acquisition consists of 150,000 shares of Calgene Common Stock and the assumption of certain NobleBear bank debt. The transaction is subject to the negotiation and execution of binding agreements, restructuring of NobleBear's bank debt, final approval by the Boards of Directors of the parties and approval by the shareholders of Bioseeds and NobelBear. The parties hope to complete the transaction by the end of January.

"The acquisition of Bioseeds gives us an entre into the specialty corn seed market with its growing applicaitons for food and industrial processors," said Roger Salquist, chairman and CEO of Calgene. "Their corn cell biology advances in proprietary specialty corn lines will expand our opportunities to genetically engineer starches."

Franklin Pass, chairman and CEO of Bioseeds will become a member of Calgene's corporate business development team. Dr. Pass brings a broad range of agribusiness experience, including the founding of two successful agricultural biotechnology companies over the last eight years.

Calgene is an agribusiness biotechnology company that is developing improved plant varieties and plant products for the seed, food and specialty chemical industries. The company has four operating subsidiaries serving these markets -- Plant Genetics Inc., Stoneville Pedigreed Seed Co., Calgene Chemical and Ameri-Can Pedigreed Seed Co.

#90019p0163 01/19/1990 ~PR Newswire

MINNEAPOLIS (JAN. 19) PR NEWSWIRE - GV Medical Inc. (NASDAQ: GVMI), today reported preliminary, unaudited revenue of $3,802,000 for the year ended Dec. 31, 1989, compared with $3,701,234 in 1988. The company's net loss increased to $4,827,000, equal to 98 cents per share, compared with a loss of $3,590,591, or 90 cents per share, in the previous year.

Fourth quarter revenue was $930,000, compared with last year's $1,369,198. The loss increased to $2,090,000, or 41 cents per share, compared with a loss of $863,785, or 21 cents per share, in the fourth quarter of 1988. The fourth quarter results were affected by the cost of the company's redirected and expanded sales and marketing program, limited production volumes and inventory valuation adjustments necessitated by enhancements in the company's core technologies. These factors were mitigated by October personnel reductions and higher interest income in the fourth quarter of 1989 compared to 1988.

The company shipped eight of its LASTAC(R) laser-enhanced angioplasty systems in the fourth quarter, including three shipped under evaluative marketing arrangements for which no current revenue has been recognized. System shipments for the year totaled 23, the same as in 1988. James R. Grabek, president of GV Medical, said three of the systems shipped in the fourth quarter were placed with leading research hospitals in a move away from the company's traditional emphasis on community hospital sites.

"We are disappointed by the 1989 results, which fell far short of our expectations from early in the year," Grabek said. "We are encouraged somewhat by fourth quarter sales, which improved from the low level of the third quarter. This indicates that the redirection of our sales and marketing effort is beginning to have an effect."

"Clinical performance of the LASTAC(R) System continues to progress well," Grabek said. "We have maintained our leadership position in treating totally occluded coronary arteries, and the system has now been used in more than 140 coronary procedures worldwide. Our primary success ratio is above 70 percent. Considering that the alternative for many of these patients would have been bypass surgery, we are very gratified by that result."

Grabek said the company now has 70 LASTAC(R) Systems installed in hospitals throughout the world. He said the system continues to perform as expected, and has been used on more than 1,200 procedures in peripheral (leg) arteries to date.

"The year ahead will be a difficult one," Grabek said. "We continue to be in a challenging selling environment as the medical community attempts to sort out the merits of various competing systems. Our current business plan envisions a loss for 1990.

"We are making good clinical and regulatory progress, however, and we expect to apply in the third quarter for approval from the U.S. Food and Drug Administration for open-market sale of the LASTAC(R) System for use in coronary arteries. At the same time, we are positioning the company to be a more broadly based participant in the cardio-vascular market. We expect to continue our active research program with significant progress and results this year in all of our core technologies -- lasers, fiber optics, balloon catheters and diagnostics.

"The company's working capital of $10,628,000, including cash reserves of $6,679,000, is adequate to fund our 1990 activities, and we have begun working on arrangements to assure the availability of adequate capital for 1991," Grabek said.

GV Medical, based in Minneapolis, produces the LASTAC(R) System, which uses direct laser energy to vaporize arterial plaque, creating a channel into which a balloon catheter can be inflated to complete the opening of the vessel. The system has been approved by the FDA for use in leg arteries, and has been under clinical evaluation in coronary arteries since March of 1988.

#90019p0165 01/19/1990 ~PR Newswire

SHELTON, CT (JAN. 19) PR NEWSWIRE - The Forschner Group, Inc. (NASDAQ: FSNR) announced today that three new members have been elected to the board of directors and that Louis Marx, Jr., an entrepreneur and private investor who has been associated with Forschner for more than 15 years, has been elected chairman of the executive committee.

In addition to Marx, Stanley R. Rawn, Jr., and William L. Bennett were named to the board, and Harry Thompson, an incumbent board member, was elected chairman. James W. Kennedy continues as president and chief executive officer, and Thomas A. Barron, former chairman, continues as a director.

Marx has been instrumental in the founding of a number of companies, including The Prospect Group, Inc., a public company that today announced plans to distribute substantially all of its assets to its shareholders; the Noel Group, Inc., a private venture capital and energy company that recently completed a $17 million private placement; Garnet Resources Corporation., a publicly traded oil and gas exploration company which consummated a $17,700,000 equity offering earlier this month; and Pan Ocean Oil Corporation.

Kennedy, commenting on the appointment of Marx, said, "Mr. Marx's advice and counsel have been extremely important to Forschner throughout its period of greatest growth, and we are especially pleased that he will now be working with us even more closely as chairman of the executive committee."

Rawn is chairman and chief executive officer of Adobe Resources Corporation. A veteran oil and gas company executive, he was associated with Marx at Pan Ocean Oil, serving as chief executive officer. He is also chairman of the executive committee and a director of Prospect Group.

Bennett is the chief executive office of Noel Group, Inc., and is chairman of the board of Taunton Technologies, Inc., a development state company that is testing a device to use ultraviolet lasers to sculpt the cornea of the eye, eliminating the need for corrective lenses. Immediately prior to his association with these companies and Marx, Bennett was with Rockefeller & Company, Inc., where he was a general partner of Discovery Funds, tow private equity partnerships. Previously he was with Bain & Company, an investment and management consulting firm in Boston, for 10 years.

Thompson is chairman of Telesphere Communications, Inc., and also president of The Strategy Group, a business and marketing consulting firm. He has had wide experience in advertising, marketing and product development in senior executive positions with the Interpublic Group of Cos. He played a significant role in the successful development of Forschner's line of Swiss Army Brand products, the first of which was the Swiss Army Watch that was introduced to the market last year.

The new board members fill vacancies created by the resignations of W. Wallace McDowell, Jr., and John J. McAtee, Jr., and an unfilled vacancy.

Forschner is the exclusive United States marketer and distributor for Victorinox Original Swiss Army Knives, Victorinox Cutlery, and other high quality Swiss-made products bearing the Swiss Army Brands label, including the new watch, as well as imported cutlery for professional and consumer use.

The Prospect Group, Inc., a New York-based company founded by Marx with affiliates in the railroad, insurance and specialized consumer products and services industries, owns 59 percent of Forschner.

#90019p0167 01/19/1990 ~PR Newswire

NEW YORK (JAN. 19) PR NEWSWIRE - PaineWebber Group Inc. reported today that net earnings for 1989 were $51,960,000, up 23 percent from net earnings of $42,360,000 in 1988. Earnings for 1989 reflect normal operating results, which include an appropriate reserve taken during the year and in the fourth quarter for the firm's bridge loan to Federated Department Stores Inc. The 1988 results included a special pretax gain of $46,303,000 from the sale of National Car Rental Systems. Earnings per share for 1989, after deducting preferred stock dividends, were $1.05, an 81 percent increase compared to $0.58 per share earned in 1988.

For the fourth quarter of 1989, PaineWebber reported net earnings of $10,862,000 compared to net earnings of $512,000 in the comparable period in 1988. Earnings per share for the 1989 quarter, after deducting preferred stock dividends, were $0.20 compared to a loss of $0.20 per share in the year ago quarter.

Revenues for 1989, including net interest, were $1,727,169,000 versus $1,754,814,000 reported in 1988. Total expenses for 1989, excluding interest, were $1,644,601,000, a three percent decline from the $1,691,591,000 incurred in 1988. The semi-fixed and fixed component of expenses for 1989 was $972,813,000 versus $1,018,962,000 in 1988, a five

percent decline.

Revenues for the 1989 fourth quarter, including net interest, were $452,326,000 versus $446,664,000 in the comparable period a year ago. Total expenses for the 1989 fourth quarter, excluding interest, were $434,993,000 versus $450,937,000 in 1988, a four percent decline. For the 1989 fourth quarter, the semi-fixed and fixed component of expenses declined eight percent to $254,154,000 from $277,117,000 reported a year ago.

At Dec. 31, 1989, PaineWebber's shareholder equity was $1.0 billion and total capitalization was $1.52 billion.

To date, PaineWebber has repurchased 4,758,700 shares of its common stock and 2,334,900 shares of its Convertible Exchangeable Preferred Stock under previously announced repurchase programs.

PaineWebber Group Inc., with its subsidiaries PaineWebber Incorporated and PaineWebber International, serves the investment and capital needs of a worldwide client base. The firm employs approximately 12,900 people in nearly 300 offices worldwide.

#90019p0170 01/19/1990 ~PR Newswire

NEW YORK, (JAN. 19) PR NEWSWIRE - All fans attending Super Bowl XXIV in New Orleans will take away more than just memories of the touchdowns, tackles and a 49ers' or Broncos' victory.

Added to the fans collection of championship game memorabilia will be a unique gift from GTE -- the GTE Special Collectors Edition Card Album and 40-card NFL Pro Set Super Bowl XXIV commemorative cards.

"This is our way of helping everyone who comes to the game have a memorable time," said Bill Tallman, director-sports/event marketing for GTE Telephone Opertions. "We hope that the GTE Super Bowl XXIV album and card collection will become an immediate collector's item. Only 80,000 sets will be distributed, and you have to be at the game, or know someone who will be, in order to get one."

GTE, the telecommunications consultant to the NFL and Super Bowl XXIV, has presented a special commemorative seat cushion to fans who attended the last four Super Bowl games. In 1989, the GTE Super Bowl XXIII seat cushions were used as part of the half-time show at Joe Robbie Stadium, Miami.

"This year, we wanted to design a gift that football fans would want to keep for years to come," Tallman said. "The album and cards, which are special items in their own right, will become such souvenirs."

Cards for a Single Sporting Event John Bello, president of NFL Properties, said, "NFL Pro Set cards are special because they are the official card of the NFL. We see this limited edition as a unique gift whose stature matches that of the Super Bowl itself. The people who receive the albums and cards will actually be given a piece of NFL history, that will allow them to relive their Super Bowl experience for years to come." NFL Properties is the licensing, marketing and publishing arm of the NFL and its 28 teams.

"The cards will become very valuable, both in the short, and the long term " said John DiGulio, president of the Houston-based Texas Sports Card Co., one of the nation's largest sellers of sports-trading cards. "The NFL Pro Set cards have done very well in the market place, and this special edition will become an instant success. To my knowledge, there never has been a sports-card collectible of this magnitude created solely for a single sporting event. When you add to that the limited quantity printed, I'd say the people getting these are extremely lucky."

Approximately 125 New Orleans-based Boy Scouts will help collate, stuff and distribute the GTE Super Bowl XXIV albums and cards. They will begin today, and will be on hand at the Superdome before the game to present the albums and cards to fans as they enter the stadium. In recognition of their efforts, GTE will make a contribution to the Boy Scouts of New Orleans.

The cover of the GTE Special Collectors Edition Album features the Super

Bowl XXIV logo, the date and the site of the game. Inside are 10 pages of plastic sleeves, which hold the cards.

The 40-card NFL Pro Set series, which is licensed by the NFL Players Association, includes cards of the Superdome, the 1989 AFC and NFC team standings, and these football players:

Denver Broncos -- John Elway, Keith Bishop, Simon Fletcher, Mike Horan, Mark Jackson, Vance Johnson, Clarence Kay, Karl Mecklenburg, Ricky Nattiel Steve Sewell, Dennis Smith, Sammy Winder, Steve Atwater, Bobby Humphrey, Tyrone Braxton, David Treadwell and coach Dan Reeves.

San Francisco 49ers -- Harris Barton, Michael Carter, Mike Cofer, Roger Craig, Jim Fahnhorst, Don Griffin, Charles Haley, Ronnie Lott, Tim McKyer, Joe Montana, Tom Rathman, Jerry Rice, John Taylor, Keena Turner, Michael Walter, Bubba Paris, Steve Young, Eric Wright, Danny Stubbs and coach George Seifert.

A Special Championship Game Design Each card will have a special championship game design featuring gold borders for the 49ers' cards and silver borders for the Broncos' cards. All will contain the Super Bowl XXIV logo in the upper right corner and either an AFC Champ or NFC Champ in the upper left corner.

GTE, under contract to the NFL through 1993, provides telecommunications equipment and services for the Super Bowl games.

GTE's subsidiaries operate in 46 states and 41 countries, with combined revenues and sales of $16.5 billion and net income of $1.2 billion in 1988. GTE is a leader in its three core businesses -- telecommunications, lighting and precision materials -- providing quality products and services worldwide.

LAWRENCEVILLE, N.J. (JAN. 19) PR NEWSWIRE - First Fidelity Bancorporation (NYSE: FFB), the regional bank holding company, today reported net income of $159.5 million, or $2.51 per common share, on a primary basis for the full year 1989 and a loss of $23.1 million, or $.46 per common share, on a primary basis for the fourth quarter of 1989.

This compared to 1988 full-year earnings of $33.9 million, or $.29 per common share, on a primary basis and a loss of $176.2 million, or $3.33 per common, share on a primary basis in the fourth quarter of the prior year. The 1988 results were largely attributable to a $235.3 million provision for loan losses in the fourth quarter.

In the fourth quarter of 1989, the loan loss provision was increased to $112.5 million from the $50.9 million provided in the third quarter of 1989. In the quarter, non-performing assets increased $25.1 million to $507.4 million at Dec. 31 and net charge-offs were $54.8 million.

At Dec. 31, the loan loss reserve totaled $388.8 million or 1.98 percent of total loans and 87 percent of non-performing loans. This compared to $331.1 million at Sept. 30, when the reserve represented 1.74 percent of total loans and 77 percent of non-performing loans.

Net interest income in the fourth quarter on a tax equivalent basis was down $8.1 million or 3 percent from the fourth quarter of 1988, reflecting a lower level of average earning assets and relatively higher funding costs.

Non-interest income was up $10 million or 14 percent in the fourth quarter over the prior-year period reflecting a gain on the settlement of pension

obligations, higher levels of trust income, higher income from service charges, commissions and fees, and an increase in net securities gains.

Operating expenses including employment costs, occupancy and equipment expense and such other expenses as advertising and non- recurring tax charges increased in the fourth quarter of 1989 over the prior year's period. Despite these increases, non-interest expense declined $27.7 million in the fourth quarter due to the inclusion in the 1988 period of expenses related to that quarter's loss.

At Dec. 31, First Fidelity had total assets of $30.7 billion and total loans of $19.6 billion. During the year total deposits grew 6.1 percent to $22.9 billion.

#90019p0183 01/19/1990 ~PR Newswire

PEORIA, IL (JAN. 19) PR NEWSWIRE - Caterpillar Logistics Services Inc. (CLS) has three new clients for its product distribution services, it was announced today.

CLS now serves Briggs Industries, a plumbing products manufacturer; PUMA USA, and CEW Import Auto Parts, a wholly owned subsidiary of ITM Automotive Inc.

"We're excited to get the opportunity to work with these companies, to provide service to their customers, and improve the efficiency of their distribution operations," said Robert L. Evans, CLS vice president and general manager. The new agreements affect five Caterpillar parts distribution facilities.

Caterpillar's Delavan, Ill., Parts Distribution facility is stocking Briggs' line of BeautyWare products for distribution to home improvement stores and other retailers in the Midwest and Northeast. CLS provides complete transportation services to ship products from Brigg's manufacturing facilities to Delavan and subsequently to BeautyWare's

customers. The CLS Logistics Information System, an integrated software product, is reducing BeautyWare's inventory and simultaneously increasing customer service.

CLS is managing all product distribution for PUMA USA, which designs and markets athletic shoes and sportswear throughout the United States. CLS uses Caterpillar's Los Angeles (Ontario, Calif.) Distribution Center to receive and store PUMA products and to fill and ship customer orders.

CLS manages CEW's parts distribution in several U.S. areas from Caterpillar's Kansas City, Mo., York, Pa., and Memphis, Tenn., parts facilities.

Parts for imported cars are purchased by CEW principally from original equipment manufacturers and distributed through a network of distributors in the United States.

CLS, a wholly owned subsidiary of Caterpillar Inc. (NYSE: CAT), was formed in 1987 to provide warehousing, transportation, distribution support services, logistics systems and systems design, and consulting services to client firms.

JACKSONVILLE, FLA. (JAN. 19) PR NEWSWIRE - USAir (NYSE: U) will add new nonstop service between New York's LaGuardia Airport and Jacksonville International Airport on February 1.

"These new flights will be Jacksonville's only nonstop service to LaGuardia, the business travelers' preferred New York City airport," said Randall Malin, USAir executive vice president-marketing. "USAir's schedule has been designed for the business traveler who wants same day roundtrip service."

New nonstop flights will depart Jacksonville at 8:55 a.m. and 7:25 p.m. and arrive LaGuardia at 11:01 a.m. and 9:29 p.m., respectively. Returning flights will depart LaGuardia at 9:30 a.m. and 7:59 p.m. and arrive Jacksonville at 11:54 a.m. and 10:31 p.m., respectively. The new service will be operated with 737 and DC-9 jet aircraft.

#90019p0189 01/19/1990 ~PR Newswire

WILMINGTON, DE (JAN. 19) PR NEWSWIRE - Wilmington Trust Co. (NASDAQ: WILM) today reported record earnings for both the fourth quarter and the full year and announced a 16 percent increase in the regular quarterly dividend rate.

Net income for the year reached $59.4 million, or $3.40 a share, up 15 percent from $51.8 million, or $2.98 a share, reported for 1988. Fourth-quarter earnings ran 7 percent ahead of the year-earlier results, amounting to $17.3 million, or $.99 a share, compared with $16.2 million, or $.93 a share, a year ago. Results for the year produced returns on assets and equity of 1.91 percent and 24.36 percent, respectively. Both measures are expected to be among the highest in the industry for banks of comparable or larger size.

The gain in 1989 earnings can be attributed primarily to continued growth of the company's basic banking activities. Net interest income (the difference between what is earned on loans and investments and what is paid for deposits and other funds) rose 16 percent to a record $114.5 million.

The improvement was the result of a $344.1 million, or 14 percent, rise in the level of earning assets and a modest widening of the net interest margin to 4.62 percent from 4.54 percent the year before.

Strong loan demand and unusually successful business development efforts raised total loans outstanding by $296.1 million, or 16 percent, on a daily average basis. At year end, loans totaled a record $2.4 billion.

Non-interest revenues climbed 6 percent to a record $77.6 million. Trust, custody and investment management fees rose 6 percent to $53.4 million, deposit service charges increased 9 percent to $8.2 million while all other fees and commissions edged up 2 percent to $16 million.

The company continued to build its loan reserve by providing $10.3 million from earnings for the year vs. net charge-offs of $6.7 million.

As the result, the reserve stood at $34.4 million at year-end, up 12 percent from the year before, and was equal to 1.45 percent of loans outstanding.

Contrary to industry experience, loan quality remained excellent. Non-performing loans totaled $7 million, down from $10.2 million the year before, and were covered almost five times by the $34.4 million loan reserve.

Today, the board of directors raised the regular quarterly dividend rate 16 percent, from $.31 to $.36 a share, payable Feb. 15, 1990, to

stockholders of record Feb. 1.

This will bring 1990 payments to $1.44 a share, up 22 percent over the $1.18 a share received by stockholders last year, and is consistent with the plan announced last April to return part of the company's rapidly growing capital to its stockholders.

#90019p0190 01/19/1990 ~PR Newswire

ALLENTOWN, PA. (JAN. 19) PR NEWSWIRE - Air Products and Chemicals Inc. (NYSE: APD) reported sales of $652.5 million and net income of $49.4 million for the first quarter ended Dec. 31, 1989.

These results compare to sales of $640.6 million and net income of $61.1 million in the year-ago quarter. Earnings per share in the current quarter were $.90 compared to $1.11 in last year's first quarter, which included $.09 per share from the sale of a partial equity interest in a cogeneration project. The other factor in comparing earnings per share was a decline in commodity chemical prices which reduced earnings per share in the current quarter by more than $.15. With the exception of commodity chemicals, Air Products' overall business performed well during the quarter.

In commenting on first quarter results, Air Products' Chairman Dexter F. Baker said, "Air Products' worldwide industrial gas business achieved higher operating profits and our strategic chemicals business earned significantly higher profits compared to the year-ago quarter. These positive results from our core businesses were more than offset by the price decline in commodity chemicals versus the peak levels of a year ago."

In the first quarter, industrial gas sales and operating profits increased over last year as worldwide merchant and on-site gas operations continued to achieve higher volumes. Average merchant prices in the United States and Europe were equal to the first quarter of last year.

Strategic chemicals experienced increased revenues and higher operating income. However, overall results for the chemicals segment were down significantly due to price declines in commodity chemical markets.

In the environmental and energy businesses, the operating facilities of Air Products' equity affiliates in waste-to-energy and cogeneration performed well.

The Equipment and Technology segment operated profitably during the quarter. This segment no longer includes the results from environmental

and energy businesses.

Looking ahead, Baker said, "We expect our worldwide gases and strategic chemicals businesses to continue to perform well throughout 1990. However, an uncertain economic outlook and the continuing decline of commodity chemical prices warrants a cautious attitude toward our near-term results. Given this outlook, we expect our 1990 earnings to be in the range of last year's reported results."

#90019p0191 01/19/1990 ~PR Newswire

YOUNGSTOWN, OH (JAN. 19) PR NEWSWIRE - Wean Industries, a division of Wean Inc. (NYSE: WID), has sold its line of hydraulic machinery to Mitsui Engineering & Shipbuilding Co. Ltd. of Tokyo, Japan.

Equipment covered by the sales agreement includes extrusion presses, shape stretchers, stretch-twisting machines, plate stretchers, pipe testing and expanding machines, forging presses, hot log shears and coilers.

Concurrently, Wean sold to Loewy Machinery Supplies Co. Inc., of Woodside, N.Y., the exclusive rights in North, Central and South America to supply spare and replacement parts for the equipment. Mitsui has also granted nonexclusive rights to Loewy in a separate accord covering Belgium, England, Finland, France, West Germany, Iran, India, Israel, Portugal, Sweden, Switzerland and Turkey.

Wean has had long-standing relationships with both companies. Mitsui became a licensee for extrusion presses and related equipment in 1969, and Loewy has been supplying spare and replacement parts ever since Wean acquired the BLH/Loewy Hydropress product lines in 1970.

Mitsui Engineering & Shipbuilding is a multidivisional company that supplies a broad range of equipment and services to the global market. Products include ships (from 52 passenger hovercraft to ULCC's of over 400,000 dwt); petrochemical, chemical and power generating plants; pollution control and sea water desalination plants; marine engines; mining and material handling equipment; nuclear systems and components; and off-shore drilling rigs, platforms and supply vessels.

Mitsui's services include ship repair, systems engineering, and extensive research and development. Its Factory Simulator, for instance, is used for advanced R&D in automation and rationalization.

The signing of the two agreements with Wean and Mitsui has expanded the role of Loewy Machinery Supplies, an international company since 1943, as

the world's largest single source of supply to the aluminum, copper, steel and pipe testing industries for their after-market needs.

#90019p0194 01/19/1990 ~PR Newswire

DETROIT (JAN. 19) PR NEWSWIRE - Manufacturers National Corporation (OTC: MNTL) reported fourth quarter, 1989 net income of $28.2 million, 7.3 percent above fourth quarter, 1988 net income of $26.3 million. On a per-share basis, net income for the fourth quarter of 1989 was $1.85 compared to $1.74 in the same period in 1988, an increase of 6.3 percent.

Net income for the year ended Dec. 31, 1989, was $107.3 million, 11.5 percent above 1988 net income of $96.3 million. On a per-share basis, 1989 net income was $7.06, 10.3 percent above 1988 net income of $6.40.

"The corporation reported continuation of its solid performance in the fourth quarter," stated Chairman Dean E. Richardson. "While net interest income and non-interest income growth was modest compared to the prior year, expense growth was also modest."

Net interest income improved 7.5 percent in the fourth quarter of 1989, compared to the same period in 1988, primarily from increased interest margins. Earning asset growth, particularly loan balances, increased only moderately over the prior year.

Non-interest income increased 3.1 percent in the fourth quarter of 1989 over the comparable period in 1988. The two largest components of this increase were income from fiduciary activities which increased 22.9 percent, and customhouse broker fees which increased 9.6 percent. Fewer securities gains and a decrease in other non-interest income partially offset these increases.

The provision for loan losses in the fourth quarter of 1989 was $9.3 million, compared to $7.4 million in the fourth quarter, 1988. Net charge-offs were $5.4 million in the fourth quarter of 1989, the same as in the fourth quarter of 1988. The allowance for loan losses was 1.99 percent of total loans at Dec. 31, 1989, compared to 1.96 percent at Dec. 31, 1988, and 1.94 percent at Sept. 30, 1989.

Domestic non-performing loans at Dec. 31, 1989, totaled $45.5 million or .77 percent of total domestic loans, compared to $49.0 million at Dec. 31, 1988, and $45.1 million at Sept. 30, 1989. International non-performing loans (all of which are to less developed countries) at Dec. 31, 1989, totaled $28.8 million compared to $24.1 million at Dec. 31, 1988, and $17.9 million at Sept. 30, 1989. Included in international non-performing

loans at Dec. 31, 1989, were $11.0 million of loans to Mexico on which interest is recorded at a reduced rate in anticipation of exchanging these loans for reduced-interest bonds under the current restructuring agreement. Other real estate was $26.6 million at Dec. 31, 1989, compared to $13.5 million at Dec. 31, 1988, and $23.7 million at Sept. 30, 1989.

Manufacturers National Corporation is a bank holding company headquartered in Detroit. It operates four subsidiary banks in Michigan, including its principal bank subsidiary, Manufacturers National Bank of Detroit, and seven banks in the metropolitan Chicago area through Affiliated Banc Group Inc. The corporation also operates financial subsidiaries in Delaware, Florida and Illinois.

NEW YORK (JAN. 19) PR NEWSWIRE - Pan American World Airways today announced it will mark the 20th anniversary of the first scheduled Boeing 747 flight on Monday with festivities at John F. Kennedy International Airport prior to the departure of its flight 002 to London's Heathrow Airport.

Pan Am flew the first "jumbo" jet on Jan. 22, 1970, also on its flight 002 JFK/LHR sector. Since that inaugural trip, Pan Am has flown over 550,000 747 flights, totaling more than three million flight hours.

The maiden voyage carried 332 passengers and 20 crew members over the 3,458 miles. Twenty years later, 120 million passengers have flown over 1.1 billion miles on Pan Am's 747 fleet, equivalent to 2,200 round trips to the moon, or 46,000 flights around the world.

BOCA RATON, FL (JAN. 19) PR NEWSWIRE - Ciba-Geigy Corporation has acquired from InnoVet, Inc. (NASDAQ: IVET) exclusive worldwide rights to develop, manufacture, and market a long-acting injectable local anesthetic for veterinary application employing the patented Microdroplet Technology.

The injectable anesthetic is designed for administration into the skin to provide anesthesia for local surgical procedures and wound repair. It is unique in that it provides anesthesia for 6 to 7 days which allows for primary healing without interruption from licking, rubbing or scratching. The product is applicable for all animal species.

The Microdroplet Technology was developed at the Univeristy of Miami (Florida). Veterinary rights were acquired by InnoVet from Haynes-Kirkpatrick Pharma-Logic who invented the technology and owns two patents and two patents pending. The technology provides a method for water insoluble and oil soluble drug compounds to be made into a range of bio compatible injectable products for animals and man.

COSTA MESA, CA (JAN. 19) PR NEWSWIRE - Parker Automotive Corporation (OTC) announced its Nov. 30, 1989, third quarter earnings today.

Revenues for the first nine months of the current fiscal year increased to $1,920,000 from last year's third quarter revenues of $960,000. Net earnings improved by $0.13 per share during the same period.

Introduction of the company's patented system for large diesel engines in mid-1989 was hampered by what management believes was unjust restraint of the sale of these systems by Cummins Engine Company. After five months of negotiations, on Dec. 6, 1989, Parker Automotive announced Cummins' authorization of the purchase, use and sale of all Parker products by Cummins distributors and customers. As a result, seven Cummins distributors were signed by Jan. 15, 1990, as distributors of CarbonClean Industrial Diesel Tune and large stocking orders have been received by Parker Automotive.

Although the Nov. 30, 1989, quarter shows a loss, operations for the current quarter ending Feb. 28, 1990, are expected to show continued improvement. The company recently received orders from Chile, Taiwan, Hong Kong, Singapore, Malaysia and Korea, and international efforts include a major distribution agreement in Europe. Expected orders from existing distributors lead management to project a dramatic increase in revenues and earnings in the 1991 fiscal year.

Parker Automotive Corporation is headquartered in Costa Mesa, Calif., with manufacturing facilities in Fountain Valley, Calif., and regional sales offices nationwide. The company markets its products worldwide and is the ackowledged leader in flushing systems for internal combustion engines.

#90019p0211 01/19/1990 ~PR Newswire

ANNAPOLIS, MD. (JAN. 19) PR NEWSWIRE - Second National (NASDAQ-NMS: SNFS) reported record 1989 earnings of $9,530,000 or $1.30 per share, an increase of $1,857,000 or 24 percent over 1988 earnings, following four successive record quarters.

Fourth quarter earnings were $2,400,000 or 33 cents per share compared with $2,196,000 or 31 cents per share for the same period in 1988.

Total assets as of Dec. 31, 1989, were $1.5 billion, an increase of 25 percent over 1988 assets of $1.2 billion.

The profitable year concluded with a $15 million preferred stock placement with Public Service Resources Corporation of New Jersey. With the

additional capital, Second National far exceeds the current and the phased-in capital requirements of the Financial Institutions Reform, Recovery and Enforcement Act (FIRREA). Tangible capital now stands at $62.7 million or 4.2 percent of assets compared to the FIRREA requirement of 1.5 percent.

"Our profitable year is attributable to a greater asset base; continued control over general and administrative expenses; and lowering costs of money. We recorded $1.8 million in after-tax profits from the sale of options and stock from our FHLMC securities portfolio. We believe it is prudent to use extraordinary profits to increase general loan loss reserves. Therefore, we directed $1.6 million of our securities gains toward the company's general reserves for loan losses, an increase of 194 percent over 1988," said Henry A. Berliner Jr., president and chief executive officer.

Second National has 35 offices in Maryland, Delaware, the District of Columbia and Pennsylvania. The company anticipates the opening of two additional branches during February to be located in Bel Air, Md., and Chadds Ford, Pa.

WASHINGTON (JAN. 19) PR NEWSWIRE - James Madison Limited (NASDAQ-NMS: JMLC; AMEX: JML), a $930 million bank holding company, today reported improved earnings for both the fourth quarter and full year 1989.

Net income for fourth quarter 1989 of $600,000, $.06 per share, represents a strong rebound from the net loss of $240,000, $.02 per share, recorded in the fourth quarter of 1988. Four consecutive profitable quarters resulted in 1989 net income of $3.0 million or $.30 per share compared to $1.2 million or $.12 per share recorded in 1988. This year-to-year improvement in net income is even more significant when the results of the $1.4 million, net of tax, nonrecurring gain due to the overfunding of the company's pension plans are excluded from the 1988 results.

This improved level of profitability is primarily the result of continued growth in net interest income and a reduction in the provision for loan losses versus comparable periods a year ago. Net interest income for 1989 increased to $37.0 million from the $33.7 million recorded in 1988. The provision for loan losses was $1.0 million in the fourth quarter of 1989 versus $1.5 million in 1988, and $3.1 million compared to $5.0 million for the full year 1989 and 1988, respectively.

JML Chairman and Chief Executive Officer K. Donald Menefee stated, "The strength of the company's net interest income is a result of continued growth in loan activity and a more active strategy of managing interest rate risk." Menefee further stated that "in light of perceived weakening in the real estate market, the company has shown an increase in the allowance for losses from $5.7 million in 1988 to $7.5 million in 1989, an increase from 1.03 percent to 1.21 percent of total loans. However, the key strength of JML is longstanding relationships with our borrowers. Therefore, we are less sensitive to downturns in the market."

James Madison Limited is a registered bank holding company located in Washington, D.C.

LOS ANGELES (JAN. 19) PR NEWSWIRE - Price Stern Sloan Inc. (NASDAQ: PSSP) today announced that it has sold substantially all of the business of its United Kingdom subsidiary to Serif Cowells PLC.

Under the terms of the transaction, Serif made a cash payment of approximately $850,000 (U.S.), assumed certain liabilities aggregating approximately $2,500,000 and acquired certain assets of Price Stern

Sloan's U.K. subsidiary. In addition, Serif was granted an exclusive license under a royalty arrangement to print, manufacture and distribute Price Stern Sloan's line of "Questron" products in the EEC countries, in addition to Scandinavia, Switzerland, Austria and Ireland.

PSS previously wrote off its investment in the U.K. subsidiary in the third quarter of 1989. The proceeds from the Serif transaction and the anticipated sale of remaining U.K. assets not included in the transaction should reduce this writeoff by approximately $1 million after expenses.

"This sale is an important step for the company, since the U.K. operation has been a drain over the past two years. We can now re-focus management time and efforts on getting back to our basic business," stated L. Lawrence Sloan, chairman and chief executive officer of Price Stern Sloan.

"The well established Questron product is an excellent fit with Serif's existing Leisure Division product lines and will widen our product range to cover pre-school early learnings levels," stated John Pryke, Serif's chief executive. Serif currently distributes a wide range of products, including "Trivial Pursuit," "Pictionary," and "Nintendo," among other games in the United Kingdom and Europe.

Price Stern Sloan will continue to market on its own Questron products in the United States and all the other territories throughout the world not granted to Serif. In addition, the company publishes and distributes children's books and related audio and video cassettes, cookbooks, humor and self-helf books, calendars, puzzles and poster art.

WASHINGTON (JAN. 19) PR NEWSWIRE - Hilarie Hoting, former vice president of the American Meat Institute (AMI), has joined Hill and Knowlton USA as vice president and senior consultant, food and nutrition.

"Hilarie's strong nutrition background and experience with the meat and food industry make her a valuable resource for dealing with the growing number of diet-related issues," said Kenneth Rabin, Ph.D., senior vice president and health care practice director of Hill and Knowlton, the worldwide public relations subsidiary of the WPP Group, plc.

In her position at the American Meat Institute, Hoting was responsible for all nutrition-related activities and served as liaison between AMI and government, consumer, health and media groups. She also directed all

foodservice programs and activities.

Hoting established and directed AMI's Foodservice Committee, which included the development of the Data Tracking Program, a quarterly report providing regional foodservice sales information. She also organized the first annual "Center-of-Plate Conference," a national meeting attended by over 200 restaurant operators, distributors and meat manufacturers, co-sponsored by Restaurant Business magazine.

In the area of nutrition and diet/health, Hoting presented meat industry positions on regulatory and legislative issues to government agencies, consumer groups and health organizations. She also monitored scientific research, nutrition legislation and government reports and food trends affecting meat consumption.

As a nutritionist and registered dietitian, she is an active member of many professional organizations, including the Society for Nutrition Education and the American Dietetic Association (ADA), having served on ADA's board of editors and publications committee. Hoting is currently the ADA media representative for the District of Columbia. She has authored consumer brochures and made contributions to textbooks and scientific journals such as the Journal of the American Dietetic Association.

Prior to joining AMI, Hoting was assistant professor, The University of Texas Health Science Center, San Antonio, Texas. She received her master of science degree from North Texas State University and her bachelor of science degree from the University of Texas.

Hill and Knowlton, Inc., based in New York, is a leading international public relations and public affairs counseling firm with 61 offices in 23 countries. Its parent company, WPP Group plc, is one of the world's largest advertising and marketing services companies.

#90019p0224 01/19/1990 ~PR Newswire

SOUTH SAN FRANCISCO, CA (JAN. 19) PR NEWSWIRE - Lewis Galoob Toys Inc. (NYSE: GAL) today announced that its of Board of Directors has unanimously adopted a Stockholder Rights Plan in which preferred stock purchase rights will be distributed as a dividend at the rate of one Right for each common share held as of the close of business on Feb. 1, 1990.

The Rights Plan is designed to deter coercive or unfair takeover tactics and to prevent an acquiror from gaining control of Lewis Galoob Toys without offering a fair price to all of Galoob's stockholders but is not

intended to prevent an acquisition of Galoob on terms that are fair to all shareholders. The company stated, however, that the adoption of the Plan was not in response to any specific takeover thereat. The Rights will automatically expire on Jan. 17, 2000.

Each Right will entitle holders of the company's common stock to buy 1/1000 of a share of Series A Preferred Stock of the company at an initial exercise price of $43. The Rights will be exercisable only if a person or group acquires beneficial ownership of 20 percent or more of Galoob common stock (an "Acquiring Person") or announces a tender or exchange offer that would result in such person or group beneficially owning 20 percent or more of the common shares.

In any person becomes the beneficial owner of 20 percent or more of Galoob common stock (other than pursuant to a board approved transaction or pursuant to a tender or exchange offer for all outstanding shares, at a price determined by the company's outside directors to be fair), or an Acquiring Person engages in certain "self-dealng" transactions including a merger in which the company is the surviving corporation, each Right not owned by such Acquiring Person will enable its holder to purchase, at the Right's then-current exercise price, shares of common stock of the company (or, in certain circumstances, cash, property or other securities of the company) having a value of twice the right's exercise price. In addition if the company is acquired in a merger or other business combination transaction in the which the company is not the surviving corporation, or if the company sells or transfers 50 percent or more of its assets or earning power, each Right not owned by such Acquiring Person will entitle its holder to purchase, at the Right's then-current exercise price, common shares of the acquiring company having a value of twice the right's exercise price.

The company will generally be entitled to redeem all Rights at 1 cent per Right at any time until the tenth day following public announcement that a 20 percent position has been acquired.

Details of the Stockholder Rights Plan are outlined in a letter, which will be mailed to all stockholders.

Lewis Galoob Toys designs, develops, markets and distributes a variety of quality toy products sold worldwide. Founded in 1957, the company is one of the largest independent, publicly held toy companies in the United States.

#90019p0231 01/19/1990 ~PR Newswire

CLEARWATER, FL. (JAN. 19) PR NEWSWIRE - Pioneer Savings Bank, F.S.B. (NASDAQ-NMS: PSBF) today reported a net loss of $6.6 million, or $1.95 per share, for the first quarter ended Dec. 31, 1989, compared to a net loss of $4.4 million or $1.28 per share, for the first quarter of the previous fiscal year.

Net interest income for the three months ended Dec. 31 1989 was $2.7 million as compared to $5.4 million for the same period in 1988. The decline in net interest incomes was primarily the result of a $2.6 million increase in total interest expense.

This was caused by a significant increase in the bank's cost of funds which reflected higher general market interest rates that existed during the period and affected the bank's deposits and borrowings.

The first quarter's results of operations also included a provision for loan losses of $1.1 million and an $813,000 provision for losses on real estate owned. In addition, $655,000 in expense was recorded which related to the sales of the Enterprise Building Corporation and Pioneer Development Group subsidiaries consummated in 1987 and 1988, respectively.

As a result of the first quarter loss, stockholders' equity in the bank was eliminated as of Dec. 31, 1989. Stockholders' equity at Dec. 31, 1989

was a negative $4.8 million. Book value per share as of Dec. 31, 1989, was a negative $1.40 compared to $9.12 at Dec. 31, 1988.

This elimination of stockholders' equity could result in regulatory authorities taking certain actions which would provide such authorities with greater control over the bank. These actions could include the appointment of a conservator or receiver for the bank. In the event of any such appointment, it is likely that the stockholders of the bank would not receive anything for their interests in the bank and such interests ultimately would be extinguished.

In addition to the provision of $1.9 million for potential losses on loans and real estate owned charged to operations for the first quarter, the bank transferred $3.1 million of the bank's general reserves to specific reserves as a result of anticipated losses with respect to particular loans secured by income producing properties. Management of the bank believes that such reserves are adequate based upon information currently available. However, the regulatory authorities have indicated that they believe an additional $6.4 million of specific reserves are necessary. Although the bank's management disagrees with such position, no assurance can be given that the bank will not be required to increase its specific reserves by the additional $6.4 million, as to the effect, if any, such an increase will have on the bank's operations.

During the first fiscal quarter of 1990, one income producing property was sold for $5.4 million which resulted in a gain in excess of the property's book value.

Pioneer's ongoing organization-wide restructuring program has resulted in a decrease in total other expenses of $251,000 due to decreases in compensation and occupancy and equipment. This improvement was achieved even after the inclusion of the $813,000 provision for losses on real estate owned provided for during the quarter ended Dec. 31, 1989. There were no similar provisions made in the quarter ended Dec. 31, 1988.

"Although our first quarter results were obviously very disappointing, we are continuing our intensive efforts to reduce further the risk in our income property loan portfolio," said Chairman of the Board, William E. Nodine. "In addition, the lower interest rate environment in recent weeks is reducing our cost of funds and, if interest rates continue to decline, the bank's net interest margin should improve during the second quarter."

Mr. Nodine announced the bank's first quarter operating results at today's annual meeting of stockholders at which two directors were elected for three-year terms to expire in 1993. Elected for three year terms expiring in 1993 were: William W. Gilkey (Partner, Clearwater law firm of Richards Gilkey, Fite, Slaughter, Pratesi & Ward, P.A.) and James M. Quinlan (Owner, Jim Quinlan Chevrolet, Clearwater). In addition, the appointment

of Deloitte & Touche as the bank's independent auditors for fiscal 1990 was ratified.

Mr. Nodine told shareholders that, as part of the bank's downsizing efforts, residential mortgages are being originated through Pioneer's 34 banking offices located in the Tampa Bay and Orlando areas, rather than through separate loan offices. The resulting cost savings and operational efficiencies are part of the bank's capital plan which emphasizes reducing the size and scope of the bank's operations in order to comply with minimum regulatory capital requirements.

Pioneer Savings Bank, F.S.B., with $1.9 billion in assets, is based in Clearwater, Fla. Customer deposits of up to $100,000 are fully insured by the FDIC.

Pioneer's common stock is traded over-the-counter in the National Market System under the symbol PSBF.

DALLAS (JAN. 19) PR NEWSWIRE - Kaneb Services Inc. (NYSE: KAB), today announced the closing of the sale to Atwood Oceanics Inc. (NASDAQ: ATWD) of Kaneb's indirect interests in its unconsolidated affiliates owning the Diamond M Falcon, Eagle and Hunter, the three remaining semi-submersible rigs of its offshore drilling subsidiary, D M Drilling Inc.

The puchase price consisted of $10.4 million in cash and assumption of recourse debt of approximately $13.5 million. The rigs are also being acquired subject to certain non-recourse indebtedness aggregating $57 million.

The sale of these rigs accomplishes one of Kaneb's primary objectives for 1989 and concludes the company's involvement in the offshore drilling industry.

NEW YORK (JAN. 19) PR NEWSWIRE - Thames Television PLC announced today that it had completed its acquisition of Reeves Communications Corporation (NASDAQ: RVCC) through the merger of its wholly owned subsidiary, Thames (USA) Inc., into Reeves.

As a result of the merger, which became effective on Jan. 17, Thames now owns 100 percent of the outstanding shares of common stock of Reeves, which will be operated as a separate subsidiary of Thames.

Thames stated that, at the time the merger became effective, Thames (USA) Inc. owned more than 90 percent of the outstanding shares of Reeves common stock. Pursuant to the terms of the merger, former holders of Reeves common stock are entitled to receive $7 in cash for each of their shares. This is the same price paid pursuant to Thames (USA) Inc.'s recently completed cash tender offer for all outstanding shares of Reeves common stock. Thames said that 12,336,513 shares of Reeves common stock had been properly tendered and purchased pursuant to the tender offer.

Thames also stated that former holders of Reeves common stock will be mailed a formal notice of merger and instructions to follow in order to obtain the cash payments they are entitled to receive as a result of the merger or to exercise their appraisal rights under Delaware law.

CLEVELAND (JAN. 19) PR NEWSWIRE - Acme-Cleveland Corporation (NYSE: AMT) today reported net earnings for the first quarter of fiscal 1990 of $1.7 million, or $.26 a common share, on sales of $47.3 million. This compares to net earnings for the first quarter of fiscal 1989 of $.9 million, or $.13 a common share, on sales of $43.9 million. Results for the first quarter of fiscal 1990 included a gain of $.6 million, or $.09 a common share, from the sale of the Corporation's minority investment in an affiliate company and from the sale of land.

First quarter consolidated orders booked were $47.6 million versus $44.8 million for the previous quarter and were $49.5 million for the first quarter in fiscal 1989. The order backlog was $35.2 million at December 31, 1989, compared to $35.7 million at September 30, 1989, and $33.5 million at December 31, 1988.

In commenting on the first quarter results, David L. Swift, president and chief executive officer, said, "The increase in volume enabled the Corporation to achieve better year over year operating results. The year-to-year decrease in bookings was mainly the result of delays in customer orders being released and an unusually large telecommunications systems order having been placed in the prior year."

Acme-Cleveland Corporation manufactures and sells telecommunications products, sensor devices and controls, cutting tools, multi-spindle machine tools, quality assurance products and systems, and related parts and services.

#90019p0241 01/19/1990 ~PR Newswire

HAUPPAUGE, NY (JAN. 19) PR NEWSWIRE - Standard Microsystems Corp. (NASDAQ: SMSC) said today that it will commence legal proceedings against Texas Instruments Inc. (TI) (NYSE: TXN).

In 1976, the company and TI entered into a patent cross licensing agreement, under which the company was granted a royalty-free license under all of TI's semiconductor-related patents issued by 1976, and all of TI's semiconductor-related patent applications filed by 1981, which included TI's so-called "Kilby patents" that have recently been recognized in Japan.

The company has been advised by TI that TI disagrees with the company's view of the extent of its license rights and, in particular, the extent to which such rights can be made available by the company to third parties. The company and TI also disagree on the extent of the company's rights to disclose the terms of the agreement. TI has advised SMC that it is TI's position that any disclosure of the agreement, potentially including this announcement itself, would be regarded by TI as a material breach of the agreement. The company said it disagrees with this position.

In the action, which will be commenced today in the U.S. District Court in the Eastern District of New York, the company will seek (among other things) an order declaring its rights under their agreement and also that in the course of TI's dealings with the company in relation to the agreement, TI violated the federal antitrust laws.

Although it is not possible to predict with certainty the outcome of this litigation, or to project the overall effect on the company of any further commercialization of its rights under the patent cross licensing agreement the company said it believes that the effect of expanding its business in devices covered by TI's patents is, if permitted, sufficiently likely to be material to its business and financial performance that a disclosure of that likelihood is now required, notwithstanding current uncertainties.

Standard Microsystems designs, develops, manufactures and sells standard, custom and semicustom metal-oxide-semiconductor/very-large-scale-integrated (MOS/VLSI) circuits and system products (hardware and software) for use by original equipment manufacturers and end users.

The company's Component Products Division is focused primarily in the computer peripherals market with applications in display, mass storage and communication controllers. The company's System Products Division is a

leading producer of local area network products and is the largest manufacturer of ARCNET coax, twisted pair and fiber optic system products.

CONTACT: Paul Richman, chairman-Tokyo, 03-423-6650, or Victor F. Trizzino president-Hauppauge, 516-273-3100 both of Standard Microsystems

#90019p0245 01/19/1990 ~PR Newswire
CHARLOTTE, NC (JAN. 19) PR NEWSWIRE - CCAIR, Inc. (NASDAQ-NMS: CCAR), today announced that it has reached a favorable conclusion to its negotiations with USAir (NYSE: U) regarding the proration formula for the division of joint fare revenues.

The Company and USAir have entered into an agreement which establishes a new proration formula to be applied to joint fare revenues retroactive to August 5, 1989. Although the effect of the revised formula cannot be determined with certainty until it is put into operation, the Company believes that the agreed upon formula, together with recent fare increases will restore the Company's share of joint fare revenues to a level which approximates the Company's per passenger revenue experienced prior to August 5, 1989.

Gordon Linkon, Vice President - USAir Express Division of USAir expressed to Company officials his satisfaction with the new agreement and stated that he is looking forward to a mutually beneficial on-going relationship with CCAIR, Inc.

The Company released the terms of its January 2, 1990 sale of its cargo operations to MARTINAIRE. The Company will receive monthly payments of 7 percent of the gross revenue received by MARTINAIRE for servicing cargo routes formerly serviced by the Company. The payments will be made for a period of 36 months or up to a maximum total amount $478,000. Although the Company expects a pre-tax loss of approximately $450,000 on the sale of its cargo operations, the Company will incur no further operating losses for the cargo operations after the second quarter. In the first quarter, cargo operating losses amounted to approximatley $367,000.

CCAIR's stock is traded on the over-the-counter market and is quoted on the NASDAQ National Market System under the symbol "CCAR."

CONTACT: Jan S. Hagerty of CCAIR, Inc, 704-527-7670.

#90019p0249 01/19/1990 ~PR Newswire

CHERRY HILL, NJ (JAN. 19) PR NEWSWIRE - Commerce Bancorp Inc. (NASDAQ: COBA) posted an increase of 20 percent in net income for 1989, it was announced today by Vernon W. Hill II, chairman of the bank holding company based here.

Net income for 1989 was $6,501,000, up $1,074,000, or 20 percent, from $5,427,000 for 1988. For 1989, fully diluted net income per share of common stock was $1.78, up $.08, or 5 percent, over the $1.70 recorded for 1988. Fully diluted net income per share of common stock for 1989 was influenced by the full effect of the issuance of 326,000 shares of common stock for an acquisition on Dec. 30, 1988, and by a public offering of 950,000 shares of common stock issued on Nov. 1, 1989.

Net income for the fourth quarter was $1,748,000, up $235,000, or 16 percent, from $1,513,000 for the fourth quarter of 1988. Fully diluted net income per share of common stock was $.42 for the fourth quarter, down $.05, or 12 percent, from the $.47 recorded for the same quarter in 1988. Fully diluted net income per share of common stock for the fourth quarter of 1989 was impacted by the issuance of 950,000 shares of common stock via a public offering on Nov. 1, 1989.

The company's strong growth continued with total assets exceeding $786 million, up $95 million, or 12 percent, from $691 million a year ago. Total deposits increased to $724 million, a $87 million increase, or 14 percent, over 1988 deposits of $637 million. Gross loans increased $115 million to $517 million from $402 million, a 29 percent increase.

Shareholders' equity rose to $56 million, a $16 million increase, or 40 percent over 1988 shareholders' equity of $40 million. Shareholders' equity as a percent of total assets at Dec. 31, 1989, was 7.17 percent vs. 5.18 percent at Dec. 31, 1988. Primary capital as a percent of total assets at Dec. 31, 1989, was 7.61 percent vs. 6.26 percent at Dec. 31, 1988.

Asset quality remains favorable with non-performing loans totaling $4,607,000, or .89 percent, of total loans outstanding at Dec. 31, 1989. As of Dec. 31, 1988, non-performing loans totaled $2,927,000 and represented .73 percent of total loans outstanding. For 1989 and 1988 net charge-offs to average loans outstanding was .10 percent each year.

OKLAHOMA CITY (JAN. 19) PR NEWSWIRE - Kerr-McGee Corp. (NYSE: KMG) has budgeted $540 million for capital expenditures in 1990, up 48 percent from $365 million spent in 1989.

Almost half of the capital expenditures, or $242 million, will be spent

for oil and gas projects, a 51 percent increase from $160 million in 1989.

The company's areas of exploration and production activity in North America include the Gulf of Mexico offshore, onshore United States and Canada. Overseas, Kerr-McGee plans projects in the North Sea, West Africa and Southeast Asia.

Kerr-McGee anticipates that capital expenditures for chemical projects will increase 31 percent to $175 million in 1990 from $137 million in 1989.

WESTLAKE VILLAGE, CA (JAN. 19) PR NEWSWIRE - At its annual meeting of shareholders held today American Video Clearinghouse Inc. received a unanimous vote of approval from its stockholders in favor of the Agreement and Plan of Merger with Comprehensive Leasing Corp., a privately held company based in Austin, Texas.

The stockholders of AVC also voted in favor of the election of six directors to succeed those whose terms have expired, authorization of the board of directors to change the name of the company, and approved Price Waterhouse as the independent auditors to examine the financial statements of the company for the fiscal year ending Nov. 30, 1990.

Comprehensive Leasing Corporation, in business since 1982, is a nationwide leasing and financial services organization.

American Video Clearinghouse Inc. is currently listed in Standard & Poor's and in the "Pink Sheets," trades in the over-the-counter market and has approximately six market makers.

SAN FRANCISCO (JAN. 19) PR NEWSWIRE - Chevron Corporation (NYSE: CHV) today announced a $4.3 billion worldwide capital and exploratory (C&E) expenditure program for 1990, up slightly over last year.

The C&E program includes Chevron's share of spending by international affiliates. It designates about $2.2 billion for petroleum exploration and development, unchanged from last year, and about $1.2 billion for refining and marketing, up about $250 million. Chemical spending will be

about $380 million, unchanged from last year after excluding the 1989 acquisition of Plexco, a major manufacturer of polyethylene pipe and products. Spending on shipping, information technology, land development, coal, minerals and other areas brings the total to $4.3 billion.

Chevron's C&E strategy remains focused on funding those businesses critical to long-term success, said Chairman Kenneth T. Derr. As Chevron invests to strengthen these businesses, it will continue efforts to improve near-term profitability. Among the measures it will take are the sale or restructuring of non-strategic assets, including selected service stations, its Alaska refining and marketing facilities, marginal oil and gas fields, the Mount Taylor, N.M., uranium mine, Chevron Chemical Co.'s agricultural chemicals business and a Bahamas oil terminal.

Exploration and production spending is split almost evenly between U.S. and international. However, international exploratory spending, projected at about $400 million, will be nearly twice the projected U.S. level. In refining and marketing, about $800 million of the $1.2 billion is earmarked for U.S. projects.

SALT LAKE CITY (JAN. 19) PR NEWSWIRE - Huntsman Holdings Corporation announced today that it has sent the following letter to the Special Committee of the Board of Directors of Aristech Chemical Corporation:

The purpose of this letter is to put you on notice of several important matters. First, we intend to submit a new bid to purchase Aristech Chemical Corporation at a price in excess of our original offer. Second, we are working out the details of our proposal, including finalizing our financing arrangements. Third, we expect to be in a position to submit our proposal within the next week or ten days. Our offer will be made by Banstar Corporation, one of our affiliates, which is the entity through which our earlier $25 a share offer was to be made.

We are advising you of the foregoing to be sure that consistent with your clear fiduciary duties to the stockholders of Aristech, you do not approve or enter into any transaction with the Mitsubishi Group or grant or otherwise agree to any "lockups", bust-up fees, topping fees, expense reimbursement arrangements, agreements not to negotiate with others, crown-jewel or other options or similar arrangements with the Mitsubishi Group prior to your receiving our formal proposal. We are confident that you will not act precipitously or on an uninformed basis and will afford us a full opportunity to make our proposal and discuss it with you.

As you know, over the past year we have continually expressed our interest in acquiring Aristech and have met on several occasions with Mr. Marshall (and other members of your management) to discuss this possibility. In this regard, in October we submitted our offer to purchase the Company at a price of $25 per share in cash. We remain enthusiastic about the benefits to be derived from the combination of Banstar and Aristech.

Furthermore in order that we are on equal footing with the Mitsubishi Group (which we recognize is virtually impossible because they are working with your management and thereby obviously have access to information we will probably never be able to obtain), we request that any documents or other evaluation materials furnished or made available to Mitsubishi Corp. also be supplied to us so that we can submit our best proposal to the Special Committee.

We are working as quickly as possible in order to finalize the terms of our new proposal and submit it to you. Should the Special Committee wish to meet with me or our representatives to discuss the foregoing, we would be happy to do so.

(Signed) Jon M. Huntsman, chairman of the board of Huntsman Holdings Corporation

Huntsman companies, headquartered in Salt Lake City, manufacture and market petrochemicals and thermoplastics including polypropylene, styrene monomer, expandable polystyrene, polystyrene, specialty compounded polymers and plastic packaging products. Huntsman companies revenues for 1988 were $1.4 billion.

#90019p0263 01/19/1990 ~PR Newswire

GREENVILLE, S.C. (JAN. 19) PR NEWSWIRE - South Carolina Gov. Carroll Campbell and officials of Hitachi America, Ltd. announced today an agreement to locate a new manufacturing company, Hitachi Electronic Devices (USA), Inc., in Greenville. Following construction, the plant will initially employ 300 people.

Over five years, Hitachi will invest approximately $150 million in a 522,000-square-foot plant to manufacture television picture tubes, according to Dr. Takeo Takemoto, board director and general manager of Hitachi's electron tube division. Eventually, the plant should employ approximately 700 workers.

"Greenville will be an excellent location for Hitachi Electronic Devices (USA), Inc.," Dr. Takemoto said. "Most importantly, the area has the human resources that are crucial to our success and longstanding traditions of hard work and reliability."

"We believe South Carolina will also prove convenient for our customers and suppliers," he continued. "While the plant responds to increasing needs for color picture tubes throughout the U.S., we hope it also makes a significant contribution to the local economy."

"This is the largest investment ever by a Japanese company in a new facility in South Carolina," said Gov. Campbell. "It comes as a time when we are seeing unparalleled success internationally."

"We see the world market and Japanese investment in South Carolina as forces that will enhance the ability of life for all our citizens," the governor said. "The joint effort of Japan and South Carolina to develop closer business ties has made locations such as this possible, and I look forward to working with Hitachi as they grow and expand in South Carolina."

The plant will be constructed on Mauldin Road in Greenville, which is in

the state's northwestern region. Completion is expected by Sept. 1991.

Junichi Aoki, formerly Hitachi Ltd.'s representative in Washington, D.C., will president of Hitachi Electronic Devices(USA), Inc.

"We greatly appreciate the assistance provided by state and local government and business officials, which has helped to make this location possible," Aoki said. "We look forward to working successfully with the entire Greenville community."

Greenville Mayor William D. Workman III stated that Hitachi's decision was "a great example of the strong public and private sector cooperation" that exists in South Carolina. The cooperation was evident by the sale of 57 acres of land owned by the Western Carolina Regional Sewer Authority (WCRSA) to locate the plant.

Hitachi America, Ltd., a wholly owned subsidiary of Hitachi, Ltd. (NYSE: HIT), Japan, markets and manufactures electrical and electronics goods throughout the United States.

#90019p0266 01/19/1990 ~PR Newswire

TAMPA, FL (JAN. 19) PR NEWSWIRE - TECO Energy, Inc. (NYSE: TE) today announced earnings of $2.36 per share for 1989, up 10.8 percent from the $2.13 per share earned in 1988. The 23-cent increase in earnings per share resulted from a significant contribution from the diversified companies and improved results from Tampa Electric Company, the principal subsidiary.

The $2.13 per share earned in 1988 was before an 11-cent extraordinary write-off of coal mining assets by its coal mining subsidiary.

Consolidated net income for 1989 was $133.8 million on revenues of $1,060.0 million, compared to net income of $120.6 million on revenues of $1,045.3 million for 1988 before the extraordinary write-off.

Tampa Electric earned operating income after taxes of $155.8 million on revenues of $934.6 million for 1989. This compared to $152.9 million on revenues of $937.2 million for 1988. The increase resulted from higher retail energy sales and lower operating and maintenance expenses due to aggressive cost-containment efforts, moderated by lower sales to other utilities and higher depreciation and property taxes.

Retail energy sales totalled 12.9 million megawatt-hours (MWH), 3.8 percent above 1988's sales of 12.4 million MWH. The residential and commercial sectors rose 5 and 6.5 percent, respectively, resulting from increases in the average use per customer and customer growth of 2.5 percent. Phosphate sales declined 4.8 percent as producers worked inventories down.

Energy sales to neighboring utilities declined 23 percent in 1989. Higher retail sales caused less energy to be available and the expectation of low oil prices led to fewer contracts with other utilities.

In 1989, Tampa Electric recorded an $18.6 million provision for revenue refund. The utility's aggressive cost containment program was a key factor in achieving this refund to its customers. The Florida Public Service Commission limited Tampa Electric's regulated return on common equity to 13.6 percent for 1989.

Operating income from the diversified companies was $40.3 million in 1989, up 38 percent from 1988's $29.5 million. Revenues were $322.4 million in 1989 compared to $286.6 million in 1988. The transportation, storage and coal companies have been highly successful in attracting new business, expanding existing business and in gaining operational efficiencies.

TECO Energy's earnings per share for the fourth quarter in 1989 increased to 45 cents per share, up 15 percent over the 39 cents per share earned for the fourth quarter of 1988 before the extraordinary item.

Consolidated net income for 1989's fourth quarter was $25.3 million on revenues of $256.3 million, compared to $21.9 million on $252.7 million for the same period in 1988 before the extraordinary item.

#90019p0278 01/19/1990 ~PR Newswire

DUBLIN, IRELAND (JAN. 19) PR NEWSWIRE - The Institute of Clinical Pharmacology, plc (NASDAQ: ICPYY) announced the results for the nine months to September 30, 1989. Revenues were IR9,548,000 ($13,582) and the company experienced a net deficit of IR2,050,000 ($2,916,000), as compared to revenues of IR9,184,000 and net income of IR727,000 for the comparable period in 1988.

"The continuation of increased investment to gear up international resources to service the demands of a rapidly globalizing pharmaceutical industry and a postponement of revenues from contracts to study anti-bacterial drugs occasioned by the mildest European weather on record during 1989 resulted in a widened spread between revenue and fixed overhead adversely affecting financial performance in accounting terms for 1989," said Prof. Austin Darragh, Chairman and Chief Executive Officer.

"The forward order book of new and carried over contracts indicates the probability of a significant favourable business pattern in the future beginning in 1990."

#90019p0279 01/19/1990 ~PR Newswire

WICHITA, KS (JAN. 19) PR NEWSWIRE - Fourth Financial Corp. (NASDAQ: FRTH) Kansas' largest multi-bank holding company, today reported record net income for the year ended Dec. 31, 1989 in the amount of $34,418,000, a 12.5 percent increase over 1988. Net income per share increased from $2.28 to $2.49. Year-end assets totaled $3,182,000,000 as compared to $2,693,000,000 one year ago, an increase of 18.2 percent. Stockholders' equity at year-end totaled $271,719,000, or 8.5 percent of total assets. The company consummated the acquisitions of Garden National Bank and McPherson Bank and Trust in December. Year-end assets and stockholders' equity include the results of these acquisitions. The 1989 results have been restated for the acquisition of Garden National Bank as it was accounted for as a pooling of interests.

Net income for the quarter ended Dec. 31, 1989 was $8,966,000 compared to $8,391,000 for the like period in 1988. Net income per share was 65 cents compared to 63 cents for the last quarter of 1988.

The board of directors has declared a 5-for-4 stock split effected in the form of a 25 percent stock dividend. One additional share for each four shares now held will be issued March 1, 1990 to stockholders of record Feb. 15, 1990. Cash will be paid in lieu of fractional shares. The board also declared a quarterly cash dividend of 22 cents per share payable March 1, 1990 to stockholders of record Feb. 15, 1990. This dividend, which will also be paid on the newly issued stock dividend shares, represents an increase of two percent over the last quarterly dividend. It is the 82nd consecutive quarterly cash dividend since Fourth Financial became a bank holding company in 1969.

In commenting on the corporate performance, Chairman Jordan L. Haines stated, "Our ongoing strategy of acquiring other financial institutions in strong Kansas markets has had a very positive impact on earnings. We believe that the challenges of this decade will be greater than those of the '80s, but Fourth Financial Corporation is well positioned for the future."

The board authorized management to acquire, during 1990, up to 250,000 shares of Fourth Financial stock. This stock, to be acquired at prevailing market prices, will be used to partially fund the three pending Citadel bank acquisitions and for other corporate purposes.

Fourth Financial's common stock is traded in the national over-the-counter market. The NASDAQ symbol is FRTH. The stock on Jan. 18, 1990 was quoted at 30 bid - 29 1/2 ask.

#90019p0280 01/19/1990 ~PR Newswire

QUINCY, MA (JAN. 19) PR NEWSWIRE - Clean Harbors, Inc. (NASDAQ: CLHB) announced today that its chairman and CEO, Alan S. McKim, has personally filed a suit in Federal District Court asserting that three of the former officers and directors of Legeis Resources Inc. did not fully disclose the value of the assets of Legeis Resources at the time McKim purchased a majority interest in that company on Sept. 11, 1989.

McKim asserts in his suit that certain officers and directors of Legeis Resources violated federal and state securities laws for failure to disclose material information at the time of the sale. McKim made the purchase of Legeis Resources stock as a private investor and granted Clean Harbors an option to purchase the stock at the same purchase price paid by McKim.

Clean Harbors has not exercised any of the options granted to it by McKim and has no current plans to do so. Clean Harbors was not involved in the original lawsuit. Two of the three defendants to McKim's action have now asked the court to join Clean Harbors in the suit asserting that the company failed to exercise certain options to buy their stock.

Jonathan Black, general counsel of Clean Harbors, said, "The attempt by the defendants to involve Clean Harbors is wholly without merit."

Alan McKim said, "It is absurd that the defendants in a personal suit brought by me against them would attempt to involve Clean Harbors. This lawsuit will have no impact on Clean Harbors."

SAN JOSE, CA (JAN. 19) PR NEWSWIRE - Altos Computer Systems (NASDAQ: ALTO) announced today the results of operations for the second quarter of fiscal year 1990, ended Dec. 23, 1989.

During the second quarter sales were $38 million compared with sales of $40 million in the like quarter a year ago. The net loss for the quarter was $1 million compared to a net loss of $1.8 million in the like quarter of the prior year. The loss per share was 9 cents compared to a loss of 15 cents a year ago. The weighted average number of shares outstanding decreased from 11,900,000 to 11,032,000.

Compared to the first quarter of fiscal 1990, net sales have increased by $5.9 million. This was due to an increase in sales worldwide. Net losses increased by $.6 million from the first quarter to $1 million in the second quarter of fiscal 1990.

Expenses for the quarter increased due to spending on products released this quarter and products to be released during this calendar year. Marketing, general and administrative expenses increased primarily due to promotional activities related to new product introductions.

During the quarter the company announced and shipped the Intel 80486 upgrade board for the Altos Series 1000. The field-installed upgrade provides end-users with significant increases in processing power and a growth path from existing 386 systems to 486 technology.

Dave Jackson, chairman of the board and chief executive officer, said, "We are encouraged that sales have increased since the first quarter. Cost-cutting measures have been implemented, and we anticipate improved performance by year end. In early January we announced and shipped the first Altos 486 System 1000, the company's most powerful multi-user UNIX system. With a 15 MIPS Intel 80486-based CPU, the 486 System 1000 gives Altos resellers the opportunity to explore new markets including transaction processing and network servers, which have traditionally been dominated by minicomputer vendors."

Founded in 1977, Altos designs, manufactures and markets 32-bit networked multi-user solutions for distribution in 60 countries. More than 120,000 Altos systems have been installed worldwide. Fiscal 1989 sales for the company were $139.9 million.

#90019p0293 01/19/1990 ~PR Newswire

PEARL RIVER, N.Y. (JAN. 19) PR NEWSWIRE - Orange and Rockland Utilities Inc. (NYSE: ORU) today reported that total 1989 electric and natural gas operating revenues were $536.2 million, vs. $485.7 million a year ago, according to James F. Smith, chairman and chief executive officer.

Unusually favorable weather during the final quarter, coupled with the timing of power plant maintenance, resulted in fourth quarter earnings of $11.3 million, or 81 cents per share, compared with $6.6 million, or 44 cents per share, a year ago.

The company's total 1989 net income declined slightly to $44.1 million, or $3.14 per share, however, compared with 1988 earnings of $44.2 million, or $3.18 per share. According to Smith, the 1989 results compare favorably with a year ago when recognition is given to the very high level of electric sales that occurred in 1988 when summer temperatures set historic records.

Given last year's record-breaking sales, total electric energy sales to retail customers during 1989 increased only 1.7 percent to 3,987,688 megawatt hours (Mwh). The sales increase, coupled with higher fuel cost recoveries in 1989 than the company experienced in 1988, resulted in electric revenues from retail customers rising to $391.7 million from $367.4 million a year ago.

Revenues from sales to other utilities in 1989 amounted to $16.3 million, compared with 1988 revenues of $10.7 million. Sales to these utilities totaled 473,243 Mwh, versus 393,314 Mwh last year. Because revenues from these sales are primarily a recovery of costs in accordance with applicable tariff regulations, they have little impact on the company's annual earnings.

Gas sales to firm customers during 1989 totaled 20,051 million cubic feet (Mmcf), compared with 19,820 Mmcf a year ago. Total annual gas revenues from firm customers were $119.1 million, compared with $98.5 million in 1988. The 1989 revenue increase reflects the recovery of higher purchased gas costs than that experienced last year, greater sales and slightly higher rates.

The company's total operating expenses -- excluding fuel, purchased power and gas purchased for resale -- amounted to $248.8 million during 1989, an increase of 1.8 percent compared with a year ago. This increase is primarily due to higher health insurance costs and property taxes.

Orange and Rockland serves an area of 1,350 square miles and a population of more than 640,000 in southeastern New York state, northern New Jersey and northeastern Pennsylvania. It generates, distributes and sells electricity, and distributes and sells natural gas.

#90019p0296 01/19/1990 ~PR Newswire

HOUSTON (JAN. 19) PR NEWSWIRE - Lyondell Petrochemical Co. (NYSE: LYO) today reported net income for the full year 1989 of $374 million, or $4.67 per share, on sales of $5.4 billion, compared with net income of $543 million on sales of $4.7 billion in 1988. The company's earnings in 1989 were the second best since its inception in 1985.

Bob G. Gower, president and chief executive officer of Lyondell Petrochemical Co., said, "Lyondell's earnings in 1989 compared to 1988 were affected by several major factors. These included lower ethylene margins, especially toward the end of the year, and higher operating costs which included major maintenance turnarounds on Lyondell's two olefins plants as well as unscheduled weather-related maintenance. In addition, earnings were affected by higher interest expense, increased administrative expenses associated with becoming a public company, and lower refining margins partially offset by higher refined product sales volumes. The increase in sales revenues year to year was due mainly to higher refined product prices."

For the fourth quarter of 1989, net income was $64 million, or 80 cents per share, compared with $157 million in the fourth quarter of 1988. Sales and operating revenues totaled $1.3 billion for the 1989 fourth quarter, compared with $1.1 billion in the like period of 1988.

"The decline in fourth quarter 1989 earnings compared to the same period a year ago is almost entirely attributable to lower ethylene margins resulting from higher feedstock costs and lower ethylene prices," Gower said. "Fourth quarter earnings were also lower than the third quarter of 1989 due to lower ethylene margins and weather related difficulties partially offset by lower maintenance costs."

Lyondell Petrochemical Co., headquartered in Houston, manufactures and markets a wide variety of petrochemicals including olefins (primarily ethylene, propylene, butadiene and butylenes), methanol, aromatics and specialty products and refined petroleum products, including gasoline, heating oil, jet fuel and lubricants.

#90019p0298 01/19/1990 ~PR Newswire

LA JOLLA, CA (JAN. 19) PR NEWSWIRE - Intermark Inc. (AMEX:IMI) today reported that it sustained a consolidated net loss of $6.8 million, or $.75 per share, in the third fiscal quarter ended Dec. 31, 1989 compared to net income of $7.1 million, or $.79 per share, in the same period a year earlier. Revenues for the quarter increased 3 percent to $175 million from $170 million in the same period of the prior year. Net income in the third quarter of the prior year included $14 million attributable to the gain realized by Triton Group on the sale of Continental Graphics Corp.

For the nine months ended Dec. 31, 1989, the company reported a consolidated net loss of $12.4 million, or $1.37 per share, compared to net income of $7.4 million, or $.80 per share, for the same period last year. Revenues for the nine months were $575 million, up 5 percent from $545 million in the prior year.

Intermark said that the quarterly loss was caused by several factors, most significant of which was recognition of its 39 percent share of the $7.6 million loss reported by Triton Group Ltd. (NYSE: TGL) in its most recent quarter. That loss resulted from Triton's decision to write off the carrying value of preferred stock it received in the sale of Simplicity Pattern and from investment write-downs. Budgeted early-stage losses at Western Sizzlin and Liquor Barn added to Triton's loss, as did a negligible return on its $140 million investment in Fuqua Industries (NYSE: FQA).

Results for the quarter were also penalized, Intermark said, by lower shipments and production levels at Dynamark Ltd. caused by sharply reduced demand for both OEM and aftermarket wheels. Munson Sporting Goods also sustained a loss for the quarter due to substantial reductions in orders from major customers.

Charles R. Scott, president of Intermark, stated in reviewing the results, "A poor showing by three of our Partner Companies tended to overshadow the achievements of the other ten. The three under-performing companies -- Intermark's Munson Sporting Goods and Dynamark and Fuqua's Snapper Power Equipment -- have each named new CEO's within the past few months and those individuals are now implementing new strategies and forward plans. We see many encouraging signs at each, but are withholding judgment and predictions for now."

Intermark is an operating/holding company whose business is to own control and add value to well-established mid-sized American growth companies

operating in broadly diverse industries.

BALTIMORE (JAN. 19) PR NEWSWIRE - Baltimore Gas and Electric Co. (NYSE: BGE) reported common stock earnings of $35,261,000 for the three months ended Dec. 31, 1989, equivalent to $.44 per common share.

This compares with earnings of $36,364,000, equivalent to $.46 per share, for the three months ended Dec. 31, 1988. For the year ended Dec. 31, 1989 earnings on common stock were $243,910,000, equivalent to $3.05 per share. This compares with $274,037,000, or $3.47 per share, for the year ended Dec. 31, 1988.

The increase in utility earnings for the three months ended Dec. 31, 1989, was primarily attributable to increased electric and gas sales as a result of colder weather during this period. The decrease in utility earnings for the year ended Dec. 31, 1989, vs. the prior year reflects the impact of higher operations and maintenance expenses and lower annual rates of growth for electricity and natural gas sales.

#90019p0313 01/19/1990 ~PR Newswire

ATLANTA (JAN. 19) PR NEWSWIRE - RPC Energy Services Inc., (NYSE: RES) announced its unaudited results for the 12 months and three months ended Dec. 31, 1989.

RPC operates in two major segments. RPC provides rental of specialized oil field equipment, and well control and transportation services to the oil and gas industry. In addition, RPC owns Chaparral Boats, a leading national manufacturer of powerboats.

For 12 months ended Dec. 31, 1989, revenue decreased 11 percent to $103,992,000 compared with revenue of $117,266,000 for the same period a year ago. Net income after income taxes increased 20 percent to $9,171,000 or 64 cents per share for the 12 months ended Dec. 31, 1989 compared with net income after income taxes of $7,672,000 or 53 cents per share a year ago.

Revenue for the three months ended Dec. 31, 1989 decreased 16 percent to $24,846,000 compared with $29,436,000 for the same period a year ago. Net income after income taxes was $2,230,000, or 16 cents per share, an increase of 35 percent compared to net income after income taxes of $1,648,000 or 11 cents per share for the same period a year ago.

The oil and gas services segment contributed $14,952,000 or 60 percent of revenue for the three months ended Dec. 31, 1989, which was a 29 percent increase from the same period a year ago. For the same period of 1988, the oil and gas segment generated revenue of $11,604,000. The boat manufacturing segment had revenue of $9,894,000 for the three months ended Dec. 31, 1989, a 45 percent deterioration from the $17,832,000 revenue for the same period a year ago.

An overall downturn in the boating industry has caused the revenue decreases at Chaparral. Production and staffing have been reduced to match the decline in demand. There are no indications that this industry condition will subside during 1990, so cost control will continue to be a high priority for this segment.

The domestic oil and gas industry has continued to stabilize. The active rig count on Dec. 31, 1989 was 1,061, an increase of 13 percent from the previous year. The increase in world oil prices, controlled OPEC production and a cold winter are other factors that have favorably impacted the oil and gas services segment revenue.

ATLANTA (JAN. 19) PR NEWSWIRE - Siemens Energy & Automation Inc. announced today that it has bought the remaining 49 percent of Siemens Analytical X-Ray Instruments Inc. from Nicolet Instrument Corp. of Madison Wis.

Siemens Analytical X-Ray Instruments was formed in July 1988 as a joint venture with Siemens Energy & Automation owning 51 percent and Nicolet controlling the remaining 49 percent. This purchase now makes Siemens Energy & Automation the sole owner of the company.

"The global market for this specialized equipment holds great potential and we hope to capitalize on this with the support of the parent company's European organization and its worldwide sales and service capabilities," said Harry S. Burker Jr., president and CEO of Siemens Energy & Automation.

Headquartered in Madison, Wis., Siemens Analytical X-Ray Instruments Inc. offers the most comprehensive, technologically advanced line of x-ray products available worldwide, including systems for x-ray powder diffraction and fluorescence instrumentation, as well as single-crystal structure applications and two-dimensional x-ray imaging.

Headquartered in Atlanta, Siemens Energy & Automation Inc. is a manufacturer of electrical and electronic equipment and systems for electric utilities, commercial and residential construction, and general industry. A member of the Siemens Group, the company's products are marketed worldwide.

HOUSTON (JAN. 19) PR NEWSWIRE - Powell Industries Inc. (NASDAQ: POWL) announced today following a regularly scheduled board meeting that Eugene L. Butler was elected to the board of directors. Butler is a director and the president and chief executive officer of Weatherford International, a Houston based oilfield service company serving the worldwide energy market. A certified public accountant, Butler previously served as chief financial officer of Weatherford.

Thomas W. Powell, chairman of the board of Powell stated: "I am extremely pleased that Gene Butler will serve on our board. He brings to us much valuable experience in international operations, energy markets in which Powell has a great deal of dependence,and hands on knowledge of corporate finance. I am confident Powell Industries will significantly benefit from his participation."

The board also elected J.F. Ahart, vice president and chief financial officer of Powell, to its board of directors. Regarding Ahart's election Powell stated: "Although Jan Ahart has been with Powell less than one year, he has amply demonstrated his competence. He has earned the full confidence of the board of directors and is also a valuable addition to the board."

Powell Industries Inc. designs, manufactures and packages electrical generation and distribution equipment.

BATTLE CREEK, MI (JAN. 19) PR NEWSWIRE - Kellogg Company (NYSE: K) announced today that its unaudited net earnings for the year ended Dec. 31 1989, without the effect of an accounting change, were $422.1 million, down 12.1 percent from the $480.4 million recorded in 1988.

Implementation on Jan. 1, 1989, of Financial Accounting Standards Board Statement No. 96, "Accounting for Income Taxes," resulted in a one-time credit of $48.1 million, thus boosting full-year earnings to $470.2 million, down 2.1 percent from 1988. Full-year earnings per share were $3.46 without the accounting change and $3.85 with the accounting change, compared to $3.90 in 1988. Net sales for 1989 were $4.65 billion, up 7.0 percent over the $4.35 billion recorded in 1988.

Fourth-quarter earnings were $57.9 million, or $.47 per share, down 42.6 percent. Fourth-quarter sales were $1.09 bil,R 9, down 0.3 percent. Fourth-quarter earnings were influenced negatively by a one- time pretax charge of approximately $10 million ($.06 per share) resulting from costs associated with staff reductions and the termination and disposition of certain operations and related assets.

Commenting on the results, Kellogg Company Chairman of the Board and Chief Executive Officer William E. LaMothe said: "Our sales volumes of ready-to-eat cereal in the United States continued below expectations during the fourth quarter. We experienced a very difficult year and are disappointed that, after 37 consecutive years of increased earnings, our record was broken. However, our disappointment is matched by our resolve to gain our historic market share in the United States and continue the excellent growth in our international markets."

#90019p0348 01/19/1990 ~PR Newswire

NEW YORK, NY (JAN. 19) PR NEWSWIRE - DPC Acquisition Corp. announced today that it is terminating its tender offer for shares of Dataproducts Corporation (AMEX: DPC). DPC Acquisition Corp. stated that it was terminating its tender offer because the current disarray in the financial markets has made it impracticable for it to obtain financing for its offer at this time. Shares tendered pursuant to the tender offer will be returned to stockholders.

In connection with the termination of its tender offer, DPC Acquisition Corp. also announced that it was terminating its consent solicitation to remove the existing members of Dataproducts' Board of Directors and replace them with a slate of its nominees.

DPC Acquisition Corp. stated that it continued to believe that the sale of Dataproducts was the best way to maximize value for the company's stockholders, and urged Dataproducts' Board of Directors to continue to pursue the sale of the company. It stated that the number of shares tendered into its offer (which, together with shares owned by its affiliates, had represented as much as approximately 44 percent of Dataproducts' shares), as well as the substantial number of shares for which executed consents to remove the board were received, represented a mandate to Dataproducts' Board of Directors to act expeditiously to maximize value for Dataproducts' stockholders. DPC Acquisition Corp. stated that it and its parent, DPC Acquisition Partners, were continuing to consider available alternatives to acquire all or a majority of Dataproducts' shares (including a negotiated acquisition, with the consent of Dataproducts' Board, of less than all Dataproducts shares at $10 per share), subject to Dataproducts' cooperation and applicable legal requirements.

DPC Acquisition Corp. urged Dataproducts to live up to it original announcement that it would pay a $3 per share dividend or to make an equivalent stock repurchase, and stated that it supported the prompt sale of Dataproducts' Woodland Hills real estate to facilitate either the prompt declaration and payment of the $2 per share dividend which the board has promised upon such sale or a stock repurchase using the net proceeds of such sale.

DPC Acquisition Corp. also urged Dataproducts' Board of Directors to continue to pursue the sale of its Dataproducts New England, Inc. subsidiary. It stated that certain of its affiliates are prepared to acquire Dataproducts New England, Inc., and are prepared to pay $26.7 million in cash and 687,000 Dataproducts shares, and that such offer is not subject to financing. The sale of Dataproducts New England, Inc. would enable Dataproducts to declare an additional dividend of $1 per share and bring the total dividend payable up to the $3 per share Dataproducts originally announced as part of its restructuring or would enable Dataproducts to repurchase a greater portion of its shares.

DES MOINES, IA (JAN. 19) PR NEWSWIRE - Oliver H. Hagen, president and chief executive officer announced the board of directors of First Interstate of Iowa Inc., a multi-bank holding company (NASDAQ: FIIA), at its quarterly meeting yesterday declared a first quarter dividend of $.05 per share to shareholders of record at the close of business on Jan. 26, 1990. The dividend will be paid on Feb. 23, 1990. The company paid dividends of $.15 per share in 1989.

First Interstate of Iowa Inc. recently reported 1989 net income of $12,658,000, or $.84 per share fully diluted, which is the highest annual earnings it has ever reported. The company's 1989 return on average equity was 18.81 percent and return on average assets was 1.12 percent. Hagen noted, "The payment of the dividend is reflective of First Interstate of Iowa's excellent financial condition and its 1989 earnings performance." He went on to report that at Dec. 31, 1989, the company had a Tier I Capital Ratio and a Total Capital Ratio (1992 Standards) of 8.47 percent and 13.92 percent, respectively, and a Primary Capital Ratio of 9.33 percent.

The market price of the common stock of First Interstate of Iowa Inc. increased as the company reported record earnings throughout 1989. The stock closed at $5.75 on Dec. 29, 1989, a 37 percent increase from $4.19 at Dec. 30, 1988.

First Interstate of Iowa Inc. owns the controlling interest in 13 Iowa banks and a computer service company. The 13 banks are located in Algona Crasco, Des Moines, Emtherville, Fort Dodge, Greenfield, Kalona, Marengo, Mason City, Sigourney, Sioux City, Spencer and Urbandale.

#90019p0360 01/19/1990 ~PR Newswire
ST. LOUIS (JAN. 19) PR NEWSWIRE - A.A. Importing Co. Inc. (NASDAQ: ANTQ) announced today that, in connection with its restructuring efforts in all of its divisions, the wholesale division has closed its warehouse/showrooms in Dallas; Dania, Fla.; and Los Angeles.

The company is evaluating whether additional warehouse/showroom closings will be necessary or desirable.

In September 1989, the company's Antique Guild subsidiary closed its three retail stores in the Phoenix area, in addition to the previous closing of three retail stores in the Los Angeles market. The company also consolidated its two warehouses, along with its Antique Guild headquarters into its largest continuing store in the Los Angeles area. The Antique Guild currently has six retail stores open in greater Los Angeles. The company has changed the nature of the operations of its retail store in Atlanta from a typical Antique Guild retail store to a discount outlet store for the purpose of conducting inventory reduction sales. The company is evaluating whether the Atlanta store will continue to conduct business under that format.

The Guild Hall division is undertaking a restructuring, which includes the narrowing of its product line. The company is selling discontinued Guild Hall furniture through the Atlanta outlet store in addition to its normal channels of distribution. The company is reviewing additional aspects of restructuring this division.

The company has negotiated an extension of the maturity date of its secured loan with its principal lender through Jan. 31, 1990, and is attempting to have the maturity date further extended in connection with its consolidation and restructuring efforts.

As previously reported, the company has not filed its annual report on Form 10-K under the Securities Exchange Act of 1934 for the fiscal year ended Jan. 29, 1989, or its quarterly reports for the current fiscal year because of the company's difficulty in preparing its consolidated financial statements and the corresponding inability of its independent auditors to issue their report on such financial statements. The company is endeavoring to obtain such an auditor's report and, upon doing so, expects to promptly prepare and file its required periodic reports. The company cannot predict, however, when the auditors' report will be obtained.

As previously reported, the preliminary results for fiscal year 1989 indicated a net loss from operations in excess of $4 million subject to the additional establishment of reserves in connection with restructuring

of the company's operations. The company hopes to determine the amount of reserves required in connection with its restructuring in the near future but has not yet completed the process of arriving at such a determination. The company continues to suffer substantial losses from operations and restructuring expenses in the current fiscal year.

FAIRFAX, VA. (JAN. 19) PR NEWSWIRE - Mohasco Corporation today reported that on Jan. 18, 1990, Cort Furniture Rental Corporation paid to Mohasco, a wholly-owned subsidiary of MHS Holdings Corporation, approximately $131.2 million in cash in prepayment of all remaining indebtedness, including interest thereon, outstanding on the promissory notes in the aggregate original principal amount of $147.5 million, issued by Cort Acquisition Corporation to Mohasco as part of the consideration for the sale of all of the outstanding capital stock of Cort Furniture to Cort Acquisition Corporation on December 31, 1988.

Cort Furniture had previously made a partial prepayment in cash to Mohasco on the notes of approximately $21.5 million on Dec. 13, 1989.

Upon receipt of the prepayment of the notes, Mohasco terminated the security agreement and the pledge agreement entered into on Dec. 31, 1988 pursuant to which the capital stock and substantially all of the other assets of Cort Furniture had been pledged to Mohasco to secure the notes.

Mohasco applied the proceeds of the prepayment to repay a portion of the indebtedness of Mohasco incurred in connection with the merger of Mohasco with MHS Merger Corporation, an indirectly wholly-owned subsidiary of MHS Holdings, which merger occurred on Sept. 22, 1989.

Mohasco is a leader in the manufacture, distribution and sale of commercial and residential interior furnishings.

EL PASO, TX (JAN. 19) PR NEWSWIRE - El Paso Electric Co. (NASDAQ: ELPA) announced today that it completed the divestiture of its non-utility operations on Jan. 17, 1990, through the sale of its subsidiaries, Franklin Land & Resources Inc. and PasoTex Corp. The subsidiaries were sold to an unrelated third party, whose managers have substantial experience in the ownership and operations of diverse business enterprises. The nominal consideration for the sale was based upon the combined values of the Franklin and PasoTex investments and was supported by a fairness opinion from the company's financial advisor, Smith Barney, Harris Upham & Co. No cash consideration resulted to the company.

The principal investments of Franklin and PasoTex include a specialty steel products manufacturer, an oil country tubular goods end finisher and marketer, a furniture manufacturer and two office buildings and a hotel in El Paso. Franklin, under the new ownership, is expected to continue its efforts to complete the pending negotiations for the sale of the hotel in the first half of 1990.

PasoTex at year end 1989 disposed of its investments in Commercial Federal Savings and Loan, Omaha, Neb. and a lamp manufacturing subsidiary. The $60 million preferred stock investment in Commercial Federal was sold to an independent third party for nominal cash, a non-recourse contingent promissory note and warrants. PasoTex' 50 percent interest in the lamp manufacturer, which had been written off in the second quarter of 1989, was surrendered by PasoTex back to the lamp manufacturer without consideration.

The company will record additional losses in the fourth quarter of 1989 of approximately $32 million, net of tax, which includes provisions related to the Franklin and PasoTex stock sale and a $15 million, net of tax, write-off of the balance of PasoTex' preferred stock investment in Commercial Federal.

The company considered a number of factors in deciding to sell Franklin and PasoTex, including the valuations of the investments of Franklin and PasoTex; the future performance prospects for and cash requirements of the investments; and financing requirements of the company's utility operations. The inability to complete PasoTex' September 1989 agreement in principle with Commercial Federal to sell the preferred stock investment back to Commercial Federal for $32 million in cash, due to the

refusal of federal regulators to approve the transaction, significantly affected planning for the cash requirements of the subsidiary operations.

David H. Wiggs Jr., chairman of the board and chief executive officer of El Paso Electric, stated that the sale of Franklin and PasoTex enabled the company to fulfill its commitment and goal to dispose of its non-utility operations and return to its core utility business. According to Wiggs, the company's non-utility operations have not been included in the company's rates, and disposition of the operations will have no effect on the company's existing or future rates.

El Paso Electric is an electric utility serving approximately 239,000 customers in El Paso and the Rio Grande Valley in Texas and New Mexico. The company has a 15.8 percent interest in each of the three 1,270 megawatt nuclear generating units at the Palo Verde Nuclear Generating Station located near Phoenix, Ariz.

DENVER (JAN. 19) PR NEWSWIRE - Cyprus Minerals Co. (NYSE: CYM) today announced it has reached an agreement with Magma Copper Co. (AMEX: MCU) for smelting and refining of up to 150,000 tons of copper concentrates annually, through June 1996, at Magma's San Manuel, Ariz. smelter. In addition, the agreement settles the dispute between Cyprus and Magma over a previous contract.

"We are pleased to resolve our differences with Magma with a fair agreement and look forward to rebuilding our relationships. This contract for smelting and refining at Magma's modern new smelter, along with our Miami smelter and our Casa Grande roasting electrowinning facilities, will provide sufficient treating capacity for all of our Arizona copper concentrate production," said F. Steven Mooney, president of Cyprus Copper Co.

Cyprus Minerals, headquartered in Englewood, Colo., is a producer of copper, molybdenum, lithium, coal, talc, barite, gold, silver, zinc, and soon iron ore. The company employs nearly 9,000 people worldwide.

LOS ANGELES (JAN. 19) PR NEWSWIRE - Union Exploration Partners Ltd. (NYSE: UXP) today declared a fourth quarter 1989 cash distribution of 38.61 cents per unit, payable Feb. 15, 1990, to unitholders of record Feb. 1, 1990.

This compares with a cash distribution of 32.66 cents per unit for the fourth quarter of 1988.

Funds available for distribution for the entire year were $1.8783 per unit versus $1.3662 per unit in 1988. The fourth quarter and full-year distributions reflect higher crude oil prices, increased natural gas sales volumes and lower amortization of debt principal.

In addition, the current year distributions include the proceeds from settlements of contract disputes with several natural gas pipeline companies.

Unocal Corporation (NYSE: UCL) and its wholly owned subsidiary, Union Oil Company of California, currently hold 233.8 million units, 95 percent of the 245.7 million units outstanding. Union Oil is the managing general partner of UXP, a limited partnership which holds substantially all of Unocal's oil and gas exploration, development and production business in the company's Texas/Southeast and Louisiana regions.

WILMINGTON, DE (JAN. 19) PR NEWSWIRE - Hercules Inc. (NYSE: HPC) today announced that it will take a pretax charge to earnings in the fourth quarter 1989 by setting up a reserve of $323 million, equal to $4.22 per share.

This charge will result in an overall loss for the full year of 1989. Final figures for the year and the fourth quarter will be released at the end of January.

The charge relates to problems associated with the Titan IV Solid Rocket Motor Upgrade (SRMU), Delta II Graphite Epoxy Motor (GEM) and SRAM II (Short-Range Attack Missile) rocket motor, all of which are programs in the company's aerospace business segment.

According to David S. Hollingsworth, Hercules chairman and chief executive officer, "Factors contributing to setting up a reserve include uncertainties caused by government budget restraints; a delay in obtaining future orders which constitutes a change in the facts and circumstances requiring modification in how these programs are reported; and technical difficulties in part associated with a fire at the Bacchus facility." The Titan IV, Delta II and SRAM programs are firm fixed-price contracts and a portion of the reserve relates to costs associated with technical difficulties which exceed a set ceiling price. The company has no other

significant firm fixed-price development contracts.

"We are optimistic about the future growth of our aerospace business as anticipated follow-on orders are received on these programs," Hollingsworth added.
